Vision & philosophy

For nearly 100 years, we have been serving the financial services sector with one core philosophy: that a clear focus on providing unparalleled service for our clients, relentless effort and execution, “boots on the ground” local expertise, and a commitment to doing the right thing rather than an easy thing would enable us to build a credible and recognized global franchise.

In 2003, the current management team reconfigured the company as a provider of financial services focused on under-served clients in niche markets. We started out with 10 people and less than \$10 million in equity. Since then, we have grown to over 3,600 employees worldwide with over \$1 billion in shareholders’ equity, and have focused on harnessing the remarkable power of compounding our shareholder capital to become a bigger and more valuable business. This approach also enables us to create our own capital runway for growth - making us less dependent on the capital markets and allowing us to be flexible and opportunistic when we do seek capital. Specifically, we have leveraged this strategy to take advantage of industry consolidation. Over the last 10 years, we have made over 20 acquisitions at attractive valuations, while also growing our capabilities organically.

In 2020, we fundamentally transformed our company’s earnings power with our acquisition of GAIN Capital Holdings, Inc. (“GAIN”), which greatly increased our penetration into the retail trading segment and created significant opportunities for cross-selling, order-flow synergies, cost efficiency and digital innovation. Our acquisition of GAIN has been validated through our strong financial results and widened global footprint, as well as our diversified product offering.

Over this time, through our steady, determined, and disciplined approach to compounding capital, our book value and market value increased at a compound annual growth rate (“CAGR”) of 28% and 29%, respectively, off the back of revenues that grew at 32% CAGR. We believe these rates make us a positive outlier in our industry.

Today, we connect our clients to more than 40 derivatives exchanges, 185 foreign exchange markets, two industry-leading retail trading platforms, most global securities markets, and numerous bilateral liquidity venues. In addition to execution of financial trades, we also provide vertically integrated post-trade settlement, clearing and custody services. This is a unique product suite outside of the bulge-bracket banks, and it enables us to serve clients with bulge-bracket needs but who have been cast aside or ignored by those institutions because of the regulatory burdens associated with serving them. Through these relationships, we help our clients pursue trading opportunities, make investments, manage market risk and improve their business performance.

Our unique ability to help clients access a broad array of financial products and markets with our combination of high-touch service and institutional-grade digital platforms is increasingly setting us apart from our peers and driving acquisition of new clients across four segments: commercial, institutional, retail and global payments.

1924

Saul Stone, a door-to-door egg wholesaler, forms Saul Stone and Company, predecessor to FCStone.

1930

Saul Stone and Company becomes one of the first clearing members of the Chicago Mercantile Exchange (CME).

1970

Saul Stone and Company becomes one of the major innovators on the CME’s International Monetary Market, bringing financial futures to the forefront of the industry.

1978

A new entity called Farmers Commodities Corporation is formed to accommodate the grain hedging brokerage services.

1981

International Assets is established as an internationally focused boutique brokerage firm.

1983

Farmers Commodities Corporation (FCC) becomes a clearing member of the Kansas City Board of Trade in 1983 and in 1985 purchases its first seat on the Chicago Board of Trade.

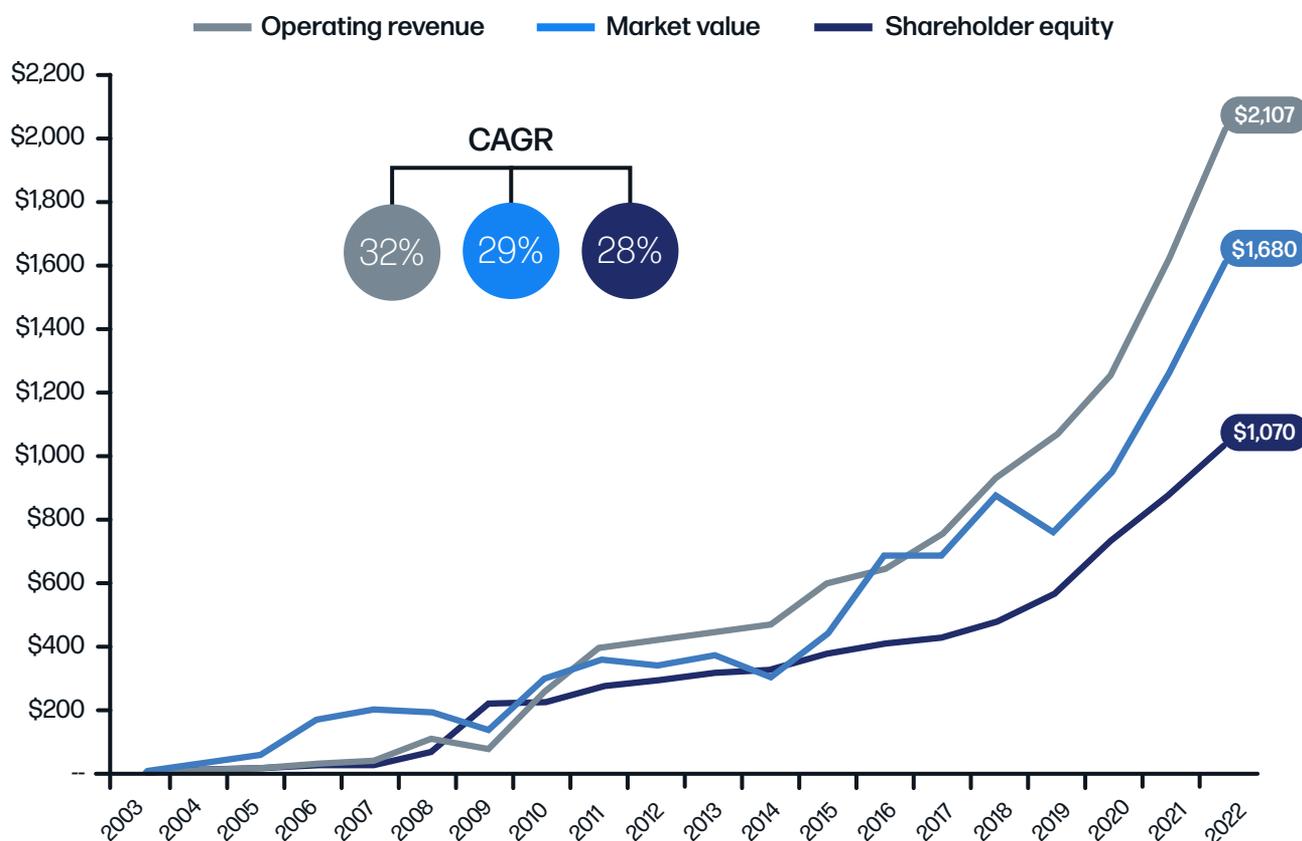

1994

International Assets is listed on NASDAQ.

Our revenue is diversified by client types, by asset class, and by geography. There is also added potential for a significant portion of recurring revenue generated from monetizing client balances in the form of interest and fee earnings on the float, depending on market interest rates.

Our business is supported by our global infrastructure of regulated operating subsidiaries, our advanced technology platforms, and our team of more than 54,000 commercial, institutional and global payments clients and over 400,000 retail accounts from nearly 80 offices spread across six continents (as of September 30, 2022).

2016

The company completes acquisition of the correspondent securities clearing business and independent wealth management business from Sterne Agee, LLC.

2016

The company agrees to acquire the London-based EMEA oils business of ICAP plc, expanding the Company's global energy capabilities.

CHAIRMAN'S LETTER

Fiscal 2022 brought a new host of challenges to the global markets ecosystem. Amidst volatility driven by rapid increases in inflation, rising interest rates and geopolitical conflict, we have persevered and achieved record results across a number of key metrics. Earnings per share ("EPS") (diluted) nearly doubled year over year from \$5.74 to \$10.01 and return on equity ("ROE") rose from 13.9% to 21.0%.

In troubled times, it is a reasonable expectation for businesses to revise their outlook downward as they face economic headwinds. Fortunately for us, this has not been the case. Through resilience, expertise, and a robust commitment to risk management – for both ourselves and our clients – we have prospered and delivered continued value to our shareholders this year.

There is no doubt that globally we have experienced unprecedented challenges. As the world attempted to transition to a "new normal" after the peak of the Covid pandemic, the conflict in Ukraine has upended countless supply chains, industries, and most importantly, the lives of millions of individuals. The surge in interest rates and rampant inflation continues to devalue local currencies and send shockwaves through the global markets ecosystem. The outlook for 2023 remains anything but certain.

As a business, this ongoing volatility and rapid rise in interest rates has both increased our clients' needs for our services and led to improved company performance. Volatility inevitably drives activity, and our strong 2022 volumes – and indeed, our growth as a business over the last 2 years – speak to this truth. Our strategic acquisition of GAIN in 2020 provided us with a major retail client base that has yielded outstanding results, with segment income increasing 70% over the prior year.

In fiscal 2022, we continued to seek out opportunistic acquisitions to further build out our suite of services. Our recent acquisition of Cotton Distributors Inc. will significantly expand our commodities trading and hedging capabilities. The transaction also increases our trading footprint in Brazil and StoneX's physical presence in continental Europe, with our first office in Switzerland. The ability to execute these acquisitions in times of extreme economic uncertainty speaks to our stability and financial strength as an industry consolidator.

Our stability and increasing volumes are the key reasons why our clients are confident in entrusting their funds with us, and why we have seen such impressive growth in clients' funds, which currently approximates \$8.6 billion. This obviously benefits us given the continuing increase in interest rates. Our relentless focus on helping our clients accomplish their business goals through our range of products and services has enabled us to build long-term relationships based on guidance, integrity, and transparency.

We are in essence the 'plumbers' of the global financial markets, supplying the liquidity and connectivity that our clients require to keep cash flowing smoothly through the complex network of interconnecting electronic 'pipes' and 'valves' of the world's financial systems. The more our clients fill these 'pipes', the more their business – and, in turn, our business – grows.

Without trust from our clients, and faith that we deeply understand how to navigate volatile conditions, we would not be capable of sustained success. A key factor here – and arguably our greatest achievement of 2022 – is our

2017

The company re-launches the former independent wealth advisory service of Sterne Agee, LLC as SA Stone Wealth Management Inc.

2018

The company bolsters its Global Payments offering by acquiring the SWIFT Service Bureau of PayCommerce.

2018

The company secures a post-Brexit footprint in the EU by acquiring Luxembourg-based Carl Klem SA.

2018

INTL FCStone expands its institutional offering with the acquisition of US-based broker-dealer GMP Securities LLC (formerly Miller Tabak Roberts).

2019

Company acquires coininvest GmbH and European Precious Metal Trading GmbH to expand its retail precious metals offering.

2019

The company acquires the futures and options brokerage business of Singapore-based UOB and becomes a fully regulated FCM in the Asia-Pacific region.

2020

INTL FCStone acquires the brokerage businesses of Tellimer Group in order to expand its capabilities in frontier and emerging markets.

persistent emphasis on risk management, both through our adherence to strict risk protocols and the constant education we offer our clients in helping them refine their strategies.

Our clients have seen volatility and risk reverberate throughout the global markets firsthand. In March, we witnessed the London Metals Exchange's biggest crisis in decades, as nickel prices doubled in a matter of hours and \$3.9 billion in transactions were abruptly cancelled. These sorts of situations are unavoidable, but our team is doing a highly effective job in navigating this unpredictable landscape and continuously validating our stability.

As a company that gains considerable tailwinds from market volatility, these conditions are ideal for our growth if we continue to effectively manage our risk. Despite our stock price recently reaching a new all-time high and our market capitalization rising to approximately \$2 billion, we believe our business remains cheaply valued with our price-to-earnings ratio being substantially under the S&P 500 average. Given that we still address only a small portion of our total addressable market, we believe there is significantly more room to grow. We continue to focus on our core company objectives of constantly building and refining our range of products, growing and diversifying our client base, digitizing our client platforms and internal systems, and compounding our capital base at our target rate of 15%+ per annum to provide a growing capital runway.

We are aware that this environment may change in 2023 and beyond and prove less favorable for the future. However, since current management took over in 2003, operating revenues have increased at a 32% CAGR; market capitalization and shareholder equity have also grown at a 29% and 28% CAGR, respectively. These impressive figures make us confident in our ability to deliver strong results to our clients and shareholders on a long-term basis.

One of our key differentiators which is critical to our success is the continued development of our technology infrastructure. Without modern, institutional-grade technology supporting our internal teams and our clients, our business cannot grow. This is a long-term goal which we have implemented over the last five years to accelerate the digitization of our business. With our risk team now utilizing enhanced real-time data across our global business, we have even greater capabilities to address market volatility. The conversion of our accounting and human resources system also significantly boosts our efficiency. We believe these technological advancements will provide operational leverage going forward, enabling us to increase our profitability as our business grows.

As we take the time to reflect over the past year, it is important to reiterate our commitment to providing best-in-class service to our clients across the globe. We are a client-centric business, and as always, our success is tied to their success. We have endured and prospered during every crisis since 2003, and I am optimistic that we will continue to do so in the future. Our business succeeds due to our unique ability to deliver our clients end-to-end service, from transaction initiation to clearing and custody, in formats ranging from advanced technology and bespoke solutions to high-touch expertise.

I would like to thank our employees for their contributions to the StoneX growth story - your vision and drive is the reason we are becoming a leading financial services franchise. I also want to thank our shareholders for your continued support and faith in our business, and to all our clients - we look forward to a successful 2023.

JOHN RADZIWILL
Chairman

2020

The company acquires EncoreFX Inc., which provides foreign-currency exchange risk management and global payment solutions to small and medium-sized businesses.

2020

The company acquires Giroxx GmbH and IFCM GmbH to strengthen its offering in Europe.

2020

The company acquires GAIN Capital Holdings, Inc., significantly expanding its retail footprint through the addition of FOREX.com and City Index.

2020

INTL FCStone rebrands itself as StoneX, as the parent company becomes StoneX Group Inc. and its customer-facing subsidiaries change their names to incorporate the new brand name.

2021

The company acquires Chasing Returns Limited, enhancing our retail offerings by utilizing financial behavioral science to analyze trends and decision-making.

2021

The company acquires a minority equity stake in diversity broker Tigress Financial Partners LLC.

2022

The company acquires Cotton Distributors Inc., which expands its cotton trading and hedging capabilities.

Integral part of the global financial infrastructure

We operate a global financial network that our clients use to trade, invest, manage risk and improve performance. We monetize activity over this network through commissions and spreads on trades, interest earned on client deposits, and fees for our expertise and market intelligence.

Diverse and resilient business model

- Global access to over 40 exchanges and 18,000 OTC products
- Global payment solutions in 185 countries and 140+ currencies
- FOREX.com and City Index, two of the largest and best-known retail trading brands in the world
- Combination of digital trading platforms and high-touch service
- Vertically integrated execution, clearing & custody

- Clients in over 180 countries served by global footprint of 3,600+ staff
- Local presence provides “boots on the ground” to serve clients in virtually every global marketplace
- Diversified across 54,000 institutional, commercial, and payments clients and 400,000+ active retail accounts
- Specific mid-market focus
- Multiple touchpoints with clients creates stickiness
- Long-term customer relationships drive recurring revenue

- Market volatility drives revenue
- Minimal exposure to directional market risk
- Significant recurring revenue from interest and fees on \$8.6 billion of client balances
- Highly flexible cost structure targeting >50% of variable costs
- Strong balance sheet with ample liquidity
- Low correlation across asset classes and markets produces stable top-line growth

- Management continuity since 2003 provides steady focus on strategy execution
- Continued focus on key metric of 15% return on equity to compound capital
- Diligent risk management to underpin growth and preserve capital growth
- Disciplined focus on strategic acquisitions to complement organic growth
- Increasing value of our network by adding new products, capabilities, markets and liquidity venues
- Expansion into new client segments and geographies
- Integration of our offerings, platforms, marketing strategy and client experience more tightly through digitization of our platforms

KEY PERFORMANCE INDICATORS

We have set out some simple but effective long-term key performance indicators to monitor our strategic progress and hold ourselves accountable to our goals. Given the constant evolution of our business, we make a point of evaluating periodically whether a given metric or target – and the rationale behind it – remains relevant to our performance and our goals. As such, we may add, adjust or discontinue certain KPIs from year to year.

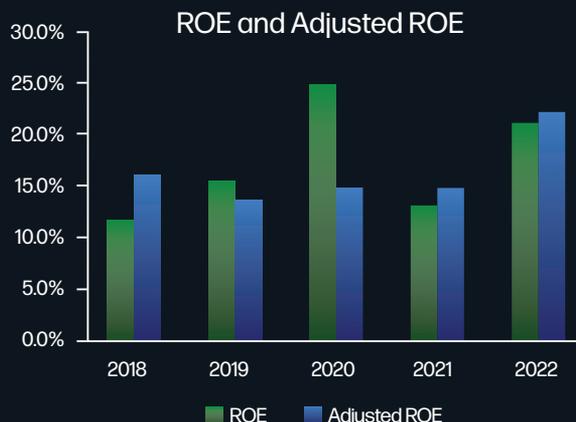

Compounding capital

Target: Annual shareholder return on equity of 15%

TARGET: MET 

Rationale:

Implies growing our net earnings by a similar amount annually as our retained earnings grow.

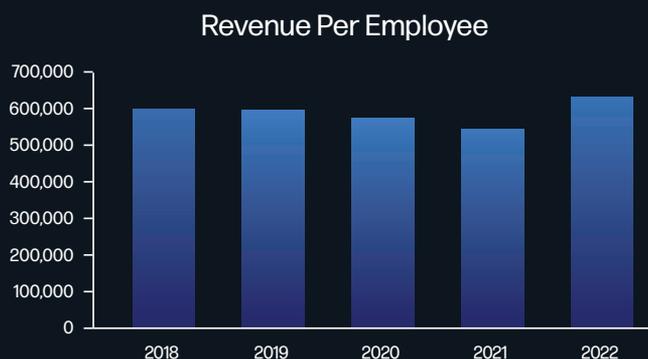

Efficiency in driving revenue growth

Target: Minimum return per employee of \$500k per annum

TARGET: MET 

Rationale:

Measures productivity and efficiency in driving revenue through use of technology, leveraging existing client relationships and expanding our products and capabilities.

Flexible cost structure

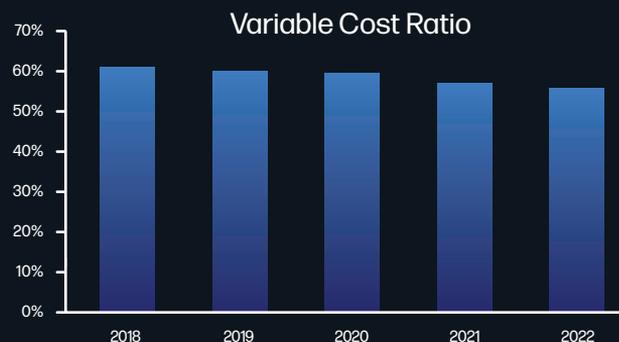

Target: >50% of our total costs variable to revenue

TARGET: MET

Rationale:

A highly flexible cost structure helps us protect our bottom line from the inherent cyclical nature of the markets. However, our ratio of fixed costs to variable costs will begin to rise in coming years as we increase the digitization and scalability of our global network.

Compensation ratio

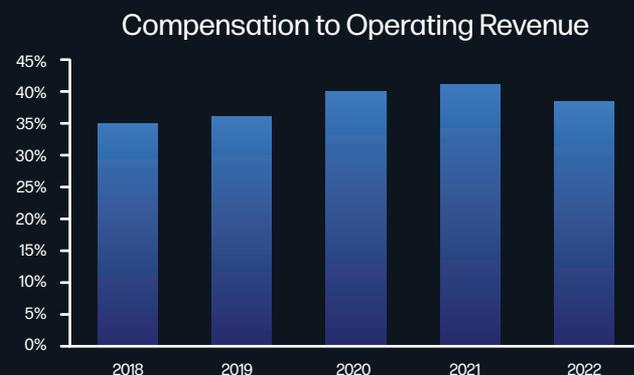

Target: Total compensation to operating revenue ratio of <40%

TARGET: MET

Rationale:

Ensures that overall compensation cost is proportional to the return shareholders require for supporting the costs, capital and risks associated with our platform.

Risk metrics – bad debt expense

Target: Bad debt <1% of annual operating income

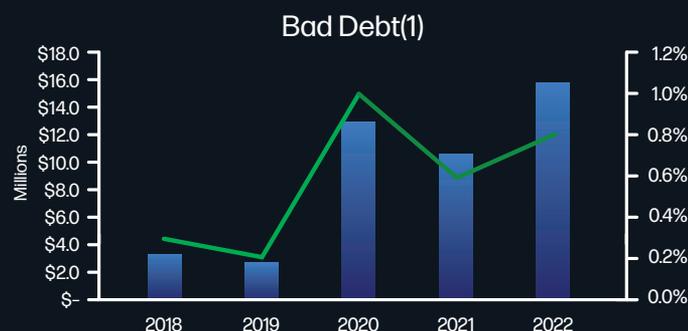

TARGET: MET

Rationale:

Calibrates our risk tolerance to avoid catastrophic losses that would impede our ability to function normally; ensures that bad debt is proportional to our annual operating revenue and earnings.

(1) In 2018, bad debt excludes bad debt on physical coal of \$1.0 million. In fiscal 2019, bad debt excludes recoveries on bad debt on physical coal of \$12.4 million.

CHIEF EXECUTIVE'S LETTER

In 2022, amid extreme market volatility, StoneX achieved record operating revenues and earnings. Our outstanding results showcase not only StoneX's strength and resilience, but also our continued growth toward becoming a premier global financial services enterprise.

Operating revenues rose to a record \$21 billion (up 26%), while net income exceeded \$207 million, up 78%. Shareholder equity eclipsed the billion-dollar benchmark for the first time, rising to \$1.07 billion.

Earnings per share (diluted) were \$10.01, and we achieved an ROE of 21% despite our equity having increased by 39% over the last two years.

Over the past 20 years, we have compounded operating revenue at 32% per annum and shareholder capital at 28% per annum. Over this same period, our market value has increased from \$1.5 million to \$1.68 billion and our share price has increased from \$0.64 to \$82.94 - a gain of approximately 130 times.¹

Our robust 2022 financial results are a direct validation of the value of our client offering and our ongoing commitment to providing global market access, institutional-grade platforms and technology, deep expertise and high-touch service.

We are continuously investing in our products and services and expanding our capabilities in areas where we can increase our market share. We have an enormous total addressable market ("TAM") in front of us, which presents a significant opportunity for us to further develop our suite of services, which we believe will further scale our business in 2023 and beyond.

Overview

Fiscal 2022 was a year of exceptional growth and progress toward our long-term strategic objectives, which include digitizing our offerings, expanding our client base and building our global financial ecosystem. We were pleased to see broad-based double-digit revenue growth across all of our products and client segments, with our business benefiting significantly from the effects of inflationary pressures on the global markets, sharp increases in short-term interest rates, and continued volatility in both financial and physical markets. As an example, three of our five busiest days in the history of our business in terms of transactional volume occurred in the second quarter of fiscal 2022, principally due to the Ukraine conflict - with the other two days occurring during the initial onset of the Covid pandemic in fiscal 2020.

Almost two years ago, in the middle of the Covid pandemic, we concluded the acquisition of GAIN, which was our largest acquisition to date. At the outset, the rationale for this strategic acquisition was that GAIN's retail clients would bring additional flow into products we already trade, allowing us to combine this new flow with our existing trade flow. We would also be able to provide clearing services and additional products that were previously inaccessible to GAIN's retail clients, especially in U.S. markets. Furthermore, we saw the opportunity for some easy cost synergies - most of which have been realized - as well as acquiring talented employees, especially on the digital marketing side of our business.

¹ Share price and market cap data for NASDAQ: SNEX ranges from 9/30/02 to 9/30/22.

Over the last two years, our transaction rationale has been validated as GAIN has exceeded the expectations we laid out. We effectively executed on all integration objectives and now see retail trading flow as a key part of our franchise.

In aggregate, our average client float for the fourth quarter of fiscal 2022 was \$8.6 billion, up 50% from a year ago. This sharp increase was due to growing engagement from existing clients, strong organic growth in our client footprint and higher margin rates caused by rising volatility. In the wake of 2022's rate hikes, we have experienced an acceleration in interest earnings on client balances, up 243% for the full fiscal year versus 2021, with the majority of this growth being recorded in the fourth quarter.

These significant increases in both product volumes and client float speak to the broadening and deepening of our client base and the validation of our strategy, as well as to the continued effort and dedication of our team in expanding the StoneX ecosystem.

| Operating Revenue by Product | Key Operating Metrics | |
|-----------------------------------|---|-----------------------------------|
| Listed Derivatives | Contracts ('000s) & Rate per Contract | |

Figures presented are annual; FY 2022 percentage changes reflect Full Year figures ending September 30, 2022 vs Full Year ending September 30, 2021

Key metrics presented do not account for all Operating Revenue generated

(1) Listed Derivatives Client Equity balance pertains to client assets in our futures and options business on which we retain a share of interest earnings

(2) Money Market Fund / FDIC Sweep balance pertains to client assets in our correspondent securities clearing business on which we retain a share of fee income

(3) Average Daily Volume ("ADV") and Rate Per Million ("RPM")

CHIEF EXECUTIVE'S LETTER

Our record financial performance was broad-based across all products and client segments. More details regarding segment performance and composition can be found on pages 26-27.

We have also seen significant strength in the dollar over the past several quarters. The majority of our earnings and variable compensation are denominated in dollars. Despite this, we have a significant amount of locally denominated fixed expenses. We believe the strong dollar reduced our 2022 expenses by approximately \$20 million when translating our non-dollar expenses to dollars for reporting purposes. We have entered into certain hedging arrangements to continue to lock in this benefit.

Our strategy in action

We believe that our impressive 2022 financial results and our 20-year track record of consistent and significant revenue growth are directly correlated with our relentless focus on becoming a best-in-class global financial services ecosystem.

We have seen an increase in the cadence and delivery of our key projects, and many of these are now through beta testing and have either been launched or are currently awaiting deployment. Our approach is always to introduce and market our new capabilities at a steady, incremental basis. None of these projects in isolation will result in a significant change to our current growth trajectory, and certain initiatives may not be viable in the long run. In aggregate, however, we believe that these initiatives will 'bend our growth curve' upwards. As many of these strategies are digital in nature, as they are deployed, we believe we will see operational leverage and scalability start to kick in and experience a steady improvement in margins.

Technology and digitization are recurring themes throughout our strategic objectives set out below. While the legacy StoneX has traditionally focused on a high-touch approach catering to large commercial and institutional clients, we have also ramped up our investment in technology significantly over the last 5 years. This has allowed us to become innovators by offering our high-touch clients better ways to engage with our ecosystem, which will in turn make them stickier and more valuable. As we accelerate towards a more digital approach, we are engaging a much broader and deeper client base with a significantly larger TAM.

In addition, technology allows us to target new client segments where our traditional high-touch approach may not be appropriate or cost-effective. As an example, the acquisition of GAIN brought us a self-directed mobile platform focused on high-net-worth retail and small professional trading clients. This will also result in a more scalable infrastructure and increased operational leverage, which should drive margins. In short, as we digitize, we are transforming ourselves into more of a fintech business.

2022 was another successful year where we made tremendous headway with each of our four strategic company objectives.

Build our ecosystem – *We must remain relevant to our clients and prospects by adding more of the products and services they want and by providing them with the best ecosystem possible for accessing the global financial markets. Doing so enables us to increase engagement and wallet share from existing clients while attracting new clients who cannot satisfy their needs elsewhere, or who are dissatisfied with how those needs are being met.*

In our securities segment, we continued to expand both our product offering as well as our geographic reach. Our securities-based revenues have grown by 33% over the last three years. On the equities side, we launched our electronic market-making capabilities to internalize and capture spread on domestic US equities while

providing best execution. We are leveraging our long-standing institutional relationships of over 20 years on the international equities side. This is a new market opportunity for us which we will ramp up incrementally over the next year or so, and one which has the potential to be a material source of revenue for the business.

On the fixed income side, we have steadily been diversifying into different asset classes to round out our offering. We have started to leverage our capabilities internationally into Europe and Asia with the addition of key professional hires to our team. We also expanded our capabilities in both regions to support trading and clearing in a broad range of securities products. We believe that we can leverage our broad-based product capabilities and trading flows to provide liquidity and execution to clients on an increasingly global basis.

We are planning to launch our cash equities capability to our international self-directed retail platform in the first quarter of 2023, allowing clients to seamlessly trade investment products as well as leveraged OTC products.

In the US, we will be launching StoneX One, which will offer a multi-asset class mobile trading platform to retail investors. StoneX One will provide our retail clients with a truly unique cross-asset platform with self-directed execution capabilities. Initially, this will include cash equities, options, and futures, and will be followed shortly by foreign exchange, cryptocurrency, fixed income and precious metals. All the trading flow will be directed to our electronic market-making platform, which will give us the opportunity, where appropriate, to internalize spreads. In the future, we can leverage our wealth management capabilities by offering robo-advisory, portfolio management, and even estate planning options for our retail clients.

“As we digitize, we are transforming ourselves into more of a fintech business.”

In Brazil, we have started work on our new Digital Pay In (“DPI”) offering, which allows international companies to collect foreign currency payments from local clients in a digitally efficient way. This has significant potential in Brazil and other jurisdictions and opens up a new and unique payments capability for our existing large corporate clients.

As we have done consistently for the last 20 years, we continue to ensure that we offer broad access to products, markets, and exchanges that our clients want to access - in essence, we open markets. We continue to innovate and offer new and enhanced OTC hedging products to our clients, and have invested in our technology stack to accomplish this faster and more effectively. We are now introducing dozens of new products every month, some of which are new and industry leading, such as cattle swaps, which we introduced into Australia in October. We have also added several new exchanges and liquidity venues. In addition to gaining incremental revenue, these new product offerings position StoneX as a leading innovator focused on adding value to our clients.

Grow/diversify client base - *We are a client-centric business and strive to grow our client footprint consistently by entering new markets, expanding market share in our existing markets, and adding new client segments and channels. Our broad range of capabilities enables us to serve clients of nearly every type, which creates a large addressable market for us and a significant opportunity for top-line growth - given that our current market penetration is likely in the single basis point range. Seizing this opportunity will enable us to increase volume and lower earnings volatility.*

CHIEF EXECUTIVE'S LETTER

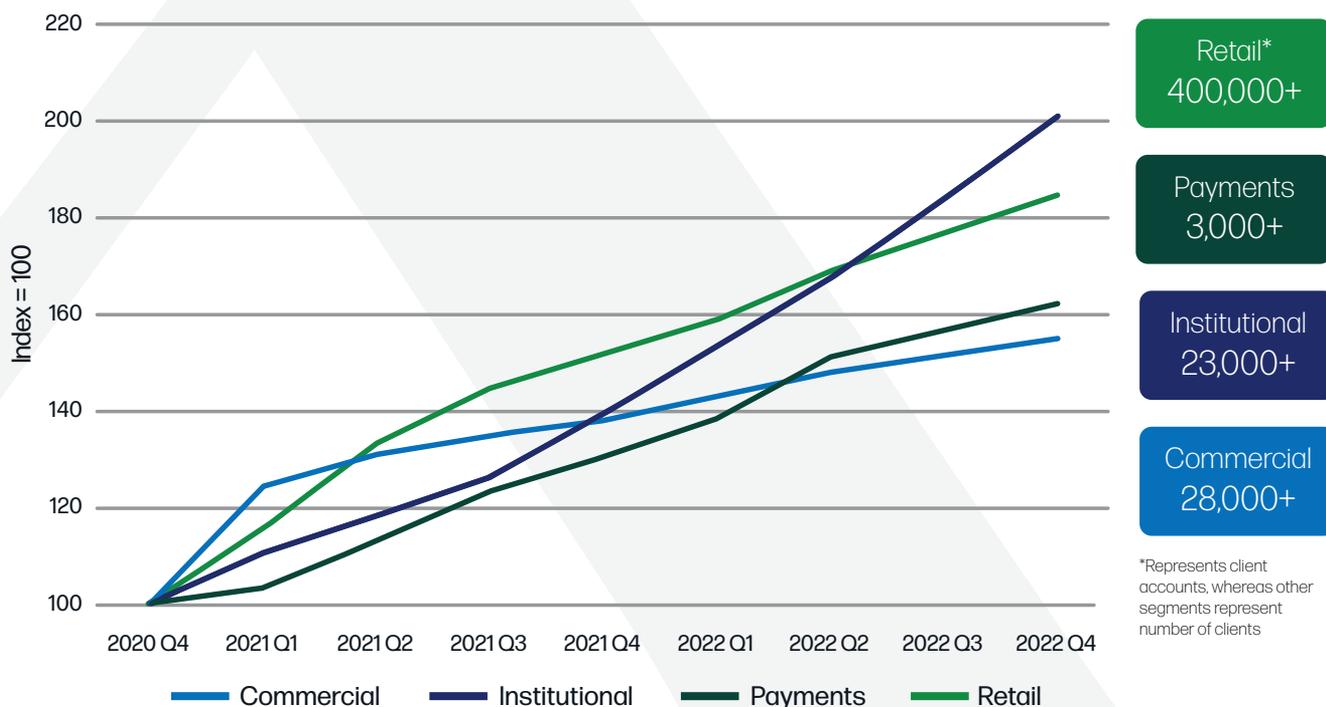

For the past two decades, our mission at StoneX has been to consistently look for new geographic markets and increase our product and service offering, in turn driving our top-line growth.

Our securities expansion has seen some early success as we seek to increase our client penetration outside the US. We are offering our products and capabilities to institutional investors in Europe and Asia, where we currently have limited market share and thus a large opportunity for client expansion. We are currently bolstering our capabilities in London to enable a more well-rounded offering.

Our multi-asset class digital trading platforms will substantially expand our retail addressable market and allow us to capture additional wallet share from existing clients. We also plan to leverage these self-directed trading platforms to reach and service smaller agricultural producers specializing in row crops, livestock, and dairy directly via the Farm Advantage mobile platform. This is a compelling opportunity for us to tap into a new and potentially large client segment.

We have launched our digital payments offering in Brazil for small and medium-sized corporations seeking international payments, which will soon be expanded to the US and Europe. As we roll out this new platform, we will add the ability to hedge currencies as well as other products. This is significant, as it will enable us to leverage our proven product capabilities for hedging clients into an entirely new client segment. Additionally, we will also be offering this payment capability to all our existing corporate clients, further cementing our relationships with them.

Customer growth by segment

Digitize our business – *We firmly believe that the digitization of client platforms – backed by highly agile and efficient infrastructure – is a key requisite for our continued growth. We believe this digitization will enable us to increase global market share in our massive TAM more efficiently while simultaneously providing scalability and margin expansion. Our keys to this approach are threefold: 1) aggregation and ease of access to data across the enterprise for strategic use, 2) open, flexible and modular architecture to enable scalability, and 3) opportunities for trade internalization across platforms that benefit our clients via better pricing and improve our bottom line via higher margins.*

We have made significant investments to develop a more efficient and scalable technology stack that enables a faster cadence in delivering digital solutions for our clients. These capabilities and platforms will be powered by our digital marketing team to drive adoption and increase incremental revenue.

We have several projects underway which will make our internal processes more efficient and scalable, allowing us to realize some operational leverage and margin expansion as we continue to grow. Most of these initiatives are underpinned by our “data lake” project. This allows us to access all data centrally and in real time from our many systems of record, where the information is stored and normalized. This dramatically reduces the end-to-end connections required by our functional areas to get a full view of client activity and generates one place to obtain all relevant information.

We continue to see this data being leveraged by several business segments to quickly deploy technology solutions and better manage our operations. Our risk management process has been enhanced and we now have real-time monitoring capabilities across the business, providing superior insight and ability to manage volatile market conditions. Our global platforms are also accessing this information, allowing us to more effectively launch client-facing applications. During 2022, we substantially completed a multi-year conversion to a new system for accounting and human resources and are now enjoying some meaningful synergies and scalability as we continue to grow. We have similar projects underway on the compliance and treasury side of our business, which we are looking forward to implementing in the near future. We have also introduced a contract management system for our legal team, a technology to better track and monitor internal audit and operational risk issues, and incremental technology improvements for compliance and KYC monitoring.

During the year we launched StoneHedge for our grain merchandising clients. This platform is deployed throughout the client’s enterprise, allowing them to price and auto-hedge grain purchases in real time from the convenience of a mobile device. This platform is integrated into the client’s enterprise system, allowing all data to be instantly accessed, driving efficiencies for the client. Our technology division recently became a member of the SWIFT Partnership Program. Membership provides StoneX clients with a direct connection to the SWIFT API platform, which provides a new level of end-to-end transparency. StoneX Global Payments will be the first business segment to deploy this new functionality, with clients having full visibility into the status of their cross-border payments throughout the entire transaction lifecycle.

We continue to deploy advanced technology across our trading businesses to efficiently price markets in a rapidly expanding product set, as well as internalize trade flow to enhance spread capture and better monetize client trading flow.

All these initiatives and projects serve to make us a more efficient, effective and scalable business.

CHIEF EXECUTIVE'S LETTER

Compound capital – *From our earliest days, we have focused on expanding our capital base by maintaining consistent profitability and reinvesting those profits back into the business so that we can create our own capital runway for growth. We strive to deploy this capital wisely through a disciplined M&A approach focused on deals that will accrete immediately to earnings, and by making allocation decisions focused on ROE. We believe this approach has been key to our ability to achieve stable and consistent growth, and we will continue to pursue it going forward.*

In fiscal 2022, we achieved an adjusted ROE of 21%, significantly above our 15% target. Additionally, over the past ten years, we have tripled our shareholder funds and completed over 20 acquisitions to strengthen our business and expand our global client footprint. This has all been achieved with a negligible increase in our issued share count, as these acquisitions were largely financed organically from retained earnings and the unbelievable power of compounding.

StoneX is committed to identifying strategic opportunities and investments that deliver growth for our business and value to our clients and investors. In November, we announced the acquisition of Cotton Distributors Inc. This purchase not only enhances the value of our commodities trading business with physical cotton trading capabilities, but also expands our footprint in Brazil and Continental Europe.

Our patient and disciplined approach to acquisitions has reaped significant benefits for our shareholders, as evidenced by our share price reaching all-time highs this year. In April, we closed the renewal of our parent-level credit facility through 2025, while also expanding the capacity under the facility to \$475 million. This expansion was possible with additional support from existing lenders, as well as several new banks joining our syndicate. With the support of this expanded group of bank partners, we look forward to continuing to increase our product offerings to our growing client base in the years to come.

ESG progress

We believe that a strong commitment to ESG practices is critical for our long-term success as a business, as it influences our approach to risk management, environmental impact, community outreach, corporate governance, and ultimately the way we serve our clients.

StoneX recently became a member of the Nodal Exchange, which offers renewable fuels and pollutants contracts to support an increasing focus on corporate sustainability and carbon neutrality. Our institutional clients can now access these environmental options and futures contracts, which span markets that include sustainable energy, carbon emissions, renewable fuels, and pollutants such as sulfur dioxide and nitrogen oxide. We are committed to helping our clients access the widest range of commodity-focused contracts to meet their environmentally focused goals.

We are pleased to note that we have worked to diversify our board to set the “tone at the top”. Our business satisfies the NASDAQ diversity standard, and we will continue to work hard to ensure StoneX is an inclusive and diverse organization. We do not see this merely as an ESG requirement but more as an essential ingredient to a high-performing organization.

We provide updates to some of the internal policies and initiatives we reported last year on page 28.

In addition to providing updates to internal policies and initiatives, we also detail some of the ways we are helping our clients achieve their ESG objectives, as well as the roles we are playing to facilitate the orderly and

effective function of those new markets that have arisen to serve their needs. These include providing clients with education and access to carbon credit markets globally; adding access to a full suite of environmental contracts to address the ESG needs of clients; and our payments platform's ongoing track record of helping hundreds of charities and NGOs ensure millions of dollars make it from their donors to people on the ground carrying out their missions.

Looking forward

As we look ahead to 2023, we will continue to relentlessly pursue our goal of becoming a leading financial services platform and an integral part of the global financial infrastructure. We anticipate heightened market volatility and rising interest rates to continue to create a tailwind for our business. However, we also recognize that the anticipated global market downturn may pose a challenge in the future. We will therefore continue to evolve and adjust our strategies based on developing economic conditions to ensure our robust growth continues.

“Above all, we remain dedicated to our client-centric culture.”

We have validated our acquisition of GAIN through our results so far, and have significantly expanded our footprint, client reach and product offering.

We have made large investments in technology over the last five years to put in place the foundations required to accelerate the digitization of our business. As we continue to implement institutional-grade platforms for our clients, we should further accelerate our growth with the scalability that technology provides to increase margins and profitability.

As clients increasingly seek global solutions, awareness of the StoneX brand and ecosystem grows across the global financial marketplace. We are incredibly optimistic about our future and our ability to drive value to both our clients and shareholders.

Above all, we remain dedicated to our client-centric culture. Our commitment to serving our growing global client footprint and providing best-in-class service is embedded into the StoneX DNA.

On behalf of the entire executive management team, I want to first and foremost thank all our clients - we are grateful for your commitment and trust in our ability to drive value to your business. I want to also thank all of my StoneX colleagues for their continued dedication to making this year another incredible success, along with our board and advisors for their guidance, our bankers for their financial support, and our shareholders for entrusting their capital to us.

SEAN M. O'CONNOR
Chief Executive Officer

CLIENT TYPES & SEGMENT PERFORMANCE

StoneX exists to deliver value to our clients – full stop. We work to build long-term relationships with them through our commitment to treating them fairly and ethically, our attention to their needs, our expertise and flexibility, our global reach, our ability to provide access to liquidity in hard-to-reach markets, and our status as a well-capitalized and regulated organization.

| Global Diversified Client Base | INSTITUTIONAL | RETAIL |
|-----------------------------------|---|---|
| Risk Profile | RISK TAKERS | |
| % of Total Revenue | 51% of Net Operating Revenue | |
| Operating Revenue | \$832mm | \$427mm |

ENVIRONMENTAL, SOCIAL & GOVERNANCE

Policy statement

StoneX recognizes that our business, and how we choose to operate it, creates impacts that reach beyond our client relationships and our bottom line to affect our physical environment, our society and the global climate. Our business philosophy strives to add value to our clients' businesses over the long term with an approach rooted in transparency, ethical conduct, and trust. In our environmental, social and governance (ESG) approach, we aim to complement the positive impacts generated by the pursuit of our business philosophy while minimizing or offsetting the potential negative impacts.

Approach to corporate & client ESG

Our approach to ESG arises organically from the corporate culture that we have cultivated since the current management team took over the Company in 2003. The hallmarks of this culture that pertain most directly to ESG include:

- Emphasis on ethical conduct, transparency and compliance with applicable regulations globally.
- Empowerment of employees through an entrepreneurial culture, featuring equal access to opportunity, merit-driven advancement and compensation, and training and support.
- Pursuit of diverse perspectives that add value throughout the organization and enhance our ability to conduct business globally.
- Commitment to governance that provides appropriate checks and balances within the executive structure.
- Pursuit of good corporate citizenship and reasonable and responsible practices that aim to mitigate the environmental impact of our operations.
- Client-focused approach to enabling the companies we do business with to pursue their own ESG objectives through our global network and offering.

Across our internal and client-focused approaches, our pursuit of ESG-related activities should be viewed within the context of our responsibility as a public company to balance the needs of our shareholders, clients, employees and other stakeholders appropriately. For these reasons, we have committed ourselves to an ongoing process of evaluating our ESG efforts and how we report our performance from year to year.

This year, we provide a summary of metrics and initiatives for 2022, as we continue to evaluate the benefits to all stakeholders of more extensive reporting – whether as part of this annual report or a separate report going forward, or on our corporate website.

ESG – client enablement & impact

StoneX is committed to helping our clients pursue their own ESG objectives through our global network, and suite of products and services. As partners in our clients' success, we are continually evaluating opportunities to add new products and services to our offering where doing so makes financial sense for both ourselves and our clients. Below are notable examples in 2022.

Playing central roles in global carbon reduction efforts. Through our global financial network, we provide our clients with access to exchange-listed carbon instruments, such as carbon credits, via our execution and clearing and custody capabilities. In doing so, we help bring liquidity to this important marketplace, which is critical to its orderly function and success.

In 2022, we successfully launched our Carbon Solutions division, providing our clients with services in a critical environmental asset class. The division offers climate advisory, carbon brokerage and trading, and financial structuring services in support of our clients' implementation of their decarbonization and climate mitigation initiatives.

Similarly, in Brazil, StoneX is a significant participant in RenovaBio, the country's signature decarbonization initiative under the Paris Agreement. We provide both trading and origination/documentation/custody services to clients in the program's CO2 credits ("CBIOS"), which are created via the manufacturing and use of biofuels. In 2022, we have helped clients originate more than 1.3 million CBIOS and trade more than 1.2 million.

In September, we added to our extensive suite of commodity-focused contracts by enabling our clients to access physically deliverable environmental futures and options contracts via the Nodal Exchange. These contracts span markets that include sustainable energy, carbon emissions, renewable fuels, and pollutants such as sulfur dioxide and nitrogen oxide. Gaining access to this new exchange allows our clients to actively participate in this space and thus further expand their environmentally focused goals. Whether that goal is to achieve carbon neutrality or build out their own ESG-focused investment products, StoneX continues to respond to the needs of our clients worldwide.

In the U.S., we are leaders in the renewable diesel and biodiesel markets. We supply makers of these fuels with the physical feedstock (fats, oils and greases) they need for production, and help participants at nearly every point in the supply chain manage their price risk and either offset or reduce the carbon footprints associated with their inputs and outputs. We have 100% origination agreements for 600 million gallons of biodiesel, renewable diesel and sustainable aviation fuel capacity. Additionally, we conduct the financial trading and hedging for 815 million gallons of capacity and opportunistically trade feedstock with over 2.5 billion gallons of capacity. In some form or fashion, we touch over 65% of the total production of biodiesel, renewable diesel and sustainable aviation fuel in the US. We also help manage the risk of and consult on over 1 billion gallons of ethanol production.

Increasing NGO impacts through payments efficiency. We have an established role in providing fast, efficient and secure global payments service to nongovernmental organizations, charities and other mission-driven groups to ensure that higher percentages of donor funds make it across international borders and into the hands of those carrying out their missions on the ground. In 2022, more than 850 NGOs from all over the world used our services to transfer over \$6 billion in funds, predominantly in local currency, to countries across the globe that needed the impact of those funds the most.

ENVIRONMENTAL, SOCIAL & GOVERNANCE

Environment

We operate from nearly 80 offices across six continents worldwide, but provide most of our services to our clients using digital communications. As such, we view our environmental footprint as arising primarily from the resources our offices consume and the waste that they produce. In most instances, we defer to the conservation, recycling and waste reduction measures put in place by the companies from whom we lease our office space, and we expect our employees to comply with those measures. We also host and/or travel to hundreds of in-person seminars, conferences and trade shows each year, and our front-office personnel frequently travel to client sites when doing so helps them better serve our clients. We recognize that all these activities produce environmental impacts, and we are continually evaluating whether common mitigation practices used by our peers would generate net value for all of our stakeholders.

An important objective of our environmental goal is to help our clients support the development of a low-carbon economy. Our new Carbon Solutions division aims to educate our clients on how the carbon credit markets work, how to estimate their carbon footprints, and how to use the carbon markets to offset their impacts or earn credits in ways that achieve their environmental objectives and align with local, regional and global initiatives.

The Carbon Solutions team is also leading the development of StoneX's own climate mitigation strategy in alignment with the group's approach to ESG. As an inaugural step, we announced at our biannual Global Strategy Summit (GSS) that 2022 will mark the beginning of our decarbonization journey, with the measurement of our corporate carbon footprint as the basis for the future development of a climate mitigation plan. As an additional step, we have offset the emissions of the 2022 GSS with the purchase and retirement of carbon credits from an urban micro-mobility project in Brazil. This is part of our continued commitment to improving the environmental performance of our operations and providing our clients with tools to improve theirs.

Social

As a business, we are client and shareholder focused, but employee driven. Our success depends in large part on our employees' ability and desire to provide exemplary service to our clients. We strive to empower them to do so through an entrepreneurial culture that rewards them for their efforts and initiative in the forms of competitive pay and benefits, opportunities to earn commissions (where applicable), merit-based bonuses and promotions, and opportunities to purchase restricted stock in the Company at reduced rates. Our employees are also full partners in our performance evaluation process and have access to numerous training and mentorship opportunities to develop their skills and advance their careers.

Executive & board diversity

As a global financial services business, we are committed to including diverse perspectives in our governance and management structures, and we are pleased with the ongoing value this approach provides to our company through the resulting diversity of talent, acumen and perspectives present on our Board of Directors and within our executive ranks. We also recognize that diversity is a relative concept, especially within a global financial services industry not known for its focus in this area, and as such, we are continually assessing what mix of perspectives will best serve the interests of all our stakeholders.

The composition of our Board of Directors complies with the board diversity requirements established under NASDAQ guidelines. Specifically, two women serve on our nine-person Board of Directors. In 2022, we were pleased to welcome to the Board Dhamu Thamodaran, who has a deep understanding of StoneX, our culture and client-first approach.

Employee diversity

StoneX Group Inc. recognizes the importance of diversity as it provides us with broader knowledge and skills to enhance performance and the service we can provide to our clients, and helps us to expand our understanding of the markets in which we operate. In addition to seeking out and including diverse perspectives and talent in our ranks, we also want to ensure that employees from diverse backgrounds feel empowered to share their experiences with employees with similar diverse backgrounds and also with other employees with different backgrounds. Our affinity group policy provides a framework for doing so that gives voice and agency to those of us with diverse backgrounds and experiences – but in ways that enlarge the perspective of all our employees and bring us closer together as a company.

In 2022, we launched the Philanthropy @StoneX Affinity Group. This employee-led, self-directed voluntary group seeks to share knowledge and raise awareness for charitable opportunities, maximize giving potential through the power of compounding kindness, bring new ideas to management that pertain to philanthropic opportunities, and share best practices and learnings consistent with StoneX's values. The affinity group has already grown to over 100 members and plans to host a variety of events in 2023, such as workshops, silent auctions, and activities to give back to local communities.

Launched in 2020, our Women of StoneX affinity group continues to help our employees become more engaged in leveraging diversity and increasing inclusion, while simultaneously providing them with new avenues for professional development. The group now has over 400 members, and as StoneX continues to grow, we expect this affinity group model to play a central role in our employee engagement strategy.

Employee safety & wellness

We believe that doing our part to maintain the health and welfare of our employees is a critical element for achieving commercial success. As such, we offer our employees heavily subsidized health benefits and offer a wellness program that focuses on employee health strategies and includes a discount to employee medical premiums for the completion of wellness initiatives. We promote a culture of hard work and achievement that also strives to provide an appropriate work-life balance for our employees. We conduct employee surveys from time to time to collect feedback and incorporate it into our planning. In addition, we offer employee assistance programs, including confidential assistance for financial, mental and physical well-being.

Supply chain human rights

The history of commodity production and extraction is rife with human rights abuses, and there remain parts of the world where such practices persist today. As buyers and sellers of select physical commodities, including precious metals, we recognize the significant adverse impacts which may be associated with extracting, trading, handling and exporting commodities from conflict-affected and high-risk areas. Specifically, we are committed to ensuring that there is no modern slavery or human trafficking in our supply chain, and that our business activities do not help finance conflict in regions destabilized by war and abuse of human rights. Our Responsible Sourcing Policy and our Modern Slavery Policy are available at ir.stonex.com.

Community giving

As part of our promotion of a healthy work-life balance among our employees, we recognize that 'life' takes place not only at home, but also in our broader communities. We also understand that employees feel more connected to both their communities and StoneX when we can help empower them to impact their communities in positive ways through volunteer efforts and charitable giving. For years, our employees have banded together with like-minded officemates and drawn on our resources and support to hold fundraisers, participate in fitness challenges, and host charity outings and dinners.

ENVIRONMENTAL, SOCIAL & GOVERNANCE

In 2022, we launched Collective Giving, our new corporate charitable giving platform, to provide a more structured and supported means for employees at StoneX to make a difference in our communities. The platform empowers our employees to choose which causes they want to support and provides for financial support from StoneX in the form of 'matching' funds - up to \$10,000 per employee, with a company maximum of \$750,000 annually.

Anti-poverty efforts

Over the course of 2022, our Brazilian colleagues continued their long tradition of donating time and resources to helping improve the lives and ease the suffering of some of the country's most impoverished and vulnerable populations.

In the past years, these initiatives have included sponsoring the AACD (Associação de Assistência a Criança Deficiente), a non-profit organization focused on orthopedics and rehabilitation for disabled individuals, and the IMAGINA Project, which offers meals, clothing, and other basic necessities for the homeless in one of São Paulo's most drug-infested neighborhoods. Another initiative provides funding for dormitories to house recovering individuals with drug addiction and provide them with medical assistance and counseling. Lastly, we currently sponsor a project (CEU Jaguaré) in one of São Paulo's 'favelas' - which are low-income neighborhoods with limited resources - to improve the lives of at-risk youth through sports education, such as funding a swimming and water polo school. We plan to continue to fund these programs during 2023.

Governance

Corporate governance statement

The Company is committed to high standards of corporate governance and has put in place a framework that fosters good governance, is practical for a company of our size and satisfies our current listing and regulatory requirements. The Company has instituted a Code of Ethics that demands honest and ethical conduct from all employees. Specific topics covered are conflicts of interest, fair dealing, compliance with regulations, accurate financial reporting, and diversity and inclusion.

Board of directors

The Company has a Board of Directors consisting of one executive and eight independent directors. The Chairman is a non-executive director. The Board oversees the strategy, finances, operations and regulatory compliance of the Company through regular quarterly meetings and additional special meetings when required. The non-executive directors regularly meet independently of the executive director. The Nominating & Governance, Audit, Compensation, Risk, and Technology and Operations Committees are each composed of at least three independent directors. The Audit Committee meets the SEC requirement that at least one of its members should be a financial expert.

Board independence

We are committed to maintaining the independence of our board as it relates to applicable rules and industry best practices because we believe doing so serves the best interests of our shareholders. No Director is considered independent if he or she is an executive officer or employee of the Company or has a relationship which, in the opinion of the Company's Board of Directors, would interfere with the exercise of independent judgment in carrying out the responsibilities of a Director. In its annual review based on this criteria (in line with Rule 5600 of the NASDAQ Stock Exchange), the Nominating & Governance Committee of the Board determined that each of our directors qualifies as independent, with the exception of Sean O'Connor, the Company's CEO.

Executive structure

The roles of Chairman and CEO are split in accordance with widely recognized best practices with regard to maintaining board independence. John Radziwill serves as the Company's Chairman. The CEO and CFO make all necessary representations to satisfy regulatory and listing requirements. Executive compensation is determined by a Compensation Committee composed exclusively of independent directors.

Executive pay tied to performance

The pay for the members of our executive committee is closely tied to the financial performance of the Company. Specifically, the annual cash bonus for each executive is based entirely on the Company's return on equity, a metric that is considered to be closely linked to stock price appreciation. A substantial portion of the annual cash bonus – generally 30% – is paid in the form of restricted company stock, which is purchased at a discount but vests over a three-year period. In addition, executives receive long-term cash awards, which generally vest five years following grant, and their growth in value is also tied to the Company's return on equity. Executive compensation figures for 2022 can be found in our latest proxy statement.

Financial interest requirements for directors and CEO

We require directors and our CEO to own a substantial equity stake in company stock. This requirement has been based on a meaningful percentage of the director's or CEO's most recent year's cash compensation and we now require our directors and CEO to own an amount of company stock equal in value to three times their annual cash compensation, subject to a phase-in period for new directors.

Financial reporting and internal control

The Company strives to present clear, accurate and timely financial statements. Management has a system of internal controls in place, regularly assesses the effectiveness of these controls and modifies them as necessary. Risk management is an important aspect of this system of internal controls, and the Risk Committee monitors compliance with risk policies.

Investor relations

The Company seeks to provide accurate and timely information to stockholders and other stakeholders to facilitate a better understanding of the Company and its activities. The Company seeks to distribute such information as widely as possible through filings on Form 8-K, press releases and postings on its website, www.stonex.com.

Forward-looking statements

This Annual Report contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve known and unknown risks and uncertainties, including the risks and uncertainties described in the Company's Annual Report on Form 10-K and other filings with the Securities and Exchange Commission, many of which are beyond the Company's control. These risks and uncertainties include adverse changes in economic, political and market conditions, losses from the Company's activities arising from customer or counterparty failures, changes in market conditions, the possible loss of key personnel, the impact of increasing competition, the impact of changes in government regulation, the possibility of liabilities arising from violations of laws or regulations and the impact of changes in technology on our businesses. Although the Company believes that its forward-looking statements are based upon reasonable assumptions regarding its businesses and future market conditions, there can be no assurances that the Company's actual results will not differ materially from any results expressed or implied by the Company's forward-looking statements. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Readers are cautioned that any forward-looking statements are not guarantees of future performance.

Canton MA 02021

The table below presents net income as reported in accordance with Generally Accepted Accounting Principles (“GAAP”). The table below also presents a reconciliation to adjusted net income and adjusted ROE, which are non-GAAP measures.

The “adjusted” non-GAAP amounts reflect each item after removing the impact of the bad debt (recovery) on physical coal for the years ended September 30, 2018 and 2019, the impact of Tax Reform for the year ended September 30, 2018, and the impact of the gains on acquisitions and related transaction costs and other expenses for the years ended September 30, 2022, 2021 and 2020. Management believes that presenting our results excluding the bad debt (recovery) on physical coal, Tax Reform, and the gains on acquisitions and related transaction costs and other expenses is meaningful, as it increases the comparability of period-to-period results.

| (in millions) | For the Year Ended | | | | |
|--|--------------------|--------------------|--------------------|--------------------|--------------------|
| | September 30, 2018 | September 30, 2019 | September 30, 2020 | September 30, 2021 | September 30, 2022 |
| Reconciliation of net income to adjusted non-GAAP amounts: | | | | | |
| Net income, as reported (GAAP) | \$ 55.5 | \$ 85.1 | \$ 169.6 | \$ 116.3 | \$ 207.1 |
| Bad debt (recovery) on physical coal, net of tax | 1.0 | (11.2) | - | - | - |
| Impact of Tax Reform | 19.8 | - | - | - | - |
| Gains on acquisitions, net of tax | - | - | (81.9) | (3.3) | - |
| Acquisition related transaction costs and other expenses, net of tax | - | - | 12.0 | 11.3 | 7.9 |
| Adjusted net income (non-GAAP) | <u>\$ 76.3</u> | <u>\$ 73.9</u> | <u>\$ 99.7</u> | <u>\$ 124.3</u> | <u>\$ 215.0</u> |
| Stockholders' Equity, beginning of fiscal year | \$ 449.9 | \$ 505.3 | \$ 594.2 | \$ 767.5 | \$ 904.0 |
| Stockholders' Equity, end of fiscal year | \$ 505.3 | \$ 594.2 | \$ 767.5 | \$ 904.0 | \$ 1,070.1 |
| Average of Stockholders' Equity | \$ 477.6 | \$ 549.8 | \$ 680.9 | \$ 835.8 | \$ 987.1 |
| Adjusted ROE | 16.0% | 13.4% | 14.6% | 14.9% | 21.8% |

Cautionary Statement about Forward-Looking Statements

Certain statements in this report, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results, and the assumptions upon which those statements are based, are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are based on current expectations and assumptions that are subject to risks and

uncertainties which may cause actual results to differ materially from the forward-looking statements. A detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements is included in the section entitled “Risk Factors” (refer to Part I, Item 1A). We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

ITEM 1 Business

Overview of Business and Strategy

We operate a global financial services network that connects companies, organizations, traders and investors to the global market ecosystem through a unique blend of digital platforms, end-to-end clearing and execution services, high touch service and deep expertise. We strive to be the one trusted partner to our clients, providing our network, product and services to allow them to pursue trading opportunities, manage their market risks, make investments and improve their business performance. Our businesses are supported by our global infrastructure of regulated operating subsidiaries, our advanced technology platforms and our team of more than 3,600 employees as of September 30, 2022. We believe our client-first approach differentiates us from large banking institutions, engenders trust and has enabled us to establish market leading positions in a number of complex fields in financial markets around the world.

We offer a vertically integrated product suite, beginning with high-touch and electronic access to nearly all major financial markets worldwide, as well as numerous liquidity venues. We deliver this access through the entire lifecycle of a trade, from deep market expertise and on-the-ground intelligence, to best execution and finally post-trade clearing, custody and settlement services. We believe this is a unique product offering outside of the bulge bracket banks, which creates long-term relationships with our clients. Our business model has created a revenue stream that is diversified by asset class, client type and geography, earning commissions and spreads as clients execute transactions across our global network, monetizing non-trading client activity including interest and fee earnings on client balances as well as earning consulting and fees for our market intelligence and risk management services.

We currently serve more than 54,000 commercial, institutional, and global payments clients, and over 400,000 retail accounts located in more than 180 countries. We believe we are the third largest independent, non-bank futures commission merchant (“FCM”) in the United States (“U.S.”) as measured by our \$6.2 billion in required client segregated assets at our U.S. FCM as of September 30, 2022, and making markets in more than 16,000 equities on the NYSE, NASDAQ, and various OTC markets, including exchange-traded-funds (“ETFs”) and over 7,000 ADRs, GDRs and foreign securities making us one of the leading market makers in foreign securities. We are one of only eight Category One ring dealing members of the London Metals Exchange (the “LME”). Our clients include commercial

entities, regional, national and introducing broker-dealers, asset managers, insurance companies, brokers, institutional and individual investors, professional traders, commercial and investment banks as well as government and non-governmental organizations (“NGOs”). We believe our clients value us for our attention to their needs, our expertise and flexibility, our global reach, our ability to provide access to liquidity in hard-to-reach markets and opportunities, and our status as a well-capitalized and regulatory-compliant organization.

We engage in direct sales efforts to seek new clients, with a strategy of extending our services to potential clients that are similar in size and operations to our existing client base. In executing this strategy, we intend to both target new geographic locations and expand the services offered in geographic locations in which we currently operate in an effort to increase our market share or where there is an unmet demand for our services. Through our web and mobile sites, including StoneX.com, StoneXOne.com, FOREX.com, and Cityindex.com we seek to attract and onboard new clients generated from digital marketing and brand advertising initiatives. We also pursue new clients through indirect channels, including our StoneX Marketing Partners affiliate program, StoneX.com/marketing partnerships; our relationships with introducing brokers, who solicit clients on our behalf; and white label partners, who offer our services to their clients under their own brand. In addition, we selectively pursue small- to medium-sized acquisitions, focusing primarily on targets that satisfy specified criteria, including client-centric organizations that may help us expand into new asset classes, client segments and geographies where we currently have a small or limited market presence.

We believe we are well positioned to capitalize on key trends impacting the financial services sector. Among others, these trends include the impact of increased regulation on banking institutions and other financial services providers; increased consolidation, especially of smaller sub-scale financial services providers and independent securities clearing firms; the growing importance and complexity of conducting secure cross-border transactions; and the demand among financial institutions to transact with well-capitalized counterparties.

We focus on mitigating exposure to market risk, ensuring adequate liquidity to maintain our daily operations and making non-interest expenses variable, to the greatest extent possible. Our strategy is to utilize a centralized and disciplined process for capital allocation, risk

management and cost control, while delegating the execution of strategic objectives and day-to-day management to experienced individuals. This requires high quality managers, a clear communication of performance objectives and strong financial and compliance controls. We believe

this strategy will enable us to build a more scalable and significantly larger organization that embraces an entrepreneurial approach to business, supported and underpinned by strong centralized financial and compliance controls.

Available Information

Our internet address is www.stonex.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, statements of changes in beneficial ownership and press releases are available free of charge in the Investor Relations section of this website. Our website also includes information regarding our corporate governance, including our Code of Ethics, which governs our directors, officers and employees. The content of our website is not incorporated by reference into this report or any other filings with the Securities and Exchange Commission (“SEC”).

Capabilities

We connect our clients to global financial and physical markets and liquidity sources to enable them with efficient access to a broad array of financial and physical products through a combination of high-touch service and digital platforms in pursuit of their business objectives. Our financial network connects our clients to over 40 derivatives exchanges, 185 foreign exchange markets, most global securities exchanges and over 18,000 over-the-counter markets.

Execution

We provide trade execution services to our clients via both high-touch service and electronically through a wide variety of technology platforms that connects them to markets across the globe. Asset and product types include listed futures and options on futures, equities, mutual funds, ETFs, equity options, foreign currencies, corporate, government and municipal bonds and unit investment trusts.

Clearing

We provide competitive and efficient clearing on all major futures exchanges globally. In addition, we act as an independent full-service provider of clearing, custody, research and security-based lending products in the global securities markets. We provide multi-asset prime brokerage, outsourced trading and custody, as well as self-clearing and introduced clearing services for hedge funds, mutual funds and family offices. We provide prime brokerage services in major foreign currency pairs and swap transactions to institutional clients. Additionally, we provide clearing of foreign exchange transactions, in addition to clearing of a wide range of over-the-counter (“OTC”) products.

OTC / Market-Making

We offer clients access to the OTC markets for a broad range of traded commodities, global securities, foreign currencies, contracts for difference (“CFD”) and interest rate products. For clients with commodity price and financial risk, our customized and tailored OTC structures help mitigate those risks by integrating the processes of product design, execution of the underlying components of the structured risk product, transaction reporting and valuation.

We provide market-making and execution in a variety of financial products including commodity derivatives, unlisted American Depository Receipts (“ADRs”) and Global Depository Receipts (“GDRs”), foreign ordinary shares, and foreign currencies. In addition, we are an institutional dealer in fixed income securities including U.S. Treasury, U.S. government agency, agency mortgage-backed, asset-backed, corporate, emerging market, convertible and high-yield securities.

Global Payments

We have built a scalable platform to provide end-to-end global payment solutions to banks and commercial businesses, as well as charities, NGOs and government organizations. We offer payments services in more than 140 currencies. In this business, we primarily act as a principal in buying and selling foreign currencies on a spot basis deriving revenue from the difference between the purchase and sale prices. Through our comprehensive platform and our commitment to client service, we provide simple and fast execution, delivering funds in any of these countries quickly through our global network of approximately 375 correspondent banking relationships.

Advisory Services

We provide value-added advisory services and high-touch trade execution across a variety of financial markets, including commodities, foreign currencies, interest rates, institutional asset management and independent wealth management. For commercial clients with exposure to commodities, foreign currencies and interest rates, we work through our proprietary Integrated Risk Management Program (“IRMP[®]”) to systematically identify and quantify their risks and then develop strategic plans to effectively manage these risks with a view to protecting their margins and ultimately improving their bottom lines.

We also participate in the underwriting and trading of agency mortgage-backed, commercial mortgage-backed, asset-backed and municipal securities as well as structured credit in domestic and international markets. Through our asset management activities, we leverage our specialist expertise in niche markets to provide institutional investors with tailored investment products. Through our independent wealth management business, we provide advisory services to the growing retail investor market.

Market Intelligence

Our Market Intelligence platform provides our clients with access to deep data and incisive commentary from our expert traders and analysts from across our global network. This platform focuses on providing local, actionable insights and detailed intelligence from every market we trade, through the lens of our professionals, who leverage first-hand knowledge and personal connections to deliver a unique advantage for our clients.

Operating Segments

Our business activities are managed as operating segments and organized into reportable segments as follows:

Commercial

We offer our commercial clients a comprehensive array of products and services, including risk management and hedging services, execution and clearing of exchange-traded and OTC products, voice brokerage, market intelligence and physical trading as well as commodity financing and logistics services. We believe our ability to provide these high-value-added products and services, differentiates us from our competitors and maximizes the opportunity to retain our clients.

Our risk management consulting services are designed to quantify and monitor commercial entities' exposure to commodity and financial risk. Upon assessing this exposure, we develop a plan to control and hedge these risks with post-trade reporting against specific client objectives. Our clients are assisted in the execution of their hedging strategies through a wide range of products from listed exchange-traded futures and options, to basic OTC instruments that offer greater flexibility, to structured OTC products designed for customized solutions and physical contracts.

Our execution and clearing services span virtually all traded commodity markets, with the largest concentrations in agricultural and energy commodities (consisting primarily of grains, energy and renewable fuels, coffee, sugar, cotton, and food service), as well as precious and base metals products. We also provide execution of foreign currency forwards and options and interest rate swaps as well as a wide range of structured product solutions to our commercial clients who are seeking cost-effective hedging strategies. Generally, our clients direct their own trading activity, and our risk management consultants do not have discretionary authority to transact trades on behalf of our clients.

We provide a full range of physical trading capabilities in precious metals markets providing our clients the ability to purchase physical gold and other precious metals, in multiple forms, and in denominations of their choice. In our precious metals trading activities, we act as a principal, committing our own capital to buy and sell precious metals on a spot and forward basis.

In addition, we act as a principal to facilitate financing, structured pricing and logistics services to clients across the commodity complex, including energy commodities, grains, oil seeds, cotton, coffee, cocoa, edible oils and feed products. We provide financing to commercial commodity-related companies against physical inventories.

Physical Trading

We act as a principal to support the needs of our clients in a variety of physical commodities, primarily precious metals, as well as across the commodity complex, including energy commodities, grains, oil seeds, cotton, coffee, cocoa, edible oils and feed products. Through these activities, we have the ability to offer a simplified risk management approach to our commercial clients by embedding more complex hedging structures as part of each physical contract to provide clients with enhanced price risk mitigation. We also offer clients efficient off-take or supply services, as well as logistics management.

We generally mitigate the price risk associated with commodities held in inventory through the use of derivatives. We do not elect hedge accounting under accounting principles generally accepted in the United States of America ("U.S. GAAP") in accounting for this price risk mitigation.

Within this segment we organize our marketing efforts into client industry product lines including agricultural, energy and renewable fuels, metals and various other commodities, servicing commercial producers, end users and intermediaries around the world.

Competitive Environment - Commercial Segment

The Commercial industry comprises the activities associated with the identification, management, hedging and monitoring of various commodity and financial risks faced by commercial entities in their business cycles, including risks related to interest rates, foreign exchange, agricultural commodities, energy and renewable fuels, industrial metals, precious metals, and other physical commodities.

Industry participants include producers/end-users, wholesalers and merchants, corporations, introducing brokers, grain elevators, merchandisers, importer/exporter and market intermediaries such as FCMs and swaps dealers, and liquidity venues such as commodity exchanges, financial exchanges and OTC markets. Commercial entities face a variety of risks, including risks related to commodity input pricing, supply chain management and inventory financing, interest rate changes, exchange rate changes, and price and quantity volatility in their outputs. Market intermediaries facilitate the identification, management and hedging of commodity and financial risks on behalf of commercial entities by designing and executing hedging programs through the use of various hedging instruments, including futures and options traded on exchanges or plain vanilla and more complex structured products traded bi-laterally on the OTC markets. Commercial entities occasionally prefer to manage exposure to physical commodities through direct purchase and sale agreements for which they may utilize the services of physical commodity merchants.

The need for, and volume of, client hedging activity is driven by commodity supply and demand dynamics, quantity and quality of commodity production and consumption, both locally and globally, trading of various commodities, and economic and geopolitical

factors. In addition, the price levels and price volatility of various commodities generally increase the need of commercial clients to hedge. FCMs, swaps dealers, physical commodity merchants and other intermediaries and service providers create value for commercial clients by managing risks across the clients' operations, allowing them to focus on their core expertise. In addition, commercial clients often face financial risks such as interest rate and exchange rate volatility, which these intermediaries help to mitigate. Physical commodity merchants serve clients by providing trading, hedging, inventory financing and logistics services.

Competitors in the Commercial segment include independent (non-bank) FCMs, FCMs affiliated with large commodity producers, global banks and independent and bank-owned swaps dealers. Although global banks represent the vast majority of client segregated assets, they tend to focus on larger clients. Independent, non-bank FCMs tend to focus on serving small- to mid-sized commercial clients where they face less competition from the global banks. Over the last 13 years since the financial crisis, the global banks have increased the minimum size of clients they are willing to serve, in part due to decreasing profit margins often driven by regulation, such as the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") in the United States and the revised Markets in Financial Instruments Directive ("MiFID II") and accompanying regulation, Markets in Financial Instruments Regulation ("MiFIR") in Europe. This has presented an opportunity for non-bank participants in this industry, such as us, to acquire small and mid-sized clients and take market share.

We strive to increase market share and attract new clients that are underserved by the global banks, capitalizing on our position as one of few publicly listed mid-sized financial services companies offering our clients access to global futures and options products through our well-capitalized independent FCM, structured OTC products through our swaps dealer as well as our physical commodity offerings. We have also taken advantage of opportunities to consolidate sub-scale competitors into our Commercial businesses.

Institutional

We provide institutional clients with a complete suite of equity trading services to help them find liquidity with best execution, consistent liquidity across a robust array of fixed income products, competitive and efficient clearing and execution in all major futures and securities exchanges globally, as well as prime brokerage in equities and major foreign currency pairs and swap transactions. In addition, we originate, structure and place debt instruments in the domestic and international capital markets. These instruments include agency mortgage-backed, commercial mortgage-backed, asset-backed and municipal securities, as well as structured credit.

Securities

We provide value-added solutions that facilitate cross-border trading in equity securities and believe our clients value our ability to manage complex transactions, including foreign exchange, utilizing our local understanding of market convention, liquidity and settlement protocols around the world. Our clients include U.S.-based regional and national broker-dealers and institutions investing or executing client transactions in international markets and foreign institutions seeking

access to the U.S. securities markets. We make markets in more than 16,000 equities on the NYSE, NASDAQ, and various OTC markets, including ETFs and over 7,000 ADRs, GDRs and foreign securities making us one of the leading market makers in foreign securities. In addition, we will make prices in more than 10,000 foreign equities listed on foreign exchanges. We are also a broker-dealer in Argentina, Brazil and in the United Kingdom ("U.K."), where we are active in providing institutional executions in the local capital markets.

We act as an institutional dealer in fixed income securities, including U.S. Treasury, U.S. government agency, agency mortgage-backed and asset-backed securities, as well as investment grade, high yield, convertible and emerging market debt to a client base including asset managers, commercial bank trust and investment departments, broker-dealers and insurance companies.

We are an independent full-service provider to introducing broker-dealers ("IBD's") of clearing, custody, research, syndicated and security-based lending products and services, including a proprietary technology platform which offers efficient connectivity to ensure a positive client experience through the clearing and settlement process. We believe we are one of the leading mid-market clearers in the securities industry, with approximately 95 correspondent clearing relationships with over \$20 billion in assets under management or administration as of September 30, 2022.

We operate an asset management business in which we earn fees, commissions and other revenues for management of third party assets and investment gains or losses on our investments in funds and proprietary accounts managed either by our investment managers or by independent investment managers.

Listed Derivatives

We provide competitive and efficient clearing and execution in all major futures exchanges globally. Through our platforms, client orders are accepted and directed to the appropriate exchange for execution. We then facilitate the clearing of clients' transactions. Clearing involves the matching of clients' trades with the exchange, the collection and management of client margin deposits to support the transactions, and the accounting and reporting of the transactions to clients.

As of September 30, 2022, our U.S. FCM held \$6.2 billion in required client segregated assets, which we believe makes us the third largest independent, non-bank FCM in the U.S., as measured by required client segregated assets. We seek to leverage our capabilities and capacity in clearing to financial institutions, institutional trading firms, professional traders and introducing brokers as well as offering facilities management or outsourcing solutions to other FCM's. Through our London-based Europe, Middle East and Africa ("EMEA") oil voice brokerage business, we provide brokerage services across the fuel, crude and middle distillates markets to clients throughout EMEA.

Foreign Exchange

We provide prime brokerage foreign exchange ("FX") services to financial institutions and professional traders. We provide our clients with the full range of OTC products, including 24-hour a day execution of spot, forwards and options, as well as non-deliverable forwards in both liquid and exotic currencies.

PART I

ITEM 1 Business

Competitive Environment - Institutional Segment

The industry in which we provide services within our Institutional segment comprises activities associated with the trading of, and investment in, various financial assets, including equity and debt securities, commodities, foreign currencies, interest rates, and derivatives, both exchange-traded and OTC. This industry also includes various services provided to participants in the financial markets, which allow participants access to liquidity and execution venues, as well as clearing and settlement of transactions. Industry participants include institutional and retail investors, banks, insurance companies, fund managers, hedge funds, investment advisers, proprietary trading firms, commodity trading advisors and commodity pool operators, and foreign institutions and investors seeking access to U.S. markets, as well as various market intermediaries such as market makers, regional and national broker-dealers, independent broker-dealers, FCMs, and investment banks and liquidity venues, such as securities and derivatives exchanges and OTC marketplaces.

Trading and investing activity across asset classes is driven by growth in wealth and savings, investors' asset allocation and diversification needs, including across geographies, and return objectives, risk management needs and the availability of speculative arbitrage opportunities. Volatility in asset prices generally drives increased trading activity and increased demand for execution and clearing services.

Broker-dealers, FCMs, investment banks and other intermediaries create value for institutional clients by facilitating client access to various financial markets, including securities and derivatives exchanges, proprietary sources of liquidity, OTC markets, other institutions and international markets. Market intermediaries can act as market-makers or principal traders that facilitate client trading activity by matching orders internally. Market intermediaries can also act as agents that accept orders, direct them to the appropriate market and facilitate the clearing of client transactions, which involves matching client trades with the exchange, collecting and managing client margin deposits to support the transactions, and accounting and reporting these transactions to clients.

Certain market intermediaries, predominantly investment banks, also provide advisory services, securities underwriting, loan syndications, security-based lending products and services, custodial services, investment research products, asset management services and technology platforms for client connectivity.

Competitors in the securities and clearing and execution segments include global banks, institutional broker-dealers, correspondent clearers, independent broker-dealers, clearing FCMs and market-makers. We compete to secure clients based on quality of execution and client service, global access and local market expertise, and the breadth of our product offerings.

Regulatory burdens for FCMs and broker-dealers have increased since the financial crisis, which has led to increased complexity and capital requirements that have disproportionately affected smaller firms, driving consolidation. We have benefited from these trends and expect them to continue, and we seek opportunities to participate in further industry consolidation.

Retail

We provide our retail clients around the world access to over 18,000 global financial markets, including spot foreign exchange and CFDs, which are investment products with returns linked to the performance of underlying assets, and both financial trading and physical investment in precious metals. In addition, our independent wealth management business offers a comprehensive product suite to retail investors in the United States.

Retail Forex and CFDs

We are a provider of trading services and solutions in the global financial markets, including spot foreign exchange ("forex") and CFDs. We offer CFDs on currencies, commodities, indices, individual equities, cryptocurrencies, bonds, options and interest rate products.

We seek to attract and support our clients through direct and indirect channels. Our primary direct channels for our retail forex and CFD business are our mobile platforms and Internet websites, FOREX.com and Cityindex.com, which are available in multiple languages, including English, Chinese, Japanese, Spanish and Arabic. Our indirect channels include our relationships with introducing brokers, who solicit clients on our behalf, and white label partners, who offer our trading services to their clients under their own brand.

Our proprietary trading technology provides our clients with an enhanced client experience and multiple ways to trade and manage their accounts, tailored to their level of experience and preferred mode of access. In addition, we selectively offer third party trading tools that we believe complement our proprietary offerings. We believe that our proprietary trading technology is a significant competitive advantage because we have the ability to adapt quickly to our clients' changing needs.

We have longstanding relationships with a large number of institutional liquidity providers, as well as access to multiple liquidity venues. They allow us to offer our clients superior liquidity and more competitive pricing with tighter bid/offer spreads than many of our competitors. In addition, we have developed a proprietary pricing engine that aggregates quotes from our liquidity sources to ensure that our prices accurately reflect current market price levels and allow us to provide our clients with fast, accurate trade execution.

We have proprietary technology to handle numerous aspects of account onboarding and client service, including the account opening and client verification process, fast online account funding and withdrawals with a wide variety of automated payment methods, and on-demand delivery of client information, such as account statements and other account-related reporting. We also offer account opening and funding functions on our mobile trading applications in order to provide a superior experience to the large number of clients who trade primarily through their mobile devices. Given the highly regulated and global nature of our business, these processes are customized to each regulatory jurisdiction in which we operate, and are further tailored to client needs and preferences in specific countries in order to make it easier for clients in these countries to open accounts with us and then to fund and trade in those accounts.

In connection with our retail business, we look to acquire new clients as cost-efficiently as possible, primarily through online marketing efforts such as advertising on third-party websites, search engine marketing and affiliate marketing. Our experienced in-house marketing team creates highly targeted online campaigns tailored to experienced traders, as well as marketing programs and materials designed to support and educate newer traders. We use sophisticated tracking and measurement techniques to monitor the results of individual campaigns and continually work to optimize our overall marketing results.

We also work with introducing brokers in order to expand our client base. We work with a variety of different types of introducing brokers, ranging from small, specialized firms that specifically identify and solicit clients interested in forex and CFD trading, to larger, more established financial services firms.

Independent Wealth Management

Our independent broker/dealer, SA Stone Wealth Management Inc. (“SA Stone”), member FINRA/SIPC, together with its affiliated SEC-registered investment advisor, SA Stone Investment Advisors Inc., provides an integrated platform of technology, comprehensive wealth management and investment services to registered representatives, investment advisor representatives and registered investment advisors nationwide. The firm supports more than 460 independent professionals with best-in-class service and products.

Retail Precious Metals

Our physical retail precious metals business is comprised of Coininvest GmbH and European Precious Metal Trading GmbH. Through our websites Coininvest.com and Silver-to-go.com we offer clients the ability to purchase physical gold and other precious metals, in multiple forms, including coins and bars, in denominations of their choice, to add to their investment portfolios.

Competitive Environment - Retail

The market for our retail services is rapidly evolving and highly competitive. Our competitors vary by region in terms of regulatory status, breadth of product offering, size and geographic scope of operations. In the retail forex and CFD industry, we compete with both regulated firms focused on forex and CFDs, as well as with global multi-asset trading firms. In wealth management, our competitors vary from large integrated banks and on-line brokerage firms to smaller regional registered investment advisory firms, where competition is driven by reduced commission rates, continued development of online trading platforms and applications and client service.

Global Payments

We provide customized payment, technology and treasury services to banks and commercial businesses as well as charities and non-governmental and government organizations. We provide transparent pricing and offer local currency payments services in more than 185 countries and 140 currencies, which we believe is more than any other payments solutions provider.

Our proprietary platforms allow our clients to connect to us digitally and seamlessly with customized solutions for each of our client groups that fit their specific needs.

We utilize the Society for Worldwide Interbank Financial Telecommunication (“SWIFT”) network as well as direct application programming interfaces (“APIs”) to service almost 100 financial institutions globally and connect them to our approximately 375 correspondent banks around the world enabling them to make local currency payments in a cost effective and secure manner.

Through our platforms and our commitment to client service, we believe we are able to provide simple and fast execution, ensuring delivery of funds in local currency to any of these countries quickly through our global network of correspondent banks. We primarily act as a principal in buying and selling foreign currencies on a spot basis and derive revenue from the difference between the purchase and sale prices.

We believe our clients value our ability to provide exchange rates that are significantly more competitive than those offered by large international banks, a competitive advantage that stems from our years of foreign exchange expertise focused on smaller, less liquid currencies.

Competitive Environment - Global Payments

Increasing globalization and growth of international trade, as well as the need of corporations, institutions and individuals to move money across borders efficiently, have driven growing activity in the global payments industry. As the world becomes increasingly interconnected, corporations require the ability to cost-effectively exchange foreign currencies and to send and receive payments from clients and suppliers. NGOs also demand cross-border payment services as they attempt to bring funding, goods and services to their target geographies and recipients at the lowest possible cost. Even banks require lower cost implementation of foreign exchange transactions, as they are otherwise dependent on correspondent banks, which may subject such transactions to expensive and opaque pricing.

Volume growth in the global payments market has been steady, driving revenue growth for cross-border payments providers. Increasingly, this volume growth comes from transactions to emerging economies, benefiting those few providers such as us who have a strong competitive position in those emerging economies and an extensive correspondent bank network that would be difficult to replicate. As reported in the Boston Consulting Group 2022 Global Payments Report, global payments revenues reached \$1.5 trillion in 2021 and are expected to grow to \$3.3 trillion in 2031 with Latin America, the Middle East, Africa and Europe expected to see the highest growth rates during this period which we believe has potential to directly benefit our payments business.

The global payments market has historically been dominated by large Organization for Economic Co-operation and Development (“OECD”) banks that provide G20 to non-G20 foreign exchange rates to clients. Such banks, however, are reliant on their correspondent banking network for foreign exchange rates, which often results in uncompetitive rates and a lack of transparency. These issues are further exacerbated by a lack of uniform regulation in the business-to-business (“B2B”) global payments sector, with no coordinated regulatory framework, even among significant OECD countries.

PART I

ITEM 1 Business

We believe that the general lack of transparency in bank offerings in the global payments market with regard to fees and exchange rates, the banks' often more expensive services, as well as the lack of systematic regulation, have opened opportunities for competitors in this market. As a result, the fast-growing space has attracted significant investor interest. Independent providers have entered the market, leveraging technology

to lower client acquisition costs and providing an enhanced client experience through online platforms. In the global payments market, we believe we are one of those independent providers and disruptors offering significant value to our bank, corporate and NGO/charities clients, providing competitive and transparent payments solutions.

Subsequent Acquisition

Cotton Distributors Inc.

On October 31, 2022, our wholly owned subsidiary, StoneX Netherlands B.V., acquired CDI-Societe Cotonniere De Distribution S.A ("CDI"), based in Switzerland. CDI operates a global cotton merchant business with a strong network of producers in Brazil, West Africa, and buyers in the APAC region. The purchase price is approximately \$40.0 million, which is CDI's estimated tangible book value.

Acquisitions during Fiscal Year 2021

Chasing Returns Limited

In August 2021, our wholly owned subsidiary, StoneX Netherlands B.V., acquired Chasing Returns Limited, based in Ireland. Chasing Returns Limited specializes in financial behavioral science designed to assist traders in analyzing trends and decision making. We utilize the capabilities of Chasing Returns Limited to enhance our offerings to retail clients.

EncoreFx Ltd.

In December 2020, we acquired EncoreFx Inc., which was incorporated in the State of Washington, and is registered as a Money Services Business with the Financial Crimes Enforcement Network ("FinCEN"), having 33 state money transmitter licenses and whose primary operations include providing foreign-currency exchange risk management and global payment solutions services to small and medium sized businesses. Subsequent to the acquisition, EncoreFx Inc. was renamed as StoneX Payment Services Ltd.

Acquisitions during Fiscal Year 2020

Gain Capital Holdings, Inc.

In July 2020, we acquired Gain Capital Holdings, Inc. ("Gain"), a global provider of trading services and solutions to institutional and retail investors, specializing in both OTC products and exchange-traded futures and options on futures. Gain provides its clients with

access to a diverse range of global OTC financial markets, including spot foreign exchange, precious metals, and CFDs (where permitted). As a result of the acquisition, we added a new digital platform to our global financial network, significantly expanded our offerings to retail clients, as well as added a complementary exchange-traded futures and options on futures business.

Regulation

Overview

Our business and the industries in which we operate are highly regulated. Our operating subsidiaries are regulated in a number of jurisdictions including the U.S., the U.K, Luxembourg, Germany, Cyprus, Argentina, Brazil, Dubai, Nigeria, Hong Kong, Singapore, Japan, Australia, Canada and the Cayman Islands. Government regulators and self-regulatory organizations oversee the conduct of our business in many ways, and a number perform regular examinations to monitor our compliance with applicable statutes, regulations and rules. These statutes, regulations and rules cover all aspects of our business, including:

- maintaining specified minimum amounts of capital and limiting withdrawals of funds from our regulated operating subsidiaries;
- the treatment of client assets, including custody, control, safekeeping and, in certain countries, segregation of our client funds and securities;
- the methods by which clients can fund accounts with us;
- sales and marketing activities, including our interaction with, and solicitation of, clients;

- disclosures to clients, including those related to product risks, self-dealing and material conflicts of interest;
- the collection, use, transfer and protection of client personal information;
- anti-money laundering practices;
- recordkeeping and reporting requirements; and
- continuing education and licensing requirements for our employees, and supervision of the conduct of directors, officers and employees.

In some jurisdictions in which we offer our products and services, we are not subject to regulation because there is no established regulatory regime that covers our products and services or due to the manner in which we offer our products and services. We consult with legal counsel in jurisdictions in which we operate on a regular basis, or where we have a material concentration of clients, as to whether we have the required authorizations, licenses or approvals or whether we may conduct our business cross-border with residents in that jurisdiction without obtaining local regulatory authorization, approval or consent. To the extent that we wish to serve clients in a jurisdiction in which we determine licensing or registration is required, we may also elect to direct such clients to a licensed white label or other partner, rather than pursuing licensing or registration ourselves.

Though we conduct our business in a manner which we believe complies with applicable local law, regulators may assert authority over activities that they deem to take place within the jurisdiction they regulate, and new laws, rules or regulations may be enacted that change the regulatory landscape and result in new, or clarify preexisting, registration or licensing requirements.

The primary responsibility for ensuring that we maintain compliance with all applicable regulatory requirements is vested in our legal and compliance departments. In addition, our legal and compliance departments are responsible for our ongoing training and education programs, supervision of our personnel required to be licensed by one or more of our regulators, review of sales, marketing and other communications and other related functions. Also where appropriate, our sales employees are licensed pursuant to applicable regulation.

Failure to comply with our regulatory requirements could result in a variety of sanctions, including, but not limited to, revocation of applicable licenses and registrations, restrictions or limitations on our ability to carry on our business, suspensions of individual employees and significant fines.

U.S. Regulation

The commodities industry in the U.S. is subject to extensive regulation under federal law. We are required to comply with a wide range of requirements imposed by the Commodity Futures Trading Commission (the “CFTC”) and the National Futures Association (the “NFA”). Similarly, the securities industry in the U.S. is subject to extensive regulation under federal and state securities laws. We must comply with a wide range of requirements imposed by the SEC, state securities commissions, the Municipal Securities Rulemaking Board (“MSRB”) and the Financial Industry Regulatory Authority (“FINRA”). These regulatory bodies safeguard the integrity of the financial markets and protect the interests of investors in these markets. They also impose minimum capital requirements on regulated entities.

In connection with our wealth management business, one of our subsidiaries, SA Stone Investment Advisors Inc., is registered with, and subject to oversight by, the SEC as an investment adviser. As such, in its relations with its advisory clients, SA Stone Investment Advisors Inc. is subject to the fiduciary and other obligations imposed on investment advisers under the Investment Advisers Act of 1940 and the rules and regulations promulgated thereunder, as well as various state securities laws. These laws and regulations include obligations relating to, among other things, custody and management of client assets, marketing activities, self-dealing and full disclosure of material conflicts of interest, and generally grant the SEC and other supervisory bodies administrative powers to address non-compliance.

The CFTC and NFA also regulate our forex, futures and swaps trading activities. Historically, the principal legislation covering our U.S. forex business was the Commodity Exchange Act, which provides for federal regulation of all commodities and futures trading activities. In recent years, as is the case of other companies in the financial services industry, our forex business has been subject to increasing regulatory oversight. The CFTC Reauthorization Act of 2019, which grants the CFTC express authority to regulate the retail forex industry, includes a series of additional rules which regulate various aspects of our business, including additional risk disclosures to retail forex clients, further limitations on sales and marketing materials and additional rules and interpretive notices regarding NFA mandated Information Systems Security Programs, including training and notification requirements for cybersecurity incidents.

Net Capital Requirements

Many of our subsidiaries are regulated and subject to minimum and/or net capital requirements. All of our subsidiaries are in compliance with their capital regulatory requirements as of September 30, 2022. Additional information on our subsidiaries subject to significant net capital and minimum net capital requirements can be found in Note 21 to the Consolidated Financial Statements.

Segregated Client Assets

We maintain client segregated deposits from our clients relating to their trading of futures and options on futures on U.S. commodities exchanges, making it subject to CFTC regulation 1.20, which specifies that such funds must be held in segregation and not commingled with the firm’s own assets. We maintain acknowledgment letters from each depository at which we maintain client segregated deposits in which the depository acknowledges the nature of funds on deposit in the account. In addition, CFTC regulations require filing of a daily segregation calculation which compares the assets held in clients segregated depositories (“segregated assets”) to the firm’s total segregated assets held on deposit from clients (“segregated liabilities”). The amount of client segregated assets must be in excess of the segregated liabilities owed to clients and any shortfall in such assets must be immediately communicated to the CFTC.

In addition, we are subject to CFTC regulation 1.25, which governs the acceptable investment of client segregated assets. This regulation allows for the investment of client segregated assets in readily marketable instruments including U.S. Treasury securities, municipal securities, government sponsored enterprise securities, certificates of deposit, commercial paper and corporate notes or bonds which are guaranteed

PART I

ITEM 1 Business

by the U.S. under the Temporary Liquidity Guarantee Program, interest in money market mutual funds, and repurchase transactions with unaffiliated entities in otherwise allowable securities. We predominately invest our client segregated assets in U.S. Treasury securities and interest-bearing bank deposits.

In addition, in our capacity as a securities clearing broker-dealer, we clear transactions for clients and certain proprietary accounts of broker-dealers (“PABs”). In accordance with Rule 15c3-3 of the Securities Exchange Act of 1934 (“Rule 15c3-3”), we maintain special reserve bank accounts (“SRBAs”) for the exclusive benefit of securities clients and PABs.

Secured Client Assets

We maintain client secured deposits from our clients relating to their trading of futures and options on futures traded on, or subject to the rules of, a foreign board of trade, making it subject to CFTC Regulation 30.7, which requires that such funds must be carried in separate accounts in an amount sufficient to satisfy all of our current obligations to clients trading foreign futures and foreign options on foreign commodity exchanges or boards of trade, which are designated as secured clients’ accounts.

Retail Forex Client Assets

As a Retail Foreign Exchange dealer (“RFED”) registered with the CFTC and member of NFA, we maintain deposits from clients relating to their trading of OTC foreign exchange contracts whereby we act as counterparty to client trading activity making it subject to CFTC regulation 5.8, which specifies that such funds must be held in designated accounts at qualifying institutions in the United States or money center countries as defined by CFTC regulation 1.49. In addition, CFTC regulations require filing of a daily retail forex obligation calculation which compares the assets held for clients with qualifying institutions (“retail forex assets”) to the firm’s total obligation to retail forex clients, also known as net liquidating value (“retail forex liabilities”). The amount of retail forex assets must be in excess of the retail forex liabilities owed to clients and any shortfall in such assets must be immediately communicated to the CFTC.

Dodd-Frank

Like other companies in the financial services industry, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) provides for a number of significant provisions affecting our business. Notably, the Dodd-Frank Act requires the registration of swap dealers with the CFTC and provides framework for:

- swap data reporting and record keeping on counterparties and data repositories;
- centralized clearing for swaps, with limited exceptions for end-users;
- the requirement to execute swaps on regulated swap execution facilities;
- the imposition on swap dealers to exchange margin on uncleared swaps with counterparties; and
- the requirement to comply with new capital rules.

We are a CFTC provisionally registered swap dealer, whose business is overseen by the NFA. During 2016, CFTC 23.154, Calculation of Initial Margin rules came into effect, imposing new requirements on registered swap dealers and certain counterparties to exchange initial margin, with phased-in compliance dates, under which we fall in the final compliance date tier recently extended to September 2022. Additionally, the CFTC finalized the proposed net capital rules applicable to swap dealers on July 22, 2020, with the new rules effective October 6, 2021.

With respect to our retail OTC business, the Dodd-Frank Act includes:

- rules that require us to ensure that our clients residing in the United States have accounts open only with our U.S. registered NFA-member operating entity; and
- rules that essentially require all retail transactions in any commodity product other than a retail foreign currency transaction that is traded on a leveraged basis to be executed on an exchange, rather than OTC.

Certain provisions of the Dodd-Frank Act have yet to be implemented and we will continue to monitor all applicable developments in the ongoing implementation of the Dodd-Frank Act. The legislation and implementing regulations affect not only us, but also our clients and counterparties.

OFAC

The U.S. maintains various economic sanctions programs administered by the U.S. Treasury Department’s Office of Foreign Assets Control (“OFAC”). The OFAC administered sanctions take many forms, but generally prohibit or restrict trade and investment in and with sanctions targets, and in some cases require blocking of the target’s assets. Violations of any of the OFAC-administered sanctions are punishable by civil fines, criminal fines, and imprisonment. We believe that we have implemented, and that we maintain, appropriate internal practices, procedures and controls to enable us to comply with applicable OFAC requirements.

U.S. Patriot Act

We are subject to a variety of statutory and regulatory requirements concerning our relationships with clients and the review and monitoring of their transactions. Specifically, we are subject to the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the “USA PATRIOT Act”), which requires that we maintain a comprehensive anti-money laundering (“AML”) program, a customer identification program (CIP), designate an AML compliance officer, provide specified employee training and conduct an annual independent audit of our AML program. The USA PATRIOT Act seeks to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. Anti-money laundering laws outside of the U.S. contain similar provisions. We believe that we have implemented, and that we maintain, appropriate internal practices, procedures and controls to enable us to comply with the provisions of the USA PATRIOT Act and other anti-money laundering laws.

FINCEN CDD Final Rule

Additionally, our US legal entities qualifying as covered financial institutions are subject to the Customer Due Diligence Rule (“the CDD Rule”), which clarifies and strengthens customer due diligence requirements. This applies to our US brokers dealer(s) in securities, futures commission merchants, and introducing brokers in commodities. The CDD Rule requires these covered financial institutions to identify and verify the identity of the natural persons (known as beneficial owners) of legal entity customers who own, control, and profit from companies when those companies open accounts.

The CDD Rule has four core requirements. It requires covered financial institutions to establish and maintain written policies and procedures that are reasonably designed to:

- identify and verify the identity of customer;
- identify and verify the identity of the beneficial owners of companies opening accounts;
- understand the nature and purpose of customer relationships to develop customer risk profiles; and
- conduct ongoing monitoring to identify and report suspicious transactions and, on a risk basis, to maintain and update customer information.

With respect to the requirement to obtain beneficial ownership information, financial institutions will have to identify and verify the identity of any individual who owns 25 percent or more of a legal entity, and an individual who controls the legal entity. A Beneficial Ownership Form is also required. These requirements are applied to customers which meet the CDD Rule Criteria.

European and United Kingdom Regulation

The Financial Conduct Authority (“FCA”), the regulator of investment firms in the U.K., regulates our U.K. subsidiary as a Markets in Financial Instruments Directive (“MiFID”) investment firm under U.K. law. In Europe, our regulated subsidiaries are subject to E.U. regulation. Across the U.K. and E.U., the respective transpositions of the Market Abuse Regulation, and the General Data Protection Regulation, also apply.

Applicable regulations also impose regulatory capital, as well as conduct of business, governance, and other requirements on these entities. The client assets (“CASS”) rules in the MiFID regulations include those that govern the handling of client money and other assets which, under certain circumstances must be segregated from the firm’s own assets.

CFD’s referencing cryptocurrencies

The FCA has adopted rules to ban the sale of CFDs referencing cryptocurrencies to retail consumers, which became effective in January 2021.

Client Money Rules

We are subject to the FCA’s Client Money rules, under which we are required to:

- maintain adequate segregation of client funds;
- maintain adequate records in order to identify appropriate client details;
- have adequate organizational arrangements in place to minimize the risk that client money may be paid for by the account of a client whose money has not yet been received by us;
- undertake daily internal and external client money reconciliations within an appropriate risk and control framework; and
- appoint an individual who is responsible for CASS oversight.

Anti-Money Laundering and Sanctions

As in the U.S., our U.K. and European entities are subject to statutory and regulatory requirements concerning relationships with customers and the review and monitoring of their transactions. Regulated firms in both the U.K. and in the European Union (“E.U.”) must have robust governance, effective risk procedures and adequate internal control mechanisms to manage the exposure to financial crime risk. The measures require the U.K. and E.U. entities to verify customer identity and understand the nature and purpose of the proposed relationship on the basis of documents, data or information obtained from a reliable and independent source; and review and monitor their customer’s transactions and activities to identify anything suspicious.

Our U.K. and E.U. entities take a risk-based approach and senior management are responsible for addressing these risks. There is a requirement to regularly identify and assess the exposure to financial crime risk and report to the governing body on the same. This enables the targeting of financial crime resources on the areas of greatest risk. Procedures in the U.K. and E.U. are based on guidance and requirements issued both at a national and supranational level.

The FCA and the financial supervisory authorities in the E.U. require our entities to have systems and controls in place to enable them to identify, assess, monitor and manage financial crime risk. Accordingly, we have implemented appropriate systems and controls which are proportionate to the nature, scale and complexity of our activities. We provide relevant training to our employees in relation to financial crime. As required, our EMEA Money Laundering Reporting Officer as well as the Money Laundering Reporting Officer appointed in respect of each of the entities in the E.U. provide regular reports on the operation and effectiveness of these systems and controls, including details of our regular assessments of the adequacy of these systems and controls to ensure their compliance with the local regulatory requirements.

Our financial crime systems and controls also include routine screening to identify where customers and others with whom we transact may be subject to financial sanctions, including measures initiated or adopted by *inter alia* the U.K. Treasury, E.U. or OFAC (as required in the U.S.).

PART I

ITEM 1 Business

EMIR

The E.U. European Market Infrastructure Regulation (Regulation (EU) 648/2012) (“EMIR”) imposes requirements on entities that enter into any form of derivative contract and applies directly to firms in the E.U. that trade derivatives and indirectly to non-E.U. firms that trade derivatives with E.U. firms. Accordingly, under these rules, we are required to:

- report all derivative contracts and their lifecycle events (concluded, modified and terminated) to which we are a party to a trade repository either by ourselves or through a third party;
- keep all records relating to concluding of derivative contracts and any subsequent modification for 5 years;
- comply with the risk management requirements for OTC bilateral derivatives, including portfolio reconciliation, portfolio compression, record keeping, dispute resolution and margining; and
- clear through central counterparties all OTC derivatives which will be subject to the mandatory clearing obligation.

MiFID

Where firms offer “execution only” services for certain financial instruments which are deemed “complex”, E.U. Markets in Financial Instruments Directive II (Directive 2014/65/EU) (“MiFID II”) requires firms to assess the appropriateness of those investments for retail clients. For this assessment, we are required to collect information about our existing and potential clients’ knowledge and experience with regard to specific products and services, including:

- the types of services, transactions and financial instruments with which the retail client is familiar;
- the nature, volume, and frequency of the retail client’s transactions in financial instruments and the period over which they have been carried out; and
- the level of education, and profession or relevant former profession of the retail client or potential retail client.

We are required to offer to a retail client or transact for them only those products that are deemed appropriate for their knowledge, experience and other circumstances. If the retail client demands a product that has been assessed as inappropriate for the retail client’s circumstances by us, we may either refuse to offer the product to the client or allow them access to the product but we are required to give the retail client a warning that the product may be inappropriate to its circumstances. We are not required to undertake this analysis for professional clients as we are entitled to assume that a professional client has the necessary knowledge and experience in order to understand the risks involved in relation to the particular products or services for which they have been classified as a professional client.

In addition to the requirements described above, MiFID II requires that:

- firms carry out an appropriateness assessment before providing an execution only service to retail clients;
- transparency is given to derivatives traded on regulated markets, multi-lateral trading facilities (“MTFs”), and organized trading facilities (“OTFs”);

- transactions are reported for those financial instruments traded on MTFs, OTFs, and those financial instruments where the underlying instrument is traded on a Trading Venue; and
- E.U. Member State regulators ban or restrict the marketing, distribution or sale of a financial instrument or types of financial practice where there is a threat to investor protection, the orderly functioning and integrity of markets or to financial stability. The European Banking Authority and the European Securities and Markets Authority have similar powers to impose a ban on an E.U.-wide basis or in relation to a particular E.U. Member State.

Packaged Retail and Insurance-based Investment Products

Our U.K. entities are required to comply with the PRIIPs Regulation in relation to packaged retail and insurance-based investment products (“PRIIPs”) that they manufacture, advise on or sell to retail clients. The FCA regards derivatives (including options, futures, and contracts for difference) as falling within the definition of a PRIIP. The regime requires us to provide retail clients with a standardized key information document (“KID”) in good time before any transaction in derivatives is concluded or for transactions concluded by distance communications, after the transaction has taken place, but only if it is not possible to provide the KID in advance and the client consents.

Payments Services Regulations 2017

The Payments Services Regulations 2017 (“PSRs”) implemented the second Payments Services Directive (“PSD II”) in the U.K. The most significant development contained in the PSD II is the requirement for payment services firms to introduce strong customer authentication (“SCA”) on the payment platforms which was required to be fully implemented by March 2022.

Brexit

The U.K. left the E.U. in January 2020 pursuant to a Withdrawal Agreement. It entered into a transition period which expired on December 31, 2020. Following the expiration of this transition period, British investment and payment firms have lost the right to conduct business within European Economic Area (“EEA”) states based on their ‘home’ state authorization. Without appropriate authorization, British firms are largely restricted to providing business to clients that are domiciled in the EEA on a ‘reverse solicitation’ basis. Furthermore, British investment firms have lost certain rights with respect to access to, or providing their clients with a connection to, certain infrastructural assets that are necessary for the provision of certain services. An example is the provision of direct electronic access to trading venues authorized in the E.U.

StoneX Financial Ltd put in place a comprehensive Brexit contingency plan to mitigate the risks associated with Brexit. This included the transfer of assets, services and clients to StoneX Financial Ltd’s subsidiary (StoneX Financial GmbH) and sister company (StoneX Financial Europe S.A).

Similarly, the group has executed a plan to mitigate the risks associated with Brexit for retail clients including the establishment of a licensed entity in Cyprus, StoneX Europe Ltd.

U.K. Investment Firm Prudential Regime

The U.K. implemented a new prudential regime that replaced the previously existing Capital Requirements Regulation (“CRR”) and fourth Capital Requirements Directive (“CRD IV”) in January 2022. The U.K. Investment Firm Prudential Regime (“IFPR”) is intended to introduce a more appropriate regime for investment firms, which are currently regulated under rules designed for banks. StoneX Financial Ltd is not currently expecting that the IFPR will require significant changes to be made to its prudential requirements. This new prudential regime entered into force in June 2021 in the E.U.

E.U. Conflict Minerals Regulation

The E.U. Conflict Minerals Regulation (“CMR”) became effective in January 2021. The U.K. adopted the CMR as it entered the U.K. statute book for Northern Ireland before the expiration of the Brexit transition period. The FCA is expected to recognize the Global Precious Metals Code in the U.K. following a recent consultation. The CMR requires importers to conduct due diligence on their gold, tantalum, tin, and tungsten supply chains to identify minerals that may have originated from conflict zones. The new requirements are largely based on existing guidance issued by the Organisation for Cooperation and Development (OECD) which StoneX Financial Ltd already applies. The firm has made some amendments to its policies and procedures in anticipation of the regulation and keeps these under review as part of its systems and controls.

Exchange Memberships

Through our various operating subsidiaries, we are member of a number of exchanges, including the Chicago Mercantile Exchange, the Chicago Board of Trade, the New York Mercantile Exchange, COMEX, InterContinental Exchange, Inc., the New Zealand Exchange, the Minneapolis Grain Exchange, the London Metal Exchange, ICE Europe Ltd, Euronext Amsterdam, Euronext Paris, European Energy Exchange, Norexco ASA, the Rosario Futures Exchange, ICE Futures Abu Dhabi, Small Exchange, Inc., Nodal Exchange and the Singapore

Other International Regulation

Our operating subsidiaries in jurisdictions outside of the U.S. U.K. and E.U. are registered with, or obtained a license from, local regulatory bodies that seek to protect clients by imposing requirements relating to capital adequacy and other matters. Several of our foreign subsidiaries are subject to certain business rules, including those that govern the treatment of client money and other assets which under certain circumstances for certain classes of client must be segregated from the firm’s own assets.

Privacy and Data Protection

Our business is subject to rules and regulations adopted by state, federal and foreign governments, and regulatory organizations governing data privacy, including for example the California Consumer Privacy Act (CCPA) and the European General Data Protection Regulation (GDPR). Additional states, as well as foreign jurisdictions, have enacted or are proposing similar data protection regimes, resulting in a rapidly evolving landscape governing how we collect, use, transfer and protect personal data.

Exchange. These exchanges impose their own requirements on a variety of matters, in some cases addressing capital adequacy, protection of client assets, record-keeping and reporting.

Failure to comply with our exchange membership requirements could result in a variety of consequence, including, but not limited to fines and revocation of memberships, which would limit on our ability to carry on our business with these exchanges.

Human Capital Management

We believe that our success is determined in large part by the quality and dedication of our people and by the empowerment of our employees to serve and engage our clients globally. At the direction of our Executive Committee and in furtherance of our strategies as a whole, our worldwide human resources officers are responsible for developing and executing our human capital strategy. This includes the attraction, acquisition, development and engagement of talent to deliver on our strategy and the design of employee compensation, incentive, welfare and benefits programs. We focus on the following factors in order to implement and develop our human capital strategy:

- Employee Compensation and Incentives
- Evaluation of Employee Performance, Training and Talent Development
- Employee Health and Welfare
- Diversity and Inclusion

Employee Compensation and Incentives

Ensuring that our employees are well-compensated and have the appropriate incentives in place to meet and exceed their potential is a central part of our human capital strategy. Our entrepreneurial culture ties pay to performance in a variety of ways, including incentive compensation, merit-based bonus programs and variable compensation. We also encourage our employees to acquire an ownership stake in our business by sponsoring stock option and restricted stock plans for directors, officers and employees. Furthermore, our Nominating & Governance Committee imposes requirements that our directors and executive officers maintain a financial interest in our stock by owning vested Company stock, fostering an additional sense of ownership and alignment of interests.

Evaluation of Employee Performance, Training and Talent Development

We commit to our employees by encouraging their growth and professional development through performance management, training and talent development, including:

- **Performance evaluations.** Employee performance is evaluated annually through written self-assessments which are reviewed in discussions with supervisors and managers. Employee performance is assessed based on a variety of key performance indicators, including achievement of objectives specific to the employee's department or role, an assessment of company core competencies, feedback from peers and subordinate employees and managers in other departments and an assessment conducted by the employee's direct manager.
- **Business Unit Training.** Business units provide hands-on training to their employees to equip them for success in their roles and provide increased opportunities to develop their careers.
- **Manager Training.** Management training is provided to certain senior leaders and mid-level managers. This training covers, among other topics, talent review, development of underperforming employees, handling employee misconduct and coaching and success workshops.
- **Know-Your-Business Programs.** We make available to employees a monthly "Know-Your-Business" program led by senior managers, including our CEO, to provide our employees with the opportunity to learn about our diverse product and service offerings, as well as familiarize themselves with the various operational and administrative support areas.
- **Virtual Networking and Mentoring Programs.** We have established networking and mentoring programs to provide an additional means for employees to connect with each other, learn about different parts of our business and to help each other further develop their careers.

Employee Health and Welfare

We believe that doing our part to maintain the health and welfare of our employees is a critical element for achieving commercial success. As such, we provide our employees with comprehensive health benefits and offer a wellness program which focuses on employee health

strategies and includes a discount to employee medical premiums for the completion of wellness initiatives. We have taken a proactive approach to addressing the Covid-19 pandemic's impact on our employees, implementing a mitigation response and monitoring program, which includes a Covid-19 Response Task Force, in order to protect the health of our employees, encouraging and in some instances requiring working from home, and balancing these steps with a carefully considered return to office policy that complies with local guidelines for each of our offices. We promote a culture of hard work and achievement that also strives to provide an appropriate work-life balance for our employees. We conduct employee surveys from time-to-time to collect feedback and incorporate into our planning. In addition, we offer employee assistance programs, including confidential assistance for financial, mental and physical well-being. Finally, we believe that the well-being of our employees is enhanced when they can give back to their local communities or charities and have established the "Collective Giving" program to facilitate participation by our employees in these initiatives and provide a company match for charitable contributions.

Diversity and Inclusion

We believe that we are more successful commercially with a diverse employee population and encourage hiring and promotion practices that focus on the best talent and the most effective performers, regardless of gender, national origin, ethnicity or other protected class. We have adopted an Affinity Group Policy which provides a framework for groups of employees to interact over areas of common interest, an example being the Women of StoneX program which focuses on supporting and developing our female employees. In addition, our Board includes two female directors and two self-identified diverse directors, and our Nominating and Governance Committee is actively focused on issues of diversity and inclusion as part of its overall mandate. Because we operate a global business across multiple business segments, products and service areas, we believe it is especially important that we attract employees with diverse backgrounds and the capability to address client needs across the numerous cultures in the countries in which we operate. We continually analyze and monitor gender and ethnicity across our employee population and report regularly into Executive Committee and the Board.

Foreign Operations

We operate in a number of foreign jurisdictions, including Canada, Ireland, the U.K., Cyprus, Luxembourg, Germany, Spain, Argentina, Brazil, Colombia, Uruguay, Paraguay, Mexico, Nigeria, Dubai, China, India, Hong Kong, Australia, Singapore, Japan, Cayman Islands, Bermuda and Poland. We established wholly owned subsidiaries in the Netherlands, Cayman Islands and Bermuda but do not have offices or employees in those countries.

Intellectual Property

We rely on a combination of trademark, copyright, trade secret and unfair competition laws in the United States and other jurisdictions to protect our proprietary technology, intellectual property rights and our brands (e.g., StoneX, IRMP, FOREX.com, GAIN Capital, and City Index). We also enter into confidentiality and invention assignment agreements with our employees and consultants, and confidentiality agreements with other third parties. We rigorously

control access to our proprietary technology. Currently, we do not have any pending or issued patents.

We use a variety of service marks that have been registered with the U.S. Patent and Trademark Office ("USPTO"), including: StoneX, IRMP, FCStone, FC Stone, CommodityNetwork, CoffeeNetwork, GAIN Capital, FOREX.com, It's Your World. Trade It., GAIN Capital

Futures, and GAIN Futures. We have applications pending with the USPTO for StoneX One, StoneHedge and Global Payments Connect. We also have registered trademarks covering our City Index brand name and logo in a variety of jurisdictions, including Australia, the U.K., the E.U., Singapore and China. We also have pursued trademark

protection through the Madrid Protocol covering our StoneX brand name in a variety of jurisdictions. To date, we have received grants of registration in Australia, Brazil, Benelux, Columbia, the U.K., Japan, South Korea, Mexico, Singapore and are awaiting examination resolutions in other jurisdictions.

Business Risks

We seek to mitigate the market and credit risks arising from our financial trading activities through an active risk management program. The principal objective of this program is to limit trading risk to an acceptable level while maximizing the return generated on the risk assumed.

We have a defined risk policy administered by our risk management committee, which reports to the Risk Committee of our Board of Directors. We established specific exposure limits for inventory positions in every business, as well as specific issuer limits and counterparty limits.

We designed these limits to ensure that in a situation of unexpectedly large or rapid movements or disruptions in one or more markets, systemic financial distress, and the failure of a counterparty or the default of an issuer, the potential estimated loss will remain within acceptable levels. The Risk Committee of our Board of Directors reviews the performance of the risk management committee on a quarterly basis to monitor compliance with the established risk policy.

ITEM 1A Risk Factors

We face a variety of risks that could adversely impact our financial condition and results of operations, set forth below.

Macroeconomic Risks

Our ability to achieve consistent profitability is subject to uncertainty due to the nature of our businesses and the markets in which we operate.

Our revenues and operating results may fluctuate significantly because of the following factors:

- market conditions, such as price levels and volatility in the commodities, securities and foreign exchange markets in which we operate;
- changes in the volume of our market-making and trading activities;
- changes in the value of our financial instruments, currency and commodities positions and our ability to manage related risks; and
- the level and volatility of interest rates.

There have been significant declines in trading volumes in the financial markets generally in the past and there may be similar declines in trading volumes generally or across our platforms in particular in the future. Any one or more of the above factors may contribute to reduced trading volumes. Our revenues and profitability are likely to decline significantly during periods of stagnant economic conditions or decreased trading volume in the U.S. and global financial markets.

Although we continue our efforts to diversify the sources of our revenues, it is likely that our revenues and operating results will continue to fluctuate substantially in the future and such fluctuations could result in losses. These losses could have a material adverse effect on our business, financial condition and operating results.

Our net operating revenues may decrease due to changes in client trading volumes which are dependent in large part on commodity prices and commodity price volatility.

Our clients' trading volumes are largely driven by the degree of volatility—the magnitude and frequency of fluctuations—in prices of commodities. Higher volatility increases the need to hedge contractual price risk and creates opportunities for arbitrage trading. Energy and agricultural commodities markets periodically experience significant price volatility. In addition to price volatility, increases in commodity prices generally lead to increased trading volume. As prices of commodities rise, especially energy prices, new participants enter the markets to address their growing risk-management needs or to take advantage of greater trading opportunities. Sustained periods of stability in the prices of commodities or generally lower prices could result in lower trading volumes and, potentially, lower revenues. In addition, lower volatility and lower volumes could lead to lower client balances held on deposit, which in turn may reduce the amount of interest revenue and account fees we collect based on these deposits.

Factors that are particularly likely to affect price volatility and price levels of commodities include supply and demand of commodities, weather conditions affecting certain commodities, national and international economic and political conditions, the perceived stability of commodities and financial markets, the level and volatility of interest rates and inflation and the financial strength of market participants.

PART I

ITEM 1A Risk Factors

Low short-term interest rates negatively impact our profitability.

We earn interest and fee income on client balances left on deposit with us. We have generated significant interest-related revenue in both the current and prior periods and a decline in short-term interest rates or a decline in the amount of client funds on deposit may have a material adverse effect on our profitability in the future.

Short-term interest rates are highly sensitive to factors that are beyond our control and we can provide no assurance as to whether short-term interest rates will decline in the future.

Our financial position and results of operations may be adversely affected by unfavorable economic and financial market conditions, including the ongoing impact of the COVID-19 pandemic and the conflict between Ukraine and Russia.

Economic and financial market conditions, including those caused by the ongoing COVID-19 pandemic and the conflict between Ukraine and Russia and related sanctions imposed by the U.S. Department of Treasury and other governing bodies in countries in which we conduct business, have created significant market volatility, uncertainty and economic disruption. While increased volatility is typically a driver of increased client activity and growth in our operating revenues, longer periods of extreme volatility and dislocation in global securities, foreign exchange and commodity markets may affect our ability to establish effective offsetting positions in our principal trading and market-making activities which may expose us to trading losses. In

addition, in the event that a global recession or slowdown occurs, this could lead to extended periods of low short-term interest rates and decreased volatility which could adversely affect our profitability. We also may be exposed to increased counterparty default, liquidity and credit risks with respect to our client accounts, which means if our clients experience losses in excess of the funds they have deposited with us, we may not be able to recover the negative client equity from our clients. In these circumstances, we may nonetheless be required to fund positions with counterparties using our own funds, which in turn would reduce our liquidity buffers. If any of these risks materialize, our operating results or ability to conduct our business may be materially adversely affected.

In addition, the continuation of the COVID-19 pandemic has led to increased operational and cybersecurity risks. These risks include, among others, increased demand on our information technology resources and systems and the increased risk of phishing and other cybersecurity attacks. Any failure to effectively manage these increased operational and cybersecurity demands and risks may materially adversely affect our results of operations and the ability to conduct our business. For a further discussion of cybersecurity risks, see Technology and Cybersecurity Risks below.

To the extent the continuation of the COVID-19 pandemic and the ongoing conflict between Ukraine and Russia adversely affects our business, financial condition, liquidity or results of operations, these events may also have the effect of heightening many of the other risks described herein and in any future Quarterly Reports on Form 10-Q or other filings we make with the SEC.

Business Risks

We face risks associated with our market-making and trading activities.

A significant portion of our operating revenues are generated through our market making and trading activities. The success of our market-making and trading activities principally depends on:

- the price volatility of specific financial instruments, currencies and commodities;
- our ability to attract order flow and our competitiveness;
- the skill of our personnel, including the efficiency of our order execution, quality of our client service and the sophistication of our trading technology;
- the availability of sufficient capital, in order to provide enhanced liquidity to our clients; and
- general market conditions.

We conduct our market-making and trading activities predominantly as a principal and therefore hold positions that bear the risk of significant price fluctuations, rapid changes in the liquidity of markets, deterioration in the creditworthiness of our counterparties and other risks that may cause the value of our positions to decline, which would lead to lower operating revenues.

In addition, as a market maker, while we seek to hedge our exposure to market risk relating to the positions we hold, at any given moment, our unhedged exposure subjects us to market risk, including the risk of significant losses. Principal gains and losses resulting from our positions could have a disproportionate effect, positive or negative, on our financial condition and results of operations for any particular reporting period. These risks are increased when we have concentrated positions in securities of a single issuer or issuers in specific countries and markets, which is the case from time-to-time.

Declines in the volume of securities, commodities and derivative transactions and in market liquidity generally may result in lower revenues from market-making and trading activities. Changes in price levels of securities and commodities and other assets, and in interest and foreign exchange rates also may result in reduced trading activity and reduce our revenues from market-making transactions. Changes in price levels also may result in losses in the fair value of securities, commodities and other assets held in inventory. Sudden sharp changes in the fair value of securities, commodities and other assets can result in a number of adverse consequences for our business, including illiquid markets, fair value losses arising from positions held by us, and the failure of buyers and sellers of securities, commodities and other assets to fulfill their settlement obligations. Any change in market volume, price or liquidity or any other of these factors could have a material adverse effect on our business, financial condition and operating results.

We operate as a principal in the OTC derivatives markets which involves significant risks associated with commodity derivative instruments in which we transact.

We offer OTC derivatives to our clients in which we act as a principal counterparty. We endeavor to simultaneously offset the underlying risk of the instruments, such as commodity price risk, by establishing corresponding offsetting positions with commodity counterparties, or alternatively we may offset those transactions with similar but not identical positions on an exchange. To the extent that we are unable to simultaneously offset an open OTC derivative position or the offsetting transaction is not effective to fully eliminate the derivative risk, we have market risk exposure on these unmatched transactions. Our exposure varies based on the size of our overall positions, the terms and liquidity of the instruments we offer to our clients and the amount of time the positions remain open.

While we mitigate market risk on OTC derivative positions with strict risk limits, limited holding periods and active risk management, adverse movements in the referenced assets or rates underlying these positions or a downturn or disruption in the markets for these positions could result in a substantial loss. In addition, any principal gains and losses resulting from these positions could have a disproportionate effect, positive or negative, on our financial condition and results of operations for any particular reporting period.

Transactions involving OTC derivative contracts may be adversely affected by fluctuations in the level, volatility, correlation or relationship between market prices, rates, indices and/or other factors. These types of instruments may also suffer from illiquidity in the market or in a related market.

OTC derivative transactions are subject to unique risks.

OTC derivative transactions are subject to the risk that, as a result of mismatches or delays in the timing of cash flows due from or to counterparties in OTC derivative transactions or related hedging, trading, collateral or other transactions, we or our counterparty may not have adequate cash available to fund our or its current obligations.

We could incur material losses pursuant to OTC derivative transactions because of inadequacies in or failures of our internal systems and controls for monitoring and quantifying the risk and contractual obligations associated with OTC derivative transactions and related transactions or for detecting human error, systems failure or management failure.

OTC derivative transactions may generally be modified or terminated only by mutual consent of the parties to any such transaction (other than in certain limited default and other specified situations (e.g., market disruption events)) and subject to agreement on individually negotiated terms. Accordingly, it may not be possible to modify, terminate or offset obligations or exposure to the risk associated with a transaction prior to its scheduled termination date.

In addition, we note that as a result of rules adopted by U.S. and foreign regulators concerning certain financial contracts, including OTC derivatives, entered into with our counterparties that have been designated as global systemically important banking organizations, we may be restricted in our ability to terminate such contracts following the occurrence of certain insolvency-related default events. Transactions with these counterparties, therefore, carry heightened risk in the event that the counterparty defaults on its obligations to us.

We are subject to margin funding requirements on short notice.

Our business involves establishment and carrying of substantial open positions for clients on futures exchanges and in the OTC derivatives markets. We are required to post and maintain margin or credit support for these positions. Although we collect margin or other deposits from our clients for these positions, significant adverse price movements can occur which will require us to post margin or other deposits on short notice, whether or not we are able to collect additional margin or credit support from our clients. We maintain borrowing facilities for the purpose of funding margin and credit support and have in place procedures for collecting margin and other deposits from clients on a same-day basis; however, there can be no assurance that these facilities and procedures will provide us with sufficient funds to satisfy any additional margin or credit support we may be required to post in the event of severe adverse price movements affecting the open positions of our clients. Generally, if a client is unable to meet its margin call, we promptly liquidate the client's account. However, there can be no assurance that in each case the liquidation of the account will not result in a loss to us or that liquidation will be feasible, given market conditions, size of the account and tenor of the positions.

We are exposed to counterparty credit risk whereby the failure by persons with whom we do business to meet their financial obligations could adversely affect our business, financial condition and results of operations.

We are exposed to the risk that our counterparties fail to meet their obligations to us or to other parties, resulting in significant financial loss to us. These risks include:

- failure by our clients and counterparties to fulfill contractual obligations and honor commitments to us;
- failure by clients to deposit additional collateral for their margin loans during periods of significant price declines;
- failure by our clients to meet their margin obligations;
- failure by our hedge counterparties to meet their obligations to us;
- failure by our clearing brokers and banks to adequately discharge their obligations on a timely basis or remain solvent; and
- default by clearing members in the clearing houses in the U.S. and abroad of which we are members which could cause us to absorb shortfalls pro rata with other clearing members.

These and similar events could materially affect our business, financial condition and results of operations. While we have policies, procedures and automated controls in place to identify and manage our credit risk, there can be no assurance that they will effectively mitigate our credit risk exposure. If our policies, procedures and automated controls fail, our business, financial condition and results of operations may be adversely affected.

We are subject to risk of default by financial institutions that hold our funds and our clients' funds.

We have significant deposits of our own funds and our clients' funds with banks and other financial institutions, including liquidity providers. In the event of the insolvency of one of these financial institutions, we might not be able to fully recover the assets we have

PART I

ITEM 1A Risk Factors

deposited since, in certain cases, we will be among the institution's unsecured creditors. As a result, our business, financial condition and results of operations could be materially adversely affected by the loss of these funds.

We rely on relationships with introducing brokers for obtaining some of our clients and our business or reputation could be harmed by such introducing broker misconduct or errors.

We have relationships with introducing brokers, both domestic and international, who solicit clients for their execution and/or advisory services. Those introducing brokers work to establish execution and/or clearing accounts with our entities for those new client relationships but generally serve as the primary relationship and customer service point for those clients. Many of our relationships with introducing brokers are non-exclusive or may be canceled on relatively short notice. In addition, our introducing brokers have no obligation to provide new client relationships or minimum levels of transaction volume. To the extent any of our competitors offers more attractive compensation terms to one or more of our introducing brokers, we could lose the brokers' services or be required to increase the compensation we pay to retain the brokers. Further, we may agree to set the compensation for one or more introducing brokers at a level where, based on the transaction volume generated by clients directed to us by such brokers, it would have been more economically attractive to seek to acquire the clients directly rather than through the introducing broker. Our failure to maintain our relationships with these introducing brokers or the failure of these introducing brokers to establish and maintain client relationships could result in a loss of revenues, which would adversely affect our business.

We may be held responsible by regulators or third-party plaintiffs for any improper conduct by our introducing brokers, even though we do not control their activities. This may be the case even when the introducing brokers are separately regulated. Many of our introducing brokers operate websites, which they use to advertise our services or direct clients to us and there may be statements on such websites in relation to our services that may not be accurate and may not comply with applicable rules and regulations. Any disciplinary action taken against us relating to the activities of our introducing brokers, or directly against any of our introducing brokers could have a material adverse effect on our reputation, damage our brand name and adversely affect our business, financial condition and operating results.

Products linked to cryptocurrencies could expose us to technology, regulatory and financial risks.

We offer derivative products linked to Bitcoin and other cryptocurrencies in certain jurisdictions, and may expand the types of these products offered, the associated types of cryptocurrencies and the jurisdictions in which the products are offered. The distributed ledger technology underlying cryptocurrencies and other similar financial assets is evolving at a rapid pace and may be vulnerable to cyberattacks or have other inherent weaknesses that are not yet apparent. We may be, or may become, exposed to risks related to cryptocurrencies or other financial products that rely on distributed ledger technology through our facilitation of clients' activities involving such financial products linked to distributed ledger technology.

There is currently no broadly accepted regulatory framework for Bitcoin or other cryptocurrencies, and the regulation of cryptocurrencies is developing and changing rapidly in the U.S. and other countries around the world. For example, in the U.S., it is unclear whether many cryptocurrencies are "securities" under federal securities laws, and the implications for us if any of our products linked to cryptocurrencies are determined to be securities could be significant and adverse. In addition, some market observers have asserted that historical material price fluctuations in many cryptocurrency markets, such as that for Bitcoin, may indicate the propensity for cryptocurrency markets to "bubble," and if markets for any cryptocurrencies linked to our products suffer severe fluctuations, our clients could experience significant losses and we could lose their business.

The manner in which we account for certain of our precious metals and energy commodities inventory may increase the volatility of our reported earnings.

Our net income is subject to volatility due to the manner in which we report our precious metals and energy commodities inventory held by subsidiaries that are not broker-dealers. Our precious metals and energy inventory held in subsidiaries which are not broker-dealers is stated at the lower of cost or net realizable value. We generally mitigate the price risk associated with our commodities inventory through the use of derivatives. We do not elect hedge accounting under U.S. GAAP for this price risk mitigation. In such situations, any unrealized gains in our precious metals and energy inventory in our non-broker-dealer subsidiaries are not recognized under U.S. GAAP, but unrealized gains and losses in related derivative positions are recognized under U.S. GAAP. As a result, our reported earnings from these business segments are subject to greater volatility than the earnings from our other business segments.

Our risk management policies and procedures may leave us exposed to unidentified or unanticipated risk, which could harm our business.

Our risk management policies and procedures may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Our risk management policies and procedures require, among other things, that we record and monitor thousands of transactions each day and we face the significant risk that we are not able to appropriately manage the risk associated with the large volume of transactions.

Our risk management policies and procedures rely on a combination of technology and human controls and supervision that are subject to error and failure. Some of our methods for managing risk are discretionary by nature and are based on internally developed controls and observed historical market behavior, and also involve reliance on standard industry practices. These methods may not adequately prevent losses, particularly as they relate to extreme market movements, which may be significantly greater than historical fluctuations in the market. In addition, our risk management policies and procedures also may not adequately prevent losses due to technical errors if our testing and quality control practices are not effective in preventing software or hardware failures. To the extent that we elect to adjust our risk management policies and procedures to allow for an increase in risk tolerance, we will be exposed to the risk of greater losses. Even if our risk management procedures are effective in mitigating

known risks, new unanticipated risks may arise and we may not be protected against significant financial loss stemming from these unanticipated risks. These new risks may emerge if, among other reasons, regulators adopt new interpretations of existing laws, new laws are adopted or third-parties initiate litigation against us based

on new, novel or unanticipated legal theories. Our risk management policies and procedures may not prevent us from experiencing a material adverse effect on our financial condition and results of operations and cash flows.

Technology and Cybersecurity Risks

Internal or third-party computer and communications systems failures, capacity constraints and breaches of security could increase our operating costs and/or credit losses, decrease net operating revenues and cause us to lose clients.

We are heavily dependent on the capacity and reliability of the computer and communications systems supporting our operations, whether owned and operated internally or by vendors or third parties, including those used for execution and clearance of our client's trades and our market-making activities. We receive and process a large portion of our trade orders through electronic means, such as through public and private communications networks. These computer and communications systems and networks are subject to performance degradation or failure due to any number of reasons, including loss of power, acts of war or terrorism, human error, natural disasters, fire, sabotage, hardware or software malfunctions or defects, computer viruses, cyber attacks, intentional acts of vandalism, client error or misuse, lack of proper maintenance or monitoring and similar events. While we currently maintain business continuity and disaster recovery plans (the "BCPs"), which are intended to minimize service interruptions and secure data integrity, our BCPs may not be sufficient or work effectively during an emergency.

Similarly, although some contracts with our third-party providers, such as our hosting facility providers, require adequate disaster recovery or business continuity capabilities, we cannot be certain that these will be adequate or implemented properly. Our disaster recovery and business continuity plans are heavily reliant on the availability of the internet and mobile phone technology, so any disruption of those systems would likely affect our ability to recover promptly from a crisis situation. If we are unable to execute our disaster recovery and business continuity plans, or if our plans prove insufficient for a particular situation or take longer than expected to implement in a crisis situation, our business, financial condition and results of operations could be materially adversely affected, and our business interruption insurance may not adequately compensate us for losses that may occur.

Our inability to avoid or adequately address the failure of our key computer and communication systems exposes us to significant risks, including:

- unanticipated disruptions in service to our clients;
- slower response times, delays in trade execution and failed settlement of trades;
- incomplete, untimely or inaccurate accounting, recording, reporting or processing of trades;
- financial losses; and
- litigation or other client claims and regulatory sanctions.

We hold a large amount of personally identifiable information relating to our clients and other counterparties, which exposes us to significant regulatory and financial risks if such information is not properly safeguarded.

In connection with our business, we collect and retain personally identifiable information of our clients. The continued occurrence of high-profile data breaches provides evidence of the serious threats to information security in general and as it relates to our business. Our clients expect that we will adequately protect their personal information, and the regulatory environment surrounding information security and privacy is rapidly evolving and increasingly demanding. Protecting against security breaches, including cyber-security attacks, is an increasing challenge, and penetrated or compromised data systems or the intentional or inadvertent release or disclosure of data has in the past, and may in the future, result in theft, loss or fraudulent or unlawful use of client or company data. It is possible that our security controls over personally identifiable information, our training of employees on data security and other practices we follow may not prevent the improper disclosure of personally identifiable information that we collect, store and manage.

We are exposed to significant risks relating to cybersecurity attacks against our trading platforms, internal databases and other technology systems.

Cybersecurity attacks across industries, including ours, are increasing in sophistication and frequency and may range from uncoordinated individual attempts to measures targeted specifically at us. These attacks include but are not limited to, malicious software or viruses, attempts to gain unauthorized access to, or otherwise disrupt, our information systems, attempts to gain unauthorized access to proprietary information, and other electronic security breaches that could lead to disruptions in critical systems, unauthorized release of confidential or otherwise protected information and corruption of data. Cybersecurity failures may be caused by employee error or malfeasance, system errors or vulnerabilities, including vulnerabilities of our vendors, suppliers, and their products. We have been subject to cybersecurity attacks in the past, including breaches of our information technology systems, and may experience them in the future, potentially with more frequency or sophistication. Although we maintain cyber risk insurance, this insurance may not be sufficient to cover all of our losses from any future breaches of our systems.

PART I

ITEM 1A Risk Factors

System failures, inadvertent disclosure of client personal information and/or cybersecurity breaches expose us to financial losses, regulatory fines or sanctions and third-party litigation.

The degradation or failure of the communications and computer systems on which we rely, due to internal system issues, vendor or other third party issues, cybersecurity attacks or for other reasons, or the significant theft, loss or fraudulent use of client information under any circumstances, may lead to financial losses, litigation or arbitration claims filed by or on behalf of our clients, and regulatory investigations and sanctions against us. These events could also have a negative effect on our reputation, which in turn could cause us to lose existing clients to our competitors or make it more difficult for us to attract new clients in the future.

Rapid market or technological changes may render our technology obsolete or decrease the attractiveness of our products and services to our clients.

We must continue to enhance and improve our electronic trading platforms. The financial services industry is characterized by significant structural changes, increasingly complex systems and infrastructures, changes in clients' needs and preferences and new business models. If new industry standards and practices emerge and our competitors release new technology before us, our existing technology, systems and

electronic trading platforms may become obsolete or our existing business may be harmed. Our future success will depend on our ability to:

- enhance our existing products and services;
- develop and/or license new products and technologies that address the increasingly sophisticated and varied needs of our clients and prospective clients;
- continue to attract highly-skilled technology personnel; and
- respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis.

Developing our electronic trading platforms and other technology entails significant technical and business risks. We may use new technologies ineffectively or we may fail to adapt our electronic trading platforms, information databases and network infrastructure to client requirements or emerging industry standards. If we face material delays in introducing new services, products and enhancements, our clients may forego the use of our platforms and use those of our competitors.

Further, the adoption of new internet, networking, cloud, telecommunications or blockchain technologies may require us to devote substantial resources to modify and adapt our services. We cannot assure that we will be able to successfully implement new technologies or adapt our proprietary technology and transaction-processing systems to client requirements or emerging industry standards. We cannot assure that we will be able to respond in a timely manner to changing market conditions or client requirements.

Debt Financing and Indebtedness Risks

The success of our business depends on us having access to significant liquidity.

Our business requires substantial cash to support our operating activities, including in connection with the establishment and carrying of substantial open positions for clients on futures exchanges and in the OTC derivatives markets by posting and maintaining margin or credit support for these positions. Although we collect margin or other deposits from our clients for these positions, significant adverse price movements can occur which will require us to post margin or other deposits on short notice, whether or not we are able to collect additional margin or credit support from our clients. We have systems in place to collect margin and other deposits from clients on a same-day basis, however, there can be no assurance that these facilities and systems will be able to obtain additional cash on a timely basis. As such, the Company is highly dependent on its lines of credit and other financing facilities in order to fund margin calls and other operating activities and the loss of access to these sources of financing could have a material adverse effect on our results of operations, financial condition and cash flows.

Our significant level of indebtedness could adversely affect our business, financial condition and results of operations.

As of September 30, 2022, our total consolidated indebtedness was \$824.2 million, and we may increase our indebtedness in the future as we continue to expand our business. The level of our indebtedness

could have material adverse effects on our business, financial condition and results of operations, including:

- requiring that an increasing portion of our cash flow from operations be used for the payment of interest on our indebtedness, thereby reducing our ability to use our cash flow to fund working capital, capital expenditures, acquisitions, investments and general corporate requirements;
- limiting our ability to obtain additional financing to fund future working capital, capital expenditures, acquisitions, investments and general corporate requirements;
- limiting our flexibility in planning for, or reacting to, changes in the economy, the markets, regulatory requirements, our operations or business;
- increasing the risk of a future downgrade of our credit ratings, which could increase future debt costs; and restricting our ability to borrow additional funds or refinance existing debt as needed or take advantage of business opportunities as they arise.

We may incur additional indebtedness in the future, including secured indebtedness. If new indebtedness is added to our current indebtedness levels, the related risks that we now face could increase materially.

As of September 30, 2022, \$485.1 million of our borrowings are subject to variable interest rates and as such in periods of rising interest rates, our cost of funds will increase, which could reduce our net income.

Committed credit facilities currently available to us might not be renewed.

As of September 30, 2022, we had four committed credit facilities under which we could borrow up to \$1,000.0 million, consisting of:

- a \$475.0 million facility for general working capital requirements, committed until April 21, 2025;
- a \$75.0 million facility for short-term funding of margin to commodity exchanges, committed until March 31, 2023;
- a \$400.0 million committed facility for financing commodity financing arrangements and commodity repurchase agreements, committed until July 28, 2024; and
- a \$50.0 million facility for short-term funding of margin to commodity exchanges, committed until October 14, 2023.

It is possible that these facilities might not be renewed at the end of their commitment periods and that we will be unable to replace them with other facilities on terms favorable to us or at all. If our credit facilities are unavailable or are insufficient to support future levels of business activity, our business, financial condition and results of operations may be materially adversely affected. In addition, in such circumstances, we may need to raise additional debt or equity financing on terms that are unattractive or dilutive to our current shareholders. Moreover, if we cannot raise additional funds on acceptable terms, we may not be able to develop or enhance our business, take advantage of future opportunities or respond to competitive pressure or unanticipated requirements, leading to reduced profitability.

The agreements governing our notes and other debt contain financial covenants that impose restrictions on our business.

The indenture governing our 8.625% Senior Secured Notes due 2025 and the agreements governing our above-mentioned committed credit facilities impose significant operating and financial restrictions and limit our ability and that of our restricted subsidiaries to incur and guarantee additional indebtedness, pay dividends or make other distributions in respect of, or repurchase or redeem, capital stock and prepay, redeem or repurchase certain debt, among other restrictions.

Our failure to comply with these restrictive covenants, as well as others contained in any future debt instruments entered into from time to time, could result in an event of default, which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations and result in our being required to repay these borrowings before their maturity. Our inability to generate sufficient cash flow to satisfy our debt obligations, to obtain additional debt or to refinance our obligations on commercially reasonable terms would have a material adverse effect on our business, financial condition and results of operations.

Global Regulatory Risks

The scope and complexity of the regulation to which we are subject creates significant risks for us.

The securities and derivatives industries are subject to extensive regulation under federal, state and foreign laws. In addition, the SEC, the CFTC, FINRA, the MSRB, the FCA, the FSA, CySEC, IIROC, the OSC, MAS, ASIC, CIMA, the NFA, the CME Group, Inc. and other self-regulatory organizations (commonly referred to as SROs), state securities commissions, and foreign securities regulators require compliance with their respective rules and regulations.

These regulations govern a broad and diverse range of our activities, including, without limitation, risk management, disclosures to clients, reporting requirements, client identification and anti-money laundering requirements, safeguarding client assets and personal information and the conduct of our directors, officers and employees.

Failure to comply with any of these laws, rules or regulations could result in material adverse effects on our business, results of operations and financial condition, including as a result of regulatory investigations and enforcement proceedings, civil litigation, fines and/or other settlement payments. In addition, changes in existing rules or regulations, including the interpretation thereof, or the adoption of new rules or regulations, could subject us to increased cost and risk of regulatory investigation or civil litigation, on or more of which could have a material adverse effect on our business, financial condition and results of operations.

The cost of complying with our regulatory requirements is significant and could increase materially in the future.

We have incurred and expect to continue to incur significant costs to comply with our regulatory requirements, including with respect to the development, operation and continued enhancement of our trading platforms and technology solutions relating to trade execution, trade reporting, trade surveillance and transaction monitoring, record keeping and data reporting. New regulations, including amendments of existing rules, could result in material increases in operating costs in order to comply with additional regulatory requirements.

We are exposed to significant risk from civil litigation and regulatory enforcement actions against us.

As a result of the broad scope of our highly regulated business activities and our large and diverse client population, we are a party to a significant number of lawsuits and regulatory investigations and proceedings, which are costly and time consuming to defend or address and expose us to risk of loss and fines and penalties. Moreover, the amounts involved in the trades we execute, together with the potential for rapid price movements in the products we offer, can result in potentially large damage claims in any litigation that arises in connection with such trades.

PART I

ITEM 1A Risk Factors

In addition, the volume of claims and the amount of damages and fines claimed in litigation and regulatory proceedings against financial services firms has been increasing and may continue to increase. The risks relating to litigation and regulatory investigations and enforcement actions will also increase as our business expands.

For a further discussion of litigation risks, see Item 3—Legal Proceedings below and Note 13 - Commitments and Contingencies in the Consolidated Financial Statements.

Certain of our subsidiaries are required to maintain significant levels of net capital and if our subsidiaries fail to meet these requirements, we face suspension, expulsion or limitation on our product lines.

Our regulated subsidiaries are subject to a number of requirements to maintain specific levels of net capital. Failure to maintain the required net capital may subject our subsidiaries to suspension or revocation of their license or registration or expulsion from regulatory bodies. Any of these developments could have a material adverse effect on our business, results of operations and financial condition.

In addition to these net capital requirements, certain of our subsidiaries are subject to the deposit and/or collateral requirements of the clearing houses and exchanges in which such subsidiaries participate. These requirements may fluctuate significantly from time to time based upon the nature and size of client trading activity. Failure to meet such requirements could result in our inability to continue to participate in such clearinghouses and exchanges, which could have a material adverse effect on our business, financial condition and results of operation.

International Operations Risks

Our international operations involve special challenges that we may not be able to meet, which could adversely affect our business, financial condition and results of operation.

We engage in a significant amount of business with clients in markets outside the United States. We face certain additional risks that are inherent in doing business in international markets, particularly in the regulated industries in which we participate. These risks include an inability to manage and coordinate the various regulatory requirements of multiple jurisdictions that are constantly evolving and are also subject to unexpected change, difficulties of debt collection and enforcement of contractual rights in foreign jurisdictions and reduced protection for intellectual property rights.

Fluctuations in currency exchange rates could negatively impact our earnings.

A significant portion of our international business is conducted in currencies other than the U.S. dollar, and changes in foreign exchange rates relative to the U.S. dollar can therefore affect the value of our non-U.S. dollar net assets, revenues and expenses. Although we closely monitor potential exposures as a result of these fluctuations in currencies and adopt strategies designed to reduce the impact of

Changes in existing net capital rules or the issuance of new rules could restrict our operations or limit our ability to issue dividends or repay debt.

Our business depends on the use of capital, most of which is generated and held by our operating subsidiaries. If there are changes to existing net capital rules, or new rules are issued, that require us to hold additional capital at our operating subsidiaries, we may be unable to issue dividends from our subsidiaries to fund our operations or repay our debt, which could have a material adverse effect on our business, financial condition and results of operation.

Rapidly evolving regulations regarding data privacy could increase our costs and adversely affect our business.

Our business is subject to rules and regulations adopted by state, federal and foreign governments, and regulatory organizations governing data privacy, including, but not limited to for example, the California Consumer Privacy Act (CCPA) and the European General Data Protection Regulation (GDPR). Additional states, as well as foreign jurisdictions, have enacted or are proposing similar data protection regimes, resulting in a rapidly evolving landscape governing how we collect, use, transfers and protect personal data. These new regulations, as well as changes to existing rules, could result in material increases in operating costs and impact the manner in which our products and services can be offered to our clients. Any failure to comply with the CCPA, GDPR or other applicable data protection regulations could subject us to risk of regulatory investigation, penalties, civil litigation and reputational harm, and could have a material adverse effect on our business, financial condition and results of operation.

these fluctuations on our financial results, there can be no assurance that we will be successful in managing our foreign exchange risk and potential movements in the U.S. Dollar against other currencies could adversely affect our results of operations. Our exposure to currency exchange rate fluctuations will grow if the relative contribution of our operations outside the U.S. increases. Any material fluctuations in currencies could have a material effect on our financial condition, results of operations and cash flows.

Our international operations are subject to the political, legal and economic risks associated with politically unstable and less developed regions of the world, including the risk of war and other international conflicts and actions by governmental authorities, insurgent groups, terrorists and others.

Our international operations are subject to specific risks that are more likely to arise in politically unstable and less developed regions of the world. We may conduct business in countries that are the subject of actual or threatened war, terrorist activity, outbreaks of pandemic or contagious diseases, such as COVID-19, political instability, civil strife and other geopolitical uncertainty, economic and financial instability, highly inflationary environment, unexpected changes in regulatory requirements, tariffs and other trade barriers, exchange rate fluctuations,

applicable currency controls, the imposition of restrictions on currency conversion or the transfer of funds and difficulties in staffing and managing foreign operations, including reliance on local experts. As a result of these and other factors, the currencies of these countries may be unstable. Future instability in such currencies or the imposition of governmental or regulatory restrictions on such currencies or on business in such countries could impede our foreign business.

As we operate or otherwise extend our services in certain jurisdictions without local registration, licensing or authorization, we may be subject to possible enforcement action and sanction for our operations in such jurisdictions if our operations are determined to have violated regulations in those jurisdictions. Further, we may be required to cease operations in one or more of the countries in which we operate without registration, licensing or authorization, or our growth may be limited by newly imposed regulatory or other restrictions.

A portion of our trading volume is attributable to clients in jurisdictions in which we or our white label partners are not currently licensed or authorized by the local government or applicable self-regulatory organization. This includes jurisdictions, such as China, from which we derive revenue and profit, and in which the local government has not adopted specific regulations governing the trading of foreign exchange and CFD products of the types we offer to clients, and jurisdictions in which we operate or otherwise extend our services in reliance on exemptions from the regulatory regime. We determine the nature and extent of services we can offer and the manner in which we conduct our business in the various jurisdictions in which we serve clients based on a variety of factors, including legal advice received from local counsel, our review of applicable U.S. and local laws and regulations and, in some cases, our discussions with local regulators. In cases in which we operate in jurisdictions based on local legal advice and/or cross border in a manner that we believe does not require us to be regulated in a particular jurisdiction, we are exposed to the risk that our legal, regulatory and other analysis is subsequently determined by a local regulatory agency or other authority to be incorrect and that we have not been in compliance with local laws or regulations, including local licensing or authorization requirements, and to the risk that the regulatory environment in a jurisdiction may change, including in a circumstance where laws or regulations or licensing or authorization requirements that previously were not enforced become subject to enforcement.

In such jurisdictions in which we are not licensed or authorized, we may be subject to a variety of restrictions regarding the manner in which we conduct our business or serve clients, including restrictions on:

- our sales and marketing activities;
- the use of a website specifically targeted to potential clients in a particular country;
- our ability to have a physical presence in a particular country; or
- the types of services we may offer clients physically present in each country.

These restrictions may have a material adverse effect on our results of operations and financial condition and/or may limit our ability to grow or continue to operate our business in any such jurisdiction or

may result in increased overhead costs or degradation in our services in that jurisdiction. Consequently, we cannot assure you that our operations in jurisdictions where we are not licensed or authorized will continue uninterrupted or that our international expansion plans will be achieved.

We may be subject to possible enforcement action and penalties if we are determined to have previously offered, or currently offer, our services in violation of applicable laws and regulations in any of the markets in which we serve clients. In any such case, we may be required to cease the conduct of our business with clients in one or more jurisdictions. We may also determine that compliance with the laws or licensing, authorization or other regulatory requirements for continuing the business in one or more jurisdictions are too onerous to justify making the necessary changes. In addition, any such event could negatively impact our relationship with the regulators or self-regulatory organizations in the jurisdictions where we are subject to regulation.

Our operations are required to comply with specific anti-corruption and record-keeping laws and regulations applicable to companies conducting business internationally, and if we violate these laws and regulations, it could adversely affect our business and subject us to broader liability.

Our international business operations are subject to various anti-corruption laws and regulations, including restrictions imposed by the Foreign Corrupt Practices Act (the “FCPA”) and trade sanctions administered by OFAC. The FCPA is intended to prohibit bribery of foreign officials and requires companies whose securities are listed in the U.S. to keep books and records that accurately and fairly reflect those companies’ transactions and to devise and maintain an adequate system of internal accounting controls. OFAC administers and enforces economic and trade sanctions based on U.S. foreign policy and national security goals against designated foreign states, organizations and individuals. Though we have policies in place designed to comply with applicable OFAC sanctions, rules and regulations as well as the FCPA and equivalent laws and rules of other jurisdictions, including the UK Bribery Act 2010, there can be no assurance that, in the future, the operations of our businesses will not violate these laws and regulations, and we could be exposed to claims for damages, financial penalties, reputational harm, incarceration of employees and restrictions on our operations and cash flows.

The U.K.’s withdrawal from the European Union could have an adverse effect on our business and financial results.

On January 31, 2020, the U.K. withdrew from membership in the E.U., which exit, referred to as Brexit, has caused disruptions to, and created uncertainty surrounding, our business in the U.K. and E.U., including the elimination of our historical right to serve clients in the E.U. from the U.K. on a passport basis and changes to U.K. and E.U. immigration policy, limiting our access to and ability to compete for and hire, skilled employees in both the U.K. and the E.U. Brexit could also impact our existing and future relationships with suppliers and employees in the U.K. and E.U. by disrupting the free movement of goods, services, and people between the U.K., the E.U., and elsewhere. As a result, Brexit could have an adverse effect on our future business, financial results and operations.

PART I

ITEM 1A Risk Factors

The long-term impact of the U.K.'s revised with the E.U. and others is unclear. Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the U.K. determines which E.U. laws to replace or replicate. Further, uncertainty around these and related

issues could lead to adverse effects on the economy of the U.K. and the other economies in which we operate. There can be no assurance that any or all of these events will not have a material adverse effect on our business, financial results and operations.

Competition Risk

We are subject to intense competition.

We derive a significant portion of our revenues from market-making and trading activities involving securities, commodities and foreign exchange. The market for these services, particularly market-making services through electronic platforms, is rapidly evolving and intensely competitive. We expect competition to continue and increase in the future. We compete primarily with wholesale, national and regional broker-dealers and FCMs, as well as electronic communications networks and retail brokers. We compete primarily on the basis of our expertise and quality of service.

We also derive a significant portion of our revenues from commodities risk management services. The commodity risk management industry is very competitive and we expect competition to continue to intensify in the future. Our primary competitors in this industry include both large, diversified financial institutions and commodity-oriented businesses, smaller firms that focus on specific products or regional markets and independent FCMs.

A number of our competitors have significantly greater financial, technical, marketing and other resources than we have. Some of them:

- offer alternative forms of financial intermediation as a result of superior technology and greater availability of information;
- offer a wider range of services and products than we offer;
- are larger and better capitalized;

- have greater name recognition; and
- have more extensive client bases.

These competitors may be able to respond more quickly to new or evolving opportunities and client requirements. They may also be able to undertake more extensive promotional activities and offer more attractive terms to clients.

Alternatively, some of our competitors are smaller, subject to lower capital requirements, and may be able to adopt and implement emerging technologies more quickly.

Recent advances in computing and communications technology are substantially changing the means by which market-making and brokerage services are delivered, including more direct access on-line to a wide variety of services and information. This has created demand for more sophisticated levels of client service. Providing these services may entail considerable cost without an offsetting increase in revenues. In addition, current and potential competitors have established or may establish cooperative relationships or may consolidate to enhance their services and products. New competitors or alliances among competitors may emerge and they may acquire significant market share.

We cannot assure you that we will be able to compete effectively with current or future competitors or that the competitive pressures we face will not have a material adverse effect on our business, results of operation and financial condition.

Organizational Risks

Our growth has depended significantly on acquisitions.

A large proportion of our historical growth has been achieved through acquisitions of complementary businesses, technologies or services. Our operating revenues grew from \$975.8 million in fiscal 2018 to \$2,107.4 million in fiscal 2022 principally as a result of several acquisitions. We cannot provide any assurances that we will be able to engage in additional suitable acquisitions on attractive terms or at all, or that we would be able to obtain financing for future transactions. If we are not able enter into additional transactions, our growth may be adversely affected.

There are numerous significant risks associated with acquisitions and our failure to adequately manage these risks could lead to financial loss and a failure to realize the benefits of the transactions.

There are a number of significant challenges that need to be overcome in order to realize the benefits of acquisitions, including:

- integrating the management teams, strategies, cultures, technologies and operations of the acquired companies;
- retaining and assimilating the key personnel of acquired companies;
- retaining existing clients of the acquired companies;
- creating uniform standards, controls, procedures, policies and information systems; and
- achieving revenue growth.

If these risks are not appropriately managed, we may fail to realize the anticipated benefits of such acquisitions or incur unanticipated liabilities, any of which could materially affect our business, financial condition and operating results. In addition, in connection with our acquisitions, we may be required to issue common stock, which would dilute our existing shareholders, or incur additional debt, which would increase our operating costs and potentially strain our liquidity. Moreover, acquisitions could lead to increases in amortization expenses, impairments of goodwill and purchased long-lived assets or restructuring charges, any of which could materially harm our financial condition or results.

Acquisitions give rise to unforeseen issues.

Acquisitions involve considerable risk, including the potential disruption of each company's ongoing business and the distraction of their respective management teams, unanticipated expenses and unforeseen liabilities. Our failure to address these risks or other problems encountered in connection with acquisitions could cause us to fail to realize the anticipated benefits of such acquisitions or incur unanticipated liabilities, any of which could adversely affect our business, financial condition and operating results.

From time to time, we may enter into negotiations for acquisitions or investments that are not ultimately consummated. Such negotiations could result in significant diversion of management time, as well as out-of-pocket costs.

The consideration paid in connection with an investment or acquisition also affects our financial results. If we were to proceed with one or more significant acquisitions in which the consideration included cash, we could be required to use a substantial portion of our available cash to consummate any acquisition. To the extent we issue shares of capital stock or other rights to purchase capital stock, including options or other rights, existing stockholders may be diluted and earnings per share may decrease. In addition, acquisitions may result in the incurrence of debt, large non-recurring write-offs, such as of acquired in-process research and development costs, and restructuring charges.

We depend on our ability to attract and retain key personnel.

Competition for key personnel and other highly qualified management, sales, trading, compliance and technical personnel is significant. It is possible that we will be unable to retain our key personnel and to attract, assimilate or retain other highly qualified personnel in the future. The loss of the services of any of our key personnel or the

inability to identify, hire, train and retain other qualified personnel in the future could have a material adverse effect on our business, financial condition and operating results.

From time to time, other companies in the financial sector have experienced losses of sales and trading professionals. The level of competition to attract these professionals is intense. It is possible that we will lose professionals due to increased competition or other factors in the future. The loss of a sales and trading professional, particularly a senior professional with broad industry expertise, could have a material adverse effect on our business, financial condition and operating results.

Certain provisions of Delaware law and our charter may adversely affect the rights of holders of our common stock and make a takeover of us more difficult.

We are organized under the laws of the State of Delaware. Certain provisions of Delaware law may have the effect of delaying or preventing a change in control. In addition, certain provisions of our certificate of incorporation may have anti-takeover effects and may delay, defer or prevent a takeover attempt that a stockholder might consider in its best interest. Our certificate of incorporation authorizes the board to determine the terms of our unissued series of preferred stock and to fix the number of shares of any series of preferred stock without any vote or action by our stockholders. As a result, the board can authorize and issue shares of preferred stock with voting or conversion rights that could adversely affect the voting or other rights of holders of our common stock. In addition, the issuance of preferred stock may have the effect of delaying or preventing a change of control, because the rights given to the holders of a series of preferred stock may prohibit a merger, reorganization, sale, liquidation or other extraordinary corporate transaction.

ITEM 1B Unresolved Staff Comments

We have received no written comments regarding our periodic or current reports from the staff of the SEC that were issued 180 days or more preceding the end of our fiscal year 2022 that remain unresolved.

ITEM 2 Properties

We have offices, operations and data centers located around the world. Our corporate headquarters is located at 230 Park Avenue, New York, New York. We have significant operations located in London, Chicago, and Kansas City, along with many other locations globally. We believe that our facilities are adequate to meet our anticipated requirements for current lines of business. Most of our offices support multiple or all of our segments. All our offices and other principal business properties are leased, except for a portion of our space in Buenos Aires, which we own.

PART I

ITEM 3 Legal Proceedings

ITEM 3 Legal Proceedings

For information regarding certain legal proceedings to which we are currently a party, see Note 13, “Commitments and Contingencies - Legal and Regulatory Proceedings” in the notes to our Consolidated Financial Statements included in this Annual Report on Form 10-K.

ITEM 4 Mine Safety Disclosures

Not applicable.

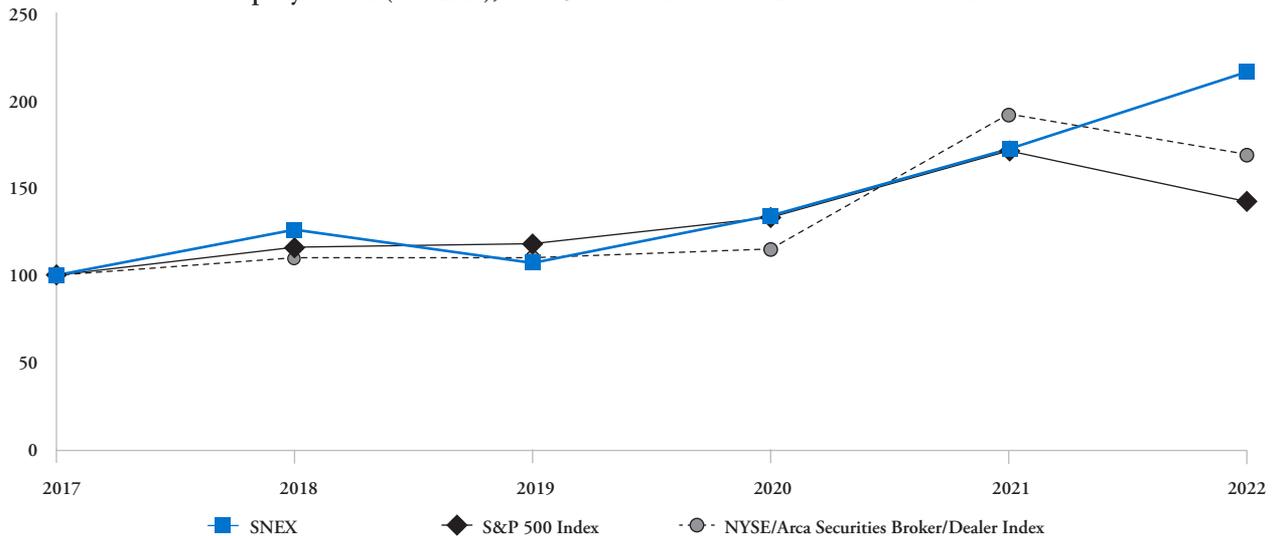

PART II

ITEM 5 Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on The NASDAQ Stock Market LLC (“NASDAQ”) under the symbol ‘SNEX’. Our common stock trades on the NASDAQ Global Select Market. As of September 30, 2022, there were approximately 451 registered holders of record of our common stock. The high and low sales prices per share of our common stock for each full quarterly period during fiscal 2022 and 2021 were as follows:

| | Price Range | |
|----------------|-------------|----------|
| | High | Low |
| 2022: | | |
| Fourth Quarter | \$ 98.13 | \$ 74.20 |
| Third Quarter | \$ 81.05 | \$ 67.02 |
| Second Quarter | \$ 77.50 | \$ 60.76 |
| First Quarter | \$ 72.34 | \$ 52.31 |
| 2021: | | |
| Fourth Quarter | \$ 70.00 | \$ 60.72 |
| Third Quarter | \$ 70.47 | \$ 58.26 |
| Second Quarter | \$ 66.87 | \$ 53.51 |
| First Quarter | \$ 65.02 | \$ 49.26 |

Value over 5 years of \$100 invested on September 30, 2016 in each of the company’s stock (“SNEX”), S&P 500 Index and NYSE/Arca Securities Broker/Dealer Index

PART II

ITEM 5 Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

We have never declared any cash dividends on our common stock, and do not currently have any plans to pay dividends on our common stock. The payment of cash dividends in the future is subject to the discretion of our Board of Directors and will depend on our earnings, financial condition, capital requirements, contractual restrictions and other relevant factors. Our credit agreements currently prohibit the payment of cash dividends by us.

On August 25, 2021, our Board of Directors authorized the repurchase of up to 1.0 million shares of our outstanding common stock from time to time in open market purchases and private transactions, commencing on October 1, 2021 and ending on September 30, 2022.

On August 23, 2022, our Board of Directors authorized the repurchase of up to 1.0 million shares of our outstanding common stock from time to time in open market purchases and private transactions, commencing on October 1, 2022 and ending on September 30, 2023. The repurchases are subject to the discretion of the senior management team to implement our stock repurchase plan, and subject to market conditions and as permitted by securities laws and other legal, regulatory and contractual requirements and covenants.

Our common stock repurchase program activity for the three months ended September 30, 2022 was as follows:

| Period | Total Number of Shares Purchased | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Program | Maximum Number of Shares Remaining to be Purchased Under the Program⁽¹⁾ |
|---|---|-------------------------------------|---|---|
| July 1, 2022 to July 31, 2022 | — | \$ — | — | 1,000,000 |
| August 1, 2022 to August 31, 2022 | — | — | — | 1,000,000 |
| September 1, 2022 to September 30, 2022 | — | — | — | 1,000,000 |
| Total | — | \$ — | — | — |

Information relating to compensation plans under which our equity securities are authorized for issuance is set forth in Part III, Item 12 of our Annual Report on Form 10-K.

ITEM 6 Reserved

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Throughout this document, unless the context otherwise requires, the terms "Company", "we", "us" and "our" refer to StoneX Group Inc. and its consolidated subsidiaries.

The following discussion and analysis should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere in this report. This Annual Report on Form 10-K contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the control of the Company, including adverse changes in economic, political and market conditions, losses from our market-making and trading activities arising from counterparty failures and changes in market conditions, the loss of key personnel, the impact of increasing competition, the impact of changes in government regulation, the

possibility of liabilities arising from violations of foreign, United States ("U.S.") federal and U.S. state securities laws, the impact of changes in technology in the securities and commodities trading industries and the potential impact of the coronavirus ("COVID-19") pandemic on our business, operations, results of operations, financial condition, workforce or the operations or decisions of our clients, suppliers or business customers. Although we believe that our forward-looking statements are based upon reasonable assumptions regarding our business and future market conditions, there can be no assurances that our actual results will not differ materially from any results expressed or implied by our forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. We caution readers that any forward-looking statements are not guarantees of future performance.

Overview

We operate a global financial services network that connects companies, organizations, traders and investors to the global market ecosystem through a unique blend of digital platforms, end-to-end clearing and execution services, high touch service and deep expertise. We strive to be the one trusted partner to our clients, providing our network, products and services to allow them to pursue trading opportunities, manage their market risks, make investments and improve their business performance. Our businesses are supported by our global infrastructure of regulated operating subsidiaries, our advanced technology platforms and our team of more than 3,600 employees as of September 30, 2022. We believe our client-first approach differentiates us from large banking institutions, engenders trust and has enabled us to establish leadership positions in a number of complex fields in financial markets around the world. For additional information, see *Overview of Business and Strategy* within Item 1. Business section of this Annual Report on Form 10-K.

We report our operating segments based primarily on the nature of the clients we serve (commercial, institutional, and retail), and a fourth operating segment, our global payments business. This structure allows us to efficiently serve clients in more than 180 countries and manage our large global footprint. See Segment Information for a listing of business activities performed within our reportable segments.

StoneX Group Inc. and its trade name "StoneX" carry forward the foundation established by Saul Stone in 1924 to today's modern financial services firm. Today, we provide an institutional-grade financial services ecosystem, connecting our clients to 40 derivatives exchanges, 185 foreign exchange markets, most global securities exchanges and over 18,000 over-the-counter markets via our networks of highly integrated digital platforms and experienced professionals. Our platform delivers support throughout the entire lifecycle of a transaction, from consulting and boots-on-the-ground intelligence, to efficient execution, to post-trade clearing, custody and settlement.

Current Trends Affecting the Financial Services Industry

Economic and financial market conditions, including those caused by the ongoing COVID-19 pandemic and the conflict between Ukraine and Russia and related sanctions imposed by the U.S. Department of Treasury and other governing bodies in countries in which we conduct business, have created significant market volatility, uncertainty and economic disruption. While increased volatility is typically a driver of increased client activity and growth in our operating revenues, longer periods of extreme volatility and dislocation in global securities, foreign exchange and commodity markets may affect our ability to establish effective offsetting positions in our principal trading and market-making activities, which may expose us to trading losses. In addition, a global recession or slowdown could lead to extended periods of lower short-term interest rates and decreased volatility which could adversely affect our profitability and/or reduce our access to capital markets. We also may be exposed to

increased counterparty default, liquidity and credit risks with respect to our client accounts, which means if our clients experience losses in excess of the funds they have deposited with us, we may not be able to recover the negative client equity from our clients.

In addition, the continuation of the COVID-19 pandemic and the conflict between Ukraine and Russia has led to increased operational and cybersecurity risks. These risks include, among others, increased demand on our information technology resources and systems and the increased risk of phishing and other cybersecurity attacks. Any failure to effectively manage these increased operational and cybersecurity demands and risks may materially adversely affect our results of operations and the ability to conduct our business. See "Risk Factors" in Part I, Item 1A in this Form 10-K for a discussion of other risks that may affect our financial condition and results of operations.

Executive Summary

Our fiscal 2022 was marked with the effects of widespread inflationary pressures on global markets, sharp increases in short term interest rates, and continued volatility in both the financial and physical commodities markets. This was especially prevalent following the Russian invasion of Ukraine, resulting in increases in client volumes and in most cases a widening of spreads captured, although we did experience a \$5.4 million increase in bad debts, net of recoveries in the year ended September 30, 2022 compared to the prior year, as a result of the effect of this heightened market volatility on certain of our clients. The impact of these effects resulted in increased volumes across all of our product offerings during the year ended September 30, 2022, as well as a significant increase in interest and fee income earned on client balances. For the year ended September 30, 2022, we achieved record operating revenues across all four of our operating segments.

In fiscal 2022 we experienced strong growth in our client balances, as average client equity and average money-market/FDIC sweep balances increased 48% and 21%, respectively compared to the year ended September 30, 2021. This growth, combined with a significant increase in short term interest rates in the second half of the fiscal year, led to an increase of \$63.3 million, or 243%, to \$89.3 million in interest and fee income on client balances in the year ended September 30, 2022.

Operating revenues increased \$434.3 million, or 26%, to \$2,107.4 million in the year ended September 30, 2022 compared to \$1,673.1 million in the year ended September 30, 2021, led by our Commercial and Institutional segments which added \$157.3 million and \$163.4 million, respectively, compared to the year ended September 30, 2021. Our Retail and Global Payments segments added \$78.7 million and \$34.7 million, respectively, compared to the year ended September 30, 2021.

Overall segment income increased \$169.5 million, or 33%, compared to the year ended September 30, 2021. This growth in segment income was led by our Commercial segment which increased \$96.1 million, or 50% compared to the year ended September 30, 2021, as a result of strong growth in operating revenues, benefiting from increased volatility and client activity. This growth in operating revenues was partially offset by a \$19.5 million increase in non-variable direct expenses.

Institutional segment income increased \$6.9 million, or 4% compared to the year ended September 30, 2021. This growth was principally driven by a 24% increase in operating revenues including a significant increase in both interest/fee income on client balances and in operating revenues derived from securities transactions, where securities average

daily volumes ("ADV") increased 25% compared to the year ended September 30, 2021, along with a 5% decline in securities rate per million ("RPM") earned. This growth was partially offset by a \$76.8 million increase in interest expense, primarily related to our institutional fixed income dealer and to a lesser extent our securities lending activities and interest paid to clients on their balances held. In addition, non-variable direct expenses increased \$27.3 million compared to the year ended September 30, 2021.

Segment income in our Retail segment increased \$47.6 million or 70% compared to the year ended September 30, 2021, principally due to strong growth in operating revenues derived from FX/CFD contracts largely driven by a 32% increase in FX/CFD contracts RPM as a result of heightened volatility in global financial markets. This growth was partially offset by a decline in operating revenues derived from physical contracts and a \$34.7 million increase in non-variable direct expenses compared to the year ended September 30, 2021.

Finally, Global Payments segment income increased \$18.9 million, or 24% compared to the year ended September 30, 2021, as average daily volumes increased 15% and RPM increased 10% compared to the year ended September 30, 2021. These increases were partially offset by an \$8.6 million increase in non-variable direct expenses.

Interest expense related to corporate funding purposes increased \$3.4 million to \$44.7 million in the year ended September 30, 2022 compared to \$41.3 million in the year ended September 30, 2021, principally due to higher short-term interest rates and an increase in debt issuance costs related to the credit facility renewed in April 2022.

On the expense side, we continue to focus on maintaining our variable cost model and limiting the growth of our non-variable expenses. Reflecting such efforts, variable expenses were 56% of total expenses in the current period, flat compared to the prior year period. Non-variable expenses, excluding bad debts increased \$100.0 million compared to the year ended September 30, 2021, principally due to higher selling and marketing expenses, fixed compensation and benefits, trading system and market information, professional fees, non-trading technology, travel and business development expenses and depreciation and amortization.

Net income increased \$90.8 million to \$207.1 million in the year ended September 30, 2022 compared to \$116.3 million in the year ended September 30, 2021. Diluted earnings per share were \$10.01 for the year ended September 30, 2022 compared to \$5.74 in the year ended September 30, 2021.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Selected Summary Financial Information

Results of Operations

Set forth below is our discussion of the results of our operations, as viewed by management, for the periods indicated.

Financial Overview

| (in millions) | Year Ended September 30, | | | | |
|--|--------------------------|----------|-------------|----------|-------------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| Revenues: | | | | | |
| Sales of physical commodities | \$ 64,052.6 | 56% | \$ 40,961.6 | (23)% | \$ 52,899.2 |
| Principal gains, net | 1,145.2 | 28% | 892.0 | 43% | 622.2 |
| Commission and clearing fees | 507.9 | 4% | 487.2 | 21% | 403.6 |
| Consulting, management, and account fees | 111.3 | 22% | 91.0 | 9% | 83.7 |
| Interest income | 219.0 | 114% | 102.4 | (22)% | 130.9 |
| Total revenues | 66,036.0 | 55% | 42,534.2 | (21)% | 54,139.6 |
| Cost of sales of physical commodities | 63,928.6 | 56% | 40,861.1 | (23)% | 52,831.3 |
| Operating revenues | 2,107.4 | 26% | 1,673.1 | 28% | 1,308.3 |
| Transaction-based clearing expenses | 291.2 | 7% | 271.7 | 22% | 222.5 |
| Introducing broker commissions | 160.1 | —% | 160.5 | 41% | 113.8 |
| Interest expense | 135.5 | 173% | 49.6 | (38)% | 80.4 |
| Interest expense on corporate funding | 44.7 | 8% | 41.3 | 75% | 23.6 |
| Net operating revenues | 1,475.9 | 28% | 1,150.0 | 32% | 868.0 |
| Compensation and benefits | 794.8 | 17% | 679.1 | 31% | 518.7 |
| Bad debts, net of recoveries and impairments | 15.8 | 52% | 10.4 | (44)% | 18.7 |
| Other expenses | 394.5 | 27% | 309.8 | 51% | 205.8 |
| Total compensation and other expenses | 1,205.1 | 21% | 999.3 | 34% | 743.2 |
| Gain on acquisitions and other gains, net | 6.4 | 88% | 3.4 | (96)% | 81.9 |
| Income before tax | 277.2 | 80% | 154.1 | (25)% | 206.7 |
| Income tax expense | 70.1 | 85% | 37.8 | 2% | 37.1 |
| Net income | \$ 207.1 | 78% | \$ 116.3 | (31)% | \$ 169.6 |
| Return on average stockholders' equity | 21.0% | | 13.9% | | 24.9% |

The tables below present a disaggregation of consolidated operating revenues and select operating data and metrics used by management in evaluating our performance, for the periods indicated:

| Operating Revenues (in millions): | Year Ended September 30, | | | | |
|--|--------------------------|----------|------------|----------|------------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| Listed derivatives | \$ 430.5 | 11% | \$ 387.6 | 18% | \$ 328.5 |
| OTC derivatives | 208.3 | 45% | 143.4 | 29% | 111.2 |
| Securities | 610.4 | 14% | 533.6 | 16% | 458.3 |
| FX / Contracts for difference ("CFD") contracts ⁽¹⁾ | 339.3 | 40% | 242.0 | 262% | 66.9 |
| Global payments | 167.8 | 25% | 133.8 | 17% | 114.6 |
| Physical contracts | 194.3 | 27% | 152.6 | 25% | 122.4 |
| Interest / fees earned on client balances | 89.3 | 243% | 26.0 | (39)% | 42.7 |
| Other | 82.7 | 19% | 69.5 | 2% | 68.4 |
| Corporate Unallocated | 7.8 | 359% | 1.7 | (88)% | 14.6 |
| Eliminations | (23.0) | 35% | (17.1) | (11)% | (19.3) |
| | \$ 2,107.4 | 26% | \$ 1,673.1 | 28% | \$ 1,308.3 |

(1) Operating revenues from FX / CFD contracts for the year ended September 30, 2020 included 43 trading days of Gain activity from the period post-acquisition of Gain, which was acquired effective August 1, 2020. Gain activity is shown in our Retail segment, along with our pre-existing FX activities, which are shown in our Institutional segment. Both had a full year of trading days during the years ended September 30, 2022 and 2021.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

| | Year Ended September 30, | | | | |
|---|--------------------------|----------|-----------|----------|-----------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| Volumes and Other Select Data (all \$ amounts are U.S. dollar or U.S. dollar equivalents): | | | | | |
| Listed derivatives (contracts, 000's) | 160,609 | 10% | 146,101 | (6)% | 154,652 |
| Listed derivatives, average rate per contract ⁽¹⁾ | \$ 2.53 | (1)% | \$ 2.55 | 29% | \$ 1.98 |
| Average client equity - listed derivatives (millions) | \$ 5,696 | 48% | \$ 3,842 | 39% | \$ 2,765 |
| Over-the-counter ("OTC") derivatives (contracts, 000's) | 2,968 | 16% | 2,557 | 21% | 2,113 |
| OTC derivatives, average rate per contract | \$ 70.49 | 27% | \$ 55.70 | 7% | \$ 52.19 |
| Securities average daily volume ("ADV") (millions) | \$ 3,459 | 25% | \$ 2,776 | 61% | \$ 1,729 |
| Securities rate per million ("RPM") ⁽²⁾ | \$ 579 | (5)% | \$ 610 | (28)% | \$ 845 |
| Average money market / FDIC sweep client balances (millions) | \$ 1,784 | 21% | \$ 1,471 | 30% | \$ 1,130 |
| FX / CFD contracts ADV (millions) ⁽³⁾ | \$ 13,273 | 25% | \$ 10,636 | 10% | \$ 9,679 |
| FX / CFD contracts RPM | \$ 99 | 11% | \$ 89 | (8)% | \$ 97 |
| Global Payments ADV (millions) | \$ 62 | 15% | \$ 54 | 20% | \$ 45 |
| Global Payments RPM | \$ 10,880 | 10% | \$ 9,921 | (2)% | \$ 10,092 |

(1) Give-up fees, as well as cash and voice brokerage revenues are excluded from the calculation of listed derivatives, average rate per contract.

(2) Interest income related to securities lending is excluded from the calculation of Securities RPM.

(3) ADV for the year ended September 30, 2020 included 43 trading days of Gain activity from the period post-acquisition of Gain, which was acquired effective August 1, 2020. Gain activity is shown in our Retail segment, along with our pre-existing FX activities, which are shown in our Institutional segment. Both had a full year of trading days during the years ended September 30, 2022 and 2021.

Operating Revenues

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Operating revenues increased \$434.3 million, or 26%, to \$2,107.4 million in the year ended September 30, 2022 compared to \$1,673.1 million in the year ended September 30, 2021. The table above displays operating revenues disaggregated across the key products we provide to our clients.

Operating revenues derived from listed derivatives increased \$42.9 million, or 11%, to \$430.5 million in the year ended September 30, 2022 compared to \$387.6 million in the year ended September 30, 2021, principally driven by a 10% increase in listed derivative volumes.

Operating revenues in OTC derivatives increased \$64.9 million, or 45%, to \$208.3 million in the year ended September 30, 2022 compared to \$143.4 million in the year ended September 30, 2021. This growth was principally driven by increased client activity in agricultural and soft commodity markets which resulted in a 16% increase in OTC contract volumes, as well as a 27% increase in the average rate per contract as a result of wider spreads in FX hedging and energy and renewable fuels markets.

Operating revenue from securities transactions increased \$76.8 million, or 14%, to \$610.4 million in the year ended September 30, 2022 compared to \$533.6 million in the year ended September 30, 2021. This increase was principally a result of a 25% increase in securities ADV driven by increased client activity in fixed income markets, which was partially offset by a 5% decline in RPM as a result of lower spreads in equity products.

Operating revenues from FX/CFD contracts increased \$97.3 million, or 40%, to \$339.3 million in the year ended September 30, 2022 compared to \$242.0 million in the year ended September 30, 2021, principally as a result of a 25% increase in FX/CFD contracts ADV, as well as a 11% increase in FX/CFD contracts RPM, both of which were driven by heightened volatility in global financial markets.

Operating revenues from global payments increased by \$34.0 million, or 25%, to \$167.8 million in the year ended September 30, 2022 compared to \$133.8 million in the year ended September 30, 2021, principally as a result of a 15% increase in ADV, as well as a 10% increase in payments RPM.

Operating revenues from physical contracts increased \$41.7 million, or 27%, to \$194.3 million in the year ended September 30, 2022 compared to \$152.6 million in the year ended September 30, 2021, principally due to increased client activity in agricultural and energy commodities, as well as continued strong client demand for precious metals.

Interest and fee income earned on client balances, which is associated with our listed and OTC derivative businesses, as well as our correspondent clearing and independent wealth management businesses, increased \$63.3 million, or 243%, to \$89.3 million in the year ended September 30, 2022 compared to \$26.0 million in the year ended September 30, 2021, principally as a result of an increase in short term interest rates as well as increases in average client equity and average FDIC sweep client balances of 48% and 21%, respectively.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Operating revenues increased \$364.8 million, or 28% to \$1,673.1 million in the year ended September 30, 2021 compared to \$1,308.3 million in the year ended September 30, 2020. The table above displays operating revenues disaggregated across the key products we provide to our clients.

Operating revenues from listed derivatives increased \$59.1 million, or 18% to \$387.6 million in the year ended September 30, 2021 compared to \$328.5 million in the year ended September 30, 2020, principally driven by a 29% increase in the average rate per contract, which was partially offset by a 6% decline in listed derivative volumes.

Operating revenues in OTC derivatives increased \$32.2 million, or 29% to \$143.4 million in the year ended September 30, 2021 compared to

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

\$111.2 million in the year ended September 30, 2020. This growth was principally driven by increased client activity in agricultural markets which drove a 21% increase in OTC contract volumes.

Operating revenue from Securities transactions increased \$75.3 million, or 16% to \$533.6 million in the year ended September 30, 2021 compared to \$458.3 million in the year ended September 30, 2020. This was principally a result of a 61% increase in securities ADV driven by increased client activity in fixed income markets and to a lesser extent equity products, which was partially offset by a 28% decline in RPM as a result of lower spreads in fixed income products.

Operating revenues from FX/CFD contracts increased \$175.1 million, or 262% to \$242.0 million in the year ended September 30, 2021 compared to \$66.9 million in the year ended September 30, 2020, as a result of an incremental \$183.0 million increase in FX/CFD contracts operating revenues in our Retail segment resulting from the acquisition of Gain, which was partially offset by lower FX operating revenues in our Institutional FX prime brokerage business.

Operating revenues from global payments increased by \$19.2 million, or 17% to \$133.8 million in the year ended September 30, 2021 compared to \$114.6 million in the year ended September 30, 2020, principally as a result of a 20% increase in ADV.

Operating revenues from physical contracts increased \$30.2 million, or 25% to \$152.6 million in the year ended September 30, 2021 compared to \$122.4 million in the year ended September 30, 2020, principally due to increased client activity in agricultural and energy commodities as well as continued strong client demand for precious metals.

Interest and fee income earned on client balances, which is associated with our listed and OTC derivative businesses, as well as our correspondent clearing and independent wealth management businesses, declined \$16.7 million, or 39%, to \$26.0 million in the year ended September 30, 2021 compared to \$42.7 million in the year ended September 30, 2020, principally as a result of a significant decline in short term interest rates related to the FOMC's actions to reduce the federal funds rate in March 2020. Partially offsetting the decline in short term interest rates was an increase in average client equity and average FDIC sweep client balances of 39% and 30%, respectively.

Finally, related to the transfer of the majority of the operations of Gain's U.K. domiciled subsidiaries into StoneX Financial Ltd., a U.S. dollar denominated entity, which was completed during the quarter ended March 2021, operating revenues for the year ended September 30, 2021 included a \$4.9 million loss on derivative positions entered into to mitigate our exposure to the British Pound in the Gain subsidiaries in advance of the transfer as well as a \$0.4 million foreign currency gain on revaluation related to the Gain U.K. domiciled subsidiaries. Prior to the transfer, the assets and liabilities of Gain's U.K. subsidiaries were subject to translation to the U.S. dollar, and for the period beginning October 2020 through March 31, 2021, the foreign currency translation adjustment related to Gain's U.K. subsidiaries resulted in a \$10.3 million increase in "accumulated other comprehensive income".

Interest and Transactional Expenses

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

TRANSACTION-BASED CLEARING EXPENSES

| | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2022 | 2021 | \$ Change | % Change |
| Transaction-based clearing expenses | \$ 291.2 | \$ 271.7 | \$ 19.5 | 7% |
| <i>Percentage of operating revenues</i> | 14% | 16% | | |

The increase in expense is principally due to higher clearing and ADR conversion fees in the Equity Capital Markets business, higher costs related to listed derivatives within the Financial Ag & Energy and Exchange-Traded Futures & Options businesses, and higher costs in our Debt Capital Markets, Global Payments, and Retail Forex businesses due to increases in average daily volumes. The decline in the percentage of operating revenues is principally due to the significant increase in interest income.

INTRODUCING BROKER COMMISSIONS

| | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2022 | 2021 | \$ Change | % Change |
| Introducing broker commissions | \$ 160.1 | \$ 160.5 | \$ (0.4) | —% |
| <i>Percentage of operating revenues</i> | 8% | 10% | | |

The modest decrease in introducing broker commissions is principally due to lower costs within our Financial Ag & Energy and Retail Forex businesses, partially offset by increased activity in our Exchange-Traded Futures & Options, LME Metals, Physical Ag & Energy and Global Payments businesses. The decline in the percentage of operating revenues is principally due to the significant increase in interest income.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

INTEREST EXPENSE

| | Year Ended September 30, | | | |

| Trading activities: | | | | |
| Institutional dealer in fixed income securities | \$ 62.3 | \$ 9.6 | \$ 52.7 | 549% |
| Securities borrowing | 23.0 | 17.6 | 5.4 | 31% |
| Client balances on deposit | 17.4 | 1.5 | 15.9 | 1,060% |
| Short-term financing facilities of subsidiaries and other direct interest of operating segments | 32.8 | 20.9 | 11.9 | 57% |
| | 135.5 | 49.6 | 85.9 | 173% |
| Corporate funding | 44.7 | 41.3 | 3.4 | 8% |
| Total interest expense | \$ 180.2 | \$ 90.9 | \$ 89.3 | 98% |

The increase in interest expense attributable to trading activities is principally due to the increase in fixed income business activities within our Institutional segment, an increase in interest on client balances principally due to higher short-term rates, and increase in average borrowings within our Commercial segment, along with the impact of the increases in short-term interest rates during the year ended September 30, 2022.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

TRANSACTION-BASED CLEARING EXPENSES

| | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2021 | 2020 | \$ Change | % Change |
| Transaction-based clearing expenses | \$ 271.7 | \$ 222.5 | \$ 49.2 | 22% |
| <i>Percentage of operating revenues</i> | 16% | 17% | | |

The increase in transaction-based clearing expenses is principally due to incremental costs in the retail forex business within our Retail segment related to the acquisition of Gain, effective August 1, 2020, and also from higher clearing and exchange fees within our Institutional segment, resulting from the increase in securities ADV, and our Commercial segment, resulting from the increase in listed derivative contract volumes.

INTRODUCING BROKER COMMISSIONS

| | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2021 | 2020 | \$ Change | % Change |
| Introducing broker commissions | \$ 160.5 | \$ 113.8 | \$ 46.7 | 41% |
| <i>Percentage of operating revenues</i> | 10% | 9% | | |

The increase in introducing broker commissions is principally due to increases in our Retail and Institutional segments related to incremental expense from the Gain acquisition. Additionally, higher revenues have resulted in increases costs within our Commercial segment and our Independent Wealth Management business.

INTEREST EXPENSE

| | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2021 | 2020 | \$ Change | % Change |
| Interest expense attributable to: | | | | |
| Trading activities: | | | | |
| Institutional dealer in fixed income securities | \$ 9.6 | \$ 33.5 | \$ (23.9) | (71)% |
| Securities borrowing | 17.6 | 25.0 | (7.4) | (30)% |
| Client balances on deposit | 1.5 | 4.4 | (2.9) | (66)% |
| Short-term financing facilities of subsidiaries and other direct interest of operating segments | 20.9 | 17.5 | 3.4 | 19% |
| | 49.6 | 80.4 | (30.8) | (38)% |
| Corporate funding | 41.3 | 23.6 | 17.7 | 75% |
| Total interest expense | \$ 90.9 | \$ 104.0 | \$ (13.1) | (13)% |

The decrease in interest expense attributable to trading activities is principally due to the decrease in short-term interest rates. Interest expense on corporate funding increased principally due to incremental interest related to the issuance of our senior secured notes during June 2020, partially offset by lower short-term interest rates on our senior

secured syndicated loan facility. In June 2020, we completed the issuance and sale of \$350 million in aggregate principal amount of the Company's 8.625% Senior Secured Notes due 2025 at the offering price of 98.5% of the aggregate principal amount.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Net Operating Revenues

Net operating revenues is one of the key measures used by management to assess the performance of our operating segments. Net operating revenue is calculated as operating revenue less transaction-based clearing expenses, introducing broker commissions and interest expense. Transaction-based clearing expenses represent variable expenses paid to executing brokers, exchanges, clearing organizations and banks in relation to our transactional volumes. Introducing broker

commissions include commission paid to non-employee third parties that have introduced clients to us. Net operating revenues represent revenues available to pay variable compensation to risk management consultants and traders and direct non-variable expenses, as well as variable and non-variable expenses of operational and administrative employees, including our executive management team.

The table below presents a disaggregation of consolidated net operating revenues used by management in evaluating our performance, for the periods indicated:

| | Year Ended September 30, | | | | |
|--|--------------------------|------------|-------------------|------------|-----------------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| Net Operating Revenues (in millions): | | | | | |
| Listed derivatives | \$ 209.4 | 20% | \$ 173.8 | 21% | \$ 143.9 |
| OTC derivatives | 208.3 | 45% | 143.4 | 29% | 111.2 |
| Securities | 364.9 | 2% | 357.8 | 24% | 287.9 |
| FX / CFD contracts | 291.9 | 51% | 193.2 | 249% | 55.4 |
| Global Payments | 158.4 | 25% | 126.4 | 16% | 108.7 |
| Physical contracts | 173.2 | 27% | 136.2 | 27% | 107.1 |
| Interest, net / fees earned on client balances | 70.0 | 206% | 22.9 | (35)% | 35.4 |
| Other | 59.3 | 16% | 51.1 | 19% | 42.9 |
| Corporate Unallocated | (59.5) | 9% | (54.8) | 124% | (24.5) |
| | \$ 1,475.9 | 28% | \$ 1,150.0 | 32% | \$ 868.0 |

Compensation and Other Expenses

The following table presents a summary of expenses, other than interest and transactional expenses.

| <i>(in millions)</i> | Year Ended September 30, | | | | |
|--|--------------------------|------------|-----------------|------------|-----------------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| COMPENSATION AND BENEFITS: | | | | | |
| Variable compensation and benefits | \$ 478.1 | 27% | \$ 377.7 | 27% | \$ 296.8 |
| Fixed compensation and benefits | 316.7 | 5% | 301.4 | 36% | 221.9 |
| | 794.8 | 17% | 679.1 | 31% | 518.7 |
| OTHER EXPENSES: | | | | | |
| Trading systems and market information | 66.2 | 13% | 58.8 | 27% | 46.3 |
| Professional fees | 54.3 | 33% | 40.9 | 35% | 30.2 |
| Non-trading technology and support | 52.4 | 14% | 46.0 | 62% | 28.4 |
| Occupancy and equipment rental | 36.1 | 6% | 34.2 | 46% | 23.5 |
| Selling and marketing | 55.3 | 66% | 33.3 | 173% | 12.2 |
| Travel and business development | 16.9 | 276% | 4.5 | (49)% | 8.9 |
| Communications | 8.3 | (11)% | 9.3 | 33% | 7.0 |
| Depreciation and amortization | 44.4 | 22% | 36.5 | 85% | 19.7 |
| Bad debts, net of recoveries and impairment | 15.8 | 52% | 10.4 | (44)% | 18.7 |
| Other | 60.6 | 31% | 46.3 | 56% | 29.6 |
| | 410.3 | 28% | 320.2 | 43% | 224.5 |
| Total compensation and other expenses | \$ 1,205.1 | 21% | \$ 999.3 | 34% | \$ 743.2 |

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Compensation and Other Expenses: Compensation and other expenses increased \$205.8 million, or 21%, to \$1,205.1 million in the year ended September 30, 2022 compared to \$999.3 million in the year ended September 30, 2021.

COMPENSATION AND BENEFITS

| (in millions) | Year Ended September 30, | | | |
|---|--------------------------|----------|-----------|----------|
| | 2022 | 2021 | \$ Change | % Change |
| Compensation and benefits: | | | | |
| Variable compensation and benefits | | | | |
| Front office | \$ 410.4 | \$ 333.5 | \$ 76.9 | 23% |
| Administrative, executive, and centralized and local operations | 67.7 | 44.2 | 23.5 | 53% |
| Total variable compensation and benefits | 478.1 | 377.7 | 100.4 | 27% |
| <i>Variable compensation and benefits as a percentage of net operating revenues</i> | 32% | 33% | | |
| Fixed compensation and benefits: | | | | |
| Non-variable salaries | 225.8 | 204.7 | 21.1 | 10% |
| Employee benefits and other compensation, excluding share-based compensation | 73.1 | 82.8 | (9.7) | (12)% |
| Share-based compensation | 17.8 | 13.9 | 3.9 | 28% |
| Total fixed compensation and benefits | 316.7 | 301.4 | 15.3 | 5% |
| Total compensation and benefits | \$ 794.8 | \$ 679.1 | \$ 115.7 | 17% |
| <i>Total compensation and benefits as a percentage of operating revenues</i> | 38% | 41% | | |
| Number of employees, end of period | 3,615 | 3,242 | 373 | 12% |

Non-variable salaries increased principally due to the increase in headcount resulting from expanding capabilities among our business lines, as well as the growth in our operational and overhead departments supporting our business growth.

Employee benefits and other compensation, excluding share-based compensation, decreased principally due to an increase in employee-elected deferred incentive, which is exchange for restricted stock that will be amortized over a thirty-six month period following the grant date and lower severance costs, partially offset by higher payroll, benefits, and retirement costs from the increased headcount. During the year ended September 30, 2022, severance costs were \$2.6 million. During the year ended September 30, 2021, severance costs were \$7.7 million, principally due to the departure of certain senior officers. Share-based compensation includes stock option and restricted stock expense.

Other Expenses: Other non-compensation expenses increased \$90.1 million, or 28%, to \$410.3 million in the year ended September 30, 2022 compared to \$320.2 million in the year ended September 30, 2021.

Trading systems and market information costs increased \$7.4 million, principally due to higher costs in the Retail Forex, Debt Capital Markets, and LME Metals businesses.

Professional fees increased \$13.4 million, principally due to higher legal and other consulting fees.

Non-trading technology and support increased \$6.4 million, principally due to higher non-trading software implementation costs related to various IT systems.

Selling and marketing costs increased \$22.0 million, principally due to increased campaigns related to our Retail Forex business, as well as costs of holding our bi-annual global sales and strategy meeting in March 2022.

Travel and business development increased \$12.4 million principally due to several business line specific development meetings, as well as increases along all business lines with the lifting of certain social distancing and travel restrictions, following periods of limited travel due to responses by governments and societies to the COVID-19 pandemic.

Depreciation and amortization increased \$7.9 million, principally due to the incremental depreciation expense from internally developed software placed into service.

Other expenses increased \$14.3 million, principally due to higher insurance costs, non-income taxes, non-variable direct business related costs, and non-compensation employee based expenses.

Bad debt expense, net of recoveries increased \$5.4 million over the prior year. During the year ended September 30, 2022, bad debt expense, net of recovery was \$15.8 million, principally related to client trading account deficits in our Commercial, Institutional, Retail, and Global Payments segments of \$11.6 million, \$1.8 million, \$2.3 million, and \$0.1 million, respectively. During the year ended September 30, 2021, bad debts, net of recoveries were \$10.4 million, principally related to client trading account deficits in our Commercial, Institutional, and Retail segments of \$3.4 million, \$0.6 million, and \$1.1 million, respectively. Additionally, we recorded bad debt expense of \$5.1 million related to trade receivables with physical clients.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Gain on Acquisitions and Other Gains, net: The results of the year ended September 30, 2022 include a nonrecurring gain of \$6.4 million related to a foreign exchange antitrust class action settlement received in March 2022. The results of the year ended September 30, 2021 included a gain of \$3.3 million related to an adjustment to the liabilities assumed as part of the Gain acquisition initially determined values, as of August 1, 2020.

Provision for Taxes: The effective income tax rate was 25% for the years ended September 30, 2022 and 2021. The gain on acquisition of \$3.3 million in the year ended September 30, 2021 was not taxable and reduced the effective income tax rate 0.5%.

The effective income tax rate for the fiscal year ended September 30, 2022 and 2021 was higher than the U.S. federal statutory rate of 21% due to U.S. state and local taxes, changes in valuation allowances, U.K. bank tax, U.S. permanent differences, and the amount of foreign earnings taxed at higher tax rates.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Compensation and Other Expenses: Compensation and other expenses increased \$256.1 million, or 34%, to \$999.3 million in the year ended September 30, 2021 compared to \$743.2 million in the year ended September 30, 2020.

COMPENSATION AND BENEFITS

| <i>(in millions)</i> | Year Ended September 30, | | | |
|---|--------------------------|------------|-----------|----------|
| | 2021 | 2020 | \$ Change | % Change |
| Compensation and benefits: | | | | |
| Variable compensation and benefits | | | | |
| Front office | \$ 333.5 | \$ 251.0 | \$ 82.5 | 33% |
| Administrative, executive, and centralized and local operations | 44.2 | 45.8 | (1.6) | (3)% |
| Total variable compensation and benefits | 377.7 | 296.8 | 80.9 | 27% |
| <i>Variable compensation and benefits as a percentage of net operating revenues</i> | <i>33%</i> | <i>34%</i> | | |
| Fixed compensation and benefits: | | | | |
| Non-variable salaries | 204.7 | 159.0 | 45.7 | 29% |
| Employee benefits and other compensation, excluding share-based compensation | 82.8 | 52.6 | 30.2 | 57% |
| Share-based compensation | 13.9 | 10.3 | 3.6 | 35% |
| Total fixed compensation and benefits | 301.4 | 221.9 | 79.5 | 36% |
| Total compensation and benefits | \$ 679.1 | \$ 518.7 | \$ 160.4 | 31% |
| <i>Total compensation and benefits as a percentage of operating revenues</i> | <i>41%</i> | <i>40%</i> | | |
| Number of employees, end of period | 3,242 | 2,950 | 292 | 10% |

Non-variable salaries increased principally due to a full year of the costs associated with the Gain acquisition in the fourth quarter of the year ended September 30, 2020.

Employee benefits and other compensation, excluding share-based compensation, increased principally due to higher payroll, benefits, and retirement costs from the increased headcount.

Fixed compensation and benefits during the year ended September 30, 2021 include severance costs of \$7.7 million, principally due to the departure of certain senior officers. During the year ended September 30, 2020, severance costs were \$1.5 million.

Other Expenses: Other non-compensation expenses increased \$95.7 million, or 43%, to \$320.2 million in the year ended September 30, 2021 compared to \$224.5 million in the year ended September 30, 2020.

Trading systems and market information costs increased \$12.5 million, principally due to incremental costs in the retail forex business acquired as part of the Gain acquisition in the fourth quarter of fiscal 2020 and higher costs in our Institutional segment.

Professional fees increased \$10.7 million, principally due to higher legal, consulting and accounting services fees.

Non-trading technology and support increased \$17.6 million, principally due to incremental costs related to the Gain acquisition in the fourth quarter of fiscal 2020 in addition to higher non-trading software implementation costs related to various IT, client engagement, and accounting systems.

Occupancy and equipment rental increased \$10.7 million, principally due to additional leased office space.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Selling and marketing costs increased \$21.1 million, principally due to incremental costs related to the acquired retail forex business, partially offset by the prior year including costs for the bi-annual global sales meeting held in February 2020.

Travel and business development decreased \$4.4 million principally as a result of the impact of the response by governments and regulatory bodies to the COVID-19 pandemic, which included social distancing; travel restrictions, "shelter in place" and other governmental regulations.

Communications increased \$2.3 million, principally due to incremental costs related to the Gain acquisition in the fourth quarter of fiscal 2020.

Depreciation and amortization increased \$16.8 million, principally due to the amortization costs of the acquired intangible assets related to the Gain acquisition, as well as increases in depreciation of IT hardware, third-party software, internally developed software, and amortization of leasehold improvements.

Other expenses increased \$16.7 million, primarily due to incremental costs from recent acquisitions most notably related to higher non-income taxes, insurance and recruiting costs.

Bad debts, net of recoveries and impairment decreased \$8.3 million year-over-year. During the year ended September 30, 2021, bad debts, net of recoveries were \$10.4 million, principally related to client trading account deficits in our Commercial, Institutional, and Retail segments of \$3.4 million, \$0.6 million, and \$1.1 million, respectively. Additionally, we recorded bad debt expense of \$5.1 million related to trade receivables with physical clients.

During the year ended September 30, 2020, bad debts, net of recoveries were \$13.0 million, primarily related to client trading account deficits in our Commercial, Institutional, and Retail segments of \$3.5 million,

\$5.7 million, and \$0.6 million, respectively. Additionally, we recorded bad debt expense of \$3.2 million related to trade receivables with physical clients.

In connection with the integration of Gain, the Company re-evaluated all trading systems utilized across the organization in order to identify duplicative systems. In connection with this process, the Company determined that certain legacy capitalized developed software costs within our OTC foreign exchange and physical metals business would no longer be placed into service and utilized as expected prior to the merger with Gain. As a result, the Company recorded impairment charges of \$5.7 million in the year ended September 30, 2020.

Gain on Acquisitions and Other Gains, net: The results of the year ended September 30, 2021 include a gain of \$3.3 million related to an adjustment to the liabilities assumed as part of the Gain acquisition initially determined values, as of August 1, 2020. The results of the year ended September 30, 2020 included gain on acquisitions of \$81.9 million, principally related to the acquisition of Gain.

Provision for Taxes: The effective income tax rate was 25% in the year ended September 30, 2021 compared to 18% in the year ended September 30, 2020. The gains on acquisitions of \$3.3 million and \$81.9 million in the year ended September 30, 2021 and 2020, respectively, were not taxable and reduced the effective income tax rate 0.5% and 8.3% in the year ended September 30, 2021 and 2020, respectively.

The effective income tax rate for the year ended September 30, 2021 was higher than the U.S. federal statutory rate of 21% due to U.S. state and local taxes, global intangible low-taxed income ("GILTI"), U.S. and foreign permanent differences, and the amount of foreign earnings taxed at higher tax rates. The effective rate for the year ended September 30, 2020 was lower than the U.S. federal statutory rate of 21% due to the non-taxable gain recognized upon the acquisition of Gain.

Variable vs. Fixed Expenses

The table below sets forth our variable expenses and non-variable expenses as a percentage of total non-interest expenses for the periods indicated.

| (in millions) | Year Ended September 30, | | | | | |
|---|--------------------------|------------|------------|------------|------------|------------|
| | 2022 | % of Total | 2021 | % of Total | 2020 | % of Total |
| Variable compensation and benefits | \$ 478.1 | 29% | \$ 377.7 | 26% | \$ 296.8 | 27% |
| Transaction-based clearing expenses | 291.2 | 17% | 271.7 | 19% | 222.5 | 21% |
| Introducing broker commissions | 160.1 | 10% | 160.5 | 11% | 113.8 | 11% |
| Total variable expenses | 929.4 | 56% | 809.9 | 56% | 633.1 | 59% |
| Fixed compensation and benefits | 316.7 | 19% | 301.4 | 21% | 221.9 | 20% |
| Other fixed expenses | 394.5 | 24% | 309.8 | 22% | 205.8 | 19% |
| Bad debts, net of recoveries and impairment | 15.8 | 1% | 10.4 | 1% | 18.7 | 2% |
| Total non-variable expenses | 727.0 | 44% | 621.6 | 44% | 446.4 | 41% |
| Total non-interest expenses | \$ 1,656.4 | 100% | \$ 1,431.5 | 100% | \$ 1,079.5 | 100% |

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Our variable expenses include variable compensation paid to traders and risk management consultants, bonuses paid to operational, administrative, and executive employees, transaction-based clearing expenses and introducing broker commissions. We seek to make our non-interest expenses variable to the greatest extent possible, and to keep our fixed costs as low as possible.

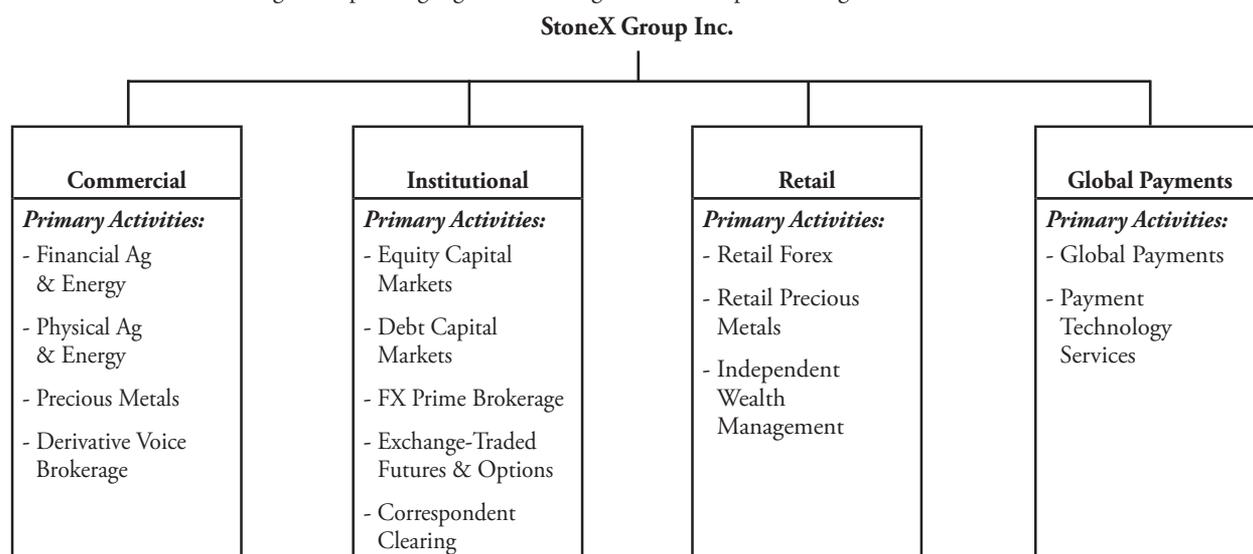

During the year ended September 30, 2022, non-variable expenses, excluding bad debts, net of recoveries, increased \$100.0 million, or 16%, compared to the year ended September 30, 2021.

During the year ended September 30, 2021, non-variable expenses, excluding bad debts, net of recoveries and impairment, increased \$183.5 million, or 43%, compared to the year ended September 30, 2020, principally driven by incremental costs from the Gain acquisition in the fourth quarter of the year ended September 30, 2020.

Segment Information

Our operating segments are based principally on the nature of the clients we serve (commercial, institutional, and retail), and a fourth operating segment, our global payments business. We manage our business in this manner due to our large global footprint, in which we have more than 3,600 employees allowing us to serve clients in more than 180 countries.

Our business activities are managed as operating segments and organized into reportable segments as shown below.

Operating revenues, net operating revenues, net contribution and segment income are some of the key measures used by management to assess the performance of each segment and for decisions regarding the allocation of our resources. Operating revenues are calculated as total revenues less cost of sales of physical commodities.

Net operating revenue is calculated as operating revenue less transaction-based clearing expenses, introducing broker commissions and interest expense.

Net contribution is calculated as net operating revenues less variable compensation. Variable compensation paid to risk management consultants and traders generally represents a fixed percentage, that can vary by revenue type, of an amount equal to revenues generated, and in some cases, revenues generated less transaction-based clearing expenses, base salaries and an overhead allocation.

Segment income is calculated as net contribution less non-variable direct segment costs. These non-variable direct expenses include trader base compensation and benefits, operational charges, trading systems and market information, professional fees, travel and business development, communications, bad debts, trade errors and direct marketing expenses.

Total Segment Results

The following table presents summary information concerning all of our business segments on a combined basis, excluding unallocated overhead, for the periods indicated.

| <i>(in millions)</i> | Year Ended September 30, | | | | | |
|---|--------------------------|-------------------------------|-------------|-------------------------------|-------------|-------------------------------|
| | 2022 | % of Operating Revenues | 2021 | % of Operating Revenues | 2020 | % of Operating Revenues |
| Sales of physical commodities | \$ 64,052.6 | | \$ 40,961.6 | | \$ 52,899.2 | |
| Principal gains, net | 1,150.5 | | 899.0 | | 620.8 | |
| Commission and clearing fees | 509.6 | | 488.4 | | 405.1 | |
| Consulting, management, and account fees | 108.5 | | 86.5 | | 79.2 | |
| Interest income | 230.0 | | 114.1 | | 140.0 | |
| Total revenues | 66,051.2 | | 42,549.6 | | 54,144.3 | |
| Cost of sales of physical commodities | 63,928.6 | | 40,861.1 | | 52,831.3 | |
| Operating revenues | 2,122.6 | 100% | 1,688.5 | 100% | 1,313.0 | 100% |
| Transaction-based clearing expenses | 292.3 | 14% | 270.3 | 16% | 221.0 | 17% |
| Introducing broker commissions | 160.3 | 8% | 161.2 | 10% | 113.6 | 9% |
| Interest expense | 134.6 | 6% | 52.2 | 3% | 85.9 | 7% |
| Net operating revenues | 1,535.4 | | 1,204.8 | | 892.5 | |
| Variable direct compensation and benefits | 413.5 | 19% | 336.1 | 20% | 253.0 | 19% |
| Net contribution | 1,121.9 | | 868.7 | | 639.5 | |
| Fixed compensation and benefits | 175.7 | | 162.3 | | 117.7 | |
| Other fixed expenses | 261.1 | | 189.8 | | 108.0 | |
| Bad debts, net of recoveries and impairment | 15.8 | | 10.4 | | 18.7 | |
| Total non-variable direct expenses | 452.6 | 21% | 362.5 | 21% | 244.4 | 19% |
| Other gain | 6.4 | | — | | — | |
| Segment income | \$ 675.7 | | \$ 506.2 | | \$ 395.1 | |

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Net contribution for all of our business segments increased \$253.2 million, or 29%, to \$1,121.9 million in the year ended September 30, 2022 compared to \$868.7 million in the year ended September 30, 2021. Segment income increased \$169.5 million, or 33%, to \$675.7 million in the year ended September 30, 2022 compared to \$506.2 million in the year ended September 30, 2021.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Net contribution for all of our business segments increased \$229.2 million, or 36%, to \$868.7 million in the year ended September 30, 2021 compared to \$639.5 million in the year ended September 30, 2020. Segment income increased \$111.1 million, or 28%, to \$506.2 million in the year ended September 30, 2021 compared to \$395.1 million in the year ended September 30, 2020.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Commercial

We offer our commercial clients a comprehensive array of products and services, including risk management and hedging services, execution and clearing of exchange-traded and OTC products, voice brokerage, market intelligence and physical trading, as well as commodity financing and logistics services. We believe our ability to provide these high-value-added products and services differentiates us from our competitors and maximizes our ability to retain our clients.

The tables below present the financial performance, a disaggregation of operating revenues, and select operating data and metrics used by management in evaluating the performance of the Commercial segment, for the periods indicated.

| <i>(in millions)</i> | Year Ended September 30, | | | | |

(1) Give-up fees as well as cash and voice brokerage are excluded from the calculation of listed derivatives, average rate per contract.

For information about the assets of this segment, see Note 22 to the Consolidated Financial Statements.

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Operating revenues increased \$157.3 million, or 29%, to \$692.1 million in the year ended September 30, 2022 compared to \$534.8 million in the year ended September 30, 2021. Net operating revenues increased \$153.4 million, or 35%, to \$586.5 million in the year ended September 30, 2022 compared to \$433.1 million in the year ended September 30, 2021.

Operating revenues derived from listed derivatives increased \$17.0 million, or 8%, to \$240.5 million in the year ended September 30, 2022 compared to \$223.5 million in the year ended September 30, 2021. This increase was principally driven by a 9% increase in the average rate per contract as a result of wider spreads in LME commodity markets which was partially offset by a 2% decrease in contract volumes as a result of decline in agricultural and soft commodity client volumes.

Operating revenues derived from OTC transactions increased \$64.9 million, or 45%, to \$208.3 million in the year ended September 30, 2022 compared to \$143.4 million in the year ended September 30, 2021. This increase was driven by a 16% increase in OTC volumes, primarily in agricultural and soft commodities as well as a 27% increase in the average rate per contract as a result of wider spreads in FX hedging and energy and renewable fuels markets.

Operating revenues derived from physical transactions increased \$48.2 million, or 36%, to \$180.4 million in the year ended September 30, 2022 compared to \$132.2 million in the year ended September 30, 2021, principally due to increased client activity in agricultural and energy commodities as well as continued strong client demand for precious metals. Operating revenues during the year ended September 30, 2022 were favorably impacted by realized gains of \$1.7 million on the sale of physical inventories carried at the lower of cost or net realizable value, for which losses on related derivative positions were recognized in prior periods. Operating revenues during the year ended September 30, 2021 included unrealized losses on derivative positions held against physical inventories carried at the lower of cost or net realizable value of \$2.2 million, and sold in subsequent quarters. In addition, the year ended September 30, 2021 included a \$1.9 million loss on the liquidation of certain physical inventories of crude oil and low sulfur fuel oil as a result of quality degradation and additional costs to sell.

Interest and fee income earned on client balances increased \$26.7 million, or 183%, to \$41.3 million in the year ended September 30, 2022 compared to \$14.6 million in the year ended September 30, 2021, as result of both a 30% increase in average client equity to \$2,149 million as well as an increase in short term interest rates.

Variable expenses, excluding interest, expressed as a percentage of operating revenues declined to 37% in the year ended September 30, 2022 compared to 42% in the year ended September 30, 2021, primarily as the result of the increase in interest income.

Segment income increased \$96.1 million, or 50%, to \$288.3 million in the year ended September 30, 2022 compared to \$192.2 million in the year ended September 30, 2021, principally driven by the growth in operating revenues which was partially offset by a \$16.5 million increase in other fixed expenses and a \$3.1 million increase in bad debts, net of recoveries and impairment. The increase in other fixed expenses principally related to a \$4.0 million increase in shared service

allocations, a \$3.2 million increase in travel and business development, a \$2.8 million increase in professional fees, a \$1.9 million increase in insurance expense and a \$1.5 million increase in selling and marketing.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Operating revenues increased \$103.3 million, or 24%, to \$534.8 million in the year ended September 30, 2021 compared to \$431.5 million in the year ended September 30, 2020. Net operating revenues increased \$79.7 million, or 23%, to \$433.1 million in the year ended September 30, 2021 compared to \$353.4 million in the year ended September 30, 2020.

Operating revenues derived from listed derivatives increased \$46.6 million, or 26%, to \$223.5 million in the year ended September 30, 2021 compared to \$176.9 million in the year ended September 30, 2020. This increase was principally driven by a 26% increase in the average rate per contract, as well as a 6% increase in contract volumes as a result of increased volatility in agricultural and base metal markets. This increase was partially offset by a \$6.7 million decline in derivative voice brokerage revenues.

Operating revenues derived from OTC transactions increased \$32.4 million, or 29%, to \$143.4 million in the year ended September 30, 2021 compared to \$111.0 million in the year ended September 30, 2020. This increase was driven by a 21% increase in OTC volumes as well as a 7% increase in the average rate per contract as a result of increased client activity in agricultural markets.

Operating revenues derived from physical transactions increased \$22.6 million, or 21%, to \$132.2 million in the year ended September 30, 2021 compared to \$109.6 million in the year ended September 30, 2020, principally due to increased client activity in agricultural and energy commodities as well as continued strong client demand for precious metals. The years ended September 30, 2021 and 2020 include unrealized losses on derivative positions held against physical inventories carried at the lower of cost or net realizable value of \$2.2 million and \$0.7 million, respectively. In addition, the years ended September 30, 2021 and 2020 included losses on the liquidation of certain physical inventories of crude oil and low sulfur fuel oil as a result of quality degradation and additional costs to sell of \$1.9 million and \$7.6 million, respectively.

Interest and fee income earned on client balances was \$14.6 million and \$14.5 million, respectively, in the years ended September 30, 2021 and 2020. A 62% increase in average client equity to \$1,648 million was offset by a significant decline in short term interest rates.

Variable expenses, excluding interest, expressed as a percentage of operating revenues was 42% in the year ended September 30, 2021 compared to 41% in the year ended September 30, 2020.

Segment income increased \$50.3 million, or 35%, to \$192.2 million in the year ended September 30, 2021 compared to \$141.9 million in the year ended September 30, 2020, principally driven by the growth in operating revenues which was partially offset by a \$1.4 million increase in fixed compensation and benefits as well as a \$5.6 million increase in other fixed expenses including a \$1.6 million increase in professional fees and a \$1.2 million increase in trading systems and market information.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Institutional

We provide institutional clients with a complete suite of equity trading services to help them find liquidity with best execution, consistent liquidity across a robust array of fixed income products, competitive and efficient clearing and execution in all major futures and securities exchanges globally as well as prime brokerage in equities and major

foreign currency pairs and swap transactions. In addition, we originate, structure and place debt instruments in the international and domestic capital markets. These instruments include asset-backed securities (primarily in Argentina) and domestic municipal securities.

The tables below present the financial performance, a disaggregation of operating revenues, and select operating data and metrics used by management in evaluating the performance of the Institutional segment, for the periods indicated.

(1) Give-up fee revenue are excluded from the calculation of listed derivative, average rate per contract.

(2) Interest income related to securities lending is excluded from the calculation of Securities RPM.

For information about the assets of this segment, see Note 22 to the Consolidated Financial Statements.

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Operating revenues increased \$163.4 million, or 24%, to \$831.8 million in the year ended September 30, 2022 compared to \$668.4 million in the year ended September 30, 2021. Net operating revenues increased \$64.1 million, or 15%, to \$483.5 million in the year ended September 30, 2022 compared to \$419.4 million in the year ended September 30, 2021.

Operating revenues derived from listed derivatives increased \$25.9 million, or 16%, to \$190.0 million in the year ended September 30, 2022 compared to \$164.1 million in the year ended September 30, 2021, principally driven by a 13% increase in listed derivative contract volumes compared to the year ended September 30, 2021, as a result of both an increase in market volatility as well as an increase in the number of clients in this business. This was partially offset by a 1% decline in the average rate per contract in the year ended September 30, 2022 compared to the year ended September 30, 2021.

Operating revenues derived from securities transactions increased \$77.4 million, or 18%, to \$513.4 million in the year ended September 30, 2022 compared to \$436.0 million in the year ended September 30, 2021. The ADV of securities traded increased 25%, principally driven by increased client activity in fixed income markets and to a lesser extent equity products. The RPM traded declined 5% in the year ended September 30, 2022 compared to the year ended September 30, 2021.

Operating revenues derived from FX contracts increased \$12.3 million, or 76%, to \$28.4 million in the year ended September 30, 2022 compared to \$16.1 million in the year ended September 30, 2021, primarily driven by a 142% increase in the ADV of FX contracts traded as a result of heightened volatility in global FX markets. The effect of the increase in ADV was partially offset by a 26% decline in the average rate per contract due to changes in product and client mix.

Finally, interest and fee income earned on client balances, which is associated with our listed derivative business, as well as our correspondent clearing and independent wealth management businesses, increased \$35.9 million, or 352%, to \$46.1 million in the year ended September 30, 2022 compared to \$10.2 million in the year ended September 30, 2021, as result of a 62% increase in average client equity and a 21% increase in average FDIC sweep client balances combined with a significant increase in short term interest rates.

As a result of the increase in short term interest rates and the increase in ADV, interest expense increased 205% compared to the prior year, with interest expense directly associated with serving as an institutional dealer in fixed income securities increasing \$52.7 million, interest paid to clients increasing \$14.5 million and interest expense directly attributable to securities lending activities increasing \$5.4 million compared to the prior year period.

Variable expenses, excluding interest, expressed as a percentage of operating revenues declined to 51% in the year ended September 30, 2022 compared to 55% in the year ended September 30, 2021, primarily as the result of the increase in interest income.

Segment income increased \$6.9 million, or 4%, to \$174.6 million in the year ended September 30, 2022 compared to \$167.7 million in the year ended September 30, 2021, primarily as a result of the increase in net operating revenues noted above, which was partially offset by a \$26.1 million, or 28% increase in non-variable direct expenses, excluding bad debts versus the year ended September 30, 2021. The increase

in non-variable direct expenses, excluding bad debts was primarily related to a \$5.2 million increase in fixed compensation and benefits, a \$3.9 million increase in trade systems and market information, a \$6.2 million increase in professional fees and a \$3.0 million increase in travel and business development.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Operating revenues increased \$44.3 million, or 7%, to \$668.4 million in the year ended September 30, 2021 compared to \$624.1 million in the year ended September 30, 2020. Net operating revenues increased \$55.6 million, or 15%, to \$419.4 million in the year ended September 30, 2021 compared to \$363.8 million in the year ended September 30, 2020.

Operating revenues derived from listed derivatives increased \$12.5 million, or 8%, to \$164.1 million in the year ended September 30, 2021 compared to \$151.6 million in the year ended September 30, 2020, principally driven by an 18% increase in the average rate per contract, which was partially offset by an 8% decline in listed derivative contract volumes in the year ended September 30, 2021 compared to the year ended September 30, 2020.

Operating revenues derived from securities transactions increased \$59.9 million, or 16%, to \$436.0 million in the year ended September 30, 2021 compared to \$376.1 million in the year ended September 30, 2020. The ADV of securities traded increased 61%, principally driven by increased client activity in fixed income markets and to a lesser extent equity products, however the RPM traded declined 28% in the year ended September 30, 2021 principally driven by lower spreads in fixed income products compared to the year ended September 30, 2020 which benefited from wider spreads driven by the onset of the COVID-19 pandemic.

Operating revenues derived from FX contracts declined \$7.9 million, or 33%, to \$16.1 million in the year ended September 30, 2021 compared to \$24.0 million in the year ended September 30, 2020, as a 25% increase in the ADV of FX contracts traded was more than offset by a 47% decline in the average rate per contract due to a decline in foreign currency volatility.

Finally, interest and fee income earned on client balances, which is associated with our listed derivative business, as well as our correspondent clearing and independent wealth management businesses, declined \$16.3 million, or 62%, to \$10.2 million in the year ended September 30, 2021 compared to \$26.5 million in the year ended September 30, 2020, principally as a result of a significant decline in short term interest rates. Partially offsetting the decline in short term interest rates was a 26% increase in average client equity and a 30% increase in average FDIC sweep client balances.

Also primarily as a result of the decline in short term interest rates, interest expense declined 48% compared to the prior year, with interest expense directly associated with serving as an institutional dealer in fixed income securities declining \$23.9 million and interest expense directly attributable to securities lending activities declining \$7.4 million compared to the prior year period.

Variable expenses, excluding interest, expressed as a percentage of operating revenues increased to 55% in the year ended September 30, 2021 compared to 49% in the year ended September 30, 2020, primarily as the result of the decline in interest income and higher variable compensation.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Segment income increased \$14.8 million, or 10%, to \$167.7 million in the year ended September 30, 2021 compared to \$152.9 million in the year ended September 30, 2020, primarily as a result of the increase in operating revenues noted above as well as a \$9.2 million decline in bad debt expenses as compared to the year ended September 30, 2020. Non-variable direct expenses, excluding bad debts, increased \$6.4 million, or 7% versus the year ended September 30, 2020, primarily related to an increase in market information, professional fees and depreciation of internally developed software which was partially offset by lower travel and business development expenses.

The tables below present the financial performance, a disaggregation of operating revenues, and select operating data and metrics used by management in evaluating the performance of the Retail segment, for the periods indicated.

| <i>(in millions)</i> | Year Ended September 30, | | | | |

(1) The ADV for the year ended September 30, 2020 is reflective of the ADV post-acquisition of Gain, and is calculated based on 43 trading days with the activities of Gain, acquired effective August 1, 2020.

For information about the assets of this segment, see Note 22 to the Consolidated Financial Statements.

Retail

We provide our retail clients around the world access to over 18,000 global financial markets, including spot foreign exchange ("forex") and CFDs, which are investment products with returns linked to the performance of underlying assets, and both financial trading and physical investment in precious metals. In addition, our independent wealth management business offers a comprehensive product suite to retail investors in the United States.

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Operating revenues increased \$78.7 million, or 23%, to \$426.7 million in the year ended September 30, 2022 compared to \$348.0 million in the year ended September 30, 2021. Net operating revenues increased \$80.5 million, or 36%, to \$302.9 million in the year ended September 30, 2022 compared to \$222.4 million in the year ended September 30, 2021.

Operating revenues derived from FX / CFD contracts increased \$85.0 million, or 38%, to \$310.9 million, primarily as a result of a 32% increase in RPM and a 3% increase in FX/CFD contracts ADV compared to the year ended September 30, 2021.

These increases were principally driven by heightened volatility which results in increased client trading activity and spread capture.

Operating revenues derived from securities transactions, which are related to our independent wealth management activities, declined \$0.6 million, or 1%, to \$97.0 million in the year ended September 30, 2022 compared to \$97.6 million in the year ended September 30, 2021.

Operating revenues derived from physical contracts declined \$6.5 million, or 32%, to \$13.9 million in the year ended September 30, 2022 compared to \$20.4 million in the year ended September 30, 2021, with the comparative prior year period reflecting a strong performance related to heightened client activity caused by the Covid-19 pandemic.

Interest and fee income earned on client balances increased \$0.7 million, or 58%, to \$1.9 million primarily as a result of an increase in short term interest rates.

Variable expenses, excluding interest, as a percentage of operating revenues were 34% in the year ended September 30, 2022 compared to 41% in the year ended September 30, 2021, with the decrease in the variable rate percentage being driven by the strong growth in operating revenues derived from FX/CFD contracts which has a lower variable rate cost base.

Segment income increased \$47.6 million, or 70%, to \$115.4 million in the year ended September 30, 2022 compared to \$67.8 million in the year ended September 30, 2021, primarily as a result of the increase in net operating revenues noted above, as well as a \$6.4 million foreign exchange antitrust class action settlement received in the year ended September 30, 2022 in our Retail forex business. Non-variable direct expenses increased \$34.7 million, or 25%, compared to the year ended September 30, 2021. The increase in non-variable direct expenses, was primarily a result of a \$14.9 million increase in selling and marketing expenses, a \$4.1 million increase in fixed compensation and benefits, a \$3.6 million increase depreciation and amortization, a \$2.5 million increase in trading systems and market information, a \$1.9 million increase in travel and business development and a \$1.4 million increase in professional fees.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Operating revenues increased \$208.0 million, or 149%, to \$348.0 million in the year ended September 30, 2021 compared to \$140.0 million in the year ended September 30, 2020. Net operating revenues increased \$158.6 million, or 249%, to \$222.4 million in the year ended September 30, 2021 compared to \$63.8 million in the year ended September 30, 2020.

Operating revenues derived from FX / CFD contracts increased \$183.0 million, or 427% to \$225.9 million, and represent the incremental revenues from the acquisition of Gain, effective August 1, 2020. For Gain, the year ended September 30, 2021 includes 259 trading days compared to 43 trading days post acquisition, during the year ended September 30, 2020.

Operating revenues derived from securities transactions relates to our independent wealth management activities which increased \$15.4 million, or 19%, to \$97.6 million in the year ended September 30, 2021 compared to \$82.2 million in the year ended September 30, 2020.

Operating revenues derived from physical contracts increased \$7.6 million, or 59%, to \$20.4 million in the year ended September 30, 2021 compared to \$12.8 million in the year ended September 30, 2020, principally driven by continued strong client demand for precious metals related to the Covid-19 pandemic.

Interest and fee income earned on client balances declined \$0.5 million, or 29%, to \$1.2 million primarily as a result of the decline in short term interest rates.

Variable expenses, excluding interest, as a percentage of operating revenues were 41% in the year ended September 30, 2021 compared to 57% in the year ended September 30, 2020, with the decrease in the variable rate percentage being driven by the Gain acquisition effective August 1, 2020, which brought a large lower variable rate cost base.

Segment income increased \$36.1 million, or 114% to \$67.8 million in the year ended September 30, 2021 compared to \$31.7 million in the year ended September 30, 2020, primarily as a result of the increase in net operating revenues noted above. The increase in non-variable direct expenses, was primarily a result of incremental costs from the Gain acquisition.

Global Payments

We provide customized payment, technology and treasury services to banks and commercial businesses as well as charities and non-governmental and government organizations. We provide transparent pricing and offer payments services in more than 185 countries and 140 currencies, which we believe is more than any other payments solutions provider.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

The tables below present the financial performance, a disaggregation of operating revenues, and select operating data and metrics used by management in evaluating the performance of the Global Payments segment for the periods indicated.

| <i>(in millions)</i> | Year Ended September 30, | | | | |
|---------------------------------------|--------------------------|----------|---------|----------|---------|

(1) Rate per million is based on principal gains, net and commission and clearing fees revenues and the ADV shown above.

For information about the assets of this segment, see Note 22 to the Consolidated Financial Statements.

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Operating revenues increased \$34.7 million, or 25%, to \$172.0 million in the year ended September 30, 2022 compared to \$137.3 million in the year ended September 30, 2021. Net operating revenues increased \$32.6 million, or 25%, to \$162.5 million in the year ended September 30, 2022 compared to \$129.9 million in the year ended September 30, 2021.

The increase in operating revenues was primarily driven by a 15% increase in the average daily volume as well as a 10% increase in the RPM traded compared to the year ended September 30, 2021.

Variable expenses, excluding interest, expressed as a percentage of operating revenues were 24% in both the years ended September 30, 2022 and 2021.

Segment income increased \$18.9 million, or 24%, to \$97.4 million in the year ended September 30, 2022 compared to \$78.5 million in the year ended September 30, 2021. This increase primarily resulted from the increase in net operating revenues, partially offset by a \$8.6 million increase in non-variable direct expenses versus the prior year period, which includes a \$4.2 million increase in fixed compensation and benefits, a \$1.2 million increase in travel and business development and a \$0.7 million increase in non-trading technology and support.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Operating revenues increased \$19.9 million, or 17%, to \$137.3 million in the year ended September 30, 2021 compared to \$117.4 million in the year ended September 30, 2020. Net operating revenues increased \$18.4 million, or 17% to \$129.9 million in the year ended September 30, 2021 compared to \$111.5 million in the year ended September 30, 2020.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

The increase in operating revenues was primarily driven by a 20% increase in the average daily volume which was partially offset by a 2% decline in the RPM traded.

Variable expenses, excluding interest, expressed as a percentage of operating revenues were 24% in both the year ended September 30, 2021 and the year ended September 30, 2020.

Segment income increased \$9.9 million, or 14%, to \$78.5 million in the year ended September 30, 2021 compared to \$68.6 million in the year ended September 30, 2020. This increase primarily resulted from the increase in net operating revenues, partially offset by a \$4.2 million increase in non-variable direct expenses versus the prior year period, which includes a \$2.9 million increase in fixed compensation and benefits.

Unallocated Costs and Expenses

The following table is a breakout of our unallocated costs and expenses from the total costs and expenses shown above. The unallocated costs and expenses include certain shared services such as information technology, accounting and treasury, credit and risk, legal and compliance, and human resources and other activities.

| (in millions) | Year Ended September 30, | | | | |
|--|--------------------------|----------|----------|----------|----------|
| | 2022 | % Change | 2021 | % Change | 2020 |
| Compensation and benefits: | | | | | |
| Variable compensation and benefits | \$ 59.5 | 58% | \$ 37.6 | (7)% | \$ 40.5 |
| Fixed compensation and benefits | 119.2 | —% | 119.1 | 37% | 86.8 |
| | 178.7 | 14% | 156.7 | 23% | 127.3 |
| Other expenses: | | | | | |
| Occupancy and equipment rental | 35.7 | 8% | 33.1 | 41% | 23.4 |
| Non-trading technology and support | 38.3 | 20% | 31.8 | 43% | 22.2 |
| Professional fees | 26.1 | 13% | 23.0 | 5% | 22.0 |
| Depreciation and amortization | 21.7 | 14% | 19.0 | 15% | 16.5 |
| Communications | 5.5 | (15)% | 6.5 | 5% | 6.2 |
| Selling and marketing | 5.8 | 241% | 1.7 | (59)% | 4.1 |
| Trading systems and market information | 4.6 | 10% | 4.2 | 62% | 2.6 |
| Travel and business development | 4.0 | 208% | 1.3 | (43)% | 2.3 |
| Other | 18.6 | (21)% | 23.4 | 22% | 19.2 |
| | 160.3 | 11% | 144.0 | 22% | 118.5 |
| Total compensation and other expenses | \$ 339.0 | 13% | \$ 300.7 | 22% | \$ 245.8 |

Year Ended September 30, 2022 Compared to Year Ended September 30, 2021

Total unallocated costs and other expenses increased \$38.3 million, or 13%, to \$339.0 million in the year ended September 30, 2022 compared to \$300.7 million in the year ended September 30, 2021. Compensation and benefits increased \$22.0 million, or 14%, to \$178.7 million in the year ended September 30, 2022 compared to \$156.7 million in the year ended September 30, 2021.

During the year ended September 30, 2022, the increase in variable compensation and benefits was principally related to higher incentives driven by increased company performance over the prior year. Fixed compensation and benefits increased modestly during the year ended September 30, 2022, principally due to increased headcount, partially offset by lower severance costs. During the year ended September 30, 2022, severance costs were \$0.9 million. During the year ended September 30, 2021, severance costs were \$3.5 million, principally due to the departure of certain senior officers.

During the year ended September 30, 2022, the increase in non-trading technology and support is principally due to an increase in non-trading software licensing and maintenance costs within our IT department. During the year ended September 30, 2022, the increase in selling and marketing expenses is principally due to the costs of holding our bi-annual global sales and strategy meeting in March 2022. During

the year ended September 30, 2022, the increase in travel and business development is principally due to increased travel among the support functions with the lifting of certain social distancing and travel restrictions, following periods of limited travel due to responses by governments and societies to the COVID-19 pandemic.

Year Ended September 30, 2021 Compared to Year Ended September 30, 2020

Total unallocated costs and other expenses increased \$54.9 million, or 22%, to \$300.7 million in the year ended September 30, 2021 compared to \$245.8 million in the year ended September 30, 2020. Compensation and benefits increased \$29.4 million, or 23%, to \$156.7 million in the year ended September 30, 2021 compared to \$127.3 million in the year ended September 30, 2020.

During the year ended September 30, 2021, the increase in fixed compensation and benefits was primarily related to the increase in headcount, principally due to the acquisition of Gain, across nearly all administrative departments, including IT, compliance, accounting, human resources, as well as credit and risk. Fixed compensation and benefits during the year ended September 30, 2021 include severance costs of \$3.5 million, principally due to the departure of certain senior officers. During the year ended September 30, 2020, severance costs were \$0.5 million.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

During the year ended September 30, 2021, the increase in other expenses is primarily due higher occupancy costs, principally related to an increase in leased office space. Additionally, non-trading technology and support increased due to higher support and maintenance costs related to various IT, client engagement, accounting, and human resources systems.

Liquidity, Financial Condition and Capital Resources

Overview

Liquidity is our ability to generate sufficient funding to meet all of our cash needs. Liquidity is of critical importance to us and imperative to maintaining our operations on a daily basis. Senior management establishes liquidity and capital policies, which we monitor and review for funding from both internal and external sources. We continuously evaluate how effectively our policies support our business operations. We have historically financed our liquidity and capital needs principally with funds generated from our subsidiaries' operations, issuing debt and equity securities, and accessing committed credit facilities. We plan to finance our future operating liquidity and regulatory capital needs in a manner consistent with our past practice. Liquidity and capital matters are reported regularly to our Board of Directors.

Regulatory

StoneX Financial Inc. is registered as a broker-dealer with the SEC and is a member of both FINRA and MSRB. In addition, StoneX Financial Inc. is registered as a futures commission merchant with the CFTC and NFA, and a member of various commodities and futures exchanges in the U.S. and abroad. StoneX Financial Inc. has a responsibility to meet margin calls at all exchanges on a daily basis, and even on an intra-day basis, if deemed necessary by relevant regulators or exchanges. We require our clients to make margin deposits the next business day, and we require our largest clients to make intra-day margin payments during periods of significant price movement. Margin required to be posted to the exchanges is a function of our clients' net open positions and required margin per contract. StoneX Financial Inc. is subject to minimum capital requirements under Section 4(f)(b) of the Commodity Exchange Act, Part 1.17 of the rules and regulations of the CFTC and the SEC Uniform Net Capital Rule 15c3-1 under the Securities Exchange Act of 1934. StoneX Financial Inc. is also subject to the Rule 15c3-3 of the Securities Exchange Act of 1934, as amended ("Customer Protection Rule").

Gain Capital Group, LLC is registered as both a futures commission merchant and registered foreign exchange dealer, subject to minimum capital requirements under Section 4(f)(b) of the Commodity Exchange Act, Part 1.17 of the rules and regulations of the CFTC and NFA Financial Requirements, Sections 1 and 11.

StoneX Markets LLC is a CFTC provisionally registered swap dealer, whose business is overseen by the NFA. CFTC 23.154, Calculation of Initial Margin rules impose requirements on registered swap dealers and certain counterparties to exchange initial margin, with phased-in compliance dates, under which we fall in the final compliance date tier recently extended to September 2022. Additionally, the CFTC finalized the proposed net capital rules applicable to swap dealers on July 22, 2020, with the new rules effective October 6, 2021.

These rules specify the minimum amount of capital that must be available to support our clients' account balances and open trading positions, including the amount of assets that StoneX Financial Inc., Gain Capital Group, LLC and StoneX Markets LLC must maintain in relatively liquid form. Further, the rules are designed to maintain general financial integrity and liquidity.

StoneX Financial Ltd is regulated by the FCA, the regulator of the financial services industry in the U.K. and is subject to regulations which impose regulatory capital requirements. StoneX Financial Ltd is a member of various commodities and futures exchanges in the U.K. and Europe and has the responsibility to meet margin calls at all exchanges on a daily basis and intra-day basis, as necessary. StoneX Financial Ltd is required to be compliant with the U.K.'s 'MIFIDPRU' regulation. To comply with these standards, we have implemented daily liquidity procedures, conduct periodic reviews of liquidity by stressed scenarios, and are required to maintain enough liquidity for the firm to survive for one year under the appropriate stressed conditions.

The regulations discussed above limit funds available for dividends to us. As a result, we may be unable to access our operating subsidiaries' funds when we need them.

In our physical commodities trading, commercial hedging OTC, securities and foreign exchange trading activities, we may be required upon to meet margin calls with our various trading counterparties based upon the underlying open transactions we have in place with those counterparties.

We continuously review our overall credit and capital needs to ensure that our capital base, both stockholders' equity and debt, as well as available credit facilities can appropriately support the anticipated financing needs of our operating subsidiaries.

As of September 30, 2022, we had total equity of \$1,070.1 million, outstanding loans under revolving credit facilities of \$485.1 million and \$339.1 million outstanding on our senior secured notes, net of deferred financing costs.

A substantial portion of our assets are liquid. As of September 30, 2022, approximately 97% of our assets consisted of cash; securities purchased under agreements to resell; securities borrowed; deposits with and receivables from exchange-clearing organizations, broker-dealers, clearing organizations and counterparties; client receivables; marketable financial instruments and investments; and physical commodities inventory. All assets that are not client and counterparty deposit financed are financed by our equity capital, bank loans, short-term borrowings from financial instruments sold, not yet purchased and under repurchase agreements, securities loaned and other payables.

As of September 30, 2022, we had deferred tax assets totaling \$52.0 million. We are required to assess the need for deferred tax asset valuation allowances at each reporting period. We record a valuation allowance against deferred tax assets when it is considered more likely than not that we will not realize all or a portion of our deferred tax assets. The valuation allowance for deferred tax assets as of September 30, 2022 and 2021 was \$15.8 million and \$15.0 million, respectively. The valuation allowances as of September 30, 2022 and 2021 were primarily related to U.S. state and local, and foreign net operating loss carryforwards and foreign tax credits acquired through the merger with Gain that, in the judgment of management, are not more likely than not to be realized.

Client and Counterparty Credit and Liquidity Risk

Our operations expose us to credit risk of default of our clients and counterparties. The risk includes liquidity risk to the extent our clients or counterparties are unable to make timely payment of margin or other credit support. We are indirectly exposed to the financing and liquidity risks of our clients and counterparties, including the risks that our clients and counterparties may not be able to finance their operations.

As a clearing broker, we act on behalf of our clients for all trades consummated on exchanges. We must pay initial and variation margin to the exchanges, on a net basis, before we receive the required payments from our clients. Accordingly, we are responsible for our clients' obligations with respect to these transactions, which exposes us to significant credit risk. Our clients are required to make any margin deposits the next business day, and we require our largest clients to make intra-day margin payments during periods of significant price movement. Our clients are obligated to maintain initial margin requirements at the level set by the respective exchanges, but we have the ability to increase margin requirements for clients based on their open positions, trading activity, or market conditions.

As it relates to OTC derivative transactions, we act as a principal, which exposes us to the credit risk of both our clients and the counterparties with which we offset our client positions. As with exchange-traded transactions, our OTC transactions require that we meet initial and variation margin payments on behalf of our clients before we receive related required payments from our clients. OTC clients are required to post sufficient collateral to meet margin requirements based on value-at-risk models as well as variation margin requirements based on the price movement of the commodity or security in which they transact. Our clients are required to make any margin deposits the next business day, and we may require our largest clients to make intra-day margin payments during periods of significant price movement. In this business as well, we have the ability to increase the margin requirements for clients based on their open positions, trading activity, or market conditions. On a limited basis, we provide credit thresholds to certain clients, based on internal evaluations and monitoring of client creditworthiness.

In addition, with OTC transactions, we are at risk that a counterparty will fail to meet its obligations to us when due. We would then be exposed to the risk that the settlement of a transaction which is due a client will not be collected from the respective counterparty with which the transaction was offset. We continuously monitor the credit quality of our respective counterparties and mark our positions held with each counterparty to market on a daily basis.

We enter into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, finance financial instruments, acquire securities to cover short positions, acquire securities for settlement, and to accommodate counterparties' needs. In connection with these agreements and transactions, it is our policy to receive or pledge cash or securities to adequately collateralize such agreements and transactions in accordance with general industry guidelines and practices. The collateral is valued daily and we may require counterparties to deposit additional collateral or return collateral pledged, when appropriate.

Option Sellers

In November 2018, balances in approximately 300 accounts of the FCM division of our wholly owned subsidiary, StoneX Financial Inc., declined below required maintenance margin levels and into deficit balances, primarily as a result of significant and unexpected price fluctuations in the natural gas markets. All positions in these accounts, which were managed by OptionSellers.com Inc. ("OptionSellers"), an independent Commodity Trading Advisor ("CTA"), were liquidated in accordance with StoneX Financial Inc.'s client agreements and obligations under market regulation standards. OptionSellers, in its role as a CTA, had been granted by each of its clients full discretionary authority to manage the trading in the client accounts, while StoneX Financial Inc. acted solely as the clearing firm in its role as the FCM.

StoneX Financial Inc.'s client agreements hold account owners liable for all losses in their accounts and obligate the account holders to reimburse StoneX Financial Inc. for any account deficits in their accounts. As of September 30, 2022, the receivable from these client accounts, net of collections and other allowable deductions was \$25.9 million, with no individual account receivable exceeding \$1.4 million. As of September 30, 2022, the allowance against these uncollected balances was \$7.6 million. The Company is pursuing collection of the uncollected balances through arbitration proceedings against the account holders. The Company will consider developments in these proceedings, and any other relevant matters, in determining whether any changes in the allowance against the uncollected balances are required.

In these and other arbitration proceedings, clients are seeking damages from StoneX Financial Inc. relating to the trading losses in their accounts.

During the year ended September 30, 2022, we resolved several of these arbitration claims through arbitration decisions and privately negotiated settlements. All of the arbitration panels that issued decisions during the year awarded StoneX Financial Inc. the full amount of the uncollected balances. A portion of the panels also awarded relief to account holders. The amount of relief awarded was not material to us, individually or in the aggregate. As noted, several of the arbitrations were resolved through privately negotiated settlement, pursuant to which the account holders agreed to pay some or all of their outstanding deficit balances. In October 2022, we reached an additional privately negotiated settlement of an arbitration proceeding, pursuant to which the accounts holders agreed to pay all of their outstanding deficit balances and we made certain immaterial payments to the account holders. We intend to continue vigorously pursuing claims through arbitration and settling cases in what we determine to be appropriate circumstances. The ultimate outcome of remaining arbitrations cannot presently be determined.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Depending on future collections and the outcomes of arbitration proceedings, any provisions for bad debts and actual losses may or may not be material to our financial results. However, we believe that the likelihood of a material adverse outcome is remote, and do not believe that any potential losses related to this matter would impact our ability to comply with our ongoing liquidity, capital, and regulatory requirements.

Primary Sources and Uses of Cash

Our cash and cash equivalents and client cash and securities held for clients are held at banks, deposits at liquidity providers, investments in money market funds that invest in highly liquid investment grade securities including U.S. treasury bills, as well as investments in U.S. treasury bills. In general, we believe all of our investments and deposits are of high credit quality and we have more than adequate liquidity to conduct our businesses.

Our assets and liabilities may vary significantly from period to period due to changing client requirements, economic and market conditions and our growth. Our total assets as of September 30, 2022 and 2021, were \$19.9 billion and \$18.8 billion, respectively. Our operating activities generate or utilize cash as a result of net income or loss earned or incurred during each period and fluctuations in our assets and liabilities. The most significant fluctuations arise from changes in the level of client activity, commodities prices and changes in the balances of financial instruments and commodities inventory. StoneX Financial Inc. and StoneX Financial Ltd occasionally utilize their

margin line credit facilities, on a short-term basis, to meet intraday settlements with the commodity exchanges prior to collecting margin funds from their clients.

The majority of the assets of StoneX Financial Inc., StoneX Financial Ltd, StoneX Markets LLC, and Gain Capital Group, LLC are restricted from being transferred to us or other affiliates due to specific regulatory requirements. This restriction has no current impact on our ability to meet our cash obligations, and no such impact is expected in the future.

We have liquidity and funding policies and processes in place that are intended to maintain sufficient flexibility to address both company-specific and industry liquidity needs. The majority of our excess funds is held with high-quality institutions, under highly liquid reverse repurchase agreements, U.S. government obligations, interest earning cash deposits and AA-rated money market investments.

We do not intend to distribute earnings of our foreign subsidiaries in a taxable manner, and therefore intend to limit distributions to earnings previously taxed in the U.S., or earnings that would qualify for the 100 percent dividends received deduction, and earnings that would not result in any significant foreign taxes. We repatriated \$29.7 million and \$300.6 million for the fiscal year ended September 30, 2022 and 2021, respectively, of earnings previously taxed in the U.S. resulting in no significant incremental taxes. Therefore, the Company has not recognized a deferred tax liability on its investment in foreign subsidiaries.

Senior Secured Notes

In June 2020, we issued \$350.0 million in aggregate principal amount of our 8.625% Senior Secured Notes due 2025 (the "Notes") at the offering price of 98.5% of the aggregate principal amount. We used the net proceeds from the sale of the Notes to fund the preliminary cash consideration for the acquisition of Gain, to pay certain related transactions fees and expenses, and to fund the repayment of Gain's 5.00% Convertible Senior Notes due 2022, with the exception of \$0.5 million which was redeemed in August 2022.

The Senior Secured Notes are fully and unconditionally guaranteed, jointly and severally, on a senior second lien secured basis, by certain subsidiaries of the Company that guarantee the Company's senior committed credit facility and by Gain and certain of its domestic subsidiaries.

The Notes will mature on June 15, 2025. Interest on the Notes accrues at a rate of 8.625% per annum and is payable semiannually in arrears on June 15 and December 15 of each year. We incurred debt issuance costs of \$9.5 million in connection with the issuance of the Notes, which are being amortized over the term of the Notes under the effective interest method.

During the year ended September 30, 2021, we repurchased \$1.6 million of the principal amount of the Notes, for 103% of the principal amount, plus accrued and unpaid interest.

We have had the right, since June 15, 2022, to redeem the Notes, in whole or in part, at the redemption prices set forth in the indenture.

Committed Credit Facilities

As of September 30, 2022, we had four committed bank credit facilities, totaling \$1,000.0 million, of which \$477.0 million was outstanding. Additional information regarding our bank credit facilities can be found in Note 11 of the Consolidated Financial Statements. The credit facilities include:

- A three-year first-lien senior secured syndicated loan facility is available to us for general working capital requirements and capital expenditures. The facility was amended on April 21, 2022 to replace the revolving credit facility and Term Loan A facility with

a \$475.0 million revolving credit facility and extend the maturity date to April 21, 2025. The amended facility includes interest at the Secured Overnight Financing Rate ("SOFR") plus a spread and is secured by substantially all of our subsidiaries assets. Prior to the amendment, the Company was required to make quarterly principal payments against the Term Loan equal to 1.25% of the original balance. During the year ended September 30, 2022, prior to its replacement, the Company made scheduled quarterly principal payments against the Term Loan equal to \$4.9 million.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

- An unsecured committed line of credit until March 31, 2023, under which \$75.0 million is available to our wholly owned subsidiary, StoneX Financial Inc. to provide short term funding of margin to commodity exchanges as necessary.
- A syndicated committed borrowing facility is available to our wholly owned subsidiary, StoneX Commodity Solutions LLC ("StoneX Commodity Solutions") to finance commodity financing arrangements and commodity repurchase agreements. The facility was amended on July 28, 2022 to increase the amount available from \$325.0 million to \$400.0 million and extend the maturity date to July 28, 2024.
- An unsecured syndicated loan facility, under which our subsidiary, StoneX Financial Ltd is entitled to borrow up to \$50.0 million, subject to certain terms and conditions of the credit agreement. This facility is intended to provide short-term funding of margin to commodity exchanges as necessary. During November 2022, the facility was renewed to extend the maturity date to October 14, 2023.

Additional information regarding the committed bank credit facilities can be found in Note 11 of the Consolidated Financial Statements. As reflected above, one of our committed credit facilities is scheduled to expire during the year ending September 30, 2023. We intend to renew or replace this facility as it expires, and based on our liquidity position and capital structure, we believe we will be able to do so.

As of September 30, 2022, we had four uncommitted bank credit facilities with no outstanding balance. The credit facilities include:

- A secured uncommitted loan facility under which StoneX Financial Inc. may borrow up to \$75.0 million, collateralized by commodity warehouse receipts, to facilitate U.S. commodity exchange deliveries of its clients, subject to certain terms and conditions of the credit agreement. There were no borrowings outstanding under this credit facility at September 30, 2022 and 2021.
- A secured uncommitted loan facility under which StoneX Financial Inc. may borrow up to \$100.0 million for short term funding of firm and client margin requirements, subject to certain terms and conditions of the agreement. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to us under a clearing arrangement. There were no borrowings outstanding under this credit facility at September 30, 2022 and 2021.
- A secured uncommitted loan facility under which StoneX Financial Inc. may borrow for short term funding of proprietary and client securities margin requirements, subject to certain terms and conditions of the agreement. The uncommitted amount available to be borrowed is not specified, and all requests for borrowing are subject to the sole discretion of the lender. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to us. The amounts borrowed under the facilities are payable on demand. There were no borrowings outstanding under this credit facility as of September 30, 2022 and 2021.

- During the year ended September 30, 2022, we executed a secured, uncommitted loan facility, under which StoneX Financial Ltd may borrow up to \$45.0 million, collateralized by commodities warehouse receipts, to facilitate the financing of inventory of commodities, subject to certain terms and conditions of the credit agreement. There were \$0.0 million and \$25.0 million in borrowings outstanding under this credit facility as of September 30, 2022 and 2021, respectively.

Our facility agreements contain certain financial covenants relating to financial measures on a consolidated basis, as well as on a stand-alone subsidiary basis, in certain cases, including minimum tangible net worth, minimum regulatory capital, minimum net unencumbered liquid assets, maximum net loss, minimum fixed charge coverage ratio and maximum funded debt to net worth ratio. Failure to comply with any such covenants could result in the debt becoming payable on demand. As of September 30, 2022, we and our subsidiaries are in compliance with all of our financial covenants under the outstanding facilities.

In accordance with required disclosure as part of our three-year syndicated revolving loan facility, during the trailing twelve months ended September 30, 2022, interest expense directly attributable to trading activities includes \$62.3 million in connection with trading activities conducted as an institutional dealer in fixed income securities, and \$23.0 million in connection with securities lending activities.

Other Capital Considerations

Our activities are subject to various significant governmental regulations and capital adequacy requirements, both in the U.S. and in the international jurisdictions in which we operate. Our subsidiaries are in compliance with all of their capital regulatory requirements as of September 30, 2022. Additional information on our subsidiaries subject to significant net capital and minimum net capital requirements can be found in Note 21 of the Consolidated Financial Statements.

Our subsidiary, StoneX Markets LLC, is a CFTC provisionally registered swap dealer, and under these capital rules is subject to a minimum regulatory capital requirement of \$20.0 million for the first time during the year ended September 30, 2022. The Dodd-Frank Act created a regulatory regime governing OTC swaps and imposed further regulations on listed derivatives. During 2016, CFTC 23.154, Calculation of Initial Margin rules came into effect, imposing new requirements on registered swap dealers and certain counterparties to exchange initial margin, with phased-in compliance dates, with StoneX Markets LLC falling in the final compliance date tier of September 2022.

Compliance with this or other swap-related regulatory capital requirements may require us to devote more capital to these businesses or otherwise restructure our operations, such as by combining these businesses with other regulated subsidiaries that must also satisfy regulatory capital requirements. StoneX Markets LLC has faced, and may continue to face, increased costs due to the registration and regulatory requirements listed above, as may any other of our subsidiaries that may be required to register, or may register voluntarily, as a swap dealer and/or swap execution facility.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Cash Flows

We include client cash and securities that meet the short term requirement for cash classification to be segregated for regulatory purposes in our consolidated cash flow statements. We hold a significant amount of U.S. Treasury obligations which represent investment of client funds or client-owned investments pledged in lieu of cash margin. U.S. Treasury securities held with third-party banks or pledged with exchange-clearing organizations representing investments of client funds or which are held for particular clients in lieu of cash margin are included in the beginning and ending cash balances reconciled on our consolidated statements of cash flows to the extent that they have an original or acquired maturity of 90 days or less and, therefore, meet the definition of a segregated cash equivalent. Purchases and sales of U.S. Treasury securities representing investment of clients' funds and U.S. Treasury securities pledged or redeemed by particular clients in lieu of cash margin are presented as operating uses and sources of cash, respectively, within the operating section of the consolidated statements of cash flows if they have an original or acquired maturity of greater than 90 days. Typically, there is an offsetting use or source of cash related to the change in the payables to clients. However, we will report a use of cash in periods where segregated U.S. Treasury securities that meet the aforementioned definition of a segregated cash equivalent mature and are replaced with U.S. Treasury securities that have original or acquired maturities that are greater than 90 days.

Our cash, segregated cash, cash equivalents, and segregated cash equivalents decreased from \$6,509.5 million as of September 30, 2021 to \$6,285.1 million as of September 30, 2022, a net decrease of \$224.4 million. Net cash of \$229.5 million was used by operating activities, including movements typical of our operations, with large changes coming from payables to clients, funds with broker dealers and clearing organizations, as well as securities sold.

In the broker-dealer and related trading industries, companies report trading activities in the operating section of the statement of cash flows. Due to the daily price volatility in the commodities market, as well as changes in margin requirements, fluctuations in the balances of deposits held at various exchanges, marketable securities and client commodity accounts may occur from day-to-day. A use of cash, as calculated on the consolidated statement of cash flows, includes unrestricted cash transferred and pledged to the exchanges or guaranty funds. These funds are held in interest-bearing deposit accounts at the exchanges, and based on daily exchange requirements, may be withdrawn and returned to unrestricted cash. Additionally, within our unregulated OTC and foreign exchange operations, cash deposits received from clients are reflected as cash provided from operations. Subsequent transfer of these cash deposits to counterparties or exchanges to margin their open positions will be reflected as an operating use of cash to the extent the transfer occurs in a different period than the cash deposit was received.

Unrealized gains and losses on open positions revalued at prevailing foreign currency exchange rates are included in trading revenue but have no direct impact on cash flow from operations. Similarly, gains and losses become realized when client transactions are liquidated, though they do not affect cash flow. To some extent, the amount of net deposits made by our clients in any given period is influenced by the impact of gains and losses on our client balances, such that clients may be required to post additional funds to maintain open positions or may choose to withdraw excess funds on open positions.

We continuously evaluate opportunities to expand our business. Investing activities include \$49.5 million in capital expenditures for property and equipment during the year ended September 30, 2022 compared to \$62.1 million during the year ended September 30, 2021 and \$16.6 million during the year ended September 30, 2020. Capital expenditures over the past three years have primarily included software development, core information technology hardware acquisitions, and leasehold improvements on office space.

Investing activities also include \$0.2 million in cash payments for the acquisition of businesses during the year ended September 30, 2022 compared to \$2.4 million during the year ended September 30, 2021 and \$225.0 million during the year ended September 30, 2020. Further information about business acquisitions is contained in Note 20 to the Consolidated Financial Statements. These amounts were offset by smaller inflows related to sales of equipment and exchange membership stock, mainly in the year ended September 30, 2021.

Financing activities included \$170.3 million outflow to settle secured term loans, more than offset by inflows related to our revolving lines of credit, primarily, of \$211.5 million. Other inflows arose from stock option exercises and proceeds from greater than 90 day maturity loans, offset by various payments and repayments of loans with greater than 90 day maturities. We did not repurchase any of our outstanding common stock during the year ended September 30, 2022.

On August 23, 2022, our Board of Directors authorized the repurchase of up to 1.0 million shares of our outstanding common stock in open market purchases and private transactions, commencing on October 1, 2022 and ending on September 30, 2023. The repurchases are subject to the discretion of the senior management team to implement our stock repurchase plan, and subject to market conditions and as permitted by securities laws and other legal, regulatory and contractual requirements and covenants.

Apart from what has been disclosed above, there are no known trends, events or uncertainties that have had or are likely to have a material impact on our liquidity, financial condition and capital resources.

Contractual Obligations

The following table summarizes our cash payment obligations as of September 30, 2022:

| (in millions) | Payments Due by Period | | | | |
|-------------------------------------|------------------------|------------------|-------------|-------------|---------------|
| | Total | Less than 1 year | 1 - 3 Years | 3 - 5 Years | After 5 Years |
| Operating lease obligations | \$ 179.7 | \$ 17.2 | \$ 32.8 | \$ 31.9 | \$ 97.8 |
| Purchase obligations ⁽¹⁾ | 7,560.8 | 7,560.8 | — | — | — |
| Payable to lenders under loans | 485.1 | 0.6 | 478.1 | 6.4 | — |
| Senior secured borrowings | 347.9 | — | 347.9 | — | — |
| Other | 65.2 | 16.7 | 23.6 | 14.3 | 10.6 |
| | \$ 8,638.7 | \$ 7,595.3 | \$ 882.4 | \$ 52.6 | \$ 108.4 |

(1) Represents an estimate of contractual purchase commitments in the ordinary course of business primarily for the purchase of precious metals and agricultural and energy commodities. Unpriced contract commitments have been estimated using September 30, 2022 fair values. The purchase commitments for less than one year will be partially offset by corresponding sales commitments of \$8,253.9 million.

Total contractual obligations exclude defined benefit pension obligations. We comply with the minimum funding requirements, and accordingly contributed \$0.1 million to our defined benefit pension plans during the year ended September 30, 2022. During the year ending September 30, 2023, we anticipate making future benefit payments of \$2.1 million related to the defined benefit plans. Additional information on the funded status of these plans can be found in Note 17 of the Consolidated Financial Statements.

Based upon our current operations, we believe that cash flow from operations, available cash and available borrowings under our credit facilities will be adequate to meet our future liquidity needs.

Off Balance Sheet Arrangements

We are party to certain financial instruments with off-balance sheet risk in the normal course of business as a registered securities broker-dealer, futures commission merchant, U.K. based financial services firm, provisionally registered swap dealer and from our market-making and proprietary trading in the foreign exchange and commodities and debt securities markets. These financial instruments include futures, forward and foreign exchange contracts, exchange-traded and OTC options, To Be Announced ("TBA") securities and interest rate swaps. Derivative financial instruments involve varying degrees of off-balance sheet market risk whereby changes in the fair values of underlying financial instruments may result in changes in the fair value of the financial instruments in excess of the amounts reflected in the Consolidated Balance Sheets. Exposure to market risk is influenced by a number of factors, including the relationships between the financial instruments and our positions, as well as the volatility and liquidity in the markets in which the financial instruments are traded. The principal risk components of financial instruments include, among other things, interest rate volatility, the duration of the underlying instruments and changes in commodity pricing and foreign exchange rates. We attempt to manage our exposure to market risk through various techniques. Aggregate market limits have been established and market risk measures are routinely monitored against these limits. Derivative contracts are traded along with cash transactions because of the integrated nature of the markets for such products. We manage the risks associated with derivatives on an aggregate basis along with the risks associated with our proprietary trading and market-making activities in cash instruments as part of our firm-wide risk management policies.

A significant portion of these instruments are primarily the execution of orders for commodity futures and options on futures contracts on behalf of our clients, substantially all of which are transacted on a margin basis. Such transactions may expose us to significant credit risk in the event margin requirements are not sufficient to fully cover losses which clients may incur. We control the risks associated with these transactions by requiring clients to maintain margin deposits in compliance with both clearing organization requirements and internal guidelines. We monitor required margin levels daily and, therefore, may require clients to deposit additional collateral or reduce positions when necessary. We also establish contract limits for clients, which are monitored daily. We evaluate each client's creditworthiness on a case-by-case basis. Clearing, financing, and settlement activities may require us to maintain funds with or pledge securities as collateral with other financial institutions. Generally, these exposures to exchanges are subject to netting of open positions and collateral, while exposures to clients are subject to netting, per the terms of the client agreements, which reduce the exposure to us by permitting receivables and payables with such clients to be offset in the event of a client default. Management believes that the margin deposits held are adequate to minimize the risk of material loss that could be created by positions held at that time. Additionally, we monitor collateral fair value on a daily basis and adjust collateral levels in the event of excess market exposure. Generally, these exposures to both counterparties and clients are subject to master netting agreements and the terms of the client agreements, which reduce our exposure.

As a broker-dealer in U.S. Treasury obligations, U.S. government agency obligations, agency mortgage-backed obligations, and asset-backed obligations, we are engaged in various securities trading, borrowing and lending activities serving solely institutional counterparties. Our exposure to credit risk associated with the nonperformance of counterparties in fulfilling their contractual obligations pursuant to these securities transactions and market risk associated with the sale of securities not yet purchased can be directly impacted by volatile trading markets which may impair their ability to satisfy outstanding obligations to us. In the event of non-performance and unfavorable market price movements, we may be required to purchase or sell financial instruments, which may result in a loss to us.

We transact OTC and foreign exchange contracts with our clients, and our OTC and foreign exchange trade desks will generally offset the client's transaction simultaneously with one of our trading counterparties or will offset that transaction with a similar, but not identical, position on the exchange. These unmatched transactions are intended to be short-term in nature and are conducted to facilitate the most effective transaction for our client.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Additionally, we hold options and futures on options contracts resulting from market-making and proprietary trading activities in these product lines. We assist clients in our commodities trading business to protect the value of their future production (precious or base metals) by selling them put options on an OTC basis. We also provide our physical commodities trading business clients with sophisticated option products, including combinations of buying and selling puts and calls. We mitigate our risk by effecting offsetting options with market counterparties or through the purchase or sale of exchange-traded commodities futures. The risk mitigation of offsetting options is not within the documented hedging designation requirements of the Derivatives and Hedging Topic of the ASC.

As part of the activities discussed above, we carry short positions. We sell financial instruments that we do not own, borrow the financial instruments to make good delivery, and therefore are obliged to purchase such financial instruments at a future date in order to return the borrowed financial instruments. We record these obligations in the consolidated financial statements as of September 30, 2022 and 2021, at fair value of the related financial instruments, totaling \$2,469.6 million and \$1,771.2 million, respectively. These positions are held to offset the risks related to financial assets owned, and reported in our Consolidated Balance Sheets in *Financial instruments owned, at fair value*, and *Physical commodities inventory, net*. We will incur losses if the fair value of the *Financial instruments sold, not yet purchased*, increases subsequent to September 30, 2022, which might be partially or wholly offset by gains in the value of assets held as of September 30, 2022. The totals of \$2,469.6 million and \$1,771.2 million include a net liability of \$384.0 million and \$368.5 million for derivatives, based on their fair value as of September 30, 2022 and 2021, respectively.

We do not anticipate non-performance by counterparties in the above situations. We have a policy of reviewing the credit standing of each counterparty with which we conduct business. We have credit guidelines that limit our current and potential credit exposure to any one counterparty. We administer limits, monitor credit exposure, and periodically review the financial soundness of counterparties. We manage the credit exposure relating to our trading activities in various ways, including entering into collateral arrangements and limiting the duration of exposure. Risk is mitigated in certain cases by closing out transactions and entering into risk reducing transactions.

We are a member of various exchanges that trade and clear futures and option contracts. We are also a member of and provide guaranties to securities clearinghouses and exchanges in connection with client trading activities. Associated with our memberships, we may be required to pay a proportionate share of the financial obligations of another member who may default on its obligations to the exchanges. While the rules governing different exchange memberships vary, in general our guaranty obligations would arise only if the exchange had previously exhausted its resources. In addition, any such guaranty obligation would be apportioned among the other non-defaulting members of the exchange. Our liability under these arrangements is not quantifiable and could exceed the cash and securities we have posted as collateral at the exchanges. However, management believes that the potential for us to be required to make payments under these arrangements is remote. Accordingly, no contingent liability for these arrangements has been recorded in the Consolidated Balance Sheets as of September 30, 2022 and 2021.

Effects of Inflation

Increases in our expenses, such as compensation and benefits, transaction-based clearing expenses, occupancy and equipment rental, may result from inflation, while we may not be readily recoverable from increasing the prices of our services. Rising interest rates are generally favorable for us, to the extent that inflation has other adverse effects on the financial markets and on the value of the financial instruments held in inventory, it may adversely affect our financial position and results of operations.

Critical Accounting Policies

Preparing consolidated financial statements in conformity with U.S. GAAP requires that management make estimates and assumptions affecting reported amounts of assets and liabilities, disclosure of contingent liabilities at the date of the financial statements, as well as the recorded amounts of revenue and expenses during the reported period. The accounting policies discussed in this section are those that we consider the most critical to the financial statements. Therefore, understanding these policies is important to understanding our reported and potential future results of operations and financial position.

Valuation of Financial Instruments and Foreign Currencies

Description

Substantially all financial instruments are reflected in the consolidated financial statements at fair value, or amounts that approximate fair value due to their short-term nature or level of collateralization. These financial instruments include: cash and cash equivalents; cash, securities and other assets segregated under federal and other regulations; securities purchased under agreements to resell; securities borrowed; deposits with and receivables from broker-dealers, clearing organizations, and counterparties; financial instruments owned; securities sold under agreements to repurchase; securities loaned; and financial instruments sold, but not yet purchased. Unrealized gains and losses related to these financial instruments, when we are principal to the transaction, are reflected in earnings.

Foreign currency translation is an estimate critical to consolidating in our reporting currency. The value of certain assets and liabilities denominated in foreign currencies, including foreign currencies sold, not yet purchased, are converted into their U.S. dollar equivalents at the foreign exchange rates in effect at the close of business at the end of the accounting period. For foreign currency transactions completed during each reporting period, the foreign exchange rate in effect at the time of the transaction is used before translation into U.S. dollar equivalent for consolidated reporting.

Judgment and Uncertainties

At each period end, we, using professional judgment and industry expertise, select fair values for financial instruments. Where available, we price from independent sources such as listed market prices, third-party pricing services, or broker or dealer price quotations. In limited cases, we use fair values derived from pricing models that consider current market and contractual prices for the underlying financial instruments or commodities, as well as time value and yield curve or volatility factors underlying the positions. In some cases, even though the value of a security is derived from an independent market price, or broker or dealer quote, certain assumptions may be required to determine the fair value.

Effect if Actual Results Differ From Assumptions

Our valuation assumptions may be incorrect, and the actual value realized upon closing any position could be different from estimated carrying value, because of changes in prices, assumptions, or the overall business environment. We do not believe that there is a reasonable likelihood that such a possibility will be significant. This view is supported by a few key factors:

- Valuations for substantially all of the financial instruments, most of which are in highly liquid markets, are available from independent, well-known publishers of market information.
- We have robust controls and procedures surrounding pricing and our various technologies involved in it.
- The relevant positions are generally short-term in nature.
- The Company holds positions in a wide range of products, such that an error in a limited number of prices is unlikely to cause a significant change to the overall result and pricing issues in a wide array of products is very unlikely.

Revenue Recognition

Description

A significant portion of our revenues are derived principally, from realized and unrealized trading income in securities, derivative instruments, commodities and foreign currencies purchased or sold for our account. We record realized and unrealized trading income on a trade date basis. We state financial instruments owned and financial instruments sold, not yet purchased and foreign currencies sold, not yet purchased, at fair value with related changes in unrealized appreciation or depreciation reflected in *Principal gains, net* in the Consolidated Income Statements. We record fee and interest income on the accrual basis and dividend income is recognized on the ex-dividend date.

A substantial amount of our revenues derive from *Commission and clearing fees*. These revenue types involve less complexity than *Principal gains, net* would, as, generally, we are an agent in the underlying transactions. We recognize revenues on a trade date basis for the transactions, as, typically, our obligation is met at that point and there are no future obligations to consider. We recognize revenue on commodities that are purchased for physical delivery to clients when we meet our obligations to our clients and in an amount equal to the consideration we expect to receive at that point in time.

Judgment and Uncertainties

Judgments, outside of the valuation considerations previously discussed, relate to the timing and appropriateness of revenue recognition and whether we have fulfilled our performance obligations.

Effect if Actual Results Differ From Assumptions

If we misapply the relevant guidance or incorrectly recognize revenue that we have not earned, earnings may be misstated. We do not believe that such a possibility is reasonably likely, because we have developed systems and controls for each of our businesses to capture all known transactions in the appropriate reporting period. In addition, the overwhelming majority of our revenue is recognized upon trade consummation, as we satisfy our performance obligations, and we do not need to estimate when that may have occurred.

Income Taxes

Description

We are subject to income taxes in the U.S. and numerous foreign jurisdictions.

Judgment and Uncertainties

Judgment is required in determining the consolidated income taxes and in evaluating tax positions, including evaluating income tax uncertainties. As a result, the company recognizes tax liabilities based on estimates of whether additional taxes and interest will be due. We do not currently have any uncertain tax positions.

PART II

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Income taxes are accounted for under the asset and liability method, recognizing the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled, with any change in tax rates recognized in income in the period that includes the enactment date. Management considers all relevant evidence for each jurisdiction to determine valuation allowances. If we change our determination as to the amount of deferred tax assets we expect to realize, we adjust our valuation allowance with a corresponding impact to income tax expense in the period in which such determination is made.

Effect if Actual Results Differ From Assumptions

We believe that our accruals for tax liabilities are adequate for all open audit years. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. To the extent circumstances arise requiring us to change our judgment regarding the adequacy of existing tax accounts, we do not believe such a change is likely to be material to our financial statements. The tax accounts in total are relatively immaterial to the balance sheet, which, when combined with their likelihood of being misstated, particularly our valuation allowances given our positive earnings trend in recent years, results in a generally insignificant risk to us.

Accounting Standards Update

In October 2021, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2021-08, "Business Combinations (Topic 805): Accounting for Contract Assets and Contract Liabilities from Contracts with Customers" ("ASU 2021-08"). ASU 2021-08 requires an acquirer in a business combination to recognize and measure contract assets and contract liabilities from acquired contracts using the revenue recognition guidance under Accounting Standards Codification Topic 606, Revenue from Contracts with Customers, in order to recognize contract liabilities in alignment with the definition of performance obligations. The standard is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years, which means that it will be effective for our fiscal year beginning October 1, 2023. Early adoption is permitted. We do not believe that adoption of ASU 2021-08 will have a significant impact on our consolidated financial statements. We do not expect any other recently issued accounting pronouncements to have a significant effect on our financial statements.

ITEM 7A Quantitative and Qualitative Disclosures about Market Risk

See also Note 4 to the Consolidated Financial Statements, 'Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk'.

Market Risk

We conduct our market-making and trading activities predominantly as a principal, which subjects our capital to significant risks. These risks include, but are not limited to, absolute and relative price movements, price volatility and changes in liquidity, over which we have virtually no control. Our exposure to market risk varies in accordance with the volume of client-driven market-making transactions, the size of the proprietary positions and the volatility of the financial instruments traded.

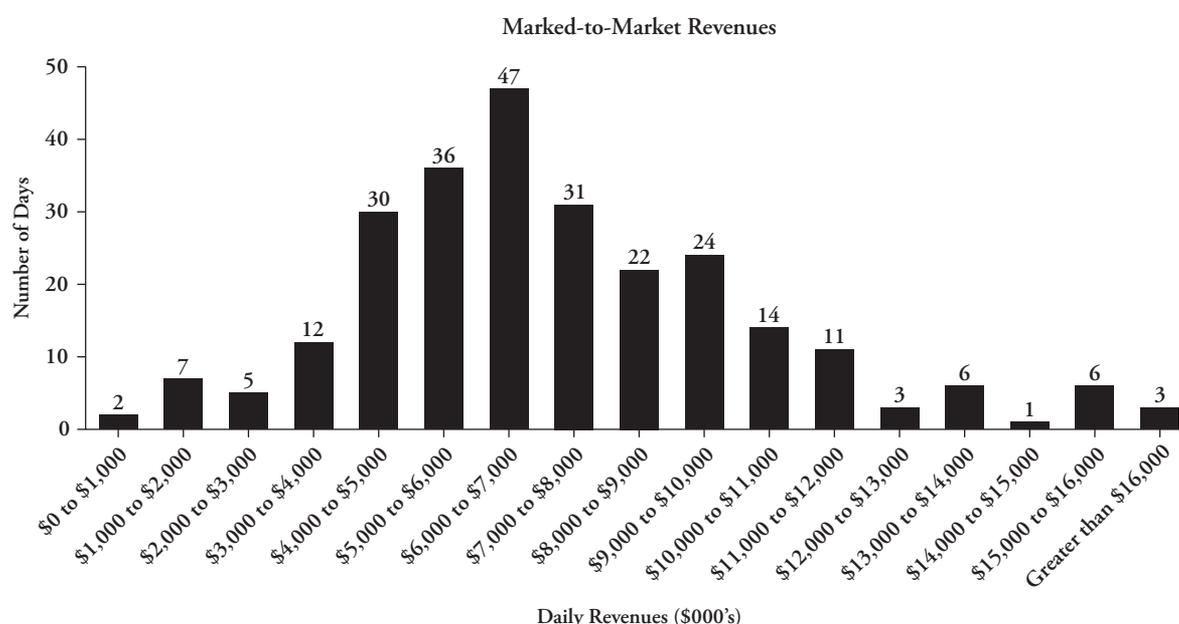

We seek to mitigate exposure to market risk by utilizing a variety of qualitative and quantitative techniques:

- Diversification of business activities and instruments;
- Limitations on positions;
- Allocation of capital and limits based on estimated weighted risks; and
- Daily monitoring of positions and mark-to-market profitability.

We utilize derivative products in a trading capacity as a dealer to satisfy client needs and mitigate risk. We manage risks from both derivatives and non-derivative cash instruments on a consolidated basis. The risks of derivatives should not be viewed in isolation, but in aggregate with our other trading activities.

We are exposed to market risk in connection with our retail trading activities. Because we act as counterparty to our retail clients' transactions, we are exposed to risk on each trade that the value of our position will decline. Accordingly, accurate and efficient management of our net exposure is a high priority, and we have developed policies addressing both our automated and manual procedures to manage our exposure. These risk-management policies and procedures are established and reviewed regularly by the Risk Committee of our Board of Directors. Our risk-management policies require quantitative analyses by instrument, as well as assessment of a range of market inputs, including trade size, dealing rate, client margin and market liquidity. Our risk-management procedures require our team of senior traders to monitor risk exposure on a continuous basis and update senior management both informally over the course of the trading day and formally through intraday and end of day reporting. A key component of our approach to managing market risk is that we do not initiate market positions for our own account in anticipation of future movements in the relative prices of products we offer.

Management believes that the volatility of revenues is a key indicator of the effectiveness of its risk management techniques. The graph below summarizes volatility of our daily revenue, determined on a marked-to-market basis, during the year ended September 30, 2022.

In our Securities market-making and trading activities, we maintain inventories of equity and debt securities. In our Commercial segment, our positions include physical commodities inventories, precious metals on lease, forwards, futures and options on futures, and OTC derivatives. Our commodity trading activities are managed as one

consolidated book for each commodity encompassing both cash positions and derivative instruments. We monitor the aggregate position for each commodity in equivalent physical ounces, metric tons, or other relevant unit.

Interest Rate Risk

In the ordinary course of our operations, we have interest rate risk from the possibility that changes in interest rates will affect the values of financial instruments and impact interest income earned. Within our domestic institutional dealer in fixed income securities business, we maintain a significant amount of trading assets and liabilities which are sensitive to changes in interest rates. These trading activities primarily consist of securities trading in connection with U.S. Treasury, U.S. government agency, agency mortgage-backed and agency asset-backed obligations as well as investment grade, high-yield, convertible and emerging markets debt securities. Derivative instruments, which consist of futures, TBA securities and forward settling transactions, are used to manage risk exposures in the trading inventory. We enter into TBA securities transactions for the sole purpose of managing risk associated with mortgage-backed securities.

In addition, we generate interest income from the positive spread earned on client deposits. We typically invest in U.S. Treasury bills, notes, and obligations issued by government sponsored entities,

reverse repurchase agreements involving U.S. Treasury bills and government obligations or AA-rated money market funds. In some instances, we maintain interest earning cash deposits with banks, clearing organizations and counterparties. We have an investment policy which establishes acceptable standards of credit quality and limits the amount of funds that can be invested within a particular fund, institution, clearing organization or counterparty. We estimate that as of September 30, 2022, an immediate 25 basis point decrease in short-term interest rates would result in approximately \$7.1 million less in annual net income.

We manage interest expense using a combination of variable and fixed rate debt. The debt instruments are carried at their unpaid principal balance which approximates fair value. As of September 30, 2022, \$485.1 million of outstanding principal debt was variable-rate debt. We are subject to earnings and liquidity risks for changes in the interest rate on this debt. As of September 30, 2022, \$347.9 million of outstanding principal debt was fixed-rate long-term debt.

Foreign Currency Risk

Currency risk arises from the possibility that fluctuations in foreign exchange rates will impact the value of our earnings and assets. Entities that have assets and liabilities denominated in currencies other than the primary economic environment in which the entity operates are subject to remeasurement. Virtually all sales and related operating costs are denominated in the currency of the local country and translated into USD for consolidated reporting purposes. Although

the majority of the assets and liabilities of these subsidiaries are denominated in the functional currency of the subsidiary, they may also hold assets or liabilities denominated in other currencies. As a result, our results of operations and financial position are exposed to changing currency rates. We may consider entering into hedging transactions to mitigate our exposure to foreign currency exchange rates. These hedging transactions may not be successful.

ITEM 8 Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
StoneX Group Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of StoneX Group Inc. and subsidiaries (the Company) as of September 30, 2022 and 2021, the related consolidated income statements, consolidated statements of comprehensive income, consolidated statements of cash flows, and consolidated statements of stockholders' equity for each of the years in the three-year period ended September 30, 2022, and the related notes and financial statement schedule (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2022 and 2021, and the results of its operations and its cash flows for each of the years in the three-year period ended September 30, 2022, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of September 30, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated November 22, 2022 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Revenue recognition for unrealized gains and losses from market making activities

As discussed in Note 15 to the consolidated financial statements, the Company recognized revenue of \$1,145.2 million for principal gains, net from financial transactions or contracts for which the Company acted as principal, a portion of which related to unrealized gains and losses derived from over-the-counter derivatives, equities, fixed income, and foreign exchange market making activities (collectively, Unrealized Gains and Losses). Such Unrealized Gains and Losses represent the change in fair value for those financial instruments owned and sold, not yet purchased that are held by the Company as of year-end and reflected in earnings.

We identified revenue recognition related to Unrealized Gains and Losses as a critical audit matter. A high degree of auditor subjectivity and judgment was involved in determining the sufficiency and timing of audit procedures required to evaluate the existence and accuracy of Unrealized Gains and Losses reflected in earnings as of September 30, 2022.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to Unrealized Gains and Losses, including controls over the computations of Unrealized Gains and Losses, as well as controls ensuring that trading subledger values were not modified within these computations. We evaluated Unrealized Gains and Losses as of September 30, 2021 by assessing the Company's revenue recognition, comparing inputs to Unrealized Gains and Losses computations prepared by the Company to source documents, and recalculating Unrealized Gains and Losses recorded. We also assessed the sufficiency of the audit evidence obtained related to Unrealized Gains and Losses by evaluating the cumulative results of the audit procedures and potential management bias.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
StoneX Group Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited StoneX Group Inc. and subsidiaries' (the Company) internal control over financial reporting as of September 30, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2022, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of September 30, 2022 and 2021, and the related consolidated income statements, consolidated statements of comprehensive income, consolidated statements of cash flows, and consolidated statements of stockholders' equity, for each of the years in the three-year period ended September 30, 2022, and the related notes and financial statement schedule (collectively, the consolidated financial statements), and our report dated November 22, 2022 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit

of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Consolidated Financial Statements

NOTE 1 Description of Business and Significant Accounting Policies

StoneX Group Inc., a Delaware corporation, and its consolidated subsidiaries (collectively “SNE X” or “the Company”), is a global financial services network that connects companies, organizations, traders and investors to the global market ecosystem through a unique blend of digital platforms, end-to-end clearing and execution services, high touch service, and deep expertise. The Company strives to be its clients’ sole trusted partner, providing its networks, products, and services to allow them to pursue trading opportunities, manage market risks, make investments and improve business performance. The Company offers a vertically integrated product suite, beginning with high-touch and electronic access to nearly all major financial markets worldwide, as well as numerous liquidity venues. The Company delivers access and service through the entire trade lifecycle, by delivering deep market expertise and on-the-ground intelligence, best execution, and finally post-trade clearing, custody, as well as settlement services. The Company has created revenue streams, diversified by asset class, client type and geography, that earn commissions and spreads as clients execute transactions across the Company’s financial networks, while the Company monetizes non-trading client activity including interest and fee earnings on client balances as well as earning consulting and fees for market intelligence and risk management services.

The Company provides these services to a diverse group of clients in more than 180 countries. These clients include more than 54,000 commercial, institutional, and global payments clients and over 400,000 retail clients. The Company’s clients include commercial entities, asset managers, regional, national and introducing broker-dealers, insurance companies, brokers, institutional investors and professional traders, commercial and investment banks, and government and non-governmental organizations (“NGOs”).

Basis of Presentation

The accompanying consolidated financial statements include the accounts of StoneX Group Inc. and all entities in which the Company has a controlling financial interest. All material intercompany transactions and balances have been eliminated in consolidation.

In the Consolidated Income Statements, total revenues reported combine gross revenues for the physical commodities business and net revenues for all other businesses. The subtotal *Operating revenues* in the Consolidated Income Statements is physical commodities cost of sales deducted from total revenues. The subtotal *Net operating revenues* in the Consolidated Income Statements is operating revenues less transaction-based clearing expenses, introducing broker commissions, and interest expense. *Transaction-based clearing expenses* are variable expenses paid to executing brokers, exchanges, clearing organizations, and banks, typically related to transactional volumes. *Introducing broker commissions* include commission paid to non-employee third parties that have introduced clients to the Company. *Net operating revenues* represent revenues available to pay variable compensation to risk management consultants and traders, certain non-variable expenses, as well as variable and non-variable expenses related to both operational and administrative employees.

Use of Estimates

Preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”) requires that management make estimates and assumptions affecting the reported amounts of assets and liabilities, disclosure of contingent liabilities as of the date of the financial statements and the reported amounts of revenue and expense during the reporting period. The most significant of these estimates and assumptions in the current year relate to fair value measurements for financial instruments, revenue recognition, valuation of inventories, and income taxes. These estimates are based on management’s best knowledge of current events and actions the Company may undertake in the future. The Company reviews all significant estimates affecting the financial statements on a recurring basis and records the effect of any necessary adjustments prior to financial statement issuance. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Foreign Currency Translation

The Company’s consolidated financial statements are reported in U.S. dollars. The Company’s subsidiaries maintain their records either in U.S. dollars or, as appropriate, the currencies of the countries in which they operate. The method of translating local currency financial information into U.S. dollars depends on whether the economy in which the foreign subsidiary operates has been designated as highly inflationary. Economies with a three-year cumulative inflation rate of more than 100% are considered highly inflationary.

Assets and liabilities of foreign subsidiaries in non-highly inflationary economies are translated into U.S. dollars using rates of exchange at the balance sheet date. Translation adjustments are recorded in other comprehensive income (loss). Revenues and expense are translated at rates of exchange in effect at relevant times during the year. Transaction gains and losses related to changes in currency rates are recorded in earnings.

Foreign subsidiaries that operate in highly inflationary countries use the U.S. dollar as their functional currency. Local currency monetary assets and liabilities are remeasured into U.S. dollars using rates of exchange as of each balance sheet date, with remeasurement adjustments and other transaction gains and losses recognized in earnings. Nonmonetary assets and liabilities do not fluctuate with changes in the local currency exchange rates to the dollar as the translated amounts for nonmonetary assets and liabilities at the end of the accounting period in which the economy becomes highly inflationary becomes the accounting basis for those assets and liabilities in the period of change and subsequent periods. Revenues and expenses are translated at rates of exchange in effect at relevant times during the year.

PART II

ITEM 8 Financial Statements and Supplementary Data

The Company operates asset management and debt trading businesses in Argentina through various wholly-owned subsidiaries. Operating revenues from the Company's Argentinean subsidiaries were approximately 1% of the consolidated operating revenues for the year ended September 30, 2022. The operating environment in Argentina continues to present business challenges, including ongoing devaluation of the Argentine peso and significant inflation. Based upon inflationary data published by the International Practices Task Force of the Center for Audit Quality, the economy of Argentina became highly inflationary during the three months ended June 30, 2018, and continues to be considered highly inflationary.

Beginning July 1, 2018, the Company designated Argentina's economy as highly inflationary for accounting purposes. As a result, the Company has accounted for its Argentinean entities using the U.S. dollar as their functional currency, beginning in the quarter ending September 30, 2018. The Company has implemented strategies to reduce exposure to the Argentine peso. As a result of Argentina's highly inflationary status, the Company recorded translation gains through earnings of \$2.1 million for the year ended September 30, 2022. Translation gains recorded through earnings were \$0.8 million for the year ended September 30, 2021. The Company recorded de minimis translation adjustments through earnings for the year ended September 30, 2020.

At September 30, 2022, the Company had net monetary liabilities denominated in Argentine pesos of \$0.4 million, compared to net monetary assets of \$0.4 million at September 30, 2021. The Company held cash and cash equivalents denominated in Argentine pesos of less than \$0.1 million as of September 30, 2022 and 2021, respectively. At September 30, 2022 and 2021, the Company had net nonmonetary assets denominated in Argentine pesos of \$1.1 million and \$0.9 million, respectively.

Cash and Cash Equivalents

The Company considers cash held at banks and all highly liquid investments not held for trading purposes, with original or acquired maturities of 90 days or less, including certificates of deposit and money market mutual funds, to be cash and cash equivalents. Cash and cash equivalents consists of cash, certificates of deposit, and money market mutual funds not deposited with or pledged to clearing organizations, broker-dealers, clearing organizations or counterparties, or segregated under federal or other regulations. Certificates of deposit are stated at cost plus accrued interest, which approximates fair value, and may be withdrawn at any time, at the discretion of the Company. Money market mutual funds are stated at their net asset value.

Cash, Securities and Other Assets Segregated under Federal and other Regulations

Pursuant to requirements of the Commodity Exchange Act and Commission Regulation 30.7 of the U.S. Commodity Futures Trading Commission ("CFTC") in the U.S., the Markets in Financial Instruments Implementing Directive 2006/73/EC underpinning the Client Asset ("CASS") rules in the Financial Services Authority ("FSA") handbook in the United Kingdom ("U.K."), and the Securities & Futures Act ("SFA") in Singapore, funds deposited by clients relating to futures and options on futures contracts in regulated commodities must be carried in separate accounts, which are designated as segregated or secured client accounts. Additionally, in accordance with Rule 15c3-3 of the Securities Exchange Act of 1934 ("Rule 15c3-3"), the Company

maintains separate accounts for the exclusive benefit of securities clients and proprietary accounts of broker dealers ("PABs"). Rule 15c3-3 requires the Company to maintain special reserve bank accounts ("SRBAs") for the exclusive benefit of securities clients and PABs. The deposits in segregated client accounts and SRBAs are not commingled with Company funds. Under the FSA's rules, certain categories of clients may choose to opt-out of segregation. As of September 30, 2022 and 2021, cash, securities, and other assets segregated under federal and other regulations consisted of cash held at banks of approximately \$2,461.6 million and \$2,260.3 million, respectively, U.S. Treasury obligations of approximately \$786.0 million and \$0.2 million, respectively, and commodities warehouse receipts of approximately \$19.7 million and \$13.9 million, respectively (see fair value measurements discussion in Note 3).

Collateralized Transactions

The Company enters into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed transactions, and securities loaned transactions primarily to fund principal debt trading, acquire securities to cover short positions, acquire securities for settlement, or meet counterparty needs under matched-booked trading strategies.

These transactions are accounted for as collateralized financing transactions and are recorded at their contractual amounts plus accrued interest. In connection with these agreements and transactions, it is the Company's policy to receive or pledge cash or securities to collateralize such agreements and transactions in accordance with contractual arrangements. The Company monitors the fair value of its collateral on a daily basis, and the Company may require counterparties, or may be required by counterparties, to deposit additional collateral or return collateral pledged. Interest income and interest expense are recognized over the life of the arrangements and are recorded in the Consolidated Income Statements as *Interest income* or *Interest expense*, as applicable. The carrying amount of these transactions approximate fair value due to their short-term nature and the level of collateralization.

Repurchase and Reverse repurchase agreement netting

During the year ended September 30, 2022, the Company began trading with a new central counterparty clearing house provider for its fixed income portfolio. This arrangement and related agreements meet the criteria for netting under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 210-20, Balance Sheet – Offsetting. Netting occurs within Securities purchased under agreements to resell and Securities sold under agreements to repurchase. More details can be found in Note 12.

Deposits with and Receivables from Broker-dealers, Clearing Organizations and Counterparties, and Payables to Broker-dealers, Clearing Organizations and Counterparties

As required by regulations of the CFTC, FSA, and Monetary Authority of Singapore ("MAS"), client funds received to margin, guaranty, and/or secure commodity futures and futures on options as well as

retail foreign exchange transactions are segregated and accounted for separately from the general assets of the Company. Deposits with broker-dealers, clearing organizations, and counterparties pertain primarily to deposits made to satisfy margin requirements on client and proprietary open futures and options on futures positions and to satisfy the requirements set by clearing exchanges for clearing membership. The Company also pledges margin deposits with various counterparties for over-the-counter (“OTC”) derivative contracts. These deposits are also included in deposits with broker-dealers, clearing organizations, and counterparties. The Company also deposits cash margin with various securities clearing organizations as an ongoing condition of the securities clearing relationships, and these deposits are included in deposits with and receivables from broker-dealers, clearing organizations, and counterparties. Deposits with and receivables from broker-dealers, clearing organizations, and counterparties are reported gross, except where a right of offset exists. As of September 30, 2022 and 2021, the Company had cash and cash equivalents on deposit with or pledged to broker-dealers, clearing organizations, and counterparties of approximately \$2,515.0 million and \$3,139.6 million, respectively.

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties also includes guaranty deposits with clearing exchanges. The guaranty deposits are held by the clearing exchanges for use in potential default situations by one or more members of the clearing exchanges. The guaranty deposits may be applied to the Company’s obligations to the clearing exchange, or to the clearing exchange’s obligations to unrelated parties.

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties also include securities pledged to clearing exchanges. These securities are either pledged to the Company by its clients or represent investments of client funds. It is the Company’s practice to include client-owned securities on its Consolidated Balance Sheets, as the rights to those securities have been transferred to the Company under the terms of the relevant futures trading agreements. Securities pledged primarily include U.S. Treasury obligations, foreign government obligations, and certain ETFs. Securities that are not client-owned, and represent an investment of client funds, are adjusted to fair value with associated changes in unrealized gains or losses recorded in *Interest income* in the Consolidated Income Statements. For client-owned securities, the change in fair value is offset against the payable to clients with no impact recognized in the Consolidated Income Statements. The total fair value of client owned and non-client owned securities included within *Deposits with and receivables from broker-dealers, clearing organizations, and counterparties, net* was \$4,272.9 million and \$810.7 million as of September 30, 2022 and 2021, respectively.

Management has considered guidance required by ASC 860, Transfers and Servicing as it relates to securities pledged by clients to margin their futures and options on futures trading accounts. Management believes that the transferor surrenders control over those assets because: (a) the transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (b) each transferee has the right to pledge or exchange the assets (or beneficial interests) it received, and no condition both constrains the transferee (or holder) from taking advantage of its right to pledge or exchange and provides more than a trivial benefit to the transferor and (c) the transferor does not maintain effective control over the transferred assets through either (1) an agreement that both entitles and obligates the transferor to repurchase or redeem them before their maturity or (2) the ability

to unilaterally cause the holder to return specific assets, other than through a cleanup call. Under this guidance, the Company reflects the client collateral assets and corresponding liabilities in the Company’s Consolidated Balance Sheets as of September 30, 2022 and 2021.

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties also includes amounts due from clearing exchanges for unrealized gains and losses associated with clients’ options on futures contracts. See discussion in the Financial Instruments section below for additional information on the Company’s accounting policies for derivative contracts. For client-owned derivative contracts, the fair value is offset against the payable to clients with no impact recognized on the Consolidated Income Statements.

The Company maintains client omnibus and proprietary accounts with other clearing organizations. The equity balances in those accounts, along with any margin cash or securities deposited with the clearing organizations are included in deposits with and receivables from broker-dealers, clearing organizations, and counterparties.

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties also include amounts due from or due to clearing exchanges for daily variation settlements on open futures and options on futures positions. The variation settlements due from or due to clearing exchanges are paid in cash on the following business day. Variation settlements equal the daily settlement of futures contracts and premiums on options on futures contracts.

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties further include amounts receivable for securities sold but not yet delivered by the Company on settlement date (“fails-to-deliver”) and net receivables arising from unsettled proprietary trades.

Payables to broker-dealers, clearing organizations, and counterparties primarily include amounts payable for securities purchased but not yet received by the Company on settlement date (“fails-to-receive”) and net payables arising from unsettled proprietary trades.

Deposits with and receivables from broker-dealers, clearing organizations and counterparties, and payables to broker-dealers, clearing organizations and counterparties also include amounts related to the value of registered broker-dealer clients cross-currency payment transactions related to the Global Payments segment. These amounts arise due to a clearing period before funds are received and payments are made, which usually is one to two business days.

Receivable from and Payables to Clients

Receivable from clients, net of allowance for doubtful accounts, includes the total of net deficits in individual exchange-traded futures and OTC derivative trading accounts carried by the Company. Client deficits arise from realized and unrealized trading losses on client OTC, futures, options on futures, swaps and forwards and amounts due on cash and margin transactions. Client deficit accounts are reported gross of client accounts that contain net credit or positive balances, except where a right of offset exists. Net deficits in individual futures exchange-traded and OTC derivative trading accounts include both secured and unsecured deficit balances due from clients as of the balance sheet date. Secured deficit amounts are backed by U.S. Treasury obligations and commodity warehouse receipts. These U.S. Treasury obligations and commodity warehouse receipts are netted against the secured deficit amounts when conditions necessary for the right to offset exist.

PART II

ITEM 8 Financial Statements and Supplementary Data

Receivable from clients, net also includes the net amounts receivable from securities clients in connection with the settlement of regular-way cash securities, margin loans to clients, and client cash debits. It is the Company's policy to report margin loans and payables that arise due to positive cash flows in the same client's accounts on a net basis when the conditions for netting as specified in U.S. GAAP are met. Clients' securities transactions cleared by the Company are recorded on a settlement date basis, but the Company makes accruals necessary to adjust any uncompleted transactions to a trade date basis for consolidated reporting, under U.S. GAAP. Securities cleared by the Company and pledged to the Company as a condition of custodial clearing arrangements are owned by the clients, including those that collateralize margin or other similar transactions, and are not reflected on the Consolidated Balance Sheets as the Company does not have title to, or beneficial interests, in those assets. The carrying value of the receivables and payables approximates fair value due to their short-term nature.

Receivable from clients, net also include amounts receivable from non-broker-dealer clients for securities sold but not yet delivered by the Company on settlement date ("fails-to-deliver") and net receivables arising from unsettled proprietary trades.

Payables to clients represent the total of client accounts with credit or positive balances. Client accounts are used primarily in connection with exchange-traded and OTC commodity, foreign exchange, precious metals, and securities transactions and include gains and losses on open trades as well as securities and cash margin deposits made as required by the Company, the exchange-clearing organizations or other clearing organizations. Client accounts with credit or positive balances are reported gross of client deficit accounts, except where a right of offset exists.

Payables to broker-dealers and counterparties also includes amounts payable to non-broker-dealer clients for securities purchased but not yet received by the Company on settlement date ("fails-to-receive") and net payables arising from unsettled proprietary trades.

Receivable from and payables to clients also include amounts related to the value of non-registered broker-dealer clients' cross-currency payment transactions related to the Global Payments segment. These amounts arise due to a clearing period before the funds are received and payments are made, which usually is one to two business days.

The future collectability of receivables from clients can be impacted by the Company's collection efforts, client financial stability, and the general economic climate. In determining collectability, the Company considers a number of factors including, but not limited to, historical collection experience, current and forecasted economic and business conditions, internal and external credit risk ratings, collateral terms, payment terms and aging of the financial asset, as well as specific-identification in certain circumstances. The Company evaluates accounts that it believes may become uncollectible on a specific identification basis, through reviewing daily margin deficit reports, the historical daily aging of the receivables, and by monitoring the financial strength of its clients. The Company may unilaterally close client trading positions in certain circumstances. In addition, to evaluate client margining and collateral requirements, client positions are stress tested regularly and monitored for excessive concentration levels relative to the overall market size. Furthermore, in certain instances, the Company is indemnified and able to charge back introducing broker-dealers for bad debts incurred by their clients.

The Company generally charges off an outstanding receivable balance when all economic means of recovery have been exhausted. That determination considers information such as the occurrence of significant changes in the client's financial position such that the client can no longer pay the obligation, or that the proceeds from collateral will not be sufficient to pay the balance.

Notes Receivable

Accrual of commodity financing income on any note is discontinued when, in the opinion of management, there is reasonable doubt as to the timely collectability of interest or principal. Nonaccrual notes are returned to an accrual status when, in the opinion of management, the financial position of the borrower indicates there is no longer any reasonable doubt as to the timely payment of principal and interest. The Company records a charge against earnings for notes receivable losses when management believes that the collection of outstanding principal is not probable.

Physical Commodities Inventory

Inventories of certain agricultural commodities are carried at net realizable value, which approximates fair value less disposal costs. Agricultural commodities inventories have reliable, readily determinable and realizable market prices, relatively predictable and insignificant costs of disposal, and are available for immediate delivery. Changes in the fair values of these agricultural commodities inventories are included as a component of *Cost of sales of physical commodities* in the Consolidated Income Statements.

Inventories of energy related products are valued at the lower of cost or net realizable value. Inventories of precious metals held by subsidiaries that are not broker-dealers are valued at the lower of cost or net realizable value, using the weighted-average price and first-in first-out costing method. Changes in the values of these inventories are included as a component of *Cost of sales of physical commodities* in the Consolidated Income Statements.

Precious metals inventory held by StoneX Financial Ltd, a U.K. based broker-dealer subsidiary, is measured at fair value, with changes in fair value included as a component of *Principal gains, net* in the Consolidated Income Statements, in accordance with U.S. GAAP accounting requirements for broker-dealers.

Property and Equipment

Property and equipment is stated at cost, net of accumulated depreciation and amortization and depreciated using the straight-line method over estimated useful life. Leasehold improvements are amortized on a straight-line basis over the estimated useful life of the improvement or the term of the lease, whichever is shorter. Expenditures that increase the value or productive capacity of assets are capitalized. When property and equipment are retired, sold, or otherwise disposed of, asset carrying amount and related accumulated depreciation are removed from the accounts and any gain or loss is included in earnings. The Company had no assets held for sale at September 30, 2022 and 2021.

The Company accounts for costs incurred to develop its trading platforms and related software in accordance with ASC 350-40, Internal-Use Software, which requires that such technology be capitalized in the application development stages. Costs related to planning, training, administration, and non-value added maintenance are charged to expense as incurred. Capitalized software development costs are amortized over the useful life of the software, which the Company generally estimates at three years.

In accordance with ASC 360-10, Property, Plant and Equipment, the Company periodically evaluates the carrying value of long-lived assets when events and circumstances warrant such review. The carrying value of a long-lived asset is considered impaired when the anticipated identifiable undiscounted cash flows from such an asset (or asset group) are less than carrying value. In that event, a loss is recognized in the amount by which the carrying value exceeds fair market value of the long-lived asset. This standard applies to assets held for use and not to assets held for sale. The Company has identified no such impairment indicators as of September 30, 2022 and 2021.

Acquisitions

The Company applies acquisition accounting on the date of acquisition to those transactions meeting the definition of a business under ASC 805. Applying acquisition accounting requires the Company to allocate the purchase consideration to the fair value of the identifiable tangible and intangible assets acquired and liabilities assumed on acquisition date. In determining the fair value of identifiable assets acquired and liabilities assumed, the Company frequently utilizes a third-party valuation specialist. The Company applies certain significant assumptions, estimates, and judgments in determining the fair value of assets acquired and liabilities assumed on acquisition date. These significant assumptions, estimates, and judgments include, but are not limited to, cash flow forecasts, discount rates, client churn rates, royalty rates, and economic lives. Any excess of the purchase consideration over the fair value of the net assets acquired is recorded as goodwill. Alternatively, in an instance where the fair value of the net assets acquired exceeds the purchase consideration, the Company records a bargain purchase gain in the Consolidated Income Statements at the date of acquisition. While the Company uses its best estimates and assumptions as a part of the purchase price allocation to accurately value assets acquired and liabilities assumed at the acquisition date, these estimates are inherently uncertain and subject to refinement. As a result, during the remeasurement period, which may extend one year from the acquisition date, the Company may record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill or bargain purchase gain. Upon conclusion of the measurement period or final determination of the fair values of assets acquired and liabilities assumed, whichever comes first, any subsequent adjustments are recorded to the Consolidated Income Statements rather than adjusted through goodwill or bargain purchase gains. The Company includes the post-acquisition results of acquired businesses in the Consolidated Income Statements from the date of acquisition. Acquisition related costs, such as fees for attorneys, accountants, and investment bankers, are expensed as incurred and are not capitalized as part of the purchase price.

Goodwill and Identifiable Intangible Assets

Goodwill is the cost of acquired companies in excess of the fair value of identifiable net assets at acquisition date. Goodwill is not subject to amortization, but rather is evaluated for impairment at least annually.

The Company evaluates its goodwill for impairment at its fiscal year end, or more frequently if indicators of potential impairment exist, in accordance with ASC 350, Intangibles - Goodwill and Other. Goodwill impairment is determined by comparing the estimated fair value of a reporting unit (generally defined as the businesses for which financial information is available and reviewed regularly by management) with its respective carrying value. If the estimated fair value exceeds the carrying value, goodwill at the reporting unit level is not deemed to be impaired. However, if the estimated fair value is below carrying value, further analysis is required to determine the amount of the impairment.

In the course of evaluating the potential impairment of goodwill, the Company may perform either a qualitative or a quantitative assessment. The Company's qualitative assessment of potential impairment may result in the determination that a quantitative impairment analysis is not necessary. Under this elective process, the Company assesses qualitative factors to determine whether the existence of events or circumstances leads the Company to determine that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If after assessing the totality of events and circumstances, the Company determines it is more likely than not that the fair value of a reporting unit is greater than its carrying amount, then performing a quantitative analysis is not required. However, if the Company concludes otherwise, then the Company performs a quantitative impairment analysis.

If the Company either chooses not to perform a qualitative assessment, or the Company chooses to perform a qualitative assessment but is unable to qualitatively conclude that no impairment has occurred, then the Company performs a quantitative evaluation. In the case of a quantitative assessment, the Company estimates the fair value of the reporting unit with which the goodwill that is subject to the quantitative analysis is associated and compares it to the carrying value. If the estimated fair value of a reporting unit is less than its carrying value, the Company estimates the fair value of all assets and liabilities of the reporting unit, including goodwill. If the carrying value of the reporting unit's goodwill is greater than the estimated fair value, an impairment charge is recognized for the excess. The fair value of the Company's reporting units exceeded their respective carrying values under the qualitative assessment approach. No goodwill impairment charges were recorded for any of the periods presented, nor were any indicators present.

Identifiable intangible assets subject to amortization are amortized using the straight-line method over their estimated period of benefit, ranging from five to twenty years. Both definite and indefinite lived identifiable intangible assets are tested for impairment whenever events or changes in circumstances suggest that an asset's or asset group's carrying value may not be fully recoverable. Residual value is presumed to be zero for all identifiable intangible assets. No intangible impairment charges were recorded for any of the periods presented, nor were any indicators present.

Financial Instruments Owned and Sold, Not Yet Purchased

Financial instruments owned and sold, not yet purchased, at fair value consist of financial instruments carried at fair value, measured on a recurring basis, or amounts that approximate fair value. Related realized and unrealized gains and losses are recognized in current period

PART II

ITEM 8 Financial Statements and Supplementary Data

earnings within *Principal gains, net, Interest income, Interest expense, and Cost of sales of physical commodities* in the Consolidated Income Statements. The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties.

Financial instruments owned and sold, not yet purchased comprise primarily the financial instruments held by the Company's broker-dealer subsidiaries and the Company's OTC derivative swap dealer. Financial instruments owned and financial instruments sold, not yet purchased, includes trading securities that the Company holds as a principal. The Company has not classified any financial instruments owned or sold, not yet purchased, as available-for-sale or held-to-maturity.

Financial instruments owned and sold, not yet purchased includes derivative instruments that the Company holds as a principal which are primarily transacted on an OTC basis. As a derivatives dealer, the Company utilizes these instruments to manage exposures to foreign currency, commodity price and interest rate risks for the Company and its clients. The Company's objectives for holding derivatives include reducing, eliminating, and efficiently managing the economic impact of these exposures as effectively as possible. The Company's derivative instruments also include forward purchase and sale commitments for the physical delivery of agricultural and energy related commodities in a future period. Contracts for the sale of agricultural and energy commodities generally do not extend beyond one year, while contracts to purchase agricultural and energy commodities generally relate to the current or future crop year.

Derivative instruments are measured at fair value on a recurring basis. For derivatives for which the Company does not elect hedge accounting, realized and unrealized gains and losses from the changes in fair value of derivative instruments are recognized immediately in current period earnings. Realized and unrealized gains and losses from the derivative instruments in which the Company acts as a dealer are included within *Principal gains, net* on the Consolidated Income Statements. Realized and unrealized gains and losses on firm purchase and sale commitments are included within *Cost of sales of physical commodities* on the Consolidated Income Statements.

To reduce credit exposure on the derivative instruments for which the Company acts as a dealer, the Company may enter into a master netting arrangement that allows for settlement of all derivative transactions with each counterparty. In addition, the credit support annex that accompanies master netting arrangements allows parties to the master netting agreement to mitigate their credit risk by requiring the party which is out of the money to post collateral. The Company accepts collateral in the form of cash or other marketable securities. Where permitted, the Company elects to net-by-counterparty certain derivative instruments entered into under a legally enforceable master netting agreement and, therefore, the fair value of those derivative instruments are netted by counterparty in the Consolidated Balance Sheets. As the Company elects to net-by-counterparty the fair value of such derivative instruments, the Company also nets-by-counterparty cash collateral exchanged as part of those derivative instruments.

The Company also brokers foreign exchange forwards, options and cash, or spot, transactions between clients and external counterparties. A portion of the contracts are arranged on an offsetting basis, limiting the Company's risk to performance of the two offsetting parties. The offsetting nature of the contracts eliminates the effects of market

fluctuations on the Company's operating results. Due to the Company's role as a principal participating in both sides of these contracts, the amounts are presented gross on the Consolidated Balance Sheets at their respective fair values, net of offsetting assets and liabilities.

The Company holds proprietary positions in its foreign exchange line of business. On a limited basis, the Company's foreign exchange trade desk will accept a client transaction and will offset that transaction with a similar but not identical position with a counterparty. These unmatched transactions are intended to be short-term in nature and are often conducted to facilitate the most effective transaction for the Company's client. These spot and forward contracts are accounted for as free-standing derivatives and reported in the Consolidated Balance Sheets at their fair values.

The Company may lease commodities to or from clients or counterparties. These commodity leases, which primarily involve precious metals, are recorded at fair value utilizing the fair value option based on guidance in ASC 825-10, Financial Instruments - Fair Value Option. These commodity leases represent hybrid financial instruments which contain both a dollar denominated loan host contract and an embedded forward derivative contract on the underlying commodities, which can be settled in either cash or metals. As permitted by the fair value option election, the entire instrument is recorded at fair value as either an asset or liability in the Consolidated Balance Sheets. The Company elects to value all of its commodities lease agreements at fair value using the fair value option.

For further information regarding the types of financial instruments owned and sold, not yet purchased, as well as the related valuation techniques refer to Note 3.

Derivative instruments and hedging activities

The Company executes interest rate swaps and foreign currency hedges to lessen the impacts of changes to interest rates and currency exchange rates, respectively, as well as benefit from favorable conditions. The Company recognizes all derivative instruments as either assets or liabilities at fair value. For all of the Company's derivative positions that are designated and qualify as part of a cash flow hedging relationship, the effective portion of the gain or loss on the derivatives is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transactions affect earnings. Gains and losses on derivatives representing any ineffective component of the hedge are recognized in current earnings. All of the Company's cash flow hedges have been deemed effective as of September 30, 2022 for both accounting and tax purposes. The Company has elected hedge accounting for both U.S. GAAP and tax purposes. The Company maintains formal documentation through a periodic memo and accounting analysis that cover what is being hedged, how it is being hedged, hedge effectiveness, the nature of the risk being hedged, among other required analyses. Company policy further includes a quarterly probability analysis covering hedge effectiveness.

Exchange and Clearing Organization Memberships

The Company or its affiliates are required to hold certain exchange and clearing organization memberships and pledges them for clearing purposes, in order to provide the right to process trades directly with the respective venues. Exchange memberships include seats on the

Chicago Board of Trade (“CBOT”), the Minneapolis Grain Exchange, the New York Mercantile Exchange (“NYMEX”), the Commodity Exchange, Inc. (“COMEX”) Division of the New York Mercantile Exchange, Mercado de Valores de Buenos Aires S.A. (“MERVAL”), the Chicago Mercantile Exchange (“CME”) Growth and Emerging Markets, InterContinental Exchange, Inc. (“ICE”) Futures US, and the London Metal Exchange (“LME”). Exchange firm and clearing organization common stock include shares of CME Group, Inc., ICE, LME Holdings Limited, and the Depository Trust & Clearing Corporation (“DTCC”).

Exchange and clearing organization memberships required in order to conduct business through the respective venues are recorded at cost and are included in *Other assets* on the Consolidated Balance Sheets. Equity investments in exchange firm common stock not required in order to conduct business on the exchanges are classified as trading securities included within *Financial instruments owned, at fair value* on the Consolidated Balance Sheets and recorded at fair value, with unrealized gains and losses recorded as a component of *Principal gains, net* on the Consolidated Income Statements. The fair value of exchange firm common stock not required in order to conduct business on the exchanges is determined from quoted market prices.

Exchange memberships that represent both (a) an ownership interest and the right to conduct business in the respective venues and are held for operating purposes, or (b) an ownership interest, which must be held by the Company to conduct business in the respective venues are accounted for as an ownership interest at cost with appropriate consideration for other-than-temporary impairment. The cost of exchange and clearing organization memberships that represent an ownership interest and are required in order to conduct business in the respective venues was \$5.5 million and \$5.5 million as of September 30, 2022 and 2021, respectively, compared to a fair value of \$6.2 million and \$6.8 million as of September 30, 2022 and 2021, respectively. Fair value was determined using quoted market prices and recent transactions.

Alternatively, exchange memberships, or seats, that only represent the right to conduct business on an exchange, but not an ownership interest in the exchange, are accounted for as intangible assets at cost with potential impairment determined under Accounting Standards Codification 350-30- *Intangibles - Goodwill and Other*. The cost of exchange memberships required in order to conduct business on the exchange, but not representing an ownership interest in the exchange, was \$5.8 million and \$6.0 million as of September 30, 2022 and 2021, respectively. As of and during the year ended September 30, 2022, there were no indicators of impairment that would suggest that the carrying value of exchange memberships that don't represent an ownership interest are impaired, primarily based upon projections of future cash flows and earnings attributable to access these respective venues.

Product Financing Arrangements

In the normal course of operations, the Company executes notes receivable under repurchase agreements with clients whereby the clients sell certain commodity inventory or other investments to the Company and agree to repurchase the commodity inventory or investment at a future date at a fixed price. These transactions are short-term in nature and are treated as secured borrowings rather than commodity inventory and purchases and sales in the Company's consolidated financial statements. These transactions are reflected as *Notes receivable, net* in the Consolidated

Balance Sheets. Commodities or investments sold under repurchase agreements are reflected at the amount of cash received in connection with the transactions. The Company may be required to provide additional collateral based on the fair value of the underlying asset.

The Company also participates in commodity repurchase transactions that are accounted for as commodity inventory and purchases and sales of physical commodities as opposed to secured borrowings. The repurchase price under these arrangements is not fixed at the time of execution and, therefore, does not meet all the criteria to be accounted for as product financing arrangements.

Lenders Under Loans

Lenders under loans are accounted for at amortized cost, which approximates fair value due to variable rates of interest.

Senior Secured Borrowings

Senior secured borrowings are accounted for at amortized cost, and are stated net of unamortized deferred financing costs and original issue discount.

Contingent Consideration

The Company estimates and records acquisition date estimated fair value of contingent consideration as part of purchase price consideration for acquisitions. Additionally, each reporting period, the Company estimates changes in the fair value of contingent consideration, and any change in fair value is recognized in the Consolidated Income Statements. Estimating contingent consideration fair value incorporates assumptions regarding future operating results, discount rates, and probabilities assigned to various potential operating results scenarios.

Revenue Recognition

The Company accounts for revenue earned from contracts with clients for services such as the execution, clearing, brokering, and custody of futures and options on futures contracts, OTC derivatives, and securities, investment management, and underwriting services under FASB ASC 606, Revenue from Contracts with Customers (“Topic 606”). Revenues for these services are recognized when the performance obligations related to the underlying transaction are completed.

Only when goods or services are transferred to clients, are revenues recognized in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services. Revenues are analyzed to determine whether the Company is the principal (i.e. reports revenue on a gross basis) or agent (i.e., reports revenues on a net basis) in the contract. Principal or agent designations depend primarily on the control an entity has over the good or service before control is transferred to a client. The indicators of which party exercises control include primary responsibility over performance obligations, inventory risk before the good or service is transferred, and discretion in establishing the price.

The revenue recognition model does not apply to revenues associated with dealing, or market-making, activities in financial instruments or contracts in the capacity of a principal, including derivative sales contracts which result in physical settlement and interest income.

Refer to Note 15 for further discussion of the Company's significant accounting policies related to revenue recognition.

PART II

ITEM 8 Financial Statements and Supplementary Data

Cost of Sales of Physical Commodities

Cost of sales of physical commodities include finished commodity or raw material and processing costs along with operating costs relating to the receipt, storage and delivery of physical commodities. Cost of sales of physical commodities also includes changes in the fair value of agricultural commodity inventories held for sale and adjustments for related forward purchase and sale commitments and exchange-traded futures and options contracts. Cost of sales of physical commodities further includes lower of cost or net realizable value for energies and certain precious metals.

Interest Expense

Interest expense is recognized on an accrual basis. Interest expense is incurred on outstanding balances on the Company's credit facilities. Interest expense is also incurred on fixed income securities sold, not yet purchased, that the Company holds in its market-marking businesses. Interest expense is also incurred from collateralized transactions, including securities loaned and securities sold under agreements to repurchase.

Transaction-Based Clearing Expenses

Clearing fees and related expenses include primarily variable expenses for clearing and settlement services, including fees the Company pays to executing brokers, exchanges, clearing organizations and banks. These fees are based on transaction volume and recorded as expense on trade date. Clearing fees are passed on to clients and are presented gross in the consolidated statements of income as the Company acts as a principal for these transactions.

Introducing Broker Commissions

Introducing broker commissions include commissions paid to non-employee individuals or organizations that maintain relationships with clients and introduce them to the Company. Introducing brokers accept futures and options orders from those clients, while the Company directly provides all account, transaction and margining services, including accepting money, securities and property from the clients. Introducing brokers bring clients to the Company's OTC business as well. Introducing broker commissions are determined monthly and settled regularly.

Compensation and Benefits

Compensation and benefits consists primarily of salaries, incentive compensation, variable compensation, including commissions, related payroll taxes and employee benefits. The Company classifies employees as either risk management consultants / traders, operational or administrative personnel, which includes executive officers. Variable compensation paid to risk management consultants and traders generally represents a fixed percentage of revenues generated, and in some cases, revenues produced less direct costs and an overhead allocation. The Company accrues commission expense on a trade-date basis.

Share-Based Compensation

The Company accounts for share-based compensation from option and restricted stock unit awards in accordance with the guidance in ASC 718-10, Compensation - Stock Compensation. The cost of employee services received in exchange for a share-based award is generally measured based on the grant-date fair value of the award. Share-based employee awards that require future service are amortized over the relevant service period. Forfeitures are accounted for as they occur in determining share-based employee compensation expense. For awards granted, compensation cost is recognized on a straight-line basis over the vesting period for the entire award.

Selling and Marketing

The Company generally expenses Selling and marketing costs as incurred. The Company's policy includes expensing commercial media development costs as incurred, rather than deferring them until the related commercial airs. The Company expenses air time, such as television air-time, as used.

Income Taxes

Income tax expense includes U.S. federal, state and local and foreign income taxes. Certain items of income and expense are not reported in tax returns and financial statements in the same year. Accounting for income taxes aims to recognize the amount of taxes payable or refundable for the current year. The Company utilizes the asset and liability method to provide income taxes on all transactions recorded in the consolidated financial statements. This method requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets or liabilities for book and tax purposes. Accordingly, a deferred tax asset or liability for each temporary difference is determined based on the tax rates that the Company expects to be in effect when the underlying items of income and expense are realized. Judgment is required in assessing the future tax consequences of events that have been recognized in the Company's financial statements or tax returns, including the repatriation of undistributed earnings of foreign subsidiaries. In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some or all of the deferred tax assets will not be realized. The Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authority, based upon the technical merits of the position. The tax benefit recognized in the consolidated financial statements from such a position is measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. See Note 19 for further information on the Company's income taxes.

Additional Paid-In Capital

The Company's additional paid-in capital ("APIC") consists of stockholder contributions that are in excess of par value of common stock, also including amounts related to stock options exercises and share-based compensation.

Comprehensive Income

Comprehensive income consists of net income and other gains and losses affecting stockholders' equity that, under U.S. GAAP, are excluded from net income. Other comprehensive income (loss) includes net actuarial gains and losses from defined benefit pension plans, the unrealized gains and losses from the Company's cash flow hedges, as well as and gains and losses on foreign currency translations.

Preferred Stock

The Company is authorized to issue one million shares of preferred stock, par value of \$0.01 per share, in one or more classes or series to be established by the Company's Board of Directors. As of September 30, 2022 and 2021, no preferred shares were outstanding and the Company's Board of Directors had not established any class or series of shares.

Accounting Standards Adopted

In December 2019, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes. This ASU removed certain exceptions for recognizing deferred taxes for investments, performing intraperiod allocation and calculating income taxes in interim periods. The ASU also adds guidance to reduce complexity in certain areas, including recognizing deferred taxes for tax goodwill and allocating taxes to members of a consolidated group. The Company adopted this standard as of October 1, 2021 on a prospective basis, as permitted by the standard. There was no cumulative effect adjustment recorded to retained earnings. The effects of this standard on the Company's consolidated financial position, results of operations and cash flows are not material.

In June 2016, the FASB issued ASU No. 2016-13, "Measurement of Credit Losses on Financial Instruments", which significantly changes the ways entities recognize credit losses on financial instruments. The guidance is effective for public business entities for annual and interim periods in fiscal years beginning after December 15, 2019. In April 2019, the FASB issued ASU No. 2019-04, "Codification Improvements to Topic 326, Financial Instruments - Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments", which among other things, included several amendments to ASU No. 2016-13, changing how a company considers expected recoveries and contractual extensions or renewal options when estimating expected credit losses.

NOTE 2 Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") using the two-class method which requires all outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends and therefore participate in undistributed earnings with common stockholders be included in computing earnings per share. Under the two-class method, net income is reduced by the amount of dividends declared in the period for each class of common stock and participating security. The remaining undistributed earnings

The guidance replaces the previous incurred loss impairment guidance and introduces a new credit reserving model known as the Current Expected Credit Loss ("CECL") model, which is based on expected losses over the life of an asset, and applies to financial assets carried at amortized cost, held-to-maturity debt securities and off-balance sheet credit exposures. The allowance must reflect management's estimate of credit losses over the life of the assets taking future economic changes into consideration.

The Company adopted this guidance on October 1, 2020, using the modified retrospective approach, which resulted in a recognized cumulative-effect adjustment of \$6.2 million, net of tax of \$2.0 million, to the opening balance of retained earnings - see Note 5 and Note 13. The adoption impact was attributable to an increase in allowance for credit losses related to the OptionSellers.com Inc. clients discussed in further detail within Note 13 of the consolidated financial statements. Results for reporting periods beginning after October 1, 2020 are presented using the CECL model, while prior period amounts continue to be reported in accordance with previously applicable U.S. GAAP.

Current Expected Credit Losses

Beginning October 1, 2020, the Company estimates its allowance for credit losses on financial assets measured at amortized cost based on expected credit losses over the life of the financial asset. In determining expected credit losses, the Company considers a number of factors including, but not limited to, historical collection experience, current and forecasted economic and business conditions, internal and external credit risk ratings, collateral terms, payment terms and aging of the financial asset.

The Company estimates expected credit losses primarily using a probability of default ("PD")/loss given default ("LGD") model ("PD/LGD model"), under which the expected credit loss is calculated as the product of PD, LGD and exposure at default.

Additionally, for collateralized transactions, the Company elects to measure expected credit losses using the fair value of collateral received where the borrower is required to, and reasonably expected to, replenish the amount of collateral securing the receivable as a result of changes in the fair value of such collateral.

are then allocated to common stock and participating securities, based on their respective rights to receive dividends. Restricted stock awards granted to certain employees and directors contain non-forfeitable rights to dividends at the same rate as common stock, and are considered participating securities. Basic EPS has been computed by dividing net income by the weighted-average number of common shares outstanding.

PART II

ITEM 8 Financial Statements and Supplementary Data

The following is a reconciliation of the numerator and denominator of the diluted net income per share computations for the periods presented below.

| <i>(in millions, except share amounts)</i> | Year Ended September 30, | | |
|---|--------------------------|------------|------------|
| | 2022 | 2021 | 2020 |
| Numerator: | | | |
| Net income | \$ 207.1 | \$ 116.3 | \$ 169.6 |
| Less: Allocation to participating securities | (6.1) | (3.5) | (4.0) |
| Net income allocated to common stockholders | \$ 201.0 | \$ 112.8 | \$ 165.6 |
| Denominator: | | | |
| Weighted average number of: | | | |
| Common shares outstanding | 19,570,403 | 19,130,643 | 18,824,328 |
| Dilutive potential common shares outstanding: | | | |
| Share-based awards | 497,137 | 547,525 | 356,151 |
| Diluted shares outstanding | 20,067,540 | 19,678,168 | 19,180,479 |

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense.

Options to purchase 451,907, 298,786 and 898,420 shares of common stock for the years ended September 30, 2022, 2021, and 2020, respectively, were excluded from the calculation of diluted earnings per share because they would have been anti-dilutive.

NOTE 3 Assets and Liabilities, at Fair Value

Fair value is defined by U.S. GAAP as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants on the measurement date.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company is required to develop a set of assumptions that reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The Company has designed independent price verification controls and periodically performs such controls to ensure the reasonableness of such values.

Financial and nonfinancial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A market is active if there are sufficient transactions on an ongoing basis to provide current pricing information for the asset or liability, pricing information is released publicly, and price quotations do not vary substantially either over time or among market makers. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity.

The guidance requires the Company to consider counterparty credit risk of all parties of outstanding derivative instruments that would be considered by a market participant in the transfer or settlement of such contracts (exit price). The Company's exposure to credit risk on derivative financial instruments relates to the portfolio of OTC

derivative contracts as all exchange-traded contracts held can be settled on an active market with a credit guaranty from the respective exchange. The Company requires each counterparty to deposit margin collateral for all OTC instruments and is also required to deposit margin collateral with counterparties. The Company has assessed the nature of these deposits and used its discretion to adjust each based on the underlying credit considerations for the counterparty and determined that the collateral deposits minimize the exposure to counterparty credit risk in the evaluation of the fair value of OTC instruments as determined by a market participant.

In accordance with ASC 820, *Fair Value Measurement*, the Company groups its assets and liabilities measured at fair value in three levels based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 - Valuation is based upon unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. Level 1 consists of financial assets and liabilities whose fair values are estimated using quoted market prices.

Level 2 - Valuation is based upon quoted prices for identical or similar assets or liabilities in markets that are less active, that is, markets in which there are few transactions for the asset or liability that are observable for substantially the full term. Included in Level 2 are those financial assets and liabilities for which fair values are estimated using models or other valuation methodologies. These models are primarily industry-standard models that consider various observable inputs, including time value, yield curve, volatility factors, observable current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures.

Level 3 - Valuation is based on prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity). Level 3 comprises financial assets and liabilities whose fair value is estimated based on internally developed models or methodologies utilizing significant inputs that are not readily observable from objective sources. Level 3 includes contingent liabilities that have been valued using an income approach based upon management developed discounted cash

flow projections, which are an unobservable input. The Company had \$0.0 million and \$2.8 million of contingent liabilities classified within Level 3 of the fair value hierarchy as of September 30, 2022 and 2021, respectively. The Company had no Level 3 assets as of September 30, 2022 and 2021.

Fair value of financial and nonfinancial assets and liabilities that are carried on the Consolidated Balance Sheets at fair value on a recurring basis

Cash and cash equivalents reported at fair value on a recurring basis includes certificates of deposit and money market mutual funds, which are stated at cost plus accrued interest, which approximates fair value.

Cash, securities and other assets segregated under federal and other regulations reported at fair value on a recurring basis include the value of pledged investments, primarily U.S. Treasury obligations and commodities warehouse receipts.

Deposits with and receivables from broker-dealers, clearing organizations and counterparties and payable to clients and broker-dealers, clearing organizations and counterparties includes the fair value of pledged investments, primarily U.S. Treasury obligations and foreign government obligations. These balances also include the fair value of exchange-traded options on futures and OTC forwards, swaps, and options.

Financial instruments owned and sold, not yet purchased include the fair value of equity securities, which includes common, preferred, and foreign ordinary shares, American Depository Receipts (“ADRs”), Global Depository Receipts (“GDRs”), and exchange-traded funds (“ETFs”), corporate and municipal bonds, U.S. Treasury obligations, U.S. government agency obligations, foreign government obligations, agency mortgage-backed obligations, asset-backed obligations, derivative financial instruments, commodities warehouse receipts, exchange firm common stock, and investments in managed funds. The fair value of exchange firm common stock is determined by quoted market prices.

Cash equivalents, debt and equity securities, commodities warehouse receipts, physical commodities inventory, derivative financial instruments and contingent liabilities are carried at fair value, on a recurring basis, and are classified and disclosed into three levels in the fair value hierarchy.

The following section describes the valuation methodologies used by the Company to measure classes of financial instruments at fair value and specifies the level within the fair value hierarchy where various financial instruments are classified.

The Company uses quoted prices in active markets, where available, and classifies such instruments within Level 1 of the fair value hierarchy. Examples include U.S. Treasury obligations, foreign government obligations, commodities warehouse receipts, certain equity securities traded in active markets, physical precious metals inventory held by a regulated broker-dealer subsidiary, exchange firm common stock, investments in managed funds, as well as options on futures contracts traded on national exchanges. The fair value of exchange firm common stock is determined by recent sale transactions and is included within Level 1.

When instruments are traded in secondary markets and observable prices are not available for substantially the full term, the Company generally relies on internal valuation techniques or prices obtained from third-party pricing services or brokers or a combination thereof, and

accordingly, classifies these instruments as Level 2. Examples include corporate and municipal bonds, U.S. government agency obligations, agency-mortgage backed obligations, asset-backed obligations, certain equity securities traded in less active markets, and OTC derivative contracts, which include purchase and sale commitments related to the Company’s agricultural and energy commodities.

Certain derivatives without a quoted price in an active market and derivatives executed OTC are valued using internal valuation techniques, including pricing models which utilize significant inputs observable to market participants. The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The key inputs depend upon the type of derivative and the nature of the underlying instrument and include interest yield curves, foreign exchange rates, commodity prices, volatilities and correlation. These derivative instruments are included within Level 2 of the fair value hierarchy.

Physical commodities inventory includes precious metals that are a part of the trading activities of a regulated broker-dealer subsidiary that records these assets at fair value using exchange-quoted prices. Physical commodities inventory also includes agricultural commodities that are a part of the trading activities of a non-broker dealer subsidiary and are recorded at net realizable value using exchange-quoted prices. The fair value of precious metals physical commodities inventory is based upon unadjusted exchange-quoted prices and is, therefore, classified within Level 1 of the fair value hierarchy. The fair value of agricultural physical commodities inventory and related OTC firm sale and purchase commitments are generally based upon exchange-quoted prices, adjusted for basis or differences in local markets, broker or dealer quotations or market transactions in either listed or OTC markets. Exchange-quoted prices are adjusted for location and quality because the exchange-quoted prices for agricultural and energy related products represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis or local market adjustments are observable inputs or have an insignificant impact on the measurement of fair value and, therefore, the agricultural physical commodities inventory as well as the related OTC forward firm sale and purchase commitments have been included within Level 2 of the fair value hierarchy.

With the exception of certain derivative instruments where the valuation approach is disclosed above, financial instruments owned and sold are primarily valued using third-party pricing sources. Third-party pricing vendors compile prices from various sources and often apply matrix pricing for similar securities when market-observable transactions for the instruments are not observable for substantially the full term. The Company reviews the pricing methodologies used by third-party pricing vendors in order to evaluate the fair value hierarchy classification of vendor-priced financial instruments and the accuracy of vendor pricing, which typically involves the comparison of primary vendor prices to internal trader prices or secondary vendor prices. When evaluating the propriety of vendor-priced financial instruments using secondary prices, considerations include the range and quality of vendor prices, level of observable transactions for identical and similar instruments, and judgments based upon knowledge of a particular market and asset class. If a primary vendor price does not represent fair value, justification for using a secondary price, including source data used to make the determination, is subject to review and approval by authorized personnel prior to using a secondary price. Financial instruments owned and sold that are valued using third-party pricing vendors are included within either Level 1 or Level 2 of the fair value hierarchy based upon the observability of the inputs used and the level of activity in the market.

PART II

ITEM 8 Financial Statements and Supplementary Data

The fair value estimates presented herein are based on pertinent information available to management as of September 30, 2022 and 2021. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these consolidated financial statements since that date and current estimates of fair value may differ significantly from the amounts presented herein.

The following tables set forth the Company's financial and nonfinancial assets and liabilities accounted for at fair value, on a recurring basis, as of September 30, 2022 and 2021 by level in the fair value hierarchy. All fair value measurements were performed on a recurring basis as of September 30, 2022 and 2021.

| <i>(in millions)</i> | September 30, 2022 | | | | |
|--|--------------------|-------------------|-------------|------------------------|-------------------|
| | Level 1 | Level 2 | Level 3 | Netting ⁽¹⁾ | Total |
| ASSETS: | | | | | |
| Certificates of deposit | \$ 4.0 | \$ — | \$ — | \$ — | \$ 4.0 |
| Money market mutual funds | 39.5 | — | — | — | 39.5 |
| Cash and cash equivalents | 43.5 | — | — | — | 43.5 |
| Commodities warehouse receipts | 19.7 | — | — | — | 19.7 |
| U.S. Treasury obligations | 786.0 | — | — | — | 786.0 |

(1) Represents cash collateral and the impact of netting across the levels of the fair value hierarchy. Netting among positions classified within the same level are included in that level.

Realized and unrealized gains and losses are included in *Principal gains, net*, *Interest income*, and *Cost of sales of physical commodities* in the Consolidated Income Statements.

The fair value of an exchange-traded options on futures contract is equal to the unrealized gain or loss on the contract determined by marking the contract to the current settlement price for a like contract on the valuation date of the contract. A settlement price may not be used if the market makes a limit move with respect to a particular options on futures contract or if the contract's underlying experiences

significant price fluctuations after the determination of the settlement price. When a settlement price cannot be used, options on futures contracts will be valued at their fair value as determined in good faith pursuant to procedures adopted by management of the Company.

The Company has classified equity investments in exchange firms' common stock not pledged for clearing purposes as trading securities. The investments are recorded at fair value, with unrealized gains and losses recorded, net of taxes, included in earnings. As of September 30, 2022, the cost and fair value of the equity investments in exchange firms

PART II

ITEM 8 Financial Statements and Supplementary Data

is \$3.7 million and \$10.6 million, respectively. As of September 30, 2021, the cost and fair value of the equity investments in exchange firms was \$3.7 million and \$11.6 million, respectively.

Information on Level 3 Financial Liabilities

The acquisition of Fillmore Advisors, LLC, as further discussed in Note 20, included a contingent consideration arrangement as a component of the purchase price. Pursuant to the contingent consideration agreement, the Company was required to make additional future cash payments based on certain financial performance measures of the acquired business. As of September 30, 2021, the Company had fully satisfied the liability for the contingent consideration. During the year ended September 30, 2021, the Company recorded cash settlements against the liability of \$2.6 million, partially offset by remeasurement losses of \$1.1 million included in *Other expenses* on the Consolidated Income Statements for the year ended September 30, 2021. Remeasurement losses in the year ended September 30, 2020 were \$0.6 million.

The acquisition of Chasing Returns Limited, as further discussed in Note 20, included a contingent consideration arrangement as a component of the purchase price. Pursuant to the contingent consideration agreement, the Company is required to make additional future cash payments based on certain implementation milestones. As of September 30, 2022, the Company had fully satisfied the liability for the contingent consideration, with payments of \$3.6 million made during the year ended September 30, 2022.

Additional Disclosures about the Fair Value of Financial Instruments that are not carried on the Consolidated Balance Sheets at Fair Value

Many, but not all, of the financial instruments that the Company holds are recorded at fair value in the Consolidated Balance Sheets. The following represents financial instruments in which the ending balances at September 30, 2022 and 2021 were not carried at fair value in accordance with U.S. GAAP on our Consolidated Balance Sheets:

Short-term financial instruments: The carrying values of short-term financial instruments, including cash and cash equivalents, cash segregated under federal and other regulations, securities purchased under agreements to re-sell and securities sold under agreements to re-purchase, and securities borrowed and loaned are recorded at amounts that approximate the fair value of these instruments due to their short-term nature and level of collateralization. These financial instruments generally expose the Company to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market rates. Under the fair value hierarchy, cash and cash equivalents and cash segregated under federal and other regulations are classified as Level 1. Securities purchased under agreements to re-sell and securities sold under agreements to re-purchase, and securities borrowed and loaned are classified as Level 2 under the fair value hierarchy as they are generally overnight, or short-term in nature, and are collateralized by common stock, U.S. Treasury obligations, U.S. government agency obligations, agency mortgage-backed obligations, and asset-backed obligations.

Receivables and other assets: Deposits with and receivables from broker-dealers, clearing organizations, and counterparties, receivables from clients, net, notes receivables, net and certain other assets are recorded at amounts that approximate fair value due to their short-term nature and are classified as Level 2 under the fair value hierarchy.

Payables: Payables to clients and payables to brokers-dealers, clearing organizations, and counterparties are recorded at amounts that approximate fair value due to their short-term nature. They are classified as Level 2 under the fair value hierarchy.

Lenders under loans: Payables to lenders under loans carry variable rates of interest and thus approximate fair value and are classified as Level 2 under the fair value hierarchy.

Senior secured borrowings, net: Senior secured borrowings, net includes the Company's 8.625% Senior Secured Notes due 2025 (the "Senior Secured Notes"), as further described in Note 11 with a carrying value of \$339.1 million as of September 30, 2022. The carrying value of the Senior Secured Notes represent their principal amounts net of unamortized deferred financing costs and original issue discount. As of September 30, 2022, the Senior Secured Notes had a fair value of \$352.3 million and are classified as Level 2 under the fair value hierarchy.

NOTE 4 Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk

The Company is party to certain financial instruments with off-balance sheet risk in the normal course of its business. The Company has sold financial instruments that it does not currently own and will therefore be obliged to purchase such financial instruments at a future date. The Company has recorded these obligations in the consolidated financial statements as of September 30, 2022 at the fair values of the related financial instruments. The Company will incur losses if the fair value of the underlying financial instruments increases subsequent to September 30, 2022. The total *Financial instruments sold, not yet purchased, at fair value* of \$2,469.6 million as of September 30, 2022 includes \$313.4 million for derivative contracts, which represent a liability to the Company based on their fair values as of September 30, 2022.

Derivatives

The Company utilizes derivative products in its trading capacity as a dealer in order to satisfy client needs and mitigate risk. The Company manages risks from both derivatives and non-derivative cash instruments on a consolidated basis. The risks of derivatives should not be viewed in isolation, but in aggregate with the Company's other trading activities. The Company's derivative positions are included in the Consolidating Balance Sheets in *Deposits with and receivables from broker-dealers, clearing organizations, and counterparties; Receivables from clients, net; Financial instruments owned, net; Financial instruments sold, not yet purchased, at fair value; Payables to clients; and Payables to broker-dealers, clearing organizations and counterparties.*

Listed below are the fair values of the Company's derivative assets and liabilities as of September 30, 2022 and 2021. Assets represent net unrealized gains and liabilities represent net unrealized losses.

(1) As of September 30, 2022 and 2021, the Company's derivative contract volume for open positions was approximately 13.3 million and 11.1 million contracts, respectively.

The Company's derivative contracts are principally held in its Institutional, Commercial, and Retail segments. The Company provides its Institutional segment clients access to exchanges at which they can carry out their trading strategies. The Company assists its Commercial segment clients in protecting the value of their future production by entering into option or forward agreements with them on an OTC basis. The Company also provides its Commercial segment clients with exchange products, including combinations of buying and selling puts and calls. In its Retail segment, the Company provides its retail clients with access to spot foreign exchange, precious metals trading, as well as contracts for difference ("CFD") and spread bets, where permitted. The Company mitigates its risk by generally offsetting the client's transaction simultaneously with one of the Company's trading counterparties or will offset that transaction with a similar but not identical position on the exchange. The risk mitigation of these offsetting trades is not within the documented hedging designation requirements of the Derivatives and Hedging Topic of the ASC. These derivative contracts are traded along with cash transactions because of the integrated nature of the markets for these products. The Company manages the risks associated with derivatives on an aggregate basis along with the risks associated with its proprietary trading and market-making activities in cash instruments as part of its firm-wide risk management policies. In particular, the risks related to derivative positions may be partially offset by inventory, other derivatives, or cash collateral paid or received.

Hedging Activities

The Company uses interest rate derivatives, in the form of swaps, to hedge risk related to variability in overnight rates. These hedges are designated cash flow hedges, through which the Company mitigates uncertainty in its interest income generation by converting floating-rate interest income to fixed-rate interest income. While the swaps mitigate interest rate risk, they do introduce credit risk, which is the possibility that the Company's trading counterparty fails to meet its obligation. The Company minimizes this risk by entering into its swaps with highly-rated, multi-national institutions. In addition to credit risk, there is market risk associated with the swap positions. The Company's market risk is limited, because any amounts the Company must pay from having exchanged variable interest will be funded by the variable interest the Company receives on its deposits. As of September 30, 2022, the Company had \$1,500.0 million in notional value of its interest rate contracts hedges. As of September 30, 2022, the Company's hedges will all mature within 2 years from the end of the current period.

The Company also uses foreign currency derivatives, in the form of forward contracts, to hedge risk related to the variability in exchange rates relative to certain of the Company's non-USD expenditures. These hedges are designated cash flow hedges, through which the Company mitigates variability in exchange rates by exchanging foreign currency for USD at fixed exchange rates at a pre-determined future date, or several cash flows at several pre-determined future

PART II

ITEM 8 Financial Statements and Supplementary Data

dates. While the forward contracts mitigate exchange rate variability risk, they do introduce credit risk, which is the possibility that the Company's trading counterparty fails to meet its obligation. The Company minimizes this risk by entering into its forward contracts with highly-rated, multi-national institutions. As of September 30, 2022, the Company had foreign currency forward contracts to purchase British Pound Sterling with notional values in local currency of £168.0 million and USD of \$207.3 million. These hedges will all mature within 2 years from the end of the current period.

The Company assesses the effectiveness of its hedges at each reporting period to identify any required reclassifications into current earnings. During the year ended September 30, 2022, the Company did not designate any portion of its hedges as ineffective and thus did not have any values in current earnings related to ineffective hedges. As of September 30, 2022, \$9.7 million and \$8.9 million of derivative liabilities related to interest rate contracts and foreign currency forward contracts, respectively, are expected to be released from *Other comprehensive income* into current earnings. The Company had no such hedges as of September 30, 2021 or during the year then ended. The fair values of derivative instruments designated for hedging held as of September 30, 2022 are as follow:

| <i>(in millions)</i> | September 30, 2022 | |
|--|--|-------------|
| | Balance Sheet Location | Fair Value |
| Liability Derivatives | | |
| Derivatives designated as hedging instruments: | | |
| Interest rate contracts | Financial instruments sold, not yet purchased \$ | 48.8 |
| Foreign currency forward contracts | Financial instruments sold, not yet purchased | 21.8 |
| Total derivatives designated as hedging instruments | \$ | 70.6 |

The Condensed Consolidated Income Statement effects of derivative instruments designated for hedging held for the year ended September 30, 2022 are as follow:

| <i>(in millions)</i> | Year Ended September 30, 2022 |
|--|----------------------------------|
| | Interest Expense |
| Total amounts in net income related to hedges | |
| Interest rate contracts | \$ 2.4 |
| Total derivatives designated as hedging instruments | \$ 2.4 |
| Loss on cash flow hedging relationships: | |
| Amount of loss reclassified from accumulated other comprehensive income into income | \$ 2.4 |
| Amount reclassified from accumulated other comprehensive income into income as a result of a forecasted transaction that is no longer probable of occurring | \$ — |

The accumulated other comprehensive income effects of derivative instruments designated for hedging held for the year ended September 30, 2022 are as follows:

| <i>(in millions)</i> | Year Ended September 30, 2022 | | |
|--|---|---|---|
| | Amount of Loss Recognized in Other Comprehensive Income on Derivatives, net of tax | Location of Loss Reclassified from Accumulated Other Comprehensive Income into Income | Amount of Loss Reclassified from Accumulated Other Comprehensive Income into Income |
| Derivatives in Cash Flow Hedging Relationships: | | | |
| Interest rate contracts | \$ 37.0 | Interest Income | \$ 2.4 |
| Foreign currency forward contracts | 16.5 | N/A | — |
| Total | \$ 53.5 | | \$ 2.4 |

The following table sets forth the Company's net gains/(losses) related to derivative financial instruments for the periods indicated, in accordance with the Derivatives and Hedging Topic of the ASC. The net gains/(losses) set forth below are included in *Principal gains, net* and *Cost of sales of physical commodities* in the Consolidated Income Statements.

| <i>(in millions)</i> | Year Ended September 30, | | |

| Net gains from derivative contracts | \$ 805.3 | \$ 398.6 | \$ 206.2 |

Credit Risk

In the normal course of business, the Company purchases and sells financial instruments, commodities and foreign currencies as either principal or agent on behalf of its clients. If either the client or counterparty fails to perform, the Company may be required to discharge the obligations of the nonperforming party. In such circumstances, the Company may sustain a loss if the fair value of the financial instrument or foreign currency is different from the contract value of the transaction.

The majority of the Company's transactions and, consequently, the concentration of its credit exposure are with commodity exchanges, clients, broker-dealers and other financial institutions. These activities involve both collateralized and uncollateralized arrangements and may result in credit exposure in the event that a counterparty fails to meet its contractual obligations. The Company's exposure to credit risk can be directly impacted by volatile financial markets, which may impair the ability of counterparties to satisfy their contractual obligations. The Company seeks to control its credit risk through a variety of reporting and control procedures, including establishing credit limits based upon a review of counterparties financial condition and credit ratings. The Company monitors collateral levels on a daily basis for compliance with regulatory and internal guidelines. The Company requests changes in collateral levels as appropriate.

The Company is a party to financial instruments in the normal course of its business through client and proprietary trading accounts in exchange-traded and OTC derivative instruments. These instruments are primarily the execution of orders for commodity futures, options on futures and forward foreign currency contracts on behalf of its clients, substantially all of these transactions occur on a margin basis. Such transactions may expose the Company to significant credit risk in the event margin requirements are not sufficient to fully cover losses which clients may incur. The Company controls the risks associated

with these transactions by requiring clients to maintain margin deposits in compliance with individual exchange regulations and internal guidelines. The Company monitors required margin levels daily and, therefore, may require clients to deposit additional collateral or reduce positions when necessary. The Company also establishes client credit limits, which are monitored daily. The Company evaluates each client's creditworthiness on a case by case basis. Clearing, financing, and settlement activities may require the Company to maintain funds with or pledge securities as collateral with other financial institutions. Generally, these exposures to both clients and counterparties are subject to master netting, or client agreements, which reduce the exposure to the Company by permitting receivables and payables with such clients to be offset in the event of a client default. Management believes that the margin deposits held as of September 30, 2022 and 2021 were adequate to minimize the risk of material loss that could be created by positions held at that time. Additionally, the Company monitors collateral fair value on a daily basis and adjusts collateral levels in the event of excess market exposure.

Derivative financial instruments involve varying degrees of off-balance sheet market risk whereby changes in the fair values of underlying financial instruments may result in changes in the fair value of the financial instruments in excess of the amounts reflected in the Consolidated Balance Sheets. Exposure to market risk is influenced by a number of factors, including the relationships between the financial instruments and the Company's positions, as well as the volatility and liquidity in the markets in which the financial instruments are traded. The principal risk components of financial instruments include, among other things, interest rate volatility, the duration of the underlying instruments and changes in commodity pricing and foreign exchange rates. The Company attempts to manage its exposure to market risk through various techniques. Aggregate market limits have been established and market risk measures are routinely monitored against these limits.

NOTE 5 Allowance for Doubtful Accounts

Deposits with and receivables from broker-dealers, clearing organizations, and counterparties, net; receivable from clients, net; and notes receivable, net include allowances for doubtful accounts, which reflect the Company's best estimates of probable losses inherent in the accounts. In determining expected credit losses and establishing its allowance for doubtful accounts, the Company considers a number of factors including, but not limited to, historical collection experience, current and forecasted economic and business conditions, internal and external credit risk ratings, collateral terms, payment terms and aging of the financial asset, as well as specific-identification in certain circumstances. The Company continually reviews its allowance for doubtful accounts.

The allowance for doubtful accounts related to deposits with and receivables from broker-dealers, clearing organizations, and counterparties was \$1.4 million and \$1.3 million as of September 30, 2022 and 2021. The allowance for doubtful accounts related to receivables from clients was \$46.4 million and \$38.5 million as of

September 30, 2022 and 2021, respectively. The Company had no allowance for doubtful accounts related to notes receivable as of September 30, 2022 and 2021.

During the years ended September 30, 2022 and September 30, 2021, the Company charged off \$5.6 million and \$5.9 million, respectively, of receivables against the allowance for doubtful accounts. During the year ended September 30, 2020, the Company charged off \$35.6 million of receivables against the allowance for doubtful accounts related to the physical coal business, which the Company exited in the year ended September 30, 2018.

During the year ended September 30, 2022, the Company recorded bad debt expense of \$12.4 million, related to the allowance. The bad debt expense was primarily caused by \$11.6 million of deficits in the Commercial segment, which includes \$2.5 million in physical commodity accounts, and \$2.3 million of client deficits in the Retail segment.

PART II

ITEM 8 Financial Statements and Supplementary Data

During the year ended September 30, 2021, the Company recorded bad debt expense of \$10.4 million. The bad debt expense was primarily related to \$8.5 million of client OTC derivative account deficits in the Commercial segment, \$0.6 million of client exchange-traded futures and options on futures account deficits in the Institutional segment, \$1.1 million of OTC derivative client account deficits in the Retail segment, and \$0.2 million in the Global Payments segment. \$4.6 million of the bad debt within the Commercial segment related to a particular energy product in the Company's physical energy commodity business.

Activity in the allowance for doubtful accounts for the years ended September 30, 2022, 2021, and 2020 was as follows:

| <i>(in millions)</i> | 2022 | 2021 | 2020 |
|--|---------|---------|---------|
| Balance, beginning of year | \$ 39.8 | \$ 27.1 | \$ 48.6 |
| ASU 2016-13 cumulative transition adjustment | — | 8.2 | — |
| Adjusted balance, beginning of year | 39.8 | 35.3 | 48.6 |
| Provision for bad debts ⁽²⁾ | 12.4 | 10.4 | 13.0 |
| Allowance charge-offs | (5.6) | (5.9) | (35.6) |
| Other ⁽¹⁾ | 1.2 | — | 1.1 |
| Balance, end of year | \$ 47.8 | \$ 39.8 | \$ 27.1 |

(1) Allowance increase is related to a recoverable amount due from an affiliated party and recorded in Other assets on the Consolidated Balance Sheets.

(2) An additional \$3.4 million is included in bad debt expense for the year ended September 30, 2022 on the consolidated income statement, which is not included in the allowance at the year then ended.

NOTE 6 Physical Commodities Inventory

The Company's inventories consist of finished physical commodities as shown below.

| <i>(in millions)</i> | September 30, 2022 | September 30, 2021 |
|--|--------------------|--------------------|
| Physical Ag & Energy ⁽¹⁾ | \$ 223.6 | \$ 248.6 |
| Precious metals - held by broker-dealer subsidiary | 136.3 | 111.2 |
| Precious metals - held by non-broker-dealer subsidiaries | 153.6 | 87.7 |
| Physical commodities inventory | \$ 513.5 | \$ 447.5 |

(1) Physical Ag & Energy consists of agricultural commodity inventories, including corn, soybeans, wheat, dried distillers grain, canola, sorghum, coffee, cocoa, cotton, and others. Agricultural inventories have reliable, readily determinable and realizable market prices, have relatively insignificant costs of disposal and are available for immediate delivery. Physical Ag & Energy also includes energy related inventories, including primarily propane, gasoline, and kerosene. The Company records changes to these values in Cost of sales of physical commodities on the Consolidated Income Statements.

NOTE 7 Property and Equipment, net

Property and equipment is stated at cost, and reported net of accumulated depreciation and amortization on the Consolidated Balance Sheets. Depreciation on property and equipment is generally calculated using the straight-line method over the relevant asset's estimated useful life. The estimated useful lives of property and equipment range from 3 to 10 years. During the years ended September 30, 2022, 2021, and 2020, depreciation expense was \$30.0 million, \$21.3 million, and \$13.3 million respectively.

During the year ended September 30, 2020, the Company recorded bad debt expense, net of recoveries, of \$13.0 million. The bad debt expense during the year ended September 30, 2020 primarily related to \$3.5 million of client OTC derivative account deficits in the Commercial segment, \$5.4 million of client exchange-traded futures and options on futures account deficits in the Institutional segment, and \$0.6 million of OTC derivative client account deficits in the Retail segment. The Company also incurred bad debt expense of \$3.2 million within the Commercial segment related to receivables in the Company's physical energy commodity business.

The Company capitalized \$24.8 million and \$22.3 million of software development costs during the years ended September 30, 2022 and September 30, 2021.

The Company recorded impairment charges of \$5.7 million, which are reflected in *Bad debts, net of recoveries and impairment* on the Consolidated Income Statement for the year ended September 30, 2020.

A summary of property and equipment, at cost less accumulated depreciation and amortization as of September 30, 2022 and 2021 is as follows:

| <i>(in millions)</i> | September 30, | |
|---|---------------|---------|
| | 2022 | 2021 |
| Property and equipment: | | |
| Furniture and fixtures | \$ 16.0 | \$ 15.0 |
| Software | 34.4 | 30.0 |
| Equipment | 45.3 | 44.1 |
| Leasehold improvements | 43.3 | 43.9 |
| Capitalized software development | 47.1 | 22.3 |
| Total property and equipment | 186.1 | 155.3 |
| Less: accumulated depreciation and amortization | (73.2) | (62.0) |
| Property and equipment, net | \$ 112.9 | \$ 93.3 |

NOTE 8 Goodwill

Goodwill allocated to the Company's operating segments as of September 30, 2022 and 2021 is as follows:

| <i>(in millions)</i> | September 30, | |
|----------------------|---------------|---------|
| | 2022 | 2021 |
| Commercial | \$ 32.6 | \$ 32.5 |
| Institutional | 9.8 | 9.8 |
| Retail | 5.8 | 5.8 |
| Global Payments | 10.0 | 10.0 |
| Total Goodwill | \$ 58.2 | \$ 58.1 |

The Company recorded \$0.1 million and \$0.2 million in foreign exchange revaluation adjustments on goodwill for the years ended September 30, 2022 and 2021, respectively.

NOTE 9 Intangible Assets

The Company recorded \$0.2 million of customer base assets related to a purchased client list and wrote off \$11.1 million of fully amortized intangible assets during the year ended September 30, 2022.

The gross and net carrying values of intangible assets as of the balance sheet dates, by major intangible asset class are as follows (in millions):

| | September 30, 2022 | | | September 30, 2021 | | |
|--|--------------------|--------------------------|------------|--------------------|--------------------------|------------|
| | Gross Amount | Accumulated Amortization | Net Amount | Gross Amount | Accumulated Amortization | Net Amount |
| Intangible assets subject to amortization: | | | | | | |
| Trade/domain names | \$ 3.7 | \$ (1.6) | \$ 2.1 | \$ 3.7 | \$ (0.9) | \$ 2.8 |
| Software programs/platforms | 28.3 | (19.4) | 8.9 | 31.4 | (13.3) | 18.1 |
| Customer base | 29.5 | (18.0) | 11.5 | 37.7 | (21.7) | 16.0 |
| Total intangible assets subject to amortization | 61.5 | (39.0) | 22.5 | 72.8 | (35.9) | 36.9 |
| Intangible assets not subject to amortization | | | | | | |
| Website domains | 1.8 | — | 1.8 | 2.1 | — | 2.1 |
| Business licenses | 3.7 | — | 3.7 | 3.7 | — | 3.7 |
| Total intangible assets not subject to amortization | 5.5 | — | 5.5 | 5.8 | — | 5.8 |
| Total intangible assets | \$ 67.0 | \$ (39.0) | \$ 28.0 | \$ 78.6 | \$ (35.9) | \$ 42.7 |

Amortization expense related to intangible assets was \$14.4 million, \$15.1 million, and \$5.8 million for the years ended September 30, 2022, 2021, and 2020, respectively.

PART II

ITEM 8 Financial Statements and Supplementary Data

As of September 30, 2022, estimated future amortization expense was as follows:

| <i>(in millions)</i> | |
|----------------------------|---------|
| Fiscal 2023 | \$ 12.6 |
| Fiscal 2024 | 5.0 |
| Fiscal 2025 | 1.9 |
| Fiscal 2026 | 1.2 |
| Fiscal 2027 and thereafter | 1.8 |
| | \$ 22.5 |

NOTE 10 Leases

The Company leases office space under non-cancelable operating leases with third parties as of September 30, 2022. Leases with an initial term of twelve months or less are not recorded on the Consolidated Balance Sheets and the Company recognizes lease expense for these leases on a straight-line basis over the lease term. Certain office space leases include one or more options to renew, with renewal terms that can extend the lease term from three to ten years, and some of which include the Company's option to terminate the leases within two years of the balance sheet date. The Company has not considered any renewal options in the lease terms of its office space leases as the Company does not believe it is reasonably certain that any of the rights will be exercised. In determining the term of certain office space leases, the Company has not included periods after termination date, if the Company holds a termination option and believes it is reasonably certain to exercise.

As the office space leases do not provide an implicit rate, the Company applies a collateralized incremental borrowing rate based on information available at lease commencement date in determining the present value of lease payments. For office space leases executed by subsidiaries, including foreign subsidiaries, the Company has applied its incremental borrowing rate. The Company believes this is a reasonable approach as its subsidiaries either do not have their own treasury functions or

The following table presents operating lease costs and other related information as of and for the fiscal year ended September 30, 2022 and 2021 (in millions, except as stated):

| | Year Ended September 30, | |
|--|--------------------------|---------|
| | 2022 | 2021 |
| Operating lease costs ⁽¹⁾ | \$ 25.7 | \$ 25.5 |
| Supplemental cash flow information and non-cash activity: | | |
| Cash paid for amounts included in the measurement of operating lease liabilities | \$ 16.4 | \$ 16.8 |
| Right-of-use assets obtained in exchange for operating lease liabilities | \$ 12.4 | \$ 36.2 |
| Lease term and discount rate information: | | |
| Weighted average remaining lease term (years) | 10.9 | 11.5 |
| Weighted average discount rate | 4.3% | 4.0% |

(1) Includes short-term leases and variable lease costs, which are immaterial.

the credit facilities available to its subsidiaries do not permit financing of right-of-use assets. Additionally, in certain instances, the parent company provides a guaranty of the lease payments to the lessor under office space leases executed by its subsidiaries. The Company believes that pricing subsidiary leases is more significantly influenced by the credit standing of the parent company than that of its subsidiaries.

Certain office space leases contain variable lease payments related to fair market rent adjustments and local inflation index measures. The Company estimates variable lease payments based upon information available at lease commencement date in determining the present value of lease payments.

The Company has elected to not separate lease components from nonlease components for all office space leases. The Company does not have any financing leases as of September 30, 2022. Operating lease expense is recognized on a straight-line basis over the lease term and is reported within *Occupancy and equipment rental* on the Consolidated Income Statements.

As of September 30, 2022 and 2021, the Company recorded operating lease right-of-use assets of \$121.8 million and \$125.3 million, respectively, and operating lease liabilities of \$143.0 million and \$146.6 million, respectively.

The maturities of the lease liabilities are as follows as of September 30, 2022 (in millions):

| | | |
|------------------------------------|----|-------|
| 2023 | \$ | 17.2 |
| 2024 | | 17.0 |
| 2025 | | 15.8 |
| 2026 | | 16.1 |
| 2027 | | 15.8 |
| After 2027 | | 97.8 |
| Total lease payments | | 179.7 |
| Less: interest | | 36.7 |
| Present value of lease liabilities | \$ | 143.0 |

NOTE 11 Credit Facilities

Committed Credit Facilities

The Company has four committed credit facilities under which the Company and its subsidiaries may borrow up to \$1,000.0 million, subject to the terms and conditions for these facilities. The amounts outstanding under these credit facilities carry variable rates of interest, thus approximating fair value. The Company's committed credit facilities consist of the following:

- A three-year \$475.0 million first-lien senior secured syndicated loan facility is available to the Company for general working capital requirements and capital expenditures. The facility was amended on April 21, 2022 to replace the \$236.1 million revolving credit facility and \$165.4 million Term Loan A facility, values as of March 31, 2022, with a \$475.0 million revolving credit facility and extend the maturity date to April 21, 2025. Prior to the amendment, the Company was required to make quarterly principal payments against the Term Loan equal to 1.25% of the original balance. During the year ended September 30, 2022, prior to its replacement, the Company made scheduled quarterly principal payments against the Term Loan equal to \$4.9 million.

The revolving credit facility is secured by a first priority lien on substantially all of the assets of the Company and those of the Company's subsidiaries that guarantee the credit facility. Per the terms of the amended facility, the commitment fees and interest rates are subject to decrease if the Company's consolidated leverage ratio, as defined, decreases below certain thresholds. As of September 30, 2022, unused portions of the loan facility require a commitment fee of up to 0.625% on the unused commitment. The revolving credit facility is subject to variable rates of interest. As of September 30, 2022, borrowings under the facility bear interest at the Secured Overnight Financing Rate ("SOFR"), as defined, plus 3.00% or the Base Rate, as defined, plus 2.00%. Borrowings under the Base Rate and SOFR options were subject to interest rates of 8.25% and 6.15%, respectively, as of September 30, 2022. The agreement contains financial covenants related to consolidated tangible net worth, consolidated funded debt to net worth ratio, consolidated fixed charge coverage ratio and consolidated net unencumbered liquid assets, as defined. The Company was in compliance with all covenants under the loan facility as of September 30, 2022.

- An unsecured committed line of credit under which \$75.0 million is available to the Company's wholly owned subsidiary, StoneX Financial Inc to provide short term funding of margin to commodity exchanges as necessary. This line of credit is subject to annual review, and the continued availability of this line of credit is subject to StoneX Financial Inc's financial condition and operating results continuing to be satisfactory as set forth in the agreement. Unused portions of the margin line require a commitment fee of 0.5% on the unused commitment. Borrowings under the margin line are on a demand basis and bear interest at the Base Rate, as defined, plus 2.00%, which was 5.75% as of September 30, 2022. The agreement contains financial covenants related to StoneX Financial Inc's tangible net worth, excess net capital, and maximum net loss over a trailing twelve month period, as defined. StoneX Financial Inc was in compliance with these covenants as of September 30, 2022. The facility is guaranteed by the Company.
- A syndicated committed borrowing facility available to the Company's wholly owned subsidiary, StoneX Commodity Solutions LLC, to finance commodity financing arrangements and commodity repurchase agreements. The facility was amended on July 28, 2022 to increase the amount available from \$325.0 million to \$400.0 million and extend the maturity date to July 28, 2024. The facility is secured by the assets of StoneX Commodity Solutions, and guaranteed by the Company. Unused portions of the borrowing facility require a commitment fee of 0.35% on the unused commitment. The borrowings outstanding under the facility bear interest at a rate per annum equal to the SOFR plus Applicable Margin, as defined, or the Base Rate plus Applicable Margin, as defined. Borrowings under the Base Rate and SOFR options were subject to interest rates of 6.25% and 5.41%, respectively, as of September 30, 2022. The agreement contains financial covenants related to tangible net worth, as defined. StoneX Commodity Solutions was in compliance with this covenant as of September 30, 2022.
- An unsecured syndicated committed borrowing facility under which \$50.0 million is available to the Company's wholly owned subsidiary, StoneX Financial Ltd for short term funding of margin to commodity exchanges. The borrowings outstanding under the facility bear interest at a rate per annum equal to 2.50% plus SOFR, as defined. The agreement contains financial covenants related to net tangible assets, as defined. StoneX Financial Ltd was in compliance with this covenant as of September 30, 2022. The facility is guaranteed by the Company. During November 2022, the facility was renewed to extend the maturity date to October 14, 2023.

PART II

ITEM 8 Financial Statements and Supplementary Data

Uncommitted Credit Facilities

During the year ended September 30, 2022, the Company executed a secured, uncommitted loan facility, under which StoneX Financial Ltd may borrow up to \$45.0 million, collateralized by commodities warehouse receipts, to facilitate the financing of inventory of commodities, subject to certain terms and conditions of the credit agreement. There were \$0.0 million and \$25.0 million in borrowings outstanding under this credit facility as of September 30, 2022 and 2021, respectively.

The Company has a secured, uncommitted loan facility, under which StoneX Financial Inc may borrow up to \$75.0 million, collateralized by commodities warehouse receipts, to facilitate U.S. commodity exchange deliveries of its clients, subject to certain terms and conditions of the credit agreement. There were no borrowings outstanding under this credit facility at September 30, 2022 and 2021.

The Company has a secured, uncommitted loan facility, under which StoneX Financial Inc. may borrow for short term funding of proprietary and client securities margin requirements, subject to certain terms and conditions of the agreement. The uncommitted amount available to be borrowed is not specified, and all requests for borrowing are subject to the sole discretion of the lender. The borrowings are secured by first liens on Company owned marketable securities or client owned securities which have been pledged to the Company. The amounts borrowed under the facilities are payable on demand. There were no borrowings outstanding under this credit facility as of September 30, 2022 and 2021.

The Company has secured uncommitted loan facilities under which StoneX Financial Inc may borrow up to \$100.0 million for short term funding of proprietary and client securities margin requirements, subject to certain terms and conditions of the agreement. The borrowings are secured by first liens on Company owned marketable securities or client owned securities which have been pledged to the Company. The amounts borrowed under the facilities are payable on demand. There were no borrowings outstanding under this credit facility as of September 30, 2022 and 2021.

Note Payable to Bank

In December 2020, the Company obtained a \$9.0 million loan from a commercial bank, secured by equipment purchased with the proceeds. The note is payable in monthly installments, with the final payment due during December 2025. The note bears interest at a rate per annum equal to the Index rate, as defined in the agreement, plus 2.35%.

Senior Secured Notes

In June 2020, the Company issued \$350 million in aggregate principal amount of its 8.625% Senior Secured Notes due 2025 (the “Senior Secured Notes”) at the offering price of 98.5% of the aggregate principal amount. The Company used the proceeds from the sale of the Senior Secured Notes to fund the preliminary cash consideration for the acquisition of Gain on the closing date, as further discussed in Note 20, to pay certain related transaction fees and expenses, and to fund the repayment of Gain’s 5.00% Convertible Senior Notes due 2022 (the “Gain Notes”).

The Senior Secured Notes are fully and unconditionally guaranteed, jointly and severally, on a senior second lien secured basis, by certain subsidiaries of the Company that guarantee the Company’s senior committed credit facility and by Gain and certain of its domestic subsidiaries.

The Senior Secured Notes will mature on June 15, 2025. Interest on the Senior Secured Notes accrues at a rate of 8.625% per annum and is payable semiannually in arrears on June 15 and December 15 of each year. The Company incurred debt issuance costs of \$9.5 million in connection with the issuance of the Senior Secured Notes, which are being amortized over the term of the Senior Secured Notes under the effective interest method. At any time on or after June 15, 2022, the Company may redeem the Senior Secured Notes, in whole or in part, at the redemption prices set forth in the indenture.

During the year ended September 30, 2021, the Company redeemed \$1.6 million of the principal amount of the outstanding Senior Secured Notes, for 103% of the principal amount, plus accrued and unpaid interest.

During the year ended September 30, 2022, the Company redeemed the remaining \$0.5 million of the principal amount of the Gain Notes.

The following table sets forth a listing of credit facilities, the current committed amounts as of the report date on the facilities, and outstanding borrowings on the facilities as well as indebtedness on a promissory note and the Senior Secured Notes as of the periods indicated:

| (in millions) Borrower | Security | Renewal/ Expiration Date | Total Commitment | Amounts Outstanding | |
|---|---|-----------------------------|----------------------|-----------------------|-----------------------|
| | | | | September 30, 2022 | September 30, 2021 |
| COMMITTED CREDIT FACILITIES | | | | | |
| Term Loan | (1) | N/A | \$ — | \$ — ⁽⁴⁾ | \$ 170.1 |
| Revolving Line of Credit | (1) | April 21, 2025 | 475.0 ⁽⁵⁾ | 260.0 | — |
| Senior StoneX Group Inc. Committed Credit Facility | | | 475.0 | 260.0 | 170.1 |
| StoneX Financial Inc. | None | March 31, 2023 | 75.0 ⁽⁵⁾ | — | — |
| StoneX Commodity Solutions LLC | Certain commodities assets | July 28, 2024 | 400.0 ⁽⁵⁾ | 217.0 | 215.0 |
| StoneX Financial Ltd. | None | October 14, 2023 | 50.0 ⁽⁵⁾ | — | — |
| | | | \$ 1,000.0 | \$ 477.0 | \$ 385.1 |
| UNCOMMITTED CREDIT FACILITIES | | | | | |
| StoneX Financial Inc. | Commodities warehouse receipts and certain pledged securities | | n/a | n/a ⁽⁵⁾ | — |
| StoneX Financial Ltd. | Commodities warehouse receipts | | n/a | n/a ⁽⁵⁾ | 25.0 |
| NOTES PAYABLE TO BANK | Certain equipment | | (5) | 8.1 | 8.6 |
| Senior Secured Notes | (2) | | (4) | 339.1 ⁽³⁾ | 336.9 |
| Total outstanding borrowings | | | | \$ 824.2 | \$ 755.6 |

(1) The StoneX Group Inc. committed credit facility is secured by substantially all of the assets of StoneX Group Inc. and certain subsidiaries identified in the credit facility agreement as obligors, and pledged equity of certain subsidiaries identified in the credit facility as limited guarantors.

(2) The Senior Secured Notes and the related guarantees are secured by liens on substantially all of the Company's and the guarantors' assets, subject to certain customary and other exceptions and permitted liens. The liens on the assets that secure the Senior Secured Notes and the related guarantees are contractually subordinated to the liens on the assets that secure the Company's and the guarantors' existing and future first lien secured indebtedness, including indebtedness under the Company's senior committed credit facility.

(3) Amounts outstanding under the Senior Secured Notes are reported net of unamortized deferred financing costs and original issue discount of \$8.8 million.

(4) Included in Senior secured borrowings, net on the Consolidated Balance Sheets.

(5) Included in Lenders under loans on the Consolidated Balance Sheets.

As reflected above, one of the Company's committed credit facilities is scheduled to expire during the year ending September 30, 2023. The Company intends to renew or replace this facility as it expires, and based on the Company's liquidity position and capital structure, the Company believes it will be able to do so.

NOTE 12 Securities and Commodity Financing Transactions

The Company enters into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, fund principal debt trading, acquire securities to cover short positions, acquire securities for settlement, and to accommodate counterparties' needs under matched-book trading strategies. These agreements are recorded as collateralized financings at their contractual amounts plus accrued interest. The related interest is recorded in the Consolidated Income Statements as *Interest income* or *Interest expense*, as applicable. In connection with these agreements and transactions, it is the Company's policy to receive or pledge cash or securities to adequately collateralize such agreements and transactions in accordance with relevant contractual terms. The collateral is valued daily and the Company may require counterparties to deposit additional collateral or return collateral pledged.

The Company pledges financial instruments owned to collateralize repurchase agreements. At September 30, 2022 and 2021, financial instruments owned, at fair value of \$2,372.3 million and \$843.3 million, respectively, were pledged as collateral under repurchase agreements. The financial instruments owned that have been pledged

as collateral have been parenthetically disclosed on the Consolidated Balance Sheets.

In addition, as of September 30, 2022 and 2021, the Company pledged financial instruments owned, at fair value of \$822.5 million and \$2,359.6 million, respectively, to cover collateral requirements for tri-party repurchase agreements. These securities have not been parenthetically disclosed on the Consolidated Balance Sheets since the counterparties do not have the right to sell or repledge the collateral. The Company also repledged securities received under reverse repurchase agreements of \$2,965.3 million and \$1,157.9 million, respectively in the two years, to cover collateral requirements for tri-party repurchase agreements.

The Company also has repledged securities borrowed and client securities held under custodial clearing arrangements to collateralize securities loaned agreements with a fair value of \$1,146.0 million and \$2,097.6 million as of September 30, 2022 and 2021, respectively.

At September 30, 2022 and 2021, the Company had accepted collateral that it is permitted by contract to sell or repledge. This collateral consists primarily of securities received in reverse repurchase agreements, securities borrowed agreements, and margin securities

PART II

ITEM 8 Financial Statements and Supplementary Data

held on behalf of correspondent brokers. The fair value of such collateral at September 30, 2022 and 2021 was \$5,836.1 million and \$4,399.8 million, respectively, of which \$1,615.3 million and \$1,031.1 million, respectively, was used to cover securities sold short which are recorded in *Financial instruments sold, not yet purchased, at*

fair value on the Consolidated Balance Sheets. In the normal course of business, this collateral is used by the Company to cover financial instruments sold, not yet purchased, to obtain financing in the form of repurchase agreements, and to meet counterparties' needs under lending arrangements and matched-book trading strategies.

The following tables provide the contractual maturities of gross obligations under repurchase and securities lending agreements as of the periods indicated (in millions):

| | September 30, 2022 | | | | |
|--|--------------------|-------------------|------------|--------------|------------|
| | Overnight and Open | Less than 30 Days | 30-90 Days | Over 90 Days | Total |
| Securities sold under agreements to repurchase | \$ 3,664.7 | \$ 2,279.1 | \$ 186.3 | \$ 3.4 | \$ 6,133.5 |
| Securities loaned | 1,189.5 | — | — | — | 1,189.5 |
| Gross amount of secured financing | \$ 4,854.2 | \$ 2,279.1 | \$ 186.3 | \$ 3.4 | \$ 7,323.0 |

| | September 30, 2021 | | | | |
|--|--------------------|-------------------|------------|--------------|------------|
| | Overnight and Open | Less than 30 Days | 30-90 Days | Over 90 Days | Total |
| Securities sold under agreements to repurchase | \$ 2,949.8 | \$ 973.4 | \$ 137.5 | \$ 280.2 | \$ 4,340.9 |
| Securities loaned | 2,153.6 | — | — | — | 2,153.6 |
| Gross amount of secured financing | \$ 5,103.4 | \$ 973.4 | \$ 137.5 | \$ 280.2 | \$ 6,494.5 |

The following table provides the underlying collateral types of the gross obligations under repurchase and securities lending agreements as of the periods indicated (in millions):

| Securities sold under agreements to repurchase | September 30, | |
|---|---------------|------------|
| | 2022 | 2021 |
| U.S. Treasury obligations | \$ 1,311.0 | \$ 106.8 |
| U.S. government agency obligations | 604.1 | 354.6 |
| Asset-backed obligations | 178.0 | 255.9 |
| Agency mortgage-backed obligations | 3,762.5 | 3,536.2 |
| Foreign government obligations | 97.2 | — |

| Securities loaned | \$ 2,153.6 | \$ — | \$ 2,153.6 |

NOTE 13 Commitments and Contingencies

Legal and Regulatory Proceedings

Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal and regulatory proceedings that are pending against the Company or unasserted claims that may result in such proceedings, the Company's legal counsel evaluates the perceived merits of any legal or regulatory proceedings or unasserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred at the date of the financial statements and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed. Neither accrual nor disclosure is required for loss contingencies that are deemed remote. The Company accrues legal fees related to contingent liabilities as they are incurred.

From time to time and in the ordinary course of business, the Company is involved in various legal actions and proceedings, including tort claims, contractual disputes, employment matters, workers' compensation claims and collections. The Company carries insurance that provides protection against certain types of claims, up to the limits of the respective policy. Additionally, the Company is subject to extensive regulation and supervision by U.S. federal and international governmental agencies and various self-regulatory organizations. The Company and its advisors periodically engage with such regulatory agencies and organizations, in the context of examinations or otherwise, to respond to inquiries, informational requests, and investigations. From time to time, such engagements result in regulatory complaints or other matters, the resolution of which can include fines and other remediation.

As of September 30, 2022 and 2021, the Consolidated Balance Sheets include loss contingency accruals, recorded during and prior to these years then ended, which are not material, individually or in the aggregate, to the Company's financial position or liquidity. Management does not currently believe exposure from loss contingencies in excess of the amounts accrued, and in addition to the possible losses discussed below, to be material to the Company's earnings, financial position or liquidity.

The following is a summary of a significant legal matter involving the Company:

OptionSellers

In November 2018, balances in approximately 300 client accounts of the FCM division of the Company's wholly owned subsidiary, StoneX Financial Inc., declined below required maintenance margin levels and into deficit balances, primarily as a result of significant and unexpected price fluctuations in the natural gas markets. All positions

in these accounts, which were managed by OptionSellers.com Inc. ("OptionSellers"), an independent Commodity Trading Advisor ("CTA"), were liquidated in accordance with StoneX Financial Inc.'s client agreements and obligations under market regulation standards.

A CTA is registered with the U.S. Commodity Futures Trading Commission ("CFTC") and a member of, and subject to audit by, the National Futures Association ("NFA"). OptionSellers was registered under a CFTC Rule 4.7 exemption for providing services only to "qualified eligible persons," which requires the account holders authorizing OptionSellers to act as their CTA to meet or exceed certain minimum financial requirements. OptionSellers, in its role as a CTA, had been granted by each of its clients full discretionary authority to manage the trading in the clients' accounts, while StoneX Financial Inc. acted solely as the clearing firm in its role as the FCM.

StoneX Financial Inc.'s client agreements hold account holders liable for all losses in their accounts and obligate the account holders to reimburse StoneX Financial Inc. for any deficits in their accounts. As of September 30, 2022, the receivable from these client accounts, net of collections and other allowable deductions (the "Net Client Accounts Receivable"), was \$25.9 million, with no individual account receivable exceeding \$1.4 million. As of September 30, 2022, the allowance against these uncollected balances was \$7.6 million. The Company is pursuing collection of the uncollected balances through arbitration proceedings against the account holders. The Company will consider developments in these proceedings, and any other relevant matters, in determining whether any changes in the allowance against the uncollected balances are required.

In these and other arbitration proceedings, clients are seeking damages from StoneX Financial Inc. relating to the trading losses in their accounts.

During the year ended September 30, 2022, the Company resolved several of these arbitration claims through arbitration decisions and privately negotiated settlements. All of the arbitration panels that issued decisions during the year awarded StoneX Financial Inc. the full amount of the uncollected balances. A portion of the panels also awarded relief to account holders. The amount of relief awarded was not material to the Company, individually or in the aggregate. As noted, several of the arbitrations were resolved through privately negotiated settlement, pursuant to which the account holders agreed to pay some or all of their outstanding deficit balances. In October 2022, the Company reached an additional privately negotiated settlement of an arbitration proceeding, pursuant to which the account holders agreed to pay all of their outstanding deficit balances and the Company made certain immaterial payments to the account holders. The Company intends to continue vigorously pursuing claims through arbitration and settling cases in what the Company determines to be appropriate circumstances. The ultimate outcome of remaining arbitrations cannot presently be determined.

Depending on future collections and the outcomes of arbitration proceedings, any provisions for bad debts and actual losses may or may not be material to the Company's financial results. However, the Company believes that the likelihood of a material adverse outcome is remote, and does not currently believe that any potential losses related to this matter would impact its ability to comply with its ongoing liquidity, capital, and regulatory requirements.

Contractual Commitments

Purchase Commitments

The Company determines an estimate of contractual purchase commitments in the ordinary course of business primarily for the purchase of precious metals and agricultural and energy commodities. Unpriced contract commitments have been estimated using September 30, 2022 fair values. Purchase commitments and other obligations as of September 30, 2022 for less than one year, one to three years, three to five years, and after five years were \$7,595.3 million, \$882.4 million, \$52.6 million, and \$108.4 million respectively. The purchase commitments for less than one year will be offset by corresponding sales commitments of \$8,253.9 million.

Exchange Member Guaranties

The Company is a member of various exchanges that trade and clear futures and option contracts. The Company is also a member of and provides guaranties to securities clearinghouses and exchanges in connection with client trading activities. Associated with its memberships, the Company may be required to pay a proportionate share of the financial obligations of another member who may default on its obligations to the exchanges. While the rules governing different exchange memberships vary, in general the Company's guaranty obligations would arise only if the exchange had previously exhausted its resources. In addition, any such guaranty obligation would be apportioned among the other non-defaulting members of the exchange. Any potential contingent liability under these arrangements is not quantifiable and could exceed the cash and securities posted to the clearinghouse as collateral.

The Company has not recorded any contingent liability in the consolidated financial statements for these agreements and believes that any potential requirement to make payments under these agreements is remote.

Self-Insurance

The Company self-insures its medical and dental claims costs up to a stop loss amount, for eligible participating employees and retirees, and for qualified dependents, subject to deductibles and limitations. Liabilities are recognized based on claims filed and an estimate of claims incurred but not reported. The Company has purchased stop-loss coverage to limit its exposure on a per claim basis and in aggregate in the event that aggregated actual claims would exceed 120% of the actuarial estimate. The Company is insured for covered costs in excess of these limits. Although the ultimate outcome of these matters may exceed the amounts recorded and additional losses may be incurred, the Company does not believe that any additional potential exposure for such liabilities will have a material adverse effect on the Company's consolidated financial position or results of operations. As of September 30, 2022 and 2021, the Company had \$1.3 million and \$1.2 million, respectively, accrued for self-insured medical and dental claims included in *Accounts payable and other liabilities* in the Consolidated Balance Sheets.

NOTE 14 Accumulated Other Comprehensive Loss, Net

Comprehensive income consists of net income and other gains and losses affecting stockholders' equity that, under U.S. GAAP, are excluded from net income. Other comprehensive loss and income includes losses on cash flow hedges, net actuarial gains and losses from defined benefit pension plans, and gains and losses on foreign currency translations.

The following table summarizes the changes in accumulated other comprehensive loss for the years ended September 30, 2022, 2021, and 2020.

| <i>(in millions)</i> | Foreign Currency Translation Adjustment | Pension Benefits Adjustment | Cash Flow Hedge | Accumulated Other Comprehensive Loss, net |
|--|---|--------------------------------|-----------------|--|

| Balances as of September 30, 2022 | \$ (34.4) | \$ (2.7) | \$ (53.5) | \$ (90.6) |

NOTE 15 Revenue from Contracts with Clients

The Company's revenues from contracts with clients subject to FASB ASC 606, Revenue from Contracts with Customers ("Topic 606") represent approximately 5.5%, 5.0%, and 0.9% of the Company's total revenues for the years ended September 30, 2022, 2021, and 2020, respectively.

Revenues within the scope of Topic 606 are presented within *Commission and clearing fees* and *Consulting, management, and account fees* on the Consolidated Income Statements. Revenues that are not within the scope of Topic 606 are presented within *Sales of physical commodities*, *Principal gains, net*, and *Interest income* on the Consolidated Income Statements.

The following table represents a disaggregation of the Company's total revenues separated between revenues from contracts with clients and other sources of revenue for the periods indicated (in millions):

| | Year Ended September 30, | | |

PART II

ITEM 8 Financial Statements and Supplementary Data

The substantial majority of the Company's performance obligations for revenues from contracts with clients are satisfied at a point in time and are typically collected from clients by debiting client trading accounts with the Company.

Commission and clearing fee revenue and consulting, management, and account fees revenue are primarily related to the Commercial, Institutional and Retail reportable segments. Principal gains, net are contributed by all of the Company's reportable segments. Interest income is primarily related to the Commercial and Institutional reportable segments. Precious metals trading and agricultural and energy product trading revenues are primarily related to the Commercial reportable segment. Precious metals retail sales revenues are primarily related to the Retail reportable segment.

Commission and Clearing Fees

Commission revenue represents sales and brokerage commissions generated by internal brokers, introducing broker-dealers, or registered investment advisors of introducing-broker dealers for their clients' trading activity in futures, options on futures, OTC derivatives, fixed income securities, equity securities, mutual funds, and annuities. The Company views the selling, distribution, and marketing, or any combination thereof, of mutual funds and insurance and annuity products to clients on the Company's registered investment advisor ("RIA") platform as a single performance obligation to the product sponsors.

The Company is the principal for commission revenue, as it is responsible for executing client purchases and sales, and maintaining relationships with product sponsors for trailing commissions. Introducing broker dealers and registered investment advisors assist the Company in performing its obligations. Accordingly, total commission revenues are reported on a gross basis.

The Company primarily generates commission revenue on exchange-traded derivatives, OTC derivatives, and securities. Exchange-traded and OTC derivative commissions are recognized at a point in time on the trade date when the client, either directly or through the use of an internal broker or introducing broker, requests the clearance and execution of a trade. Securities commissions are either sale-based commissions that are recognized at a point in time on the trade date or trailing commission that are recognized over time as earned. Sales-based securities commissions are typically a flat fee per security transaction and in certain instances are based on a percentage of the trade date transaction value.

Trailing commission revenue is generally based on a percentage of the periodic fair value of clients' investment holdings in trail-eligible assets, and is recognized over the period during which services, such as on-going support, are performed. As trailing commission revenue is based on the fair value of clients' investment holdings in trail-eligible assets. This variable consideration is constrained until the fair value of trail-eligible assets is determinable.

Clearing fees generally represent transaction based fees charged by the various exchanges and clearing organizations at which the Company or one of its clearing brokers is a member for the privilege of executing and clearing trades through them. Clearing fees are generally passed through to the clients' accounts and are reported gross as the Company

maintains control over the clearing and execution services provided, maintains relationships with the exchanges or clearing brokers, and has ultimate discretion in whether the fees are passed through to the clients and the rates at which they are passed through. As clearing fees are transactional based revenues they are recognized at a point in time on the trade date along with the related commission revenue when the client requests the clearance and execution of a trade.

Trade Conversion Fees

Trade conversion fees include revenue earned from converting foreign ordinary equities into an American Depository Receipt ("ADR") or Global Depository Receipt ("GDR") and fees earned from converting an ADR or GDR into foreign ordinary equities on behalf of clients. Trade conversion revenue is recognized at a point in time on the trade date.

Underwriting Fees

Revenues from investment banking consists of revenues earned from underwriting fixed income securities, primarily municipal and asset-backed securities, and are recognized in revenues upon completion of the underlying transaction, which is generally the trade date, based upon the terms of the assignment as the performance obligation is to successfully broker a specific transaction.

Asset Management Fees

The Company earns asset management fees on Company sponsored and managed mutual funds and on the advisory accounts of independent registered investment advisors on the Company's platform. The Company provides ongoing investment advice and acts as a custodian, providing brokerage and execution services on transactions, and performs administrative services for these accounts. This series of performance obligations transfers control of the services to the client over time as the services are performed. This revenue is recognized ratably over time to match the continued delivery of the performance obligations to the client over the life of the contract. The asset management revenue generated is based on a percentage of the market value of the eligible assets in the clients' accounts. As such, the consideration for this revenue is variable and this variable consideration is constrained until the market value of eligible assets in the clients' accounts is determinable.

Advisory and Consulting Fees

Advisory and consulting fees are primarily related to risk management consulting fees which are billed and recognized as revenue on a monthly basis when risk management services are provided. Risk management consulting contracts are generally for a minimum term of six months and then continue from month to month, but may be terminated at any time after the original six months by either party upon providing written notice. Advisory and consulting fees are not variable based on client trading activities. This revenue is generally recognized ratably over time to match the continued delivery of the performance obligation to the client over the life of the contract.

Sweep Program Fees

The Company earns fees generated in lieu of interest income from a multi-bank sweep program with unaffiliated banks and money market funds. Pursuant to contractual arrangements with clients and their introducing-brokers, available cash balances in client accounts are swept into either Federal Deposit Insurance Corporation (“FDIC”) insured cash accounts at unaffiliated banks or unaffiliated money market funds for which the Company earns a portion of the income generated by the client balances for administration and recordkeeping. The fees generated by the Company’s multi-bank sweep program are reported net of the balances remitted to the introducing-brokers and the clients of introducing-brokers. These fees are paid and recognized over time to match the continued delivery of the administration and recordkeeping performance obligations to the life of the contract. The fees earned under this program are generally based upon the type of sweep account, prevailing interest rates, and the amount of client balances invested.

Client Account Fees

Client account fees represent fees earned for custodial, recordkeeping, and administrative functions performed for client accounts. These functions include statement delivery fees, account transfer fees, safekeeping fees, errors and omission insurance fees, platform fees, and other fees. Client account fees that are transactional based, such as account transfer fees, are recognized at a point in time when the related performance obligation is satisfied. Client account fees that are related to ongoing services, such as statement delivery fees and errors and omission insurance fees, are recognized over time. Client account fees that relate to ongoing services are typically billed to clients’ accounts on a monthly or quarterly basis.

Retail Precious Metals Sales

The Company principally generates revenue from sale of bullion coins and small bars of precious metal via its websites. Revenues from the sale of physical precious metals are recognized when control of the inventory is transferred within the meaning of Topic 606.

Physical Precious Metals Trading

The Company principally generates revenue from trading physical precious metals on an OTC basis. Revenues from the sale of physical precious metals are recorded on a trade date basis and generally settle on an unallocated basis. Substantially all of the Company’s sales of precious metals are conducted using sales contracts that meet the definition of derivative instruments in accordance with ASC 815, Derivatives and Hedging (“Topic 815”). The contracts underlying

the Company’s commitment to deliver precious metals are referred to as fixed price forward commodity contracts because the price of the commodity is fixed at the time the order is placed. Although the contracts typically are executed on a spot basis and settle on unallocated account, the client has the option to request delivery of the precious metals, the option to net settle out of the position by executing an offsetting trade, or the option to roll the transaction to a subsequent maturity date. Thus, the sales contracts contain embedded option derivatives that would be subject to the guidance in Topic 815. As the contracts are subject to the guidance in Topic 815, the fixed price derivative sales contracts are outside the scope of Topic 606. The Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606.

Physical precious metals trading revenue generated by registered broker-dealer subsidiaries is presented on a net basis and included as a component of *Principal gains, net* in the Consolidated Income Statements, in accordance with U.S GAAP for broker-dealers. Physical precious metals trading revenue for subsidiaries that are not broker-dealers continues to be recorded on a gross basis.

Physical Agricultural and Energy Product Trading

The Company principally generates revenue from merchandising and originating physical agricultural and energy commodities from forward firm sales commitments accounted for in accordance with Topic 815. The fixed and provisionally-priced derivative sales contracts that result in physical delivery are outside the scope of Topic 606. The Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606.

Principal Gains, Net

Principal gains, net includes revenues on financial transactions or contracts for which the Company acts as principal. This revenue is reported on a net basis and is primarily outside the scope of ASC 606. Principal gains, net includes margins generated from OTC derivative trades, equities, fixed income, precious metals, and foreign exchange executed with clients and other counterparties and are recognized on a trade-date basis. Principal gains, net, also includes realized and unrealized gains and losses derived principally from market making activities in OTC derivatives, equities, fixed income, and foreign exchange. Net dealer inventory and investment gains are recognized on a trade-date basis and include realized gains or losses and changes in unrealized gains or losses on investments at fair value. Principal gains, net also includes dividend income on long equity positions and dividend expense on short equity positions, which are recognized on the ex-dividend date. The following table indicates the relevant income and expense:

| (in millions) | Year Ended September 30, | | |
|--|--------------------------|----------|---------|
| | 2022 | 2021 | 2020 |
| Dividend income on long equity positions | \$ 142.3 | \$ 282.7 | \$ 77.0 |
| Dividend expense on short equity positions | 134.0 | 281.3 | 76.6 |
| Dividend income net of dividend expense reported within Principal Gains, net | \$ 8.3 | \$ 1.4 | \$ 0.4 |

PART II

ITEM 8 Financial Statements and Supplementary Data

Interest Income

Interest income is generated from client funds deposited with the Company to satisfy margin required by third-party banks, exchange-clearing organizations, or other FCMs. Interest income is also generated from investing client funds in allowable securities, primarily U.S. Treasury obligations and from trading fixed income securities that the Company holds in its market-making businesses. Interest income also includes interest generated from collateralized transactions, including securities borrowed and securities purchased under agreements to resell, and from extending margin loans to clients. Interest income is recognized on an accrual basis and is not within the scope of Topic 606.

Remaining Performance Obligations

Remaining performance obligations are services that the firm has committed to perform in the future in connection with its contracts with clients. The Company's remaining performance obligations are generally related to its risk management consulting and asset management contracts with clients. Revenues associated with remaining performance obligations related to these contracts with clients are not material to the overall consolidated results of the Company. Similar to the above, risk management consulting contracts are

generally for a minimum term of six months and then continue from month to month, but may be terminated at any time after the original six months by either party upon providing written notice. Asset management contracts may be terminated by the client at any time. For the Company's asset management activities, where fees are calculated based on a percentage of the market value of eligible assets in client's accounts, future revenue associated with remaining performance obligations cannot be determined as such fees are subject to fluctuations in the market value of eligible assets in clients' accounts.

Practical Expedients

The Company has applied Topic 606's practical expedient that permits for the non-disclosure of the value of performance obligations for (i) contracts with an original expected length of one year or less and (ii) contracts for which the Company recognizes revenue at the amount to which it has the right to invoice for services performed.

The Company has also applied Topic 606's practical expedient that allows for no adjustment to consideration due to a significant financing component if the expectation at contract inception is such that the period between payment by the client and the transfer of the promised goods or services to the client will be one year or less.

NOTE 16 Share-Based Compensation

Share-based compensation expense is included in *Compensation and benefits* in the Consolidated Income Statements and totaled \$17.8 million, \$13.9 million and \$10.3 million for the years ended September 30, 2022, 2021, and 2020, respectively.

Stock Option Plans

The Company sponsors a stock option plan for its directors, officers, employees and consultants. The 2013 Stock Option Plan, which was approved by the Company's Board of Directors and shareholders, authorizes the Company to issue stock options covering up to 3.0 million shares of the Company's common stock. As of September 30, 2022, there were 1.4 million shares authorized for future grant under this plan. Awards that expire or are canceled generally become available for issuance again under the plan. The Company settles stock option exercises with newly issued shares of common stock.

Fair value is estimated at the grant date based on a Black-Scholes-Merton option-pricing model using the following weighted-average assumptions:

| | Year Ended September 30, | | |
|----------------------------------|--------------------------|-------|---------------------|
| | 2022 | 2021 | 2020 ⁽¹⁾ |
| Expected stock price volatility | 39% | 38% | —% |
| Expected dividend yield | —% | —% | —% |
| Risk free interest rate | 1.54% | 1.68% | —% |
| Average expected life (in years) | 5.21 | 4.50 | 0.00 |

(1) There were no stock options granted under the plan during the year ended September 30, 2020.

Expected stock price volatility rates are primarily based on historical volatility. The Company has not paid dividends in the past and does not currently expect to do so in the future. Risk free interest rates are based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option or award. The average expected life represents the estimated period of

time that options or awards granted are expected to be outstanding, based on the Company's historical share option exercise experience for similar option grants. The weighted average fair value of options issued during the years ended September 30, 2022, 2021, and 2020 was \$22.82, \$19.83, and \$0.00, respectively.

The following is a summary of stock option activity for the year ended September 30, 2022:

| | Shares Available for Grant | Number of Options Outstanding | Weighted Average Exercise Price | Weighted Average Grant Date Fair Value | Weighted Average Remaining Term (in years) | Aggregate Intrinsic Value (\$ millions) |
|--|----------------------------|-------------------------------|---------------------------------|--|--|---|
| Balances as of September 30, 2021 | 1,569,798 | 1,229,600 | \$ 45.17 | \$ 12.82 | 4.21 | \$ 25.5 |
| Additional shares authorized by shareholders | | — | | | | |
| Granted | (240,500) | 240,500 | \$ 62.04 | \$ 22.82 | | |
| Exercised | — | (212,356) | \$ 31.31 | \$ 12.72 | | |
| Forfeited | 43,389 | (43,389) | \$ 59.89 | \$ 21.65 | | |
| Expired | 15,010 | (15,010) | \$ 46.39 | \$ 10.69 | | |
| Balances as of September 30, 2022 | 1,387,697 | 1,199,345 | \$ 50.46 | \$ 14.57 | 4.54 | \$ 39.0 |
| Exercisable at September 30, 2022 | | 233,655 | \$ 46.14 | \$ 11.78 | 3.33 | \$ 8.6 |

The total compensation cost not yet recognized for non-vested awards of \$10.6 million as of September 30, 2022 has a weighted-average period of 4.84 years over which the compensation expense is expected to be recognized. The total intrinsic value of options exercised during the years ended September 30, 2022, 2021, and 2020 was \$39.0 million, \$11.7 million and \$4.2 million, respectively.

The options outstanding as of September 30, 2022 broken down by exercise price are as follows:

| Exercise Price | Number of Options Outstanding | Weighted Average Exercise Price | Weighted Average Remaining Term (in years) |
|----------------|-------------------------------|---------------------------------|--|
| \$ — | - | \$ 5.00 | — |
| \$ 5.00 | - | \$ 10.00 | — |
| \$ 10.00 | - | \$ 15.00 | — |
| \$ 15.00 | - | \$ 20.00 | — |
| \$ 20.00 | - | \$ 25.00 | — |
| \$ 25.00 | - | \$ 30.00 | — |
| \$ 30.00 | - | \$ 35.00 | — |
| \$ 35.00 | - | \$ 40.00 | 53,627 |
| \$ 40.00 | - | \$ 45.00 | 700,000 |
| \$ 45.00 | - | \$ 50.00 | — |
| \$ 50.00 | - | \$ 55.00 | — |
| \$ 55.00 | - | \$ 60.00 | — |
| \$ 60.00 | - | \$ 65.00 | 445,718 |
| | | 1,199,345 | \$ 50.46 |

Restricted Stock Plan

The Company sponsors a restricted stock plan for its directors, officers and employees. The Company's 2017 restricted stock plan, which was approved by the Company's Board of Directors and shareholders, authorizes up to 1.5 million shares to be issued. As of September 30, 2022, 0.3 million shares were authorized for future grant under the restricted stock plan. Awards that expire or are canceled generally become available for issuance again under the plan. The Company utilizes newly issued shares of common stock to make restricted stock grants.

PART II

ITEM 8 Financial Statements and Supplementary Data

The following is a summary of restricted stock activity through September 30, 2022:

| | Shares Available for Grant | Number of Shares Outstanding | Weighted Average Grant Date Fair Value | Weighted Average Remaining Term (in years) | Aggregate Intrinsic Value (\$ millions) |
|-----------------------------------|----------------------------|------------------------------|--|--|---|
| Balances as of September 30, 2021 | 558,298 | 577,041 | \$ 50.57 | 1.26 | \$ 38.0 |
| Granted | (269,129) | 269,129 | \$ 69.41 | | |
| Vested | — | (265,862) | \$ 48.60 | | |
| Forfeited | 642 | (642) | \$ 53.44 | | |
| Balances as of September 30, 2022 | 289,811 | 579,666 | \$ 60.22 | 1.22 | \$ 48.1 |

The total compensation cost not yet recognized of \$25.2 million as of September 30, 2022 has a weighted-average period of 1.22 years over which the compensation expense is expected to be recognized. Compensation expense is amortized on a straight-line basis over the vesting period. Restricted stock grants are included in the Company's total issued and outstanding common shares.

NOTE 17 Retirement Plans

Defined Benefit Retirement Plans

The Company has a frozen qualified defined benefit pension plan (the "Qualified Plan") and a nonqualified defined benefit pension plan (the "Nonqualified Plan"), and recognizes their funded status, measured as the difference between the fair value of the plan assets and the projected benefit obligation, in *Other assets* or *Accounts payable and other accrued liabilities* in the Consolidated Balance Sheets, depending on the funded status of each plan.

The Qualified Plan assets, which are managed in a third-party trust, primarily consist of a diversified blend of approximately 90% debt securities and 10% equity investments and had a total fair value of \$30.9 million and \$41.5 million as of September 30, 2022 and 2021, respectively. All Qualified Plan assets fall within Level 2 of the fair value hierarchy. The benefit obligation associated with the Qualified Plan will vary over time only as a result of changes in market interest rates, the life expectancy of the plan participants, and benefit payments, since the accrual of benefits was suspended when the Qualified Plan was frozen in 2006. The benefit obligation was \$26.3 million and \$36.3 million and the discount rate assumption used in the measurement of this obligation was 5.40% and 2.70% as of September 30, 2022 and 2021, respectively. Related to the Qualified Plan, the Company's net pension obligation was in a funded status of \$4.6 million and \$5.2 million as of September 30, 2022 and 2021, respectively.

The Nonqualified Plan assets had a total fair value of less than \$0.1 million as of September 30, 2022 and 2021. The benefit obligation associated with the Nonqualified Plan will vary over time only as a result of changes in market interest rates, the life expectancy of the plan participants, and benefit payments. There are no active participants in the Nonqualified plan. The benefit obligation was \$1.2 million and \$1.5 million as of September 30, 2022 and 2021, respectively. Related to the Nonqualified Plan, the Company's unfunded pension obligation was \$1.2 million and \$1.5 million as of September 30, 2022 and 2021, respectively.

The Company recognized a net periodic benefit of \$0.1 million, \$0.3 million and \$0.4 million for the years ended September 30, 2022, 2021, and 2020, respectively. The expected long-term return on plan assets assumption was 2.8% for 2022. The Company made contributions of \$0.1 million to the plans in the years ended September 30, 2022 and 2021. The Company complies with minimum funding requirements. The estimated undiscounted future benefit payments are expected to be \$2.1 million in 2023, \$2.1 million in 2024, \$2.1 million in 2025, \$2.1 million in 2026, \$2.1 million in 2027, and \$10.2 million in 2028 through 2032.

Defined Contribution Retirement Plans

The Company offers participation in the StoneX Group Inc. 401(k) Plan ("401(k) Plan"), a defined contribution plan providing retirement benefits to all domestic full-time non-temporary employees who have reached 21 years of age. Employees may contribute from 1% to 80% of their annual compensation to the 401(k) Plan, limited to a maximum annual amount as set periodically by the Internal Revenue Service. The Company makes matching contributions to the 401(k) Plan in an amount equal to 62.5% of each participant's eligible elective deferral contribution to the 401(k) Plan, up to 8% of employee compensation. Matching contributions vest, by participant, based on the following years of service schedule: less than two years – none, after two years – 33%, after three years – 66%, and after four years – 100%.

U.K. based employees of StoneX Group are eligible to participate in a defined contribution pension plan. The Company contributes double the employee's contribution up to 10% of total base salary for this plan. For this plan, employees are 100% vested in both the employee and employer contributions at all times.

For fiscal years ended September 30, 2022, 2021, and 2020, the Company's contributions to these defined contribution plans were \$16.9 million, \$15.2 million and \$10.1 million, respectively.

NOTE 18 Other Expenses

Other expenses consisted of the following, for the periods indicated.

| <i>(in millions)</i> | Year Ended September 30, | | |
|--------------------------------------|--------------------------|---------|---------|
| | 2022 | 2021 | 2020 |
| Non-income taxes | \$ 13.5 | \$ 14.8 | \$ 6.6 |
| Insurance | 10.8 | 7.1 | 4.7 |
| Employee related expenses | 9.6 | 7.0 | 4.7 |
| Other direct business expenses | 10.0 | 6.3 | 4.6 |
| Membership fees | 3.3 | 2.8 | 2.4 |
| Director and public company expenses | 1.8 | 1.5 | 1.4 |
| Office expenses | 1.7 | 1.3 | 1.8 |
| Other expenses | 9.9 | 5.5 | 3.4 |
| Total other expenses | \$ 60.6 | \$ 46.3 | \$ 29.6 |

During the quarter ended December 31, 2021, the Company modified its Other expenses presentation to better explain its current entities and businesses. Prior year values have been adjusted to reflect this format, but total Other expenses has not changed within this footnote or the consolidated income statements.

NOTE 19 Income Taxes

Inflation Reduction Act

In August 2022, the Inflation Reduction Act of 2022 (“Act”) was signed into U.S. law. Under the Act, there is a new 15% corporate minimum tax and a new 1% excise tax on stock repurchases that are effective after December 31, 2022. Further, the Act includes provisions related to climate change, energy, and health care. These provisions should not have a material impact on the Company’s consolidated financial statements.

Coronavirus Aid, Relief, and Economic Security Act

On March 27, 2020, the U.S. government enacted the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”), which provides economic relief in response to the coronavirus pandemic. The CARES Act, among other things, includes provisions to allow certain net operating losses to be carried-back up to five years, to increase interest deduction limitations, accelerates the refunds of alternative minimum tax credits, and makes technical corrections to tax depreciation methods for qualified leasehold improvement property. The Company evaluated and properly accounted for the provisions of the CARES Act and there was no material impact to the Company’s consolidated financial statements.

Income tax expense/(benefit) for the years ended September 30, 2022, 2021, and 2020 was allocated as follows:

| <i>(in millions)</i> | Year Ended September 30, | | |
|---|--------------------------|---------|---------|
| | 2022 | 2021 | 2020 |
| Income tax expense attributable to income from operations | \$ 70.1 | \$ 37.8 | \$ 37.1 |
| Taxes allocated to stockholders’ equity, related to pension liabilities | (0.1) | 0.5 | — |
| Taxes allocated to stockholders’ equity, related to hedge accounting | (17.0) | — | — |
| Total income tax expense | \$ 53.0 | \$ 38.3 | \$ 37.1 |

PART II

ITEM 8 Financial Statements and Supplementary Data

The components of income tax expense/(benefit) attributable to income from operations were as follows:

| <i>(in millions)</i> | Year Ended September 30, | | |
|----------------------|--------------------------|---------|----------|
| | 2022 | 2021 | 2020 |
| Current taxes: | | | |
| U.S. federal | \$ 8.2 | \$ 6.7 | \$ (0.6) |
| U.S. state and local | 3.6 | (0.1) | 2.3 |
| Australia | 2.8 | 1.8 | 0.5 |
| Brazil | 12.6 | 8.0 | 6.5 |
| Germany | 8.9 | 6.0 | 3.4 |
| Singapore | 2.0 | 1.9 | 2.8 |
| United Kingdom | 29.2 | 6.6 | 13.9 |
| Other international | 3.1 | 3.7 | 4.2 |
| Total current taxes | 70.4 | 34.6 | 33.0 |
| Deferred taxes: | | | |
| U.S. federal | 3.4 | 1.4 | 4.9 |
| U.S. state and local | (0.1) | 2.7 | 0.6 |
| Australia | (0.2) | 0.3 | (0.1) |
| Brazil | (0.8) | (1.3) | (1.3) |
| Singapore | — | 0.4 | 0.8 |
| United Kingdom | (2.7) | 0.1 | (0.3) |
| Other international | 0.1 | (0.4) | (0.5) |
| Total deferred taxes | (0.3) | 3.2 | 4.1 |
| Income tax expense | \$ 70.1 | \$ 37.8 | \$ 37.1 |

U.S. and international components of income from operations, before tax, was as follows:

| <i>(in millions)</i> | Year Ended September 30, | | |
|------------------------------------|--------------------------|----------|----------|
| | 2022 | 2021 | 2020 |
| U.S. | \$ 50.0 | \$ 37.3 | \$ 88.8 |
| Australia | 8.7 | 7.8 | 1.4 |
| Brazil | 25.3 | 13.7 | 7.6 |
| Germany | 27.8 | 17.2 | 10.4 |
| Singapore | 19.4 | 16.0 | 20.5 |
| United Kingdom | 104.8 | 41.4 | 58.5 |
| Other international | 41.2 | 20.7 | 19.5 |
| Income from operations, before tax | \$ 277.2 | \$ 154.1 | \$ 206.7 |

Items accounting for the difference between income taxes computed at the federal statutory rate and income tax expense were as follows:

| <i>(in millions)</i> | Year Ended September 30, | | |
|--|--------------------------|--------|--------|
| | 2022 | 2021 | 2020 |
| Federal statutory rate effect of: | 21.0% | 21.0% | 21.0% |
| U.S. State and local income taxes | 1.0% | 1.8% | 1.2% |
| Foreign earnings and losses taxed at different rates | 1.1% | 1.0% | 0.9% |
| Change in valuation allowance | 0.9% | 1.9% | 1.0% |
| U.K. bank tax | 2.6% | 0.4% | —% |
| U.S. permanent items | 0.2% | (1.2)% | 0.6% |
| Non-deductible compensation | 0.7% | 1.9% | 0.6% |
| Foreign permanent items | (2.8)% | (2.3)% | 0.3% |
| U.S. bargain purchase gain | —% | (0.5)% | (8.3)% |
| GILTI | 0.6% | 0.6% | 0.7% |
| Effective rate | 25.3% | 24.6% | 18.0% |

The components of deferred income tax assets and liabilities were as follows:

| <i>(in millions)</i> | September 30, 2022 | September 30, 2021 |
|----------------------------------|--------------------|--------------------|
| Deferred tax assets: | | |
| Share-based compensation | \$ 4.8 | \$ 1.7 |
| Deferred compensation | 5.1 | 4.7 |
| Net operating loss carryforwards | 18.7 | 17.7 |
| Intangible assets | 6.4 | 6.5 |
| Bad debt reserve | 7.8 | 7.3 |
| Hedging | 17.0 | — |
| Foreign tax credit carryforwards | 1.6 | 2.0 |
| Other compensation | 8.0 | 7.0 |
| Property and equipment | — | 6.3 |
| Pension | 2.1 | 1.2 |
| Right of use assets | 23.8 | 22.9 |
| Other | 2.0 | 1.8 |
| Total gross deferred tax assets | 97.3 | 79.1 |
| Less valuation allowance | (15.8) | (15.0) |
| Deferred tax assets | 81.5 | 64.1 |
| Deferred income tax liabilities: | | |
| Unrealized gain on securities | 2.5 | 2.8 |
| Prepaid expenses | 3.8 | 4.2 |
| Property and equipment | 2.0 | — |
| Right of use liabilities | 20.8 | 21.6 |
| Other deferred liabilities | 0.4 | 0.4 |
| Deferred income tax liabilities | 29.5 | 29.0 |
| Deferred income taxes, net | \$ 52.0 | \$ 35.1 |

Deferred income tax balances reflect the effects of temporary differences between the carrying amounts of assets and liabilities and their tax bases and are stated at enacted tax rates expected to be in effect when taxes are actually paid or recovered.

As of September 30, 2022 and 2021, the Company has net operating loss carryforwards for U.S. federal, state, local, and foreign income tax purposes of \$5.2 million and \$6.2 million, net of valuation allowances, respectively, which are available to offset future taxable income in these jurisdictions. The state and local net operating loss carryforwards of \$4.5 million, net of valuation allowance, begin to expire after September 2023.

The Company also has \$0.6 million, net of valuation allowances, of federal net operating loss carryforwards, which consist of a portion that will expire in tax years ending 2031 through 2036. The remaining portion of the federal net operating loss carryforwards do not expire, but cannot be utilized until after 2037 and are limited by Internal Revenue Code (“IRC”) Section 382. As of September 30, 2022, the Company has \$0.1 million, net of valuation allowance, of foreign net operating loss carryforwards primarily in Ireland, which have an unlimited carryforward period.

As a result of the CARES Act, the AMT credit carryforward was 50% refundable during the year ending September 30, 2019 and the remaining 50% was refundable in the year ended September 30, 2020, to the extent it was not used to offset regular income tax liability. The Company has no remaining foreign tax credit carryforwards, net of valuation allowance, as of September 30, 2022.

The valuation allowance for deferred tax assets as of September 30, 2022 was \$15.8 million. The net change in the total valuation allowance for the year ended September 30, 2022 was an increase of \$0.8 million.

The increase was related to the increase in foreign net operating loss carryforwards offset by decreases related to state net operating loss carryforwards. The valuation allowances as of September 30, 2022 and 2021 were primarily related to U.S. state and local and foreign net operating loss carryforwards that, in the judgment of management, are not more likely than not to be realized.

The Company does not intend to distribute earnings of its foreign subsidiaries in a taxable manner, and therefore intends to limit distributions to earnings previously taxed in the U.S., or earnings that would qualify for the 100 percent dividends received deduction, and earnings that would not result in any significant foreign taxes. The Company repatriated \$29.7 million and \$300.6 million during the years ended September 30, 2022 and 2021, respectively, of earnings previously taxed in the U.S. resulting in no significant incremental taxes. Therefore, the Company has not recognized a deferred tax liability on its investment in foreign subsidiaries.

The Company had a de minimis balance of unrecognized tax benefits as of September 30, 2022, 2021, and 2020 that, if recognized, would affect the effective tax rate.

Accrued interest and penalties are included in the related tax liability line in the Consolidated Balance Sheets. The Company had no accrued interest and penalties included in the Consolidated Balance Sheets as of September 30, 2022 and 2021.

The Company recognizes accrued interest and penalties related to income taxes as a component of income tax expense. The Company had a de minimis amount of interest, net of federal benefit, and penalties recognized as a component of income tax expense during the years ended September 30, 2022, 2021, and 2020.

PART II

ITEM 8 Financial Statements and Supplementary Data

The Company and its subsidiaries file income tax returns with the U.S. federal jurisdiction and various U.S. state and local and foreign jurisdictions. The Company has open tax years ranging from September 30, 2016 through September 30, 2022 with U.S. federal and state and local taxing authorities. In the U.K., the Company has open tax years ending September 30, 2020 to September 30, 2022. In

Brazil, the Company has open tax years ranging from December 31, 2017 through December 31, 2021. In Argentina, the Company has open tax years ranging from September 30, 2015 to September 30, 2022. In Singapore, the Company has open tax years ranging from September 30, 2017 to September 30, 2022.

NOTE 20 Acquisitions

The Company's consolidated financial statements include the operating results and cash flows of the acquired businesses from the dates of acquisition.

Subsequent Acquisition

Cotton Distributors Inc.

On October 31, 2022, the Company's wholly owned subsidiary, StoneX Netherlands B.V., acquired CDI-Societe Cotonniere De Distribution S.A ("CDI"), based in Switzerland. CDI operates a global cotton merchant business with clients and producers in Brazil, West Africa, and buyers in the APAC region. The purchase price is approximately \$40.0 million, which is CDI's estimated tangible book value.

Acquisitions in Fiscal 2021

Chasing Returns Ltd.

On August 3, 2021, the Company's wholly owned subsidiary, StoneX Netherlands B.V., acquired Chasing Returns Limited, a Company based in Ireland, which specializes in financial behavioral science designed to assist traders in analyzing trends and decision making. The Company intends to use Chasing Returns Limited to enhance the Company's offerings to its retail clients. The estimated purchase price is approximately \$6.0 million, all of which was excess purchase price over net assets acquired. The Company recognized \$2.4 million in acquired intangible assets, classified as software, and \$3.6 million in goodwill.

EncoreFx Ltd.

Effective December 22, 2020, the Company acquired EncoreFx Inc., which is incorporated in the State of Washington, and is registered as a Money Services Business with FinCEN, having 33 state money transmitter licenses and whose primary operations include providing foreign-currency exchange risk management and global payment solutions services to small and medium sized businesses. The terms of the agreement included cash consideration of \$0.9 million. The transaction was accounted for as an asset acquisition. The excess of cash consideration over the asset and liabilities assumed of \$0.5 million was allocated to an indefinite lived intangible asset recognized related to the licenses acquired. The intangible asset has been assigned to the Global Payments reportable segment. Subsequent to the acquisition, the company was renamed as StoneX Payment Services Ltd.

Acquisitions in Fiscal 2020

Gain Capital Holdings, Inc.

In February 2020, the Company entered into a definitive merger agreement to acquire Gain for \$6.00 per share in an all-cash transaction. The merger closed on July 30, 2020 ("the Gain acquisition date") subsequent to approval by Gain's shareholders, approval by regulators, and the completion of customary closing conditions.

Purchase Price

The aggregate merger consideration was (in millions):

| | | |
|---------------------------------------|----|-------|
| Aggregate cash consideration | \$ | 215.0 |
| Accrual for merger cash consideration | | 21.6 |
| Total merger consideration | \$ | 236.6 |

Subsequent to the Gain acquisition date, holders of 3.6 million shares of Gain common stock outstanding at the Gain acquisition date who did not vote to approve the merger ("Dissenting Holders", and the shares held by such Dissenting Holders, the "Dissenting Shares") purportedly demanded appraisal rights pursuant to Section 262 of the Delaware General Corporation Law in the Court of Chancery of the State of Delaware. The \$21.6 million accrual for merger consideration included in the aggregate merger consideration was based upon 3.6 million Dissenting Shares assuming a right to receive \$6.00 per share at the Gain acquisition date. Any subsequent settlement with the Dissenting Holders will be considered the settlement of a post-acquisition contingency to be included in the Company's post-acquisition Consolidated Income Statements.

Purchase Price Allocation

The consolidated financial statements were prepared using the acquisition method of accounting under U.S. GAAP with the Company treated as the acquirer of Gain for accounting purposes. Under the acquisition method of accounting, the aggregate merger consideration was allocated to the assets acquired and liabilities assumed generally based on their fair value at the Gain acquisition date. The Company made significant estimates and assumptions in determination of the fair value of assets acquired and liabilities assumed based upon discussions with management and informed insights into the industries in which Gain operates. These significant estimates and assumptions included, but were not limited to, projected cash flows of the acquired business, client attrition rates, discount rates, royalty rates, and economic lives of the identified assets.

The Company engaged a third party valuation specialist to assist with the assessment of the overall reasonableness of the bargain purchase gain as further discussed below and determination of the fair value

of the net identifiable assets acquired. The allocation of the purchase price to the fair value of assets acquired and liabilities assumed is considered final as of September 30, 2021.

The following table summarizes the purchase price allocation as of the Gain acquisition date (in millions):

| | Purchase Price Allocation |
|--|------------------------------|
| Cash and cash equivalents | \$ 507.2 |
| Cash, securities and other assets segregated under federal and other regulations | 497.4 |
| Deposits with and receivables from broker-dealers, clearing organizations, and counterparties ⁽¹⁾ | 249.7 |
| Receivables from clients, net ⁽²⁾ | 2.0 |
| Income taxes receivable | 0.4 |
| Deferred income taxes, net | 23.0 |
| Property and equipment, net | 6.1 |
| Right of use assets, net | 15.0 |
| Other assets | 17.9 |
| Total fair value of tangible assets acquired | 1,318.7 |
| Accounts payable and other accrued liabilities | 49.4 |
| Operating lease liabilities | 15.0 |
| Payable to clients | 863.4 |
| Payable to broker-dealers, clearing organizations, and counterparties | 0.5 |
| Income taxes payable | 12.4 |
| Convertible senior notes ⁽³⁾ | 92.0 |
| Total fair value of tangible liabilities assumed | 1,032.7 |
| Fair value of tangible net assets acquired ⁽⁴⁾ | 286.0 |
| Identifiable intangible assets acquired | |
| Trademarks/domain names ⁽⁵⁾ | 3.7 |
| Software programs/platforms ⁽⁵⁾ | 22.2 |
| Customer base ⁽⁵⁾ | 9.8 |
| Total fair value of intangible assets acquired | 35.7 |
| Fair value of identifiable net assets acquired | 321.7 |
| Total merger consideration | 236.6 |
| Bargain purchase gain | \$ 85.1 |

(1) Amount represented the contractual amount of deposits with and receivables from broker-dealers, clearing organizations, and counterparties considered collectible as of the Gain acquisition date.

(2) Amount represented the contractual amount of receivables due from clients for trading activity considered collectible as of the Gain acquisition date.

(3) As \$91.5 million of the \$92.0 million in aggregate principal of the Gain Notes were redeemed on September 1, 2020, the Company believed that the face value of the Gain Notes approximated their fair value as of the Gain acquisition date due to the fundamental change right provided for in the Gain Notes indenture. Refer to Note 11 for further discussion of the Gain Notes redemption.

(4) With the exception of deferred income taxes and the convertible senior notes, the Company believes that the fair value of the tangible assets acquired and tangible liabilities assumed approximated their carrying values as of the Gain acquisition date due either to their short-term nature, the Company's ability to initiate the withdrawal and settlement of client related trading balances, or the fact that the balances are recorded at fair value on a recurring basis.

(5) The trademark/domain names, software programs/platforms, and client base intangible assets were assigned useful lives of 5 years, 3 years, and 4 years, respectively.

The Company believes that the transaction resulted in a bargain purchase gain primarily due to the significant market volatility experienced during the first calendar quarter of 2020, primarily as a result of the COVID-19 pandemic. The market volatility experienced during 2020 through the Gain acquisition date increased significantly compared to corresponding historical periods. This resulted in Gain generating windfall profits and a corresponding increase in net tangible book value. The bargain purchase gain is included in *Gain on acquisitions and other gains* on the Company's Consolidated Income Statements for the fiscal years ended September 30, 2021 and 2020.

Post-Acquisition Results and Unaudited Pro Forma Information

Gain's results of operations and cash flows have been included in the Company's consolidated financial statements for the period subsequent to July 31, 2020. For the year ended September 30, 2020, the Company's results include total revenues and net income from Gain of \$49.0 million and \$1.8 million, respectively.

PART II

ITEM 8 Financial Statements and Supplementary Data

The following unaudited pro forma financial information (in millions, except per share amounts) has been adjusted to give effect to the Gain merger as if it were consummated on October 1, 2019.

| | Year Ended September 30, 2020 |
|----------------------------|----------------------------------|
| Total revenues | \$ 54,414.1 |
| Net income | \$ 138.5 |
| Basic earnings per share | \$ 7.17 |
| Diluted earnings per share | \$ 7.02 |

The unaudited pro forma financial information includes material, nonrecurring pro forma adjustments directly attributable to the Gain acquisition primarily including the adjustment for a goodwill impairment loss, adjustment for the bargain purchase gain, adjustments to the amortization of intangible assets, and adjustments for direct and incremental acquisition-related costs and the related tax effects. The unaudited pro forma financial information does not include any revenue or cost saving synergies from operating efficiencies or the effect of incremental costs incurred from integrating the companies.

The Company incurred costs related to the merger of \$5.2 million for the year ended September 30, 2020, that are included within *Professional fees* on the Consolidated Income Statement.

The business acquired has been assigned to the Company's Retail and Institutional reportable segments.

UOB Bullion and Futures Limited

In October 2019, the Company's subsidiary StoneX Financial Pte Ltd completed its acquisition of the futures and options brokerage and clearing business of UOB Bullion and Futures Limited ("UOB"), a subsidiary of United Overseas Bank Limited. Closing. The cash purchase price for the acquired assets was \$5.0 million.

The purchase price allocation resulted in the recognition of liabilities assumed related to the futures and options on futures client account balances of approximately \$351.8 million as of the acquisition date, which was recorded within *Payables to clients* on the Consolidated Balance Sheets, and an equal and offsetting amount of assets acquired. The carrying amount of the client assets and related liabilities was assumed to approximate fair value due to their short-term nature, the Company's ability to initiate the withdrawal and settlement of client related trading balances, and the fact that the open derivative positions are recorded at fair value on a recurring basis.

The Company also acquired certain client base intangible assets and property and equipment in connection with the acquisition. The Company engaged a third-party valuation specialist to assist with the valuation of the acquired intangible assets and property and equipment. As of the acquisition date, \$0.8 million of the purchase price was allocated to the fair value of the property and equipment acquired and \$3.1 million was allocated to the fair value of the client base intangible assets acquired. The remaining excess of the purchase price over the fair value of the net assets acquired of \$1.1 million was allocated to goodwill. The Company believes the goodwill represents the synergies that can be realized from integrating the acquired business into its existing exchange-traded futures and option business. The allocation of the purchase price to the fair value of assets acquired and liabilities assumed was considered final as of September 30, 2020.

The business acquired has been assigned to the Company's Institutional reportable segment. The client base intangible assets were assigned a useful life of 5 years.

UOB's results of operations and cash flows have been included in the Company's consolidated financial statements for the periods subsequent to October 7, 2019. For the year ended September 30, 2020, the Company's results include total revenues and net loss from UOB of \$10.3 million and \$1.4 million, respectively.

Tellimer

In December 2019, the Company executed a definitive purchase agreement to acquire the brokerage businesses of Tellimer Group ("Tellimer"). This transaction involved the stock purchase of 100% of Exotix Partners, LLP, based in the United Kingdom, and the stock purchase of 100% of Tellimer Capital Ltd based in Nigeria. The closing of this transaction was subject to limited conditions including regulatory approval in the relevant jurisdictions. The cash purchase price was equal to the net tangible book value of the acquired entities upon closing.

Regulatory approval for the acquisition of Exotix Partners, LLP, was obtained during the period with the acquisition closing on April 1, 2020. The cash purchase price for the acquisition of Exotix Partners, LLP, was \$4.7 million. The allocation of the cash purchase price to the fair value of assets acquired and liabilities assumed resulted in the recognition of \$1.0 million in cash and cash equivalents, \$1.0 million in receivables from clients, net, \$0.3 million in property and equipment, net, \$3.4 million in other assets, and \$1.0 million in liabilities assumed. The allocation of the purchase price to the fair value of assets acquired and liabilities assumed was considered final as of March 31, 2021.

Regulatory approval for the acquisition of Tellimer Capital Ltd was obtained during the period with the acquisition closing on June 1, 2020. The cash purchase price for the acquisition of Tellimer Capital Ltd and the related allocation to the fair value of assets acquired and liabilities assumed was not material to the Company's consolidated financial statements.

Tellimer's results of operations and cash flows have been included in the Company's consolidated financial statements from the date of acquisition. For the year ended September 30, 2020, the Company's results include total revenues and net loss from Tellimer of \$5.9 million and less than \$0.1 million, respectively.

The acquired business have been assigned to the Company's Institutional reportable segment.

IFCM Commodities

In January 2020, the Company's wholly owned subsidiary, INTL Netherlands B.V., acquired 100% of the equity interests of IFCM Commodities GmbH ("IFCM") based in Germany. The cash purchase price of \$1.9 million was equal to net tangible book value upon closing plus a premium of \$1.0 million. The excess of the cash consideration over the fair value of the net tangible assets acquired on the closing date was allocated to the fair value of IFCM's client relationships. This client base intangible asset was assigned a useful life of five years. The allocation of the purchase price to the fair value of assets acquired and liabilities assumed was considered final as of December 31, 2020.

IFCM's results of operations and cash flows have been included in the Company's consolidated financial statements for the periods subsequent to January 2, 2020. For the year ended September 30, 2020, the Company's results include total revenues and net income from IFCM of \$1.8 million and \$0.5 million, respectively.

GIROXX

In May 2020, the Company's wholly owned subsidiary, StoneX Financial Ltd, acquired 100% of GIROXX based in Germany.

The cash purchase price for the acquisition of GIROXX was \$4.4 million. The allocation of the cash purchase price to the fair value of tangible assets acquired and liabilities assumed resulted in the recognition of cash and cash equivalents of \$6.5 million, property and equipment of \$0.1 million, accounts payables and other accrued liabilities of \$0.6 million, and payables to clients of \$5.8 million as of the acquisition date.

The Company acquired certain identifiable intangible assets in connection with the acquisition of GIROXX, primarily related to a business license permitting the Company to facilitate payment transactions in the European Union and certain proprietary developed software. The Company allocated \$0.4 million and \$1.5 million of the excess purchase price over net tangible assets acquired to the

business license and proprietary developed software, respectively. The remaining excess purchase price over the net tangible assets acquired of \$2.3 million was allocated to goodwill. The Company believes the allocation to goodwill represents the synergies that can be realized from integrating the acquired business into its existing Global Payments reportable segment.

The acquired business license has been assigned an indefinite life and the proprietary developed software has been preliminarily assigned a useful life of 3 years. The allocation of the purchase price to the fair value of assets acquired and liabilities assumed was considered final as of June 30, 2021.

GIROXX's results of operations and cash flows have been included in the Company's consolidated financial statements for the period subsequent to May 1, 2020. For the year ended September 30, 2020, the Company's results include total revenues and net loss from GIROXX of \$0.5 million and \$0.6 million, respectively.

The acquired business has been assigned to the Company's Global Payments reportable segment.

Asset Acquisitions

Quest Capital

In August 2019, the Company's subsidiary, SA Stone Wealth Management, executed an asset purchase agreement to acquire certain client accounts of Quest Capital Strategies, Inc. The asset purchase agreement was subject to FINRA approval and other conditions to closing. FINRA approval was obtained and the other conditions to closing were fulfilled and the closing of the transaction occurred on December 9, 2019. The cash purchase price for the acquired client accounts was equal to \$1.7 million. This transaction was accounted for as an asset acquisition at cost. The cash purchase price was allocated to the fair value of the client lists and relationships obtained and has been assigned, and will be amortized, over a useful life of seven years.

NOTE 21 Regulatory Requirements and Subsidiary Dividend Restrictions

The Company's subsidiary StoneX Financial Inc. is registered as a broker dealer and member of the Financial Industry Regulatory Authority ("FINRA") subject to the SEC Uniform Net Capital Rule 15c3-1, which requires the maintenance of minimum net capital. StoneX Financial Inc. is also a futures commission merchant registered with the CFTC and subject to the net capital requirements of the CFTC Regulation 1.17. Under the more restrictive of these rules, StoneX Financial Inc. is required to maintain "adjusted net capital", equivalent to the greater of \$1.5 million or 8% of client and non-client risk maintenance margin requirements on all positions, as defined in such rules, regulations, and requirements. Adjusted net capital and the related net capital requirement may fluctuate on a daily basis. StoneX Financial Inc., along with certain regulated affiliates, including Gain Capital Group, LLC and others, has a restriction on dividends.

For StoneX Financial Inc. withdrawn excess capital cannot reduce excess capital, subsequent to haircuts and charges, to an amount less than 120% of the greatest minimum requirement.

The Company's subsidiary, Gain Capital Group, LLC, is subject to regulation by the CFTC and NFA and is required to maintain specific levels of regulatory capital. As a futures commission merchant and retail foreign exchange dealer, Gain Capital Group, LLC is required to maintain adjusted net capital of the greater of \$1.0 million or 8% of customer and non-customer risk maintenance margin, or \$20.0 million plus 5.0% of the amount of retail customer liabilities over \$10.0 million, plus 10% of all liabilities owed to eligible contract participant counterparties acting as a dealer that are not an affiliate.

PART II

ITEM 8 Financial Statements and Supplementary Data

StoneX Financial Inc. as a registered securities carrying broker dealer is also subject to Rule 15c3-3 of the Securities Exchange Act of 1934 (“Rule 15c3-3”), which requires the Company to maintain separate accounts for the benefit of securities clients and proprietary accounts of broker dealers (“PABs”). These client protection rules require the Company to maintain special reserve bank accounts (“SRBAs”) for the exclusive benefit of securities clients and PABs. As of September 30, 2022, StoneX Financial Inc. prepared reserve computations for the client accounts and PAB accounts in accordance with the customer reserve computation guidelines set forth in Rule 15c3-3. Based upon these computations, excess of total credits over debits was \$1.6 million as of September 30, 2022. The Company held \$3.5 million in customer SRBAs as of September 30, 2022, and made additional deposits of \$3.9 million on October 4, 2022 to meet the customer segregation and segregated deposit timing requirements of Rule 15c3-3. The total PAB credits over total PAB debits was \$10.3 million as of September 30, 2022 and the PAB reserve requirement was \$10.3 million as of September 30, 2022. The Company held \$12.9 million in the PAB SRBA as of September 30, 2022, and withdrew \$1.1 million on October 4, 2022.

Pursuant to the requirements of the Commodity Exchange Act, funds deposited by clients of StoneX Financial Inc. supporting trading of futures and options on futures on a U.S. commodities exchange must be carried in separate accounts which are designated as segregated client accounts. Pursuant to the requirements of the CFTC, funds deposited by clients of StoneX Financial Inc. related to trading futures and options on futures traded on, or subject to the rules of a foreign board of trade, must be carried in separate accounts in, which are

The following table details the Company’s subsidiaries with a minimum regulatory net capital requirement in excess of \$10.0 million as well as the actual regulatory capital of the subsidiary as of September 30, 2022 (in millions):

| Subsidiary | Regulatory Authority | Actual | Minimum Requirement |
|----------------------------|---|---------------|----------------------------|
| StoneX Financial Inc. | SEC and CFTC | \$ 402.4 | \$ 250.1 |
| StoneX Financial Ltd. | Financial Conduct Authority (“FCA”) | \$ 399.8 | \$ 358.0 |
| Gain Capital Group, LLC | CFTC and NFA | \$ 49.2 | \$ 28.4 |
| StoneX Financial Pte. Ltd. | Monetary Authority of Singapore (“MAS”) | \$ 58.0 | \$ 13.2 |
| StoneX Markets LLC | CFTC and NFA | \$ 191.4 | \$ 128.8 |

Certain other subsidiaries of the Company, each with a minimum requirement less than \$10.0 million, are also subject to net capital requirements promulgated by authorities in the countries in which they operate. As of September 30, 2022, all of the Company’s subsidiaries were in compliance with their local regulatory requirements.

Swap dealers are subject to a comprehensive regulatory regime with new obligations for the swaps activities for which they are registered, including adherence to risk management policies, supervisory

designated as secured clients’ accounts. As of September 30, 2022, StoneX Financial Inc. had client segregated and client secured funds of \$6,278.6 million and \$212.4 million, respectively, compared to a minimum regulatory requirement of \$6,206.7 million and \$199.4 million, respectively.

The Company’s subsidiary StoneX Financial Ltd. is regulated by the Financial Conduct Authority (“FCA”), the regulator of the financial services industry in the U.K. The regulations impose regulatory capital, as well as conduct of business, governance, and other requirements. The conduct of business rules include those that govern the treatment of client money and other assets which, under certain circumstances, for certain classes of client, must be segregated from the firm’s own assets. As of September 30, 2022, StoneX Financial Ltd. had client segregated funds of \$1,242.4 million, compared to a minimum regulatory requirement of \$1,244.1 million, before making the necessary subsequent deposits to meet the client money requirement.

StoneX Financial Pte. Ltd. is regulated by the Monetary Authority of Singapore (“MAS”) and operates as an approved holder of a Capital Market Services License. StoneX Financial Pte. Ltd. is subject to the requirements of MAS and pursuant to the Securities and Futures Act. The regulations include those that govern the treatment of client money and other assets which under certain circumstances must be segregated from the firm’s own assets. As of September 30, 2022, StoneX Financial Pte. Ltd. had client segregated funds of \$556.8 million compared to a minimum regulatory requirement of \$538.9 million.

procedures, trade record and real time reporting requirements, as well as rules for minimum capital requirements which became effective October 6, 2021. Our subsidiary, StoneX Markets LLC, is a CFTC provisionally registered swap dealer, and under these capital rules, StoneX Markets LLC is subject to a minimum regulatory capital requirement of \$20.0 million.

NOTE 22 Segment and Geographic Information

The Company's operating segments are principally based on the nature of the clients we serve (commercial, institutional, and retail), and a fourth operating segment, its global payments business. The Company manages its business in this manner due to its large global footprint, in which it has more than 3,600 employees allowing it to serve clients in more than 180 countries.

The Company's business activities are managed as operating segments and organized into reportable segments as follows:

- *Commercial*
- *Institutional*
- *Retail*
- *Global Payments*

Commercial

The Company offers commercial clients a comprehensive array of products and services, including risk management and hedging services, execution and clearing of exchange-traded and OTC products, voice brokerage, market intelligence and physical trading as well as commodity financing and logistics services. The ability to provide these high-value-added products and services, differentiates the Company from its competitors and maximizes the opportunity to retain clients.

Institutional

The Company provides institutional clients with a complete suite of equity trading services to help them find liquidity with best execution, consistent liquidity across a robust array of fixed income products, competitive and efficient clearing and execution in all major futures and securities exchanges globally as well as prime brokerage in equities and major foreign currency pairs and swap transactions. In addition, the Company originates, structures and place debt instruments in the international and domestic capital markets. These instruments include asset-backed securities (primarily in Argentina) and domestic municipal securities.

Retail

The Company provides retail clients around the world access to over 18,000 global financial markets, including spot foreign exchange ("forex"), both financial trading and physical investment in precious metals, as well as CFDs, which are investment products with returns linked to the performance of underlying assets. In addition, its independent wealth management business offers a comprehensive product suite to retail investors in the United States.

Global Payments

The Company provides customized payment, technology and treasury services to banks and commercial businesses as well as charities and non-governmental organizations and government organizations. The Company provides transparent pricing and offers payments services in more than 185 countries and 140 currencies, which it believes is more than any other payments solution provider.

The total revenues reported combine gross revenues from physical contracts for subsidiaries that are not broker-dealers and net revenues for all other businesses. In order to reflect the way that the Company's management views the results, the table below also reflects the segment contribution to *Operating revenues*, which is shown on the face of the Consolidated Income Statements and which is calculated by deducting physical commodities cost of sales from total revenues.

Segment data includes the profitability measure of net contribution by segment. Net contribution is one of the key measures used by management to assess the performance of each segment and for decisions regarding the allocation of the Company's resources. Net contribution is calculated as revenue less direct cost of sales, transaction-based clearing expenses, variable compensation, introducing broker commissions, and interest expense. Variable compensation paid to risk management consultants/traders generally represents a fixed percentage of revenues generated, and in some cases, revenues generated less transaction-based clearing expenses, base salaries and an overhead allocation.

Segment data also includes segment income which is calculated as net contribution less non-variable direct expenses of the segment. These non-variable direct expenses include trader base compensation and benefits, operational employee compensation and benefits, communication and data services, business development, professional fees, bad debt expense and other direct expenses.

Inter-segment revenues, expenses, receivables and payables are eliminated upon consolidation.

Total revenues, operating revenues and net operating revenues shown as "Corporate Unallocated" primarily consist of interest income from its centralized corporate treasury function. In the normal course of operations, the Company operates a centralized corporate treasury function in which it may sweep excess cash from certain subsidiaries, where permitted within regulatory limitations, in exchange for a short-term interest bearing intercompany payable, or provide excess cash to subsidiaries in exchange for a short-term interest bearing intercompany receivable in lieu of the subsidiary borrowing on external credit facilities. The intercompany receivables and payables are eliminated during consolidation; however, this practice may impact reported total assets between segments.

Net costs not allocated to operating segments include costs and expenses of certain shared services such as information technology, accounting and treasury, credit and risk, legal and compliance, and human resources and other activities.

(1) Within the Condensed Balance Sheets and Condensed Statements of Operations of StoneX Group Inc. - Parent Company Only, the Company has accounted for its investment in wholly owned subsidiaries using the cost method of accounting. Under this method, the Company's share of the earnings or losses of such subsidiaries is not included in the Condensed Balance Sheet or Condensed Statements of Operations. If the accounting for its investment in wholly owned subsidiaries was presented under the equity method of accounting, total revenues would also include subsidiary earnings/(losses) of \$197.0 million, \$(127.2) million, and \$81.4 million for the years ended September 30, 2022, 2021, and 2020, respectively.

| Additional consideration payable related to acquisitions | \$ — | \$ — | \$ 21.6 |

ITEM 9 Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

In connection with the filing of this Form 10-K, our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of September 30, 2022. We seek to design our disclosure controls and procedures to provide reasonable assurance that the reports we file or submit under the Exchange Act contain the required information and that we submit these reports within

the time periods specified in SEC rules and forms. We also seek to design these controls and procedures to ensure that we accumulate and communicate correct information to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of September 30, 2022.

(b) Management’s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) and 15d-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”). Our internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company’s assets that could have a material effect on the financial statements.

There are limitations inherent in any internal control, such as the possibility of human error and the circumvention or overriding of controls. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that

the objectives of the control system are met, and may not prevent or detect misstatements. As conditions change over time, so too may the effectiveness of internal controls. A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

Management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the Company’s internal control over financial reporting as of September 30, 2022, based on the framework in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission.

Based on its assessment, management has concluded that our internal control over financial reporting was effective as of September 30, 2022.

KPMG LLP, an independent registered public accounting firm, was engaged to audit the effectiveness of our internal control over financial reporting as of September 30, 2022 and has issued an audit report regarding their assessment of the effectiveness of internal control over financial reporting which is included on page 69 in this Annual Report on Form 10-K.

PART II

ITEM 9B Other Information

(c) Changes in Internal Control Over Financial Reporting

During the year ended September 30, 2022, the Company migrated a significant component of its subsidiaries to a different accounting system. Management implemented data migration, onboarding, and post go-live controls over the new system. The rigor around the migrations allows management to conclude that this does not present an issue with internal control over financial reporting.

ITEM 9B Other Information

None.

ITEM 9C Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

ITEM 10 Directors, Executive Officers and Corporate Governance

We will include a list of our executive officers and biographical and other information about them and our directors in the definitive Proxy Statement for our 2023 Annual Meeting of Stockholders to be held on March 1, 2023. We will file the proxy within 120 days of the end of our fiscal year ended September 30, 2022 (the “2023 Proxy Statement”). The 2023 Proxy Statement is incorporated herein by reference. Information about our Audit Committee may be found in the Proxy Statement. That information is incorporated herein by reference.

We adopted a code of ethics that applies to the directors, officers and employees of the Company and each of its subsidiaries. The code of ethics is publicly available on our website at <https://ir.stonex.com/corporate-governance>. If we make any substantive amendments to the code of ethics or grant any waiver, including any implicit waiver, from a provision of the code to our Chief Executive Officer, Chief Financial Officer, or Chief Accounting Officer, we will disclose the nature of the amendment or waiver on that website or in a report on Form 8-K.

ITEM 11 Executive Compensation

We will include information relating to our executive officer and director compensation and the compensation committee of our Board of Directors in the 2023 Proxy Statement and is incorporated herein by reference.

ITEM 12 Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

We will include information relating to security ownership of certain beneficial owners of our common stock and information relating to the security ownership of our management in the 2023 Proxy Statement and is incorporated herein by reference.

The following table provides information generally as of September 30, 2022, the last day of fiscal 2022, regarding securities to be issued on exercise of stock options, and securities remaining available for issuance under our equity compensation plans that were in effect during fiscal 2022.

| Plan Category | Number of securities to be issued upon exercise of outstanding options, warrants and rights | Weighted average exercise price of outstanding options, warrants and rights | Number of securities remaining available for future issuance under equity compensation plans |
|--|---|---|--|
| Equity compensation plans approved by stockholders | 1,199,345 | \$ 50.46 | 1,387,697 |
| Equity compensation plans not approved by stockholders | — | — | — |
| Total | 1,199,345 | \$ 37.59 | 1,387,697 |

ITEM 13 Certain Relationships and Related Transactions, and Director Independence

We will include information regarding certain relationships and related transactions and director independence in the 2023 Proxy Statement and is incorporated herein by reference.

ITEM 14 Principal Accountant Fees and Services

Our independent registered public accounting firm is KPMG LLP, Kansas City, MO, Auditor Firm ID: 185.

Information regarding principal accountant fees and services will be included in the 2023 Proxy Statement and is incorporated herein by reference.

PART IV

EXHIBIT 31.1 Section 302 Certification

I, Sean M. O'Connor, certify that:

1. I have reviewed this Annual Report on Form 10-K of StoneX Group Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d - 15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

EXHIBIT 32.1 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

In connection with the Annual Report of StoneX Group Inc. (the Company) on Form 10-K for the period ended September 30, 2022 as filed with the Securities and Exchange Commission on the date hereof (the Report), I, Sean M. O'Connor, Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that to the best of my knowledge:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
